VOLUME 2

AMNVC: ACOUSTIC MATERIALS FOR NOISE AND VIBRATION CONTROL

0118: Noise Reduction and Speech Intelligibility Improvement in a Highway Tunnel ................................................................. 752
Sheng Chen, Chi Kin Leung, Xia Meng Que
0179: The Sound Absorption Performance of Porous Foam Metal Panel .................................................................................. 759
Lei Lin
0275: Effects of Damping Treatments on Acoustic Properties of Honeycomb Panels ............................................................... 764
Santhosh Kumar Ramanathan, Leoping Feng, Ulf Orrenius
0352: Micro-Perforated Plates for Vehicle Applications ........................................................................................................... 773
Ying Guo, Sahry Alam, Mats Åbom
0625: Evaluation of the Sound Insulation of Liquid-Filled Panels ............................................................................................ 792
Bai Calejo Rodrigues, Agostinho De Sousa Coutinho
0158: Environmentally-Friendly Alternatives for Acoustic Materials ...................................................................................... 810
Alice Bottoon Rodrigues, Chadwyck T. Musser
0829: Application of FEM to Predict Acoustic Characteristics of Structures with Multilayered Viscoelastic Media .................. 822
Miao Xiaohong, Wang Xuexen, Jia Di
0833: Effects of Propagating Waves on Optimized Configurations of Absorbing Porous Materials by Topology Optimization .................................................................................................................. 830
Joong Seok Lee, Yoon Young Kim, Jung Soo Kim, Yeon June Kang
0856: Development of Predictable Flow Resistive Sound Absorbers ..................................................................................... 836
Coates Michael, Kierzkowski Marek
0080: Sound Absorption Application of Nanofibers Made by NanospiderTM Technology ......................................................... 844
Denisa Srabiska
0099: Relationship Between Sound Absorption Characteristics and Microscopic Structure Determined by X-Ray Computed Tomography of Sound Absorption Material for Automobiles ................................................................................................................. 849
Tosyoji Yamashita, Kazuhiro Suzuki, Hideki Adachi, Soaihiro Nishino, Yo Tomota
0915: A Novel Cold Extrusion Process for Making Vibro-Acoustic Products from Recycled Raw Materials ........................................ 859
A. Khan, K. V. Horoshenkov, F. Becot, L. Jaouen
0728: Floor Impact Noise Reduction using Vibration Isolation Layered Structure ................................................................. 865

0729: An Experimental Study of the Frequency-dependent Behaviour of Magneto-sensitive Rubber with Respect to Preload, Vibrational Amplitude and Magnetic Field Strength ................................................................. 872

Jonas Lejon, Leif Kari

AMTBAH: ARRAY MEASUREMENT TECHNIQUES: BEAMFORMING AND ACOUSTIC HOLOGRAPHY

0103: Beacon-Aided Adaptive Localization of Sound-Sources aboard a Pass-By Rail-Car Using a Track-Side Acoustic Microphone-Array ........................................................................................................................................... 877

Yue Ivan Wu, Kiniam Thomas Wong, Siu-Kit Lau

0145: Development of a Real Time Noise Source Identification System using Reconfigurable FPGA Technology ................................................................. 885

Zhonghao Zheng, Lai Wei

0149: Sound Field Separation Technique Based on Equivalent Source Method Using Pressure-Velocity Measurements and Its Application in Nearfield Acoustic Holography ................................................................. 894

Chuangxing Bi, Xinzhou Chen

Shen Heping, Nie Jia, He Yuanan, Shang Dejiang

0230: Development and Application of Time Reversal Method for Audio Signal Separation ................................................................. 914

Bo-Heien Wu, Gee-Pinn James Tso, Yu-Hao Heiih, Chih-Hao Chou, Sory Lee

0249: Investigation on Uniform and Non-uniform Deployment of Microphones in Near-field and Far-field Source Imaging ................................................................................................................................................................. 921

Mingsian R. Bai, Jia-Hong Lin, Kwan-Liang Liu

0265: Sound Radiation of Hearing Aid Structures ................................................................................................................................................................................................. 934

Alfred Sturmemann, Erdal Karamuk

0495: Near Field Acoustic Holography with Microphones Mounted on a Rigid Sphere ................................................................................................................................................................................................. 940

Finn Jacobtest, G. Moreno, E. Fernandez Grande, J. Held

0555: Complex Envelope of Acoustic Holography; Theory and Applications ................................................................................................................................................................................................. 948

Park Choong-Su, Kim Yang-Hann

0824: Vehicle Track Determination by Using a Microphone Array ................................................................................................................................................................................................. 966

