Modular Modeling of Maneuvering Motions of an Underwater Glider ......................................................... 503
Forg-Chen Chiu, Ming-Feng Guo, Jenhwa Guo, Seung-Keon Lee

New Tools for Ocean Exploration, Equipping the NOAA Ship Okeanos Explorer ........................................ 511
Justin Manley

Oil Spill Contingency Planning using Laser Fluorosensors and Web-Based GIS .............................................. 516
M.N.Jha, Y.Gao

From Ocean Issues to Solutions: The Role of Public Ocean Literacy ............................................................ 524
Jerry Schubel, Kathryn Schubel

Towards Marine Geographic Information Systems: Multidimensional Representation of Fish aggregations and Their Spatiotemporal Evolutions ............................................................... 531
Valerie Carette, Mir Abolfazl Mostafavi, Rodolphe Devillers

Development of a Multi-AUV SLAM Testbed at the University of Michigan .................................................. 541
Hunter Brown, Ayoung Kim, Ryan Eustice

Climate Change, Offshore Wind Power, and the Coastal Zone Management Act ............................................. 547
Thomas Street

Classification of Sperm Whale Clicks and Triangulation for Real-Time Localization with SBL Arrays .............. 553
Ryo Hirotsu, Tamaki Ura, Junichi Kojima, Harumi Sugimatsu, Masao Sakata, Rajendar Bahl, Masao Yanagisawa

Overview of the R&D Program for an Environmental Impact Assessment of Methane Hydrate Exploitation in Japan ............................................................................................................. 560
Nao Arata, Shyunji Sukizaki, Yuji Awashima, Yo Okada, Eiji Ogisako

Convective Clouds Modelling and Tracking by an Airborne Radar .................................................................. 567
Clementine Costes, Rene Garello, Gregoire Mercier, Jean-Paul Artis, Nicolas Bon

Combined Energy Storage and Three-axis Attitude Control of a Gyroscopically Actuated AUV ......................... 572
Blair Thornton, Tamaki Ura, Yoshiaki Nose

Underwater Behavioral Study of Ganges River Dolphins by Using Echolocation Clicks Recorded by 6-hydrophone Array System ........................................................................................... 581
Harumi Sugimatsu, Tamaki Ura, Junichi Kojima, Rajendar Bahl, Sandeep Behera

Visual SLAM for Underwater Vehicles using Video Velocity Log and Natural Landmarks ............................. 588
Joaquim Salvi, Yvan Petillot, Stephen Thomas, Josep Aulinas

Research Activities by the Marine Environment Survey and Assessment Subgroup in the Research Consortium for Methane Hydrate Resources (MH21 project) in Japan ............................................. 594
Shinya Suzuki, Shunji Sukizaki, Yasufumi Ishihara, Itsuka Yabe, Kisaburo Nakata, Poojitha Yapa, Lalith Dasanayaka, Uditha Bandara

Scientific Guidelines for Conservation and Sustainable Usage Of Marine Biodiversity in Canada’s Ocean ................................................................................................................................. 598
Paul Snellgrove, Philippe Archambault, Kim Juniper, Peter Lawton, Anna Metaxas, Chris McKindsey, Pierre Pepin, David Schneider, Verena Tunnicliffe

Design and Analysis of Low Frequency Communication System in Persian Gulf ............................................. 606
Hossein Shahbazi, Ali Karimifard

Submerged Water Current Turbines .................................................................................................................... 613
Nahidul Khan, M.Tariq Iqbal, Michael Hinchey

Multiuser Underwater Communication with Space-Time Block Codes and Acoustic Vector Sensor ................. 619
Huaihui Guo, Ali Abdi
Acoustic - Microwave Water Level Sensor Comparisons in an Estuarine Environment ........................................... 625
   John Boon, John Brubaker

A Multi-Resolution Hidden Markov Model for Optimal Detection, Tracking, Separation and Classification of Marine Mammal Vocalizations ......................................................... 630
   Brian Harrison, Paul Baggenstoss

