</table>
1,3-Butadiene Trends in California Ambient Air
M. Poore, P. Rieger

Legal Aspects of Emissions Monitoring
D. Morrison

Intra-community Variability in Ultrafine Particle Number Concentrations in an Urban Environment
K. Moore, P. Pakbin, N. Hudda, C. Sioutas, M. Krudysz

Shell of Shrimp as an Adsorbent for Arsenic in Aqueous Solution
M. Lin, Y. Chen, C. Liao

Metals with Analytical Detection Limits or Background Levels in Filter Media that Exceed Regulatory Screening Levels in Ambient Air
G. Graening, N. Adkins, P. Duda

Development of EPA OTM 10 for Landfill Applications, Interim Report
E. Thoma, S. Thorneloe, R. Green, G. Hater, R. Hashmonay, M. Chase, M. Modrak, D. Goldsmith

Considerations for an Environmental Management System Development, A Case Study
Central Puget Sound Transit Authority, Sound Transit
J. DeMaro

The Influence of Roadway Configuration on Near Road Air Quality
R. Baldauf, G. Bowker, D. Heist, S. Perry, E. Thoma, T. Long, G. Hagler, A. Khlystov, L. Brixey

A Comparative Study for Destruction of Hydrophobic VOCs in Trickle Bed Air Biofilters
A. Aly Hassan, G. Sorial

California's "Early Action Measures" To Reduce Greenhouse Gas Emissions
T. Vandenburg

Detection and Environmental Consequences of Leaks from Geological Carbon Dioxide Storage Schemes
J. Colls, M. Steven, K. Smith, J. West, J. Pearce

Emissions and the Shipping Industry: Emission Reduction Strategies for Ocean-Going Vessels in California
M. DiBiase

Characterization of Rotating-Wing Aircraft Emissions
M. Cheng, S. Mahurin, E. Corporan, C. Klingshirn, M. DeWitt

Applications of Nephelometers in Visibility and Fine Particulate Monitoring
J. Carney, S. Cloran

Development and Evaluation of Chemical Filters Enhanced with Photocatalysis for Removing VOCs from Indoor Air
W. Den, H. Chang, Z. Wang

Sustaining Environmental and Organizational Excellence through Management Systems
A. Worrell, C. Pugh

Transforming the SIP Process: Finding a Better Approach to Cleaner Air in Texas
J. Anderson

Retrofit of Air Pollution Control Equipment for Purdue University MACT Compliance Project
T. Wagner

Case Study - PSD Permitting for Petcoke Fuel in a Lime Kiln
P. Cobb, D. Buff

Thermal Oxidation of VOC Flash Emissions from Natural Gas Pipeline Pigging Operations
S. Bassett

Metalorganic Synthesis of Cylindrical Titania Arrays and Their Photocatalytic Activity in Gas-Phase
W. Den, C. Lin
Effect of Additive KNO₃ in the Procedure on Characteristics of Particulate Emissions from Burning Incense ................................................................. 403
C. Yang, Y. Chang, F. Chang, T. Lin

Low NOₓ, Down-Fired Burners for Reforming Furnaces ................................................................. 409
W. Bussman, C. Baukal

The Forensic Link Between Ambient Air Monitoring Filters and Radiation Detection Analysis to Benefit Homeland Security .................................................. 429
D. Musick

Global Climate Change and the Mitigation Challenge ................................................................. 438
F. Princiotta

Characterization of Polar Organic Compounds from Atmospheric Transformations of Diesel Emissions ................................................................. 469
S. Samy, B. Zielinska

Evaluation of the Differences Between Modeled and Estimated Pollutant Concentrations Using a Source-Receptor Relationship .................................................. 474
L. Prendi, X. Xu, J. Giroux

Comparing Waste Management Systems from a Systematic Perspective: Case Studies of the Region of Waterloo and Dalian ........................................ 491
X. Chen

Dispersion Model Validation for a Natural Gas Compression Facility in Complex Terrain .......................... 506
P. Reid

The Study of Methyl Stearate (Biodiesel) Pyrolysis in a Flow Reactor .................................................. 521
M. Chai

Continuous Measurement of Ammonia Concentrations at Remote Sites Using Narrow-Bandwidth Open Path Tunable-Diode Laser Absorption Spectroscopy ........................................ 527
M. Boehm, R. Grant, J. Bauer

Quantification and Verification of Odour Impact from Fugitive Sources .................................................. 532
H. Liu, A. Bokowa

Analysis of Motorcycle Exhaust Regular Testing Data - A Case Study of Taipei City ........................................ 543
Y. Chen, F. Jeng, L. Chen