Ramon Peral Orts, Nuria Campillo Davii, Emilio Velasco Sánchez

0560: Digital Terrain Model for Far Field Noise Localization with Beam Forming Technique ................................................................................................................................................................................................. 978

Vincenzo Quaranta, Ignazio D’Altrui, Claudio Calisti Tassini

0759: Quantitative Evaluations of Sound Source Segregation Performance by Means of the Frequency Domain Binaural Model ................................................................................................................................................................................................. 987

Minako Tomita, Yoshifumi Chisaki, Tsyuyoshi Usagawa

0837: Long Range Location of Wildlife Using Phased Arrays of Microphones: A Feasibility Study ................................................................................................................................................................................................. 996

Travis Wiens, Stuart Bradley, Kevin George

0847: Spatial Active Noise Reduction with Multiple Error Microphones ................................................................................................................................................................................................. 1010

Cherkassky Dani, Ofro Rubin

0115: Development of Acoustic Video Camera System Based on Binocular Vision and Short-Time Beamforming ................................................................................................................................................................................................. 1023

Li Bing, Yang Duangec, Shao Lin, Lian Xiaomin

0229: Multireference and Scan-based Cyclostationary Near Field Acoustic Holography (CYNAH) ................................................................................................................................................................................................. 1034

Wan Quan, Jiang Weikang

0321: Method of Support Vector Regression Applied to Snapshot Measurement in Near-field Acoustic Holography ................................................................................................................................................................................................. 1050

Ronggu Miao, Haichao Zhu, Rui Li

0923: Investigation of the Depth of Field in Acoustic Maps and Its Relation Between Focal Distance and Array Design ................................................................................................................................................................................................. 1060

Dirk Dobler, Gunnar Heilmann, Ralf Schröder

0745: Inverse Filtering in Real-time Nearfield Acoustic Holography (RT-NAH) Using Finite-difference Time-domain Technique ................................................................................................................................................................................................. 1068

Jean-Claude Pascal, Jean-Hugh Thomas, Jing-Fang Li, Stasien Paullusseur

0848: Improving the Time / Spatial Resolution Capabilities of Beamforming in the Time Domain Using Zeropadding ................................................................................................................................................................................................. 1084

Dirk Heilmann, Dirk Zeweler

0838: Focusing Properties of Phase Conjugation Arrays ................................................................................................................................................................................................. 1091

Sheng Li

0146: Visualization for Vibration Mode of Membrane and Sound Radiation by NAH and Intensity Method ................................................................................................................................................................................................. 1095

Nabilah Irshihm, Shibayama Hideo, Yamana Kazuki

0853: Influence of Environmental Temperature on Nearfield Acoustic Holography Reconstruction ................................................................................................................................................................................................. 1103

Li Lingzhi, Feng Tao, Lai Ke

AN: AIRPORT NOISE

0331: Measuring Environmental Aircraft Noise: Combining New Technologies with Old Ideas ................................................................................................................................................................................................. 1112

Bergermans Dick, Bohgholm Niels

0413: Understanding the Experience of Aircraft Noise: an Application of Q-methodology ................................................................................................................................................................................................. 1120

Maarten Kroezen, Christian Bröer
0575: Tools for Land Planning around Airports ................................................................. 1221
Lawrence S. Finegold, Michiko So Finegold, Bernard F. Berry

0766: Improvement of the Accuracy of an LAnoise-based Aircraft Noise Model .................. 1231
Hisashi Yoshikawa, Kiyoshi Iwasa, Ichiro Yamada, Kouji Tsuji

1014: Acute and Long-term Effect on Blood Pressure of Exposure to Noise Near Airports - The HYENA Study ................................................................. 1238
Lars Jarup, Wolfgang Babisch, Danny Houthuijs, Goran Pershagen, Klea Katsouyanni, Manolis Velonakis, Ennio Cadum

2026: Yamato City Government Policy of Dealing with the Urban Aircraft Noise Problem Caused by the U.S. Military Air Base ................................................................. 1255

0532: Aircraft Noise and Hypertension Among Men - A Study Around Arlanda Airport ........ 1267
Giusta Bluhm, Charlotte Eriksson, Mats Rosenlund, Goran Pershagen, Agnete Hilding, Claes-Göran Östenson

0628: Air Traffic Noise Quota at Paris Charles de Gaulle Airport, a Global Indicator From Actual Noise Levels ................................................................. 1274
Barbo Bertrand, Machet Jean-Marie

0643: Portuguese Real Estate Taxation, Land Use and Noise .................................................... 1282
Cecília Rocha, António Carvalho