Methane Discharge from a Submarine Mud Volcano - a Multiple-method Approach................................. 639
   Eberhard Sauter

Basis Expansion Model for Underwater Acoustic Channels? ......................................................................... 643
   Fengzhong Qu, Liqiuang Yang

A Correlation Model for Vector Sensor Arrays in Underwater Communication Systems ............................ 650
   Ali Abdi, Huaihai Guo

Underwater Communication Goes Cognitive ............................................................................................... 662
   Yonggang Wang, Jiasheng Tang, Yue Pan, Li Huangfu

Joint Positioning and Navigation Aiding System for Underwater Robots ....................................................... 666
   Renato Sousa, Alex Penas, Paulo Oliveira, Reza Ghahcheleoo, Antonio Pascoal

Turbulence: Characteristics and Its Implications in Tidal Current Energy Device Testing........................... 674
   Oghenevwori Okorie, Alan Owen

Extraction Method of Scallop Area in Seabed Images for Fishery Resources Investigation ....................... 680
   Masashi Toda, Koichiro Enomoto, Yasuhiro Kawaihara, Masaaki Wada, Katsumori Hatanaka

A Networked/Autonomous Receiving Array System .................................................................................... 685
   Jeffrey Skinner, William Hodgkiss

The Trondheim Harbour: Acoustic Propagation Measurements and Communication Capacity ...................... 691
   Knut Grythe, Jan Hakegaard, Tor Reinen, Tor Myrvoll

Automated Data Quality Assurance for Marine Observations ...................................................................... 700
   James Koziana, John Olson, Troy Anselmo, Weiwei Lu

Design and Operation of a Multi Node Cabled Observatory ....................................................................... 706
   Adrian Woodroffe, Adrian Round

Power Delivery to Subsea Cabled Observatories ......................................................................................... 711
   Adrian Woodroffe, Michael Wrinch, Steve Pridie

A Quantitative Assessment of the Thermal Properties of Diving Garments When Using Argon As a Suit Inflation Gas ................................................................. 717
   Marshall Nuckols, Joseph Giblo, Jody Wood-Putnam

Ams Ocean Studies: a Dynamic, Introductory College-level Oceanography Course Emphasizing Real-world Data and Investigations ................................................................. 724
   James Brey, Ira Geer, Joseph Moran, Robert Weinbeck, Elizabeth Mills, Bernard Blair, Thomas Kiley, Edvard Hopkins

Reconstruction and Fusion of Perceptual Features for Automatic Classification of Sonar Echoes .................... 729
   Vincent Myers, John Fawcett, Paul Hines, Victor Young

Interpolation Methods for Vertical Linear Array Element Localization ......................................................... 736
   Tarun Chandrayadula, Kathleen Wage

Synthetic Virtual Array Processing of GPS Sonobuoys for Underwater Target Tracking .......................... 741
   Abdalla Osman, Aboelmagd Noureldin, Jim Theriault, Garfield Mellema, D.J.S Campbell

The Use of HMPE Mooring Lines in Deepwater MODU Mooring Systems .............................................. 748
   Robert Garrity, Bill Fronzaglia
Demonstration of the Hybrid Remotely Operated Vehicle (HROV) Light Fiber Tether System ................................................................. 752
  Barbara Fletcher, Chris Young, James Buescher, Andrew Bowen, Robert McCabe, Dana Yoerger, Louis Whitcomb

The Technical Challenges of Designing Oil and Gas Pipelines in the Arctic ................................................................. 758
  Basel Abdalla, Paul Jukes, Ayman Eltaher, Billy Duron

Development of a Coordinated Controller for Underwater Vehicle-Manipulator Systems .............................................. 769
  Serdar Soylu, Bradley Buckham, Ronald Podhorodeski

Robust Search for Structured Object Placement Using Unmanned Vehicles ................................................................. 778
  John Baylog, Thomas Wettergren, John Hyland, Cheryl Smith

