2008 International Conference on Innovations in Information Technology (IIT)

Al Ain, United Arab Emirates
16-18 December 2008
TABLE OF CONTENTS

A Domain-Driven Approach for Enterprise Development, using BPM, MDA, SOA and Web Services ............................................................................................................................... 1
  Fabio Perez Marzullo, Jano Moreira de Souza, Geraldo Bonorino Xexéo

Innovation Approach to Cognitive Medical Image Interpretation ............................................................................................................................... 6
  Lidia Ogiela

DRP-DRP: Data Replication Protocol for Disaster Recovery Planning ............................................................................................................................... 11
  Hanan S. Al-Ghamdi, Arwa Y. Al-Aama

Security Risk Analysis for Asset in relation to Vulnerability, Probability of Threats and Attacks ............................................................................................................................... 16
  Ghassan Kbar

General and Invariant Image Retrieval from Visual Databases Based on Multiple Search Strategies ............................................................................................................................... 21
  Noureddine Abbadeni

Blind Channel Identification for OFDM-based SIMO Systems ............................................................................................................................... 26
  Faisal O. Alayyan, Raed M. Shubair, Yee Hong Leung, Abdelhak M. Zoubir, Omar Alketbi

Auto-Summarization-Based Steganography ............................................................................................................................... 31
  Abdelrahman Desoky, Mohamed Younis, Hesham El-Sayed

Multiple Perspectives Criteria of Open Source Software Appropriation: A Case Study of a City Council ............................................................................................................................... 36
  Nor Zairah Ab. Rahim, Rose Alinda Alias, Jennie Carroll

An Efficient Network Security System through an Ontology Approach ............................................................................................................................... 41
  A.H.Azni, Madihah Mohd Saud, Azreen Azman, Emran Mohd Tamil, Mohd Yamani Idna Idris

Secure Password Detection with Artificial Neural Networks ............................................................................................................................... 46
  Fadi N. Sibai, Aaesha Shehhi, Sheikha Shehhi, Buthaina Shehhi, Najlaa Salami

Multi-dimensional Particle Swarm Optimization for Dynamic Environments ............................................................................................................................... 51
  Serkan Kiranyaz, Jenni Pulkkinen, Moncef Gabbouj

Police Operational Planning and Crime Detection through Adopting an Information Systems Approach ............................................................................................................................... 56
  Peter Kinloch, Hulya Francis, Michael Francis, Mark Taylor

On the Use of Wireless Sensor Networks to Cope with Partitions in Mobile Ad-Hoc Networks ............................................................................................................................... 61
  Anwar Al Hamra, Matija Puzar

Performance Evaluation of the IEEE 802.11e EDCA Access Method ............................................................................................................................... 66
  Amal A. Alhamadi, Mohamed A. Madkour

Using Singular Value Decomposition (SVD) As a Solution for Search Result Clustering ............................................................................................................................... 71
  Hussam Dahwa Abdulla, Vaclav Snasel

Web Retrieval Improvement: Using Pattern Detection ............................................................................................................................... 76
  Milos Kudelka, Vaclav Snasel, Ondrej Lehecka, Hussam Abdulla, Saleh Alwahaishi

Classification and Identification of Stocks using SOM and Genetic Algorithm based Backpropagation Neural Network ............................................................................................................................... 81
  Asif Ullah Khan, T. K. Bandopadhyaya, Sudhir Sharma

A Privacy Preserving Clustering Technique Using Haar Wavelet Transform and Scaling Data Perturbation .................................................................183
Sara Hajian, Mohamad Abdollahi Azgomi

An Efficient and Secure Buyer-Seller Networking Protocol for Anonymous Digital Transaction .................................................................188
Vinu V Das, Nessy Thankachan

Efficient Range Queries in Spatial Peer-to-Peer Networks ...............................................................................................................................193
Ahmed Mustafa, Zaher Al Aghbari, Ibrahim Kamel

Uplink Scheduling Mechanism for MPEG Encoded Video in IEEE 802.16 MAN .................................................................198
Subodh Pudasaini, Anup Thapa, Moonsoo Kang, Seokjoo Shin

Towards a Semantic Composition of ebXML Business Processes ....................................................................................................................203
Ouassila Hioual, Zizette Boufaida

A Probing Technique for Discovering Last-Matching Rules of a Network Firewall .................................................................208
K. Salah, K. Sattar, M. Sqalli, Ehab Al-Shaer

Experimental Performance Evaluation of a Hybrid Packet Reception Scheme for Linux Networking Subsystem .........................................................213
K. Salah, A. Qahtan

