2008 IEEE International Symposium on Service-Oriented System Engineering

SOSE 2008

Table of Contents

Message from the Chairs
Symposium Organization
Program Committee

Session 1A: Service Modeling and Analysis I

A Generic Model of Enterprise Service-Oriented Architecture ......................................................... 1
  Longji Tang, Jing Dong, and Tu Peng

A Model-Driven Approach to Service Composition .............................................................................. 8
  Yuanzhi Wang and Kerry Taylor

A Framework for Analyzing Activity Time Data .................................................................................. 14
  Ahmad Ibrahim and Ho-Jin Choi

Composite Design Patterns to Integrate Available Services ................................................................. 19
  Dan Thu Tran and Thuy Bao Tran Huynh

Session 1B: Service Creation and Adaptation

A Black-Box Strategy to Migrate GUI-Based Legacy Systems to Web Services ........................................... 25
  Bo Zhang, Liang Bao, Rumin Zhou, Shengming Hu, and Ping Chen

A Web-Based Mashup Environment for On-the-Fly Service Composition .............................................. 32
  Qi Zhao, Gang Huang, Jiyu Huang, Xuanzhe Liu, and Hong Mei

The Multiview Service: A New Concept for the Development of Adaptable Service Oriented Systems ......................................................... 38
  Adil Kenzi, Bouchra El Asri, Mahmoud Nassar, and Abdelaziz Kriouile

Web Page’s Blocks Based Topical Crawler .............................................................................................. 44
  Weifeng Zhang, Baowen Xu, and Hong Lu
Session 1C: Service Delivery and Deployment

A Model and Design Methodology of Continuous Services over the Home Service Systems .................................................................50
  Mikio Aoyama
Service Request Interpretation Using Case-Based Reasoning .................................................................56
  Chiung-Hon Leon Lee, Alan Liu, and Yen-Ru Cheng
Improving End-User Programming with Situational Mashups in Web 2.0 Environment .........................................................62
  Angus F.M. Huang, Shin Bo Huang, Evan Y.F. Lee, and Stephen J.H. Yang
A Virtual Service Framework for Service Composition QoS Based on Active Measurement ......................................................68
  Ming-Feng Wu, T. Ming Jiang, and Abay Wu

Session 2A: Service Modeling and Analysis II

Modeling and Validating Service Choreography with Semantic Interfaces and Goals .................................................................73
  Shanshan Jiang, Jacqueline Floch, and Richard Sanders
Model-Checking of Web Services Choreography .................................................................................................79
  Hongli Yang, Xiangpeng Zhao, Chao Cai, and Zongyan Qiu
Refining Service-Oriented Model Using Interpretation Mapping .......................................................................................85
  Huaikou Miao, Xiaoxia Cao, and Zhongsheng Qian
A Representation Model for Reusable Assets to Support User Context ................................................................................91
  Hend Ben Hadji, Su-Kyoung Kim, and Ho-Jin Choi
A Formal Specification of Mondex Using SAM .................................................................................................97
  Reng Zeng, Jianling Liu, and Xudong He

Session 2B: Service Assembly, Composition, and Aggregation

Integrating Service Composition Flow with User Interactions .............................................................................................103
  Jonathan Lee, Ying-Yan Lin, Shang-Pin Ma, Yao-Chiang Wang, and Shin-Jie Lee
Improving Takuan to Analyze a Meta-Search Engine WS-BPEL Composition .........................................................109
  Manuel Palomo-Duarte, Antonio Garcia-Domínguez, and Inmaculada Medina-Bulo
Composing Highly Reliable Service-Oriented Applications Adaptively ..............................................................................115
  Wei-Tek Tsai, Jay Elston, and Yinong Chen
A Reliability Evaluation Framework on Composite Web Service ...............................................................................123
  Jiang Ma and Hao-peng Chen

Session 2C: Verification, Validation, and Testing of Service-Oriented Systems

Ontology for Service Oriented Testing of Web Services ......................................................................................129
  Yufeng Zhang and Hong Zhu
A WS-BPEL Based Structural Testing Approach for Web Service Compositions

Chien-Hung Liu, Shu-Ling Chen, and Xue-Yuan Li

Static Check of WS-CDL Documents

Lei Zhou, Hanyi Zhang, Tao Wang, Chuchao Yang, Zheng Wang, Meng Sun, and Geguang Pu

