Francesco Parasiliti, Marco Villani

A Dual Inductor Current Fed dc/dc Converter with ZVS Active Clamping, for Fuel Cell Based Plant
Vittorio Isastia Cimino, Luigi Piegari
Simulation of Wind Power Generation with Matrix and Multi-Level Converters: Power Quality Analysis ................................. 182
R. Melício, V.M.F. Mendes, J.P.S. Catalão

Wind Turbine Power Electronics and Electrical Machines: On Lightning Protection Simulation ......................................................... 1828
R.B Rodrigues, V.M.F. Mendes, J.P.S. Catalão

Comparison of Electrical Machine Types in Hybrid Drive Trains: Induction Machine vs. Permanent Magnet Synchronous Machine ............................................................................................................ 1834
Dominik Bücherl, Reinhard Nuscheler, Wolfgang Meyer, Hans-Georg Herzog

Environmental and Life Cycle Cost Analysis of a Switched Reluctance Motor ................................................................. 1840
E. Martínez, P. Andrada, B. Blanqué, M. Torrent, J.I. Perat, J.A. Sánchez

Comparative Study of Using Different Electric Motors in the Electric Vehicles ..................................................................... 1844
Nasser Hashemnia, Behzad Asaei

Control of Induction Motors for Wide Speed Range for Electric Vehicle Drives ................................................................. 1849
D. Casadei, F. Milanesi, G. Serra, A. Tanti, L. Zarri

Theoretical Analysis of High Temperature Superconducting Induction/Synchronous Machine Based on the Nonlinear Electrical Equivalent Circuit .................................................................................. 1855
Taketsune Nakamura, Toshiharu Nishimura, Kazumasa Nagao, Kazuhiro Matsumura, Yoshio Ogama

Anti-Slip Wheel Controller Drive for EV using Speed and Torque Observers ........................................................................ 1860
Daniel Foito, Manoo Guerreiro, Armando Cordeiro

An Approach to Find an Optimum Designed SRM for Electric Vehicle Drive ........................................................................ 1865
Wieslaw Jazdzynski, Michal Majchrowicz

Analysis of an Electromagnetic Automobile Suspension System ...................................................................................... 1871
Miguel Chaves, José Maia, Jorge Esteves

Design, Analysis and Realization of a Novel Magnetic Harmonic Gear ...................................................................................... 1875
Jan Rens, Richard Clark, Stuart Calverley, Kais Atallah, David Howe

Comparative Study of Different Electric Machines in the Powertrain of a Small Electric Vehicle .............................................................................. 1879
João P. Trovão, Paulo G. Pereirinha, Fernando J. T. E. Ferreira

Modeling and MPPT Sensorless Control of a DFIG-Based Marine Current Turbine ............................................................ 1885

Comparative Analysis of Estimation Techniques of SFOC Induction Motor for Electric Vehicles ............................................ 1891
A. Haddoun, M.E.H. Benbouzid, D. Diallo, R. Abdessemed, J. Ghouili, K. Srairi

Hybrid-Electric Vehicles for Advanced Urban Mobility: a New Proposal ...................................................................................... 1897
C. Concari, G. Franceschini, A. Toscani

Analysis and Modeling of an Electrostatic Induction Micromotor .......................................................................................... 1902
F. J. Santana Martín, S. García-Alonso Montoya, J. M. Monzón Verona, J. A. Montiel-Nelson

Diagnosis of Rotor Faults in Traction Drives for Railway Applications .................................................................................. 1907
S. M. A. Cruz, A. Stefani, F. Filippetti, A. J. M. Cardoso

Proposal of the Section Change Method of the Stator Block of the Discontinuous Stator Permanent Magnet Type Linear Synchronous Motor Aimed at Long-distance Transportation ........................................................................ 1913
Kenji Suzuki, Yong-Jae Kim, Hideo Dohmeki
Electromagnetic Guiding of Vertical Transportation Vehicles: State Control of an Over-determined System ................................................................. 1919
Benedikt Schmulling, Rudiger Appunn, Kay Hameyer