A Markov Model for Multi-Criteria Multi-Person Decision Making ..................................................................................................................218
René Chelvier, Kristina Dammasch, Graham Horton, Stefan-Werner Knoll, Claudia Krull, Benjamin Rauch-Gebbensleben

Examining Visual Attention of Dyslexics on Web Navigation Structures with Eye Tracking .................................................................223
Areej Al-Wabil, Panayiotis Zaphiris, Stephanie Wilson

Trust-Privacy Tradeoffs in Distributed Systems ...............................................................................................................................................228
Rima Deghaili, Ali Chehab, Ayman Kayssi

RFID Security Protocols ..................................................................................................................................................................................233
Hoda Daou, Ayman Kayssi, Ali Chehab

Energy Optimization in Mobile TV Broadcast Networks .................................................................................................................................238
Mohamed Hefeeda, Cheng-Hsin Hsu

Two Fast Handover Solutions for the IMS Handover in the Presence of Mobile IPv6 by using Context Transfer Procedures ..................................................................................................................243
Reza Farahbakhsh, Naser Movahhedinia

Exploring the Factors of Online Engagement in the Era of Web 2.0: An Experimental Approach ..................................................................................................................248
Hend S. Al-Khalifa

The Effect of Using Domain Specific Ontologies in Query Expansion in Medical Field ..................................................................................................................252
Vahid Jalali, Mohammad Reza Matash Borujerdi

Securing Open Access Networks Using Intelligent Policy Management System ..................................................................................................................257
H. Chamas, H. Omar, M. Kermani, K. Shuaib

Efficient Placement of Sensors for Detection against Distributed Denial of Service Attack ..................................................................................................................................262
Muhammad Hasan Islam, Kamran Nadeem, Shoab A Khan

Developing Message-Based Trust Model for Web Applications ..................................................................................................................267
Mohammad B. Sharifnia, Azadeh Iranmehr, Mahmood Doroodchi

New Paradigm in Evaluating Usability of E-learning System .................................................................................................................................272
N. Nikmehr, M. Doroodchi

Power Efficient Switches with Dynamic Virtual Channel Allocation for Network-on-Chips ..................................................................................................................................277

</table>
Web 2.0 Applications – An Approach to Testing .................................................................381
G.S.Chakravarthy, Rajesh R. Barde

A Method of Extracting Word Tendencies to Understand Popular Subjects .....................385
Kazuhiro Morita, Yuuya Iwabu, El-Sayed Atlam, Masao Fuketa, Jun-ichi Aoe

Usage of Real-world Robotics in Semantic Web .................................................................390
David Obdrzalek

Fine Grained Access Rights Definition in a Three Tiered Information System .....................395
David Bednárek, Jakub Yaghob, Filip Zavoral

Semantic Interoperability of Dublin Core Metadata in Digital Repositories .......................400
Dimitrios A. Koutsomitropoulos, Georgia D. Solomon, Theodore S. Papatheodorou

Biologically Inspired Architecture for Securing Hybrid Mobile Ad hoc Networks ..............405
Yasir Abdelgadir Mohamed, Azween B. Abdullah

On Energy Efficient Routing for Wireless Sensor Networks .............................................410
Jamal N. Al-Karaki, Islam T. Al-Malkawi

Electronic Government in the Emirate of Dubai in the United Arab Emirates ...................415
Nabeel A. Al-Qirim

Hermitian and Skew-Hermitian Splitting Methods for Streamline Upwind Petrov-Galerkin Approximations of a Grid-Aligned Flow .........................................................420
Mohammad Sameer Sunhaloo, Jeetendre Narsoo, Ashvin Gopaul, Muddun Bhuruth

Efficient PAPR for OFDM and CI/OFDM Systems with Iterative Clipping ......................425
Tomohiro Noguchi, Khoirul Anwar, Masato Saito, Minoru Okada

An Extensible Model for Improving the Privacy of Web Services .....................................429
Mona Tavakolan, Maryam Zarreh, Mohammad Abdollahi Azgomi

Generation of Arabic Phonetic Dictionaries for Speech Recognition ...............................434
Mohamed Ali, Moustafa Elshafei, Mansour Al-Ghamdi, Husni Al-Mahtaseb, Atef Al-Najjar

Complexity-Reduced Decoding Algorithm for Unmodulated Parallel-Combinatory High-Compaction Multicarrier Modulation Signals .................................................439
Ryuji Hayashi, Masanori Hamamura

Protein Crystallization Prediction with a Combined Feature Set ........................................444
Hui-Huang Hsu, Shiang-Ming Wang

An Interactive System for Extracting Arabic Lexicon from Arabic Newspaper Text ..........449
Mohamed Ben Halima, Adel M. Alimi