Precise Steps for Choreography Modeling for SOA Validation and Verification

Sebastian Wieczorek, Andreas Roth, Alin Ștefănescu, and Anis Charfi

Session 3A: Service Modeling and Analysis III

Formal Approach for the Development of Business Processes in Terms of Service-Oriented Architectures Using Pi-ADL

Flavio Oquendo

A Framework for Agent-Based Service-Oriented Modelling

Zhi Jin and Hong Zhu

Towards Scalable Statistical Service Selection

Lijun Mei, W.K. Chan, and T.H. Tse

Adaptive Multi-Dimension Web Service Development Approach

Lixin Zhou

Session 3B: Domain-Specific Service-Oriented Applications

A Gateway Design for Message Passing on the SOA Healthcare Platform

Chi-Lu Yang, Yeim-Kuan Chang, and Chih-Ping Chu

An Integrated Information System for Real Estate Agency Based on Service-Oriented Architecture

Li-Yu Lin and Chua-Huang Huang

A Service-Oriented Architecture Based Vendor Managed Inventory System

Hsiang-I Tseng and Chua-Huang Huang

A Newborn Screening System Based on Service-Oriented Architecture

Embedded Support Vector Machine

Sung-Huai Hsieh, Sheau-Ling Hsieh, Yin-Hsiu Chien, Zhenyu Wang, Yung-Ching Weng, and Feipei Lai

Session 3C: SaaS for Telecommunication

SALmon — A Service Modeling Language and Monitoring Engine

Viktor Leijon, Stefan Wallin, and Johan Ehnmark

A Service-Oriented Fault-Tolerant Environment for Telecom Operation

Support Systems

Ing-Yi Chen, Guo-Kai Ni, and Chau-Young Lin
A Study of Design and Implementation on SOA Governance: A Service-Oriented Monitoring and Alarming Perspective ......................................................... 215  
  Kuang-Yu Peng, Shao-Chen Lui, and Ming-Tsung Chen

SOA-Based Alarm Integration for Multi-Technology Network Fault Management ........................................................................................................ 221  
  Chung-Hua Hu and Shun-Hsing Hsu

Session 4A: Quality of Web Services

Service Quality in a Collective Urban Transportation System ....................................................................................................................... 227  
  R. Radharamanan, Jeng-Nan Juang, and C.J.A.K. Felix

WS-QoSOnto: A QoS Ontology for Web Services ............................................................................................................................................... 233  
  Vuong Xuan Tran

QoS Aspects in Web Services Compositions ................................................................................................................................................. 239  
  Farzad Mahdikhani, Mahmoud Reza Hashemi, and Marjan Sirjani

An Improving Fault Detection Mechanism in Service-Oriented Applications Based on Queuing Theory ................................................................. 245  
  Shuo Yang and Hao-peng Chen

Session 4B: Solution Frameworks for Building Service-Oriented Applications

SOAVM: A Service-Oriented Virtualization Management System with Automated Configuration ......................................................................................................................... 251  
  Zhili Cheng, Zhihui Du, Yinong Chen, and Xiaoying Wang

Analyzing Tag-Based Mashups with Fuzzy FCA ............................................................................................................................................... 257  
  Hsing Mei and Cheng-Yen CHou

The Honeycomb Theory of Web3.0 ......................................................................................................................................................... 263  
  Zhiyuan Fang, Lin Zhao, Meiyan Xiao, and Yu Zhou

Towards SOA-Based Code Defect Analysis ......................................................................................................................................................... 269  
  Qianxiang Wang, Na Meng, Zhiyi Zhou, Jinhui Li, and Hong Mei

Session 4C: Enterprise Service-Oriented Architecture

Business-Oriented Virtualization of Web Services — A Case Study ................................................................................................................................. 275  
  Yanbo Han, Peng Zhang, Wanghu Chen, Cheng Zhang, and Jing Wang

A Sustainable Service-Oriented B2C Framework for Small Businesses ................................................................................................................................. 281  
  Xiaodong Liu and Hailiang Ye

Performance Improvement for an SOA Based Enterprise Application Using Service Redirection ................................................................................................................................. 287  
  Jung-Sing Jwo and Yu Chin Cheng

A Business Application Form Triggered Service Model ............................................................................................................................................... 291  
  L.L. Liu