Strand-Level Proximity Losses in PM Machines Designed for High-Speed Operation ................................................................. 1925
P. B. Reddy, Z. Q. Zhu, Seok-Hee Han, T. M. Jahns

Analysis of Switching Loss of an AC Fed Direct Converter for a Switched Reluctance Machine ................................................................................................................................. 1931
S. J. Forrest, J. Wang, G. W. Jewell

Determination of Three Phase Induction Machine Efficiency from Start up Data ................................................................. 1937
Johann Peter Bacher, Florian Waldhart

Challenges in the Segregation of Losses in Cage Induction Machines ................................................................................................................................. 1942
Jenni Pippuri, Antero Arkko

Stray Load Losses Calculation Routine Based on the Eh-Star Method ................................................................................................................................. 1947
Adilson C. Machado, João E. de S. Pacheco, M. V. Ferreira da Luz, C. G. C. Neves, R. Carlson

Laminated Iron Core Losses variation with frequency and under SPWM Excitation ................................................................................................................................. 1951
P. Rovolis, G. Loizos, A. Kladas, J. Tegopoulos

Determination of Magnetic Losses in Planar Magnetic Elements ................................................................................................................................. 1955
C. L. Ebert, W. P. Carpes Jr., J. C. S. Fagundes

Induction Motor Stray Losses and Inter-bar Currents ................................................................................................................................. 1959
Steven C. Englebretson, James L. Kirtley Jr.

Assessment of Induction Machine Efficiency with Comments on New Standard IEC 60034-2-1 ................................................................................................................................. 1964
Wenping Cao

The Optimal Design for Improving Efficiency of the Three Phase Induction Motor ................................................................................................................................. 1970
Pil-Wan Han, Yon-Do Chun, Jae-hak Choi, Mi-Jung Kim, Dae-Hyun Koo, Ju Lee

Comparison of the Efficiency Depending on Test Standards of Three-phase Cage Induction Machine ................................................................................................................................. 1974
Dae-Hyun Koo, Mi-Jung Kim, Pil-Wan Han, Jae-Hak Choi, Yon-Do Chun, Yun-Hyun Cho

Theoretical and Experimental Forces for a New Linear Switched Reluctance Traction Motor ................................................................................................................................. 1979
D. S. B. Fonseca, C. P. Cabrita, M. R. A. Calado

High Torque Internal Permanent Magnet Wheel Motor for Electric Traction Applications ................................................................................................................................. 1984
Konstantinos I. Laskaris, Antonios G. Kladas

Modeling of Long Stator Linear Motors – Application to the Power Supply of Multi Mobile System ................................................................................................................................. 1988
A. Cassat, B. Kawababani, Y. Perriard, J.-J. Simond

Secondary Current Controlled Linear Induction Motor with Function of Linear Transformer for Wireless LRV ................................................................................................................................. 1994
Nobuo Fujii, Kentaro Sakata, Takashi Yoshida, Takeshi Mizuma

Air-gap Control System of a Linear Induction Motor for a Railway Transit ................................................................................................................................. 2000
Chan-Bae Park, Byung-Song Lee, Hyung-Woo Lee, Sam-Young Kwon, Hyun-June Park

Cogging Force Reduction in Permanent Magnet Linear Motor using Phase Set Shift ................................................................................................................................. 2004
Jaewon Lim, Hyun-Kyo Jung
Reduction of the Cogging in the Linear Synchronous Motor with a Claw-pole-structured Mover -confirmation with the High-thrust Model- ................................................................. Kenji Shiroshita, Kunihiro Iijima, Teruo Kichiji, Yasuhiro Kataoka, Kunihisa Tashiro, Tetsumaru Saito, Hironuki Wakiwaka 2008

Advanced Parametric Environment for Electrical Machines Design Optimization .................................................. Konstantinos G. Papadopoulos, Christos Mademlis, Alexandros M. Michaelides, Christopher P. Riley, Nick Robertson, Isabel Coenen 2012

Control of an Unconventional Converter for 3-Phase Extension of 1-Phase Mains Supply ........................................... V. Biagini, P. Bolognesi, L. Taponenco 2018