Digital Image Watermarking using Edge Detection and Wavelets with Robustness Analysis against JPEG Compression Attacks .........................................................454
V. Senthil, R. Bhaskaran

Small World Wireless Mesh Networks ........................................................................459
Nabil Afifi, Kah-Seng Chung

Impact of Physical Propagation Environment on Ad Hoc Network Routing Protocols ..........464
Nuraj Pradhan, Tarek Saadawi

NABU: A Macedonian Web Search Portal ........................................................................469
Igor Janevski, Kristijan Takasmanov, Jovan Pehcevski

Visual Feedback for Design-Space Exploration with UML MARTE ................................474
Andreas W. Liehr, Klaus J. Buchenrieder, Ulrich Nageldinger

Use of Ontologies for Bridging Semantic Gaps in Distant Communication .......................479
Nilar Aye, Funmi Hattori, Kazuhiro Kiwabara
Fast String Matching with Space-efficient Word Graphs ................................................................. 484
Susumu Yata, Kazuhiro Morita, Masao Fuketa, Jun-ichi Aoe

Pico Sensors for All Seasons — When Light Performs Its Marvels .................................................. 489
Roxana-Mariana Beiu, Valeriu Beiu

Microbial Drug Target Identification using Different Computational Approaches: Specific
Application to Pseudomonas Aeruginosa .......................................................................................... 494
Deepak Perumal, Chu Sing Lim, Meena K. Sakharkar

Inner Distance Based Hand Gesture Recognition for Devices Control ............................................. 499
Nasibeh Alijanpour, Hossein Ebrahimnezhad, Afshin Ebrahimi

Organizational Challenges of the Semantic Web in Digital Libraries ............................................. 504
Bendik Bygstad, Gheorghita Ghinea, Geir-Tore Klaebo

Performance Evaluation of Simple Fingerprint Minutiae Extraction Algorithm Using
Crossing Number on Valley Structure ............................................................................................... 509
Sunny Arief Sudiro, Michel Paindavoine, Rudi Trisno Yuwono, Lussiana Etp

Reconstruction of Normalized XML Documents ................................................................................. 514
Martin Necasky

Boosting Throughput of Snort NIDS Under Linux ........................................................................... 519
K. Salah, A. Qahtan

Designing an MPSoC Architecture with Run-time and Evolvable Task Decomposition and
Scheduling: A Neural Network Case Study ....................................................................................... 524
Shervin Vakili, S. Mehdi Fakhraie, Siamak Mohammadi

A Bayesian Based EDA Tool for Accurate VLSI Reliability Evaluations ........................................ 529
Walid Ibrahim, Azam Beg, Hoda Amer

Bandwidth Management in Mobile Wireless Cellular Networks in Heavy Load Conditions
– Time Slot Division Method .............................................................................................................. 534
Khaja Kamaluddin, Mohammed Sharif, Abid Almaini

Agent-Based Modeling Using Swarm Intelligence in Geographical Information Systems ................ 539
Rawan Ghnemat, Cyrille Bertelle, Gerard H.E. Duchamp

A Fast Token Based Algorithm for Multiple Resources Sharing in Distributed Systems ............... 544
Tahar Alloui, Mohamed Yagoubi, Mohamed Djoudi, Youcef Ouinten

A Study on Management of Software Engineering in Japanese Enterprise IT Industry ..................... 549
Yasuo Kadono, Hiroe Tsubaki, Seishiro Tsuruho

Online and Offline Test Unification in Digital Filters ........................................................................ 554
R. Yousefi, M. H. Sargolzaie, S. M. Fakhraie

Goal support towards Business Processes Modelling ......................................................................... 559
Ananda Edirisuriya, Jelena Zdravkovic

Frequency Domain Concurrent Error Detection in DSP Systems ..................................................... 564
R. Yousefi, S. M. Fakhraie

Simulative Study of Error Propagation in Target Tracking Based on Time
Synchronization Error in Wireless Sensor Networks ........................................................................... 569
Saeid Pashazadeh, Mohsen Sharifi

Image Adaptive Semi-fragile Watermarking Scheme Based on RDWT-SVD ................................... 574
Hossein Kourkchi, Shahrokh Ghaemmaghami

CAPSC: A Context-Aware Payment System for Supply-Chains ....................................................... 579
Maryam Bayat, Mehdi Shajari
Effect of Online Discussion Forums to Improve Mathematics Problem Solving and Critical Thinking – A Comparative Study .................................................................584
Seibu Mary Jacob, Hong Kian Sam

Policy Driven Context-Aware Services in Mobile Environments ........................................................589
Y. Al Ridhawi, H. Harroud, A. Karmouch, N. Agoulmine