Absorption Properties in Shoal dominated regions of the Atchafalaya Shelf, Louisiana, USA ............................................................. 788
  Puneeta Naik, Eurico D’Sa

Tethered and Untethered Vehicles: The Future is in the Past ................................................................. 794
  James McFarlane

A Study of Channel Capacity for a Seabed Underwater Acoustic Sensor Network ................................................................. 798
  Peter King, Ramachandran Venkatesan, Cheng Li

Fault Point Localization of Power Feeding Lines in Optical Submarine Cables ................................................................. 803
  Junichi Kojima, Shigetaka Matsumoto, Kenichi Asakawa

Study on key technologies of Construction of Marine Geomagnetic Filed Model Based on Polynomial Method ......................................................... 807
  Shengping Wang, Jianhu Zhao, Yongting Wu

US Naval Facilities Engineering Service Center Environmental Program on Climate Change ................................................................. 812
  Kathleen Paulson, Dallas Meggitt

Understanding the Impact of Surface Waves on Microwave Water Level Measurements ................................................................. 818
  Robert Heitsenrether, Mark Bushnell, Kate Derner, John Boon, Warren Krug

Attitude Estimation from Noisy Sonar Images ................................................................. 826
  Hisashi Shiba

On the Need, Development and Operation of Joint Use Commercial-Scientific Ocean Observing Systems ................................................................. 832
  Andrew Clark, Donna Kocak

A Demonstration of Absorption Controlled Isolation for Underwater Networks ................................................................. 839
  Craig Benson, Michael Ryan, Michael Frater, Robin Dunbar

Benthic Habitat Mapping with Autonomous Underwater Vehicles ................................................................. 843
  Andrew Davie, Klaas Hartmann, Gregory Timms, Martin de Groot, John McCulloch

A Power Assignment Mechanism for Underwater Wireless Multimedia ................................................................. 852
  Lin Chin-Feng, Shun-Hsyung Chang

Analysis of Underwater Acoustic and Electric Noise in the Port of Gothenburg ................................................................. 855
  Stefan Petrovic, Eva Dalberg, Ron Lennartsson, Leif Persson

Marine Mineral Tailings Use in Anticorrosive Coatings ................................................................. 860
  Zhimin Bai, Zhihui Wen, John Wiltshire

Study on Building Local Marine Geomagnetic Field Model Based on Interpolation Method ................................................................. 869
  Jianhu Zhao, Hui Liu, Juanjuan Li
Semantic Knowledge-based Representation for Improving Situation Awareness in Service-Oriented Agents of Autonomous Underwater Vehicles ................................................................. Pedro Patrón, Emilio Miguelañez, Joel Cartwright, Yvan Petillot

Foz do Arelho Outfall Plume Predictive Study ................................................................................................................................. Patricia Ramos, Sandra Carvalho

Asymptotic Diving Control Method for Torpedo-type Underactuated AUVs .................................................................................. Ji-Hong Li, Pan-Mook Lee

Fast Phytoplankton Classification from Emission Fluorescence Spectra Based on Self-organizing Maps .................................................. Ismael Aymerich, Jaume Piera, Aureli Soria-Frisch

Source Localization on a Single Hydrophone ................................................................................................................................. Grégoire Le Touzé, Josep Torras, Barbara Nicolas, Jérôme Mars

Acoustic Channel Characterization in the Baltic Sea and in the North Sea ............................................................................................ Henry Dol, Frank Gerdes, Paul Van Walree, Wolfgang Jans, Steffen Kuenzel

DFR: Directional Flooding-Based Routing Protocol for Underwater Sensor Networks ................................................................. Daeyoup Hwang, Dongkyun Kim

Video Data Management System Archives and Provides Online Access to the NOAA Ocean Exploration Digital Video and Image Data on Deep Corals .................................................................................. Anna Fiolek, Donald Collins