Design Considerations for Rotors with Embedded V-Shape Permanent Magnets .............................................................. Steffen Hahlbeck, Dieter Gerling 2024

A Comparison Between PMSM, EMSM and SMSM in a BAS Application .................................................................. D. Hagstedt, F. Márquez, M. Alaküla 2034

Development of a Radial Flux Machine Design Environment .................................................................................. Avo Reinap, Dan Hagstedt, Francisco Márquez, Yury Loayza, Mats Alaküla 2039

Comparison of Simulation and Measurement Methods of the Static Magnetization Characteristics of a 1 Hp RSRM............................................................ Danilo Nobre Oliveira, Ricardo Silva The Pontes 2043

Comparison of Simulation and Measurement Methods of the Static Magnetization Characteristics of a Low Power LSRM .................................................................. Danilo Nobre Oliveira, Ricardo Silva The Pontes 2048

Choice of Magnetic Induction and Current Density Values for Planar Magnetic Design ........................................ C. L. Ebert, W. P. Carpes Jr., J. C. S. Fagundes 2054

Optimum Design of Electromagnet in Magnetic Levitation System for Contactless Delivery Application Using Response Surface Methodology ........................................... Do-Kwan Hong, Ki-Chang Lee, Byung-Chul Woo, Dae-Hyun Ko 2059

New Solution of Tangent Rewinder Drive in the Board Factory ..................................................................................... Borislav Jeftenic, Leposava Ristic, Milan Bebic, Neša Rašić 2065

CFD Electric Motor External Fan System Validation ........................................................................................................... Cassiano Antunes Cezário, Amir Antônio Martins Oliveira 2071

Machine Design Software for Induction machines ........................................................................................................ Matthis Centner 2077

Performance Calculation of SR Motors for Optimum Design and a Washing Machine Application .................................................. H. Bulent Ertan, L. Burak Yalciner 2081

A Study on the Influence of Forest Fire on Polymer Insulators ......................................................................................... Won-Kyo Lee, In-Hyuk Choi, Dong-II Lee, Kab-Cheol Hwang 2087

Electrical Machines Windings Insulation Diagnostics And Degree Of Wear Classification ............................................ T. Glinka, J. Bernatt, A. Decner, A. Polak 2092

A New Concept for Weight Reduction of Large Direct Drive Machines ........................................................................ G. Shrestha, H. Polinder, D.J. Bang, J.A. Ferreira, A.S. McDonald 2097

Estimation Errors in Sensorless Drives due to the Magnetic Interaction ........................................................................ Frederik M. De Belie, Peter Sergeant, Tine L. Vandoorn, Jan A. Melkebeek 2103
Torque and Current Ripple Analytical Investigation in Space-Vector PWM Inverter Fed Induction Motor Drive under DC-Bus Voltage Pulsation .................................................................................. 2108
Jiri Klima, Miroslav Chomat, Ludek Schreier

Basic Performance of Inset Type PMSM .......................................................................................... 2114
Taro Genda, Ismet Rahmad Kartono, Makoto Yoneda, Hideo Dokeki

Fault Tolerant Power Converter for Switched Reluctance Drives ................................................................ 2120
Natália S. Gameiro, A. J. M. Marques Cardoso

Modeling of PWM Inverter-Fed IPMSM Drive System and Its Application to Hybrid Vehicle ........................................................................................................... 2126
Tomoaki Ono, Toshiaki Murata, Junji Tamura, Takeshi Tsuchiya

Modeling and Simulation of Matrix Converter Drives for Diagnostic Purposes ........................................... 2132
M. Ferreira, S. M. A. Cruz, A. J. M. Cardoso

Analytical Study of New Type of Direct Drive Motor for Scroll Type of Compressor ........................................ 2138
Mitsunori Kawakami, Nobuo Fujii

Engineering-focused Software for the Design of the Drive of Electrical Machines ........................................ 2144
Bertrand du Peloux, Guillaume Lacombe

On Line Simulation Models of Electric Drives .......................................................................................... 2148
Shlomi Eitan, Raul Rabinovici