Ali-Asghar Salehpour, Babak Mirmobin, Ali Arefal-Kia, Siamak Mohammadi

Interference Measurements by Power Line Communications over HF Aeronautical Systems .................................................................599
C. P. Colvero, V. R. D. Carneiro, B. F. Cunha, P. V. Gonzalez Castellanos

Performance of Fully Software and Hardware Accelerated XML Processing and Securing .........................604
Tomáš Knap, Irena Mlynková, Martin Necaský

A Wireless Healthcare Monitoring Platform ..................................................................................609
A. Sagahyroon, H. Rady, A. Ghazy, U. Saleman

New Support Vector Machine-based Approach over DNA Chip Data .................................................613
Ana Madevska-Bogdanova, Nevena Ackovska

Adaptation of the MCDS Broadcasting Protocol to VANET Safety Applications ................................617
L. Oulad Djedid, N. Lagraa, M. Yagoubi, K. Tahari

Capacity Analysis and Power Allocation of MIMO-OFDM System With Statistical Eigen-Beamforming .................................................................622
Hamed Maleki, Said Nader-Esfahani

A New Lecture support Based on On-line Arabic Handwriting Recognition .......................................627
Monji Kherallah, Adel M. Alimi

Overlay Multicast Tree Configuration Protocol with Bandwidth Reservation ........................................632
Hirokazu Ohata, Hiroaki Higaki

Wireless Multihop Communication in Sparse Vehicle Ad-Hoc Networks ........................................637
Hiroaki Oka, Hiroaki Higaki

Multiple Statistical Validations for Sensor Networks Optimization .................................................642
Davood Shamsi, Mehrdad Majzoobi, Farinaz Koushanfar, Negar Kiyavash

Hop-by-Hop or Longer Hops: The Energy Perspective ........................................................................646
Farinaz Koushanfar, Negar Kiyavash

Development of Intelligent User Behavior Based Adaptive Rule Based System .................................651
Shruti Kohli, Ela Kumar, B. P. Joshi

Smartphone, PDA and Mobile Embedded Device Clients of Biotelemetric System for Monitoring of Life Functions .................................................................656
Ondrej Krejcar, Jindrich Cernohorsky, Petr Fojcik, Dalibor Janckulik, Jan Martinovic

Energy-Aware Distributed Algorithm for Virtual Backbone in Wireless ..............................................661
H. Raei, M. Sarram, B. Salimi, F. Adibiya

Data Prebuffering using SQL CE Database on Real Time Operation System Windows Mobile 6.0 .................................................................................................666
Ondrej Krejcar, Jindrich Cernohorsky

A Web Services based Framework for Uniform Integration of Command-line Bioinformatics Software Tools ..................................................................................671
Elarbi Badali, Larbi Esmahi, M. Adel Serhani, Salah Bouktif
Data Stream Management System: Tools for Live Stream Handling & their application on trivial Network Analysis Problems ................................................................. 676
Nadeem Akhtar, Mohammed A Qadeer, Faraz Khan, Faridul Haque

A User Friendly Password Authenticated Key Agreement for Web Based Services ........................................ 681
Mohammed Misbahuddin, P. Premchand, A. Govardhan

Analysis and Its solution on Security Threats in SIP-based Mobility Support Environments ......................................................... 686
Je-A-Tek Ryu, Byeong-hee Roh, Man-Pyo Hong, Hwan-Kuk Kim, Jeong-Wook Kim

Implementation of Pseudo PWM Pulse to Adjust Brightness of LEDs in Video Displays ........................ 691
MohamadHadi Karamiata, Hosein Zarini Farahmand, Mohsen Orooji, Mahboobeh Movafagh

CDMA versus IDMA for Subscriber Cell Density ................................................................. 694
Asma Basharat, Imtiaz Ahmad Khokhar, Saeed Murtaza

Iris Recognition Using Rotational Complex Wavelet Filters: A Novel Approach ........................................ 699
Rajesh M. Bodade, Sanjay N. Talbar, Shailendra K. Ojha

Global Index for QoS in Wireless Networks ........................................................................ 704
M. Boulmalf, T. Aouam, A. Lakas

Parallel Detection of Nucleic Acids Using an Electronic Chip .......................................................... 709
Leyla Soleymani, Zhichao Fang, Shana O. Kelley, Edward H. Sargent

Design, Implementation, and Evaluation of TAILOR (Intelligent Handoff Decision Model for Heterogeneous Networks) ........................................... 713
Farhan Siddiqui, Sherali Zeadally, Hesham El-sayed, Naveen Chilamkurti

Research Review on the Biological Effect of Cell Phone Radiation on Human ........................................ 718