Automatic Fish School Classification for Acoustic Sensing of Marine Ecosystem .............................................................................. Riwal Lefort, Ronan Fablet, Jean Marc Boucher, Laurent Berger, Sebastien Bourguignon

Development of Japanese Scientific Cable Technology ......................................................................................................................... Hitoshi Mikada, Kenichi Asakawa

SINS Initial Alignment Method Using Robust Filtering for Towed Ocean Bottom Magnetometer ........................................................................... Xue Zhang, De Huang, Jing Liu

Deep Sea Unrepeatered Video Transmission System over 10 km Coaxial Tow Cable based on SHDSL ........................................................................ Hai Yu, Jingbiao Liu, Wenyu Cai

Maritime Radar Simulator based on DSP Board using Switched Slide Window Tracking Algorithm ........................................................................ Jinho Bae, Jeong Hee Han, Mano Andrews, Chong Hyun Lee, Hyoung-Goo Jeon

Progress in Developing a Device for Measuring Heat Flux from the Hydrothermal Vent in Deep Ocean using Acoustic Method .................................................................................................................. Huachen Pan, Ying Chen, Jie Mao, Wei Fan, Yiwen Pan, Youfeng Wu, Minzhong Wu

Range-resolving Shallow Water Acoustic Tomography by Ensemble Kalman Filtering ........................................................................... Olivier Carrière, Jean-Pierre Hermand, James Candy

Methodology for Modelling Tidal Turbine Characteristics ...................................................................................................................... Emma Robinson, Gerald Byrne

Towed Ocean Bottom Magnetometer to Measure Geomagnetic Vector Based on AMR Sensor and SINS ........................................................................ Xue-ting Zhang, Jing-biao Liu, Ying Chen, De-nv Huang

Visitor Interactions with 3-D Visualizations on a Spherical Display at a Science Museum ........................................................................ Celeste Barthel, Shawn Rowe
Large-Scale Experiments of a Marine Riser ................................................................. 1108
   David Murrin, Sue Molloy, Wei Qiu, Neil Bose, Martin Ordzone

Design of Self-Localization Strategies for Networks of Underwater Drifters .................. 1114
   Diba Mirza, Curt Schurgers

Time-Constrained Optimization of Multi-AUV Cooperative Mine Detection .................. 1122
   Ryan Prins, Mahmut Kandemir

Shallow Water Height Mapping with Interferometric Synthetic Aperture Sonar ................. 1135
   Sergio Silva, Sergio Cunha, Anibal Matos, Nuno Cruz

Bathymetric Data Fusion: PCA based Interpolation and Regularization, Sea Tests, and Implementation ................................................................. 1142
   Luis Gomes, Paulo Oliveira

An Algebraic Approach to Synthetic Aperture Sonar Image Reconstruction .................. 1150
   Sergio Silva, Sergio Cunha, Anibal Matos, Nuno Cruz

Adaptive Mission Plan Diagnosis and Repair for Fault Recovery in Autonomous Underwater Vehicles ................................................................. 1157
   Pedro Patrón, Emilio Miguelañez, Yvan Peitillot, David Lane, Joaquim Salvi

Sub-band Processing of Synthetic Aperture Sonar Data ............................................... 1166
   Sergio Silva, Sergio Cunha, Anibal Matos, Nuno Cruz

Diffuse High Bandwidth Optical Communications .................................................... 1174
   Clifford Pontbriand, Norman Farr, Jonathan Ware, Jim Preisig, Hugh Popenoe

High Spatial Resolution Mapping of Water Quality and Bathymetry with a Person-deployable, Low Cost Autonomous Underwater Vehicle ........................................... 1178
   Robert Ellison, Daryl Slocum

Morphing Hull Concepts for Unmanned Underwater Vehicles .................................... 1185
   Russell Rufino, Timothy Miller, Farhan Gandhi