Frequency Model of a Three-Phase Drive for Railways Application ........................................................... 2154
Joseph El Hayek, Grzegorz Skarpetowski

Simulation of IPM motor with Current Vector Control Drive and DTC Drive by Nonlinear Magnetic Circuit Model .................................................................................................................. 2158
Hiroki Goto, Kensuke Kimura, Kenji Nakamura, Osamu Ichinokura

Limitation of Adjustable-Speed Drive Operation by Unbalanced Voltage Supply ...................................... 2163
Miroslav Chomat, Ludek Schreier, Jiri Bendl

Layered Control Structure for High-Frequency Control in Drive Applications ............................................. 2169
Jan Verveckken, Johan Driesen

Effect of BLDC Motor Commutation Schemes on Inverter Power Loss ....................................................... 2174
Syed A. Hossain, Pedro Reis

Analysis of the Electromechanical Behaviour of the Subsynchronous Cascade Drive ................................ 2179
Ioannis Tsoumas, Athanasios Safacas

Reluctance Motor Simulational Models Using Different State Variables .................................................... 2185
Wojciech Burlikowski

Overcoming Limits of High-speed PM Machines .......................................................................................... 2189
Aleksandar Borisavljevic, Henk Polinder, Braham Ferreira

Feasibility Investigations on an Antithrombotic Electroactive Function for Medical Applications .................. 2195
Christophe Viguier, Pascal Leprince, Bertrand Nogarede

Electromagnetic Characterization of a Linear Reluctance Actuator: A New Approach ................................ 2201
D.S.B. Fonseca, T.J.B. Godinho, C.P. Cabrita

Simulation of Relation between Electrode Thickness and Spring Characteristic of a New Stacked-type Electrostatic Actuator .................................................................................................. 2207
Kazuo Okuda, Keiji Saneyoshi

Linear Switched Reluctance Actuator Modelling With Flux Tubes Considering Saturation Effects ............... 2211
António Espírito Santo, Maria R. A. Calado, Carlos M. P. Cabrita
Demonstration Model of a Linear Permanent Magnet Actuator with Gas Springs
Ravindra Babu Ummaneni, Robert Nilssen, J. E. Brennwall

Educational Bench: Self-controlled Synchronous Machine
Bertrand Nogarede, Dominique Harribey, Yvan Lefèvre, Francois Pigache

Benchmark Test of a Variable Speed Unit for Teaching Purposes

Teaching Induction Machine through Finite Element Models
V. Fireteanu, P. Taras

Emetor – An Educational Web-based Design Tool for Permanent-magnet Synchronous Machines
Florence Meier, Stephan Meier, Juliette Soulard

A Virtual Testbed for Characterizing Synchronous Generators Based on Time Domain Tests
F. S. Sellschopp, M. Cisneros, M. A. Arjona, R. Vargas, C. Hernandez, V. M. Cabrera

Physical Laboratory Model of Typical Load Torque Characteristics for Teaching Electric Drives
Goran Rovišan, Tanja Vešic, Damir Žarko

Development of a Modular Linear Magnetic Gear As a Project in the Electrical Engineering Education
Avo Reinap, Francisco Márquez

Fundamental Motor Types Evolving from Two Coils
Ekkehard Bolte, Florian Schwieger

Soft Magnetic Composite with Lamellar Particles - Application to the Clawpole Transverse-Flux Machine with Hybrid Stator
Patrick Lemieux, O. Jude Delma, Maxime R. Dubois, Roderick Guthrie

The Applications of the Interference Microscope on the Electrical Machines Field
Mircea Ignat, George Zarnescu, Ioan Peter, Arpad Borsos

Clawpole Transverse Flux Machines with Amorphous Stator Cores
Nicolas Dehlinger, Maxime R. Dubois

The Application of Powder Magnetic Circuits in Electric Machines
Barbara Slusarek, Piotr Gawrys, Jozef Z. Gromek, Marek Przybylski

An Integrated Design of a Machine with Soft Magnetic Mouldable Composite
Avo Reinap, Mats Alakäla, Gunnar Lindstedt, Bert Thuresson, Tord Cedell, Mats Andersson, Peter Jeppsson

