Proceedings

International Conference on Information, Process, and Knowledge Management

eKNOW 2009

1-7 February 2009
Cancun, Mexico
Table of Contents

Preface
Committees

eKNOW 1: Process Analysis & Modeling
A Model for Enhancing Knowledge Creation, Application, and Succession
While Facilitating Leadership Change within Virtual Work Environments .................................................. 1
  Michael Charles Hitson
Constraint Specification for Active Process Models ..................................................................................... 7
  Kevin Finch and Weigang Wang
SLA-Driven Business Process Distribution .................................................................................................. 14
  Faramarz Safi Esfahani, Masrah Azrifah Azmi Murad, Md. Nasir Sulaiman,
  and Nur Izura Udzir
Process Diagnostics: A Method Based on Process Mining ............................................................................ 22
  Melike Bozkaya, Joost Gabriels, and Jan Martijn van der Werf

eKNOW 2: Knowledge Management Systems
Encouraging the Reuse of Knowledge in Communities of Practice by Using
a Trust Model .................................................................................................................................................. 28
  Aurora Vizcaíno, Javier Portillo-Rodriguez, Juan Pablo Soto, and Mario Piattini
Integrating Time into Spatially Represented Knowledge Structures .......................................................... 34
  Claus Atzenbeck and David L. Hicks
Visual Middle-Out Modeling of Problem Spaces ......................................................................................... 43
  Andrea Valente
Enterprise Knowledge Clouds: Next Generation KM Systems? .................................................................49
Kemal A. Delic and Jeff A. Riley

eKNOW 3: Decision Support Systems
An Integrated Approach for Defining Pricing Strategies in Competitive Markets ........................................54
Gülfem İşiklar Alptekin and S. Emre Alptekin
Towards a Context-Based Dialog Management Layer for Expert Systems ..................................................60
Victor Hung, Avelino Gonzalez, and Ronald DeMara
Improving Semantic in the Decision Support System K-DSS .................................................................66
Sabine Bruaux and Inès Saad
A Decision Support Methodology for the Control of Alternative Penalties - A Case-Based Reasoning Approach .................................................................72
Expedito Carlos Lopes, Ulrich Schiel, and Gilson Pereira dos Santos Jr.

eKNOW 4: Knowledge Fundamentals
Knowledge Management Challenges in Customer Support: A Case Study .....................................................78
Marko Jäntti, Kirsi Tanskanen, and Jukka Kaukola
The Method for a Summarization of Product Reviews Using the User's Opinion .......................................84
Jung-Yeon Yang, Jaeseok Myung, and Sang-goo Lee
Massive Pruning for Building an Operational Set of Association Rules: Metarules for Eliminating Conflicting and Redundant Rules .................................................................90
Martine Cadot and Alain Lelu
Exploring Knowledge Flow in Software Project Development ....................................................................99
Olivier Gendreau and Pierre N. Robillard

eKNOW 5: Knowledge Semantics Processing & Ontology
Ontology Development for a Manufacturing Data Base for Products with Graded Properties ................................105
M. Reyes Perez, J. Gausemeier, and D. Nordsieck
Towards the Automation of Modeling Language Independent Schema Integration ........................................110
Peter Bellström and Jürgen Vöhringer
Semantic Modelling of Collaborative Business Processes .....................................................................116
Witold Abramowicz, Konstanty Haniewicz, Monika Kaczmarek, and Dominik Zyskowski
Ontology-Based Focused Crawling ...........................................................................................................123
Hiep Phuc Luong, Susan Gauch, and Qiang Wang

eKNOW 6: Information Management
Product Improvement by Selecting Appropriate Suppliers: A Case Study .....................................................129
S. Emre Alptekin and Gülfem İşiklar Alptekin
Towards Flexible Information Architecture for Fractal Information Systems ...............................................135
Marite Kirikova
Proposing a Conceptual Readiness Assessment Model of MIS/IS Deployment in Manufacturing Companies (A Case Study Conducted on the Applications of the Suggested Model in MehrCamPars Co.1) ........................................................................................................................................141

Jale Mirzaei and Fariborz Mosavi Madani

Improving the New Product Development Process through ICT Systems in the Aerospace Industry – A Report on Case Study Research .................................................................................................147

Raul Brandao and Martin Wynn

Developing a Knowledge Sharing Platform: The Case of a Bio-Industry Research Consortium ..................................................................................................................................................................................153

Luc Cassivi, Anne-Laure Saives, Elkbir Labzagui, and Pierre Hadaya

Poster

Miology: A Web Application for Organizing Personal Domain Ontologies .................................................................159

Mirco Speretta and Susan Gauch

Author Index