   Nuno Santos, Anibal Matos, Nuno Cruz

Improvement and Sea Test of Autonomous Underwater Vehicle "URASHIMA" for Practical use ........................................................................................................... 1201
   Junya Ishiwata, Satoshi Tsukoioka, Tadahiro Hyakudome, Takao Sawa, Hidehiko Nakajo, Yoshinobu Nanbu, Kojiro Watanabe, Akihisa Ishikawa

A Bistatic HF Radar for Current Mapping and Robust Ship Tracking .......................... 1206
   Dennis Trizna

A Coherent Marine Radar for Decametric-Scale Current Mapping and Direct Measurement of Directional Ocean Wave Spectra .............................................. 1212
   Dennis Trizna

Field Directionality Synthesis from Multiple Array Orientations: A Least Squares Approach ............................................................................................................. 1218
   Granger Hickman, Haitian Tao, Jeffrey Krolik

3-D Motion and Structure Estimation for Arbitrary Scenes from 2-D Optical and Sonar Video ................................................................................................................. 1224
   Shahriar Negahdarpour, Ali Taatian

Unmanned Surface Vehicles for Undergraduate Engineering Education .................. 1232
   Joseph Holler, Andrea Striz, Stephen Longfield, Katherine Murphy, Brian Bingham

Payload Sensors, Navigation and Risk Reduction for AUV Under Ice Surveys .............. 1240
   Bjorn Jalving, Karstein Vestgård, Jan Erik Faugstadmo, Øyvind Hegrenes, Øystein Engelhardtson, Brendan Hyland
Search Performance Prediction for Multistatic Sensor Fields ................................................................. 1247
  Michael Walsh, Thomas Wettergren

Improved Torpedo Range Estimation Using Modified Fast Orthogonal Search Techniques .............. 1255
  Vincent Dagenais, Donald McLaughey, Sean Pecknold

Low Power Control Systems for Microbial Fuel Cell Batteries .............................................................. 1262
  Robert Tyce, Kenneth Critz, Jeffrey Book, Leonard Tender

NOAA'S Integrated Observations and Data Management Tools .............................................................. 1269
  Martin Yapur, Eric Miller

An Underwater Optical Communication System Implementing Reed-Solomon Channel Coding .............................. 1275
  William Cox, Jim Simpson, Carlo Domizioli, John Math, Brian Hughes

The Nereus Hybrid Underwater Robotic Vehicle for Global Ocean Science Operations to 11,000m Depth ................................................................................................................................. 1281
  Louis Whitcomb, Andrew Bowen, Dana Yoerger, Chris Taylor, Robert McCabe, Jonathan Howland, Daniel Gomez-Ibanez, James Kinsey, Matthew Heintz, Glenn McDonald, Donald Peters, Barbara Fletcher, Chris Young, James Buescher, Louis Whitcomb, Stephen Martin, Sarah Webster, Michael Jakuba

Design, Installation, and Operation of the PLUTO Observatory, Isla de Canales de Tierra, Panama .............. 1291
  Scott Gallager, Steve Lerner, Amber York, Emily Miller, Andy Girard

Investigation of Autonomous Docking Strategies for Robotic Operation on Intervention Panels ................................................................................................................................................................................................. 1301
  Szymon Krupinski, Francesco Maurelli, Gabriel Grenon, Yvan Petillot

Modelling the Hydrodynamic Sway Force Exerted on the Bare-Hull of an Axisymmetric Underwater Vehicle in Lateral Acceleration Manoeuvres ................................................................................................................................................................. 1311
  Farhood Azarsina, Christopher Williams

Measurement-Based Estimates of Extreme Wave Conditions for the Gulf of Mexico .......................... 1320
  Chankwon Jeong, Vijay G. Panchang

Underwater Acoustic Technology: Review of Some Recent Developments .............................................. 1327
  Kenneth Foote

The MODENA Project: Modeling and Simulation of the Maritime Environment Remotely Sensed by Radar ................................................................................................................................................................................................. 1333
  René Garello