Evaluation of Soft Magnetic Mouldable Composite Core Motors
Avo Reinap, Mats Alakäla, Tord Cedell, Mats Andersson, Peter Jeppsson

Design and Prototyping a Torus Machine with a Rotocast Core
Avo Reinap, Conny Högmark, Mats Alakäla, Tord Cedell, Mats Andersson, Peter Jeppsson

Superconducting Multi-Stacks Motors Using the diamagnetism Property of Bulk Material
R. Moulin, J. Lévêque, J. C. Mercier, A.Rezzoug, D. Netter

Modeling and Transient Simulation of FACTS in Multi-Machine Power Systems
Y. Pannatier, B. Kawkabani, J.-J. Simond

Synchronous Generator, Excitation and Speed Governor Modeling in ATP-EMTP for Interconnected DG Studies
Fabricio A. M. Moura, José R. Camacho, José W. Resende, Williams R. Mendes
Modelling and Analysis of Series-Connected Wound Rotor Induction Motor .......................................................... 231
   Gojko Joksimovic

A New MPPT Method for Photovoltaic Generation Systems Based on Hill Climbing Algorithm
   Dimosthenis Pefitis, Georgios Adamidis, Anastasios Balouktsis ................................................................. 2324

Modeling of Rotor Based Harmonics in Dual-Star, Wound Field, Synchronous Machines ......... 2329
   Frederick Kieferndorf, Halina Burzanowska, Sami Kanerva, Petteri Sario

Dynamic Simulation of Maximizing the Starting Torque for Super-High-Speed Drive of a 4/2 Switched Reluctance Motor .......... 2335
   Ismet Rahmad Kartono, Kouta Kajiwara, Hideo Dohmeki

Induction Motor Parameters Identification from Bench Tests Using a Newton-Raphson Method .......................................................... 2341
   Nuno Veiga Cardoso, João C. P. Palma, João J. E. Santana

Improvement Generating Powers Quality of A Doubly-Fed Induction Generator With a Second-Order L.C Filter in the Rotor Circuit ................................................................................................................. 2347
   M. Hacil, A. L. Nemmour, A. Khezzar, M. Boucherma

Separation of Saliency Components for Speed Sensorless Detection of Flux and Rotor Position of Induction Machines .......................................................................................................................... 2353
   T. M. Wolbank, M. K. Metwally

A Novel Concept of Pulsatile Magnetoactive Pump for Medical Circulatory Support .......................................................................................................................... 2359
   Nicolas Martinez, Pascal Leprince, Bertrand Nogarede

Hybrid Cascaded H-Bridge Multilevel Inverter Motor Drive DTC Control for Electric Vehicles .................................................................................................................................................. 2365

Numerical Calculations of a Hybrid Power Train for Motor Vehicles ................................................................................................. 2371
   Markus Wilke, Robert Goraj, Markus Klöpzig, Heinz-Werner Neumüller

Alternative Designs of a Superconducting Synchronous Generator: the Southampton Approach .......................................................................................................................... 2375
   Kevin F. Goddard, Bartosz Lukasik, Jan K. Sykulski

The Effects of Inter-bar Currents in Cast Aluminium and Cast Copper Rotors ................................................................................................. 2381
   Alexander Stening, Chandur Sadarangani

Design Considerations of High-Speed Induction Machines for High-Temperature Applications .................................................................................................................................................. 2386
   David Gerada, Abdeslam Mebarki, Martin Shanel, Keith J. Bradley, Neil L. Brown

Circuit Coupled Simulation of a Claw–pole Alternator by a Temporary Linearization of the 3d–fe Model ................................................................. 2392
   E. Lange, M. Van Der Giet, F. Henrotte, K. Hameyer

Losses in an Eccentric Rotor Induction Machine Fed from Frequency Converter .......................................................................................................................... 2398
   Anouar Belahcen

A Coupled-circuit Model for a Dfig Operating Under Unbalanced Conditions ................................................................................................. 2404
   S. Djurovic, S. Williamson