Study on Thermal Deactivation of Catalytic Converters on Motorcycles .................................................. 552
Y. Chen, Y. Yu, F. Jeng, L. Chen

Determining the Visible Opacity of Sulfuric Acid Aerosols Using the Digital Opacity Compliance System (DOCS) .................................................. 566
M. McFarland, J. Bosch, A. Olivas

The Effect of Moisture Content and Aeration on H₂S Production in C&D Debris Landfills .......................... 585
J. ZHANG, B. Dubey, T. Townsend

Particulate Matters Component Profile of Exhaust Emission from Heavy Duty Diesel Vehicle at Tianjin, China .................................................. 590
J. Wang, Z. Bai, T. Jin, P. Zhang, F. Wang, Y. You

Causes of Summertime High Ozone in Alberta, Canada .................................................. 600
D. Fox, M. Kellerhals

The Compaction of Spark Discharge Generated Soot Particles in Toluene/NOₓ/air Photooxidation System .................................................. 615
Z. LU, J. Hao, J. Li, H. Takekawa

Understanding Maintenance Startup and Shutdown (MSS) Permitting Issues in Texas ........................................ 620
S. Sampath

The Use of Optical Remote Sensing as Part of a Study to Evaluate Methods for Measuring Emission Factors from Military Aircraft Engines - Rotary Wing Engines .................................................. 625
R. Kagann, R. Hashmonay, M. Chase
An Analysis of the Cost of Disposal of Unwanted Pharmaceuticals from Pharmacies and GP Surgeries in a County in the East of England. .................................................................642
A. Woolridge

Volume 2

Paint Shop Odor Control & Community Relations at Navistar Canada, Inc., Chatham Assembly Plant, Chatham, Ontario, Canada ........................................................................660
D. Lanoue

Onsite Powder Activated Carbon Production Using Hot Oxygen .................................................................................................................................665
L. Bool

New Permitting Challenges: PM$_{2.5}$ NAAQS and PSD Increment Modeling .........................................................................................................................669
R. Paine

Utilization of Wasted Tea Leaves for Removal of Cr(VI) from Wastewater .............................................................................................................................673
C. Weng, W. Huang

Public-Private Partnerships to Redevelop Industrial Waste Ponds in Toledo, Ohio .................................................................689
B. White

Measurements of Polycyclic Aromatic Hydrocarbons in Different-size Airborne Particles from the Comarca Laguna, Mexico 694
R. Balan, A. Campos Trujillo, E. Herrera-Peraza, B. Valle, V. Mágica Alvarez, G. García-Vargas

Reduction of GHG Emissions by Mechanical Biological Treatment (MBT) of Wastes ........................................................................................................................................699
B. Raninger, R. Li, M. Nelles

NO$_x$ Removal by Carbon Gasification using Fluidized Zero Valant Iron Process ........................................................................................................705
S. Chen, H. Hsu, W. Shiu, Z. Wen

Impacts of Climate and Emissions Changes on Nitrogen and Sulfur Deposition over the US .................................................................721
E. Tagaris, K. Liao, K. Manomaiphiboon, A. Russell, S. He, J. Woo, P. Amar

Toward a More Cost Effective Air Compliance Budget .................................................................................................................................728
M. Cybulski

Linked Responses of Ozone and PM$_{2.5}$ to Emissions Controls Currently and in the Future .................................................................733

Energy Production Options from Biosolids .................................................................................................................................738
L. Lundberg

Dioxins Fate and Exposure Risk Assessment in Taipei Metropolitan .................................................................................................................................750
L. Chen, C. Yang.

Management System for Air Emissions - SIGEA® - The Search for Corporate Sustainability .................................................................766
V. Schmall, R. Oliveira, A. Souza, K. Ferreira, L. Ribeiro, R. Potolski, G. Lima

An Evaluation of Near-Field PM$_{2.5}$ Impacts from a Coal-Fired Power Plant Using Ambient PM$_{2.5}$ and SO$_2$ Measurements and AERMOD ................................................................772
D. Shea, A. MacNutt, P. Campbell, D. Cramer

Biomass Power Plant Permitting Trends in the Northeast - Lessons Learned ........................................................................................................791
M. Holzman, D. Donovan

Meteorological Considerations for Nuclear Power Plant Siting and Licensing ........................................................................................................799
G. Howroyd, P. Snead

Regenerable Multi-Functional Sorbent Development for Sulfur and Chloride Removal from Coal-Derived Synthesis Gas ........................................................................795
R. Siriwardane, T. Simonyi, W. Batton, R. Eddy