Real Time Observation of the Thermal Bar and Spring Stratification of Lake Michigan with the GLUCOS Coastal Observatory ................................................................................................................................................................................................. 1338
  Thomas Cowie, Geoff Anderson, Greg Barske, Harvey Bootsma, Thomas Hansen, John Janssen, Val Klump, Robert Paddock, Donald Szmania, Korey Verhein, James Waples

Using a Towed Optical Habitat Mapping System to Monitor the Invasive Tunicate Species Didemnum sp. Along the Northeast Continental Shelf ................................................................................................................................................................................................. 1347
  Amber York, Scott Gallager, Richard Taylor, Norman Vine, Steve Lerner

Current and Future Directions in Ocean Education at the Consortium for Ocean Leadership .............. 1356
  Susan Cook, Leslie Peart

Guidance and Control of an ASV in AUV Tracking Operations ..................................................................... 1359
  José Melo, Aníbal Matos

Wave Forecasting in Prince William Sound (Alaska) ..................................................................................... 1366
  Gaurav Singhal, Vijay Panchang
Toward High-Spatial Resolution Gravity Surveying of the Mid-Ocean Ridges with Autonomous Underwater Vehicles
James Kinsey, Maurice Tivey, Dana Yoerger

Removing Ping Timing Ambiguity via Data Association
Vishal Ravindra, Marco Guerrero, Peter Willett, Stefano Corraluppi, Shengli Zhou

The NOAA IOOS Data Integration Framework: Initial Implementation Report
Jeff de La Beaujardière

Advances in High Brightness Light Emitting Diodes in Underwater Applications
Kevin Hardy, Mark Olsson, John Sanderson, Peter Weber, Peter Weber, Jon Simmons

Comparison of Acoustic Measurements of Zooplankton Populations using an Acoustic Water Column Profiler and an ADCP
David Lemon, David Billenness, Jan Buermans

Winter Pulses of Pacific-origin Water and Resuspension Events Along the Canadian Beaufort Slope Revealed by a Bottom-moored Observatory
Alexandre Forest, Makoto Sampei, Marie-Emmanuelle Rail, Yves Gratton, Louis Fortier

Underwater Acoustic Single- and Multi-User Differential Frequency Hopping Communications
Dianne Egnor, Luca Cazzanti, Julia Hsieh, Geoffrey Edelson

Analysis of Secondary Source Levels of a Parametric Array Transducer
Mano Andrews, Jeong Han, Bae Ho, Chong Lee

Applications of AUVs with SAS
Per Espen Hagen, Terje Fossum, Roy Hansen

A Particle Filter Approach for AUV Localization
Francesco Maurelli, Szymon Krupinski, Yvan Petitot, Joaquim Salvi

Preliminary Results in Experimental Identification of 3-DOF Coupled Dynamical Plant for Underwater Vehicles
Stephen Martin, Louis Whitcomb

Fast Marching and Acoustic Descriptors Based Method for Fish Proportion Interpolation
Imen Karoui, Ronan Fablet, Jean-Marc Boucher

High-Performance Visualizations and Simulations for Ocean Environments and the Mine Countermeasure Mission Using C3L
John Sustersic, Mahmut Kandemir, Shashi Phoha, Mendel Schmiedekamp

Designing and Implementing a System of Multiplexing and Demultiplexing on FPGA using MATLAB/Simulink for the Detection of Acoustic Signals
Mohamed Abdillahi-Said, Chan Wang Park

Correcting and Validating Moored Oxygen Time-Series Observations
James Irish, Larry Ward, Stanley Boduch

Connect or Terminate: How CONOPS Drives Design of Subsea Network Systems
Michael Slater, Jennifer Snyder

Bundle Adjustment for 3-D Motion and Structure Estimation from 2-D Optical and Sonar Views
Shahriar Negahdaripour, Ali Taatian

Analytical Techniques for the Calculation of Leeway as a Basis for Search and Rescue Planning
John Morris, Vladimir Osychny, A. Turner