0403: Depreciation of Property Prices Around Airports: A Meta-Regression of Hedonic Price Studies ................................................................. 1300
Zia Wadud, Tom G Reynolds, Andreas Schafer

1046: Noise Measures for Airport Capability Expansion at Narita International Airport ........ 1320
Naoshi Okuda, Saburo Ogata, Kenichi Katsuta

Armand Györy, Jean-Baptiste Chaudron, Martin Adelantado

ANM: AIRCRAFT NOISE MONITORING

0211: Analysis of Influence of Navigation Procedures on the Reduction of Aircraft Noise in Final Approach ................................................................. 1347
Doris Novak, Tino Burak, Igor Simac, Zoran Jaksic

0455: The Maintenance of the Accuracy of Microphones Used in Aircraft Noise Monitoring ................................................................. 1353
Michael Osborne

0565: 2D-Axisymmetric and 3D Computational Study of the Acoustic Absorption of Resonant Liners ................................................................. 1361
Roche, Leykian, Vuillot

0605: Noise Occurrence Caused by the U.S. Military Facility Presence in Okinawa and Its Influence on Inhabited Areas ................................................................. 1378
Takeshi Takeda, Kato Fumio, Yamanaka Shinji

0729: New Method of Detecting and Identifying Long-duration Noise Events Due to Ground Activities for Airport Noise Monitoring ................................................................. 1383
Michinori Okazaki, Keishi Sakoda, Kenji Fukushima, Koichi Makino, Ichiro Yamada

0997: Key Considerations for the Successful Specification and Design of Aircraft Interior Noise Isolators ................................................................. 1391
Jeffrey N. Weisbeck

ASDTN: ANNOYANCE AND SLEEP DISTURBANCE FROM TRANSPORTATION NOISE

0166: TVANE Train Vibration and Noise Effects: Presentation of a Swedish research project ................................................................. 1397
Tomas Jerson, Eiv Øhrstrøm, Mikael Ögren

0456: Ground Vibration Control on Beijing Subway Line 5 ................................................................. 1404
Anbin Wang, A. Adedipe, J. Sun, L. Jiang, J. Ren
CA: COMPUTATIONAL AEROCOUSTICS

0750: Numerical Prediction of Thermo-acoustic Instability in Rijke Tube Using Non-linear Model for Heat Source ......................................................... 1475
   W.-S. Song, J.-Y. Park, S. Lee

0798: Aero-Acoustic Modelling using Large Eddy Simulation .......................................................... 1484
   Weizhong Shen, Jens N. Sørensen

VOLUME 3

0806: Grid-Optimized Upwind DRP Finite Difference Scheme on Curvilinear Grids for CAA.............................. 1498
   Hai-Qing Si, Tong-Guang Wang

0824: A Survey of PML Absorbing Boundary Conditions for the Euler Equations Problems in Cylindrical Coordinates .......................................................... 1514
   Sarah A. Parrish, Fang Q. Hu

0920: Recent Developments in Direct Noise Computation of Turbulent Flows: Numerical Methods and Applications.......................................................... 1533
   C. Bogey, C. Bailly

0939: Simulation of Duct Aeroacoustics with Flow Discontinuity Using CE/SE Method ......................................................... 1541
   Leung Chi-Kinrudolph

DM: DUCTS AND MUFFLERS

0088: Study on Acoustic Attenuation Performance of Complex Silencers with Complex Flow by DRBEM ......................... 1549
   Xuexin Wang, Xihong Mao, Di Jia, Zhenlin Ji

0110: Two-Load Method for Measuring Acoustic Element Characteristics with Flow ......................................................... 1559
   Xuexin Wang, Xihong Mao, Di Jia, Zhenlin Ji, Tanyuan Zhang

0132: A New Type of Muffler and Overall Evaluation Indices .......................................................... 1568
   Jiaping Jing, Fu Si, Wu Bang-Yu

0210: Direct Numerical Calculation of Flow Noise at Duct Constrictions ......................................................... 1578
   S. K. Tang, W. L. Lee

0259: Evaluating Acoustic Attenuation Performance of Silencers with CFD Approach ......................................................... 1585
   Zhongxu Kang, Hushgshu Xu, Zhenlin Ji

0277: Computational Simulation of Automotive Muffler Radiation Noise ......................................................... 1593
   Yasuda Takashi, Noritoshi Nakagawa, Chaoqun Wu, Naoko Nakamura, Masao Uchiyama

0492: The Influence of the Node Geometry on the Performance of a Herschel-Quincke Tube ......................................................... 1602
   Mikhail Karlsson

0540: Characterization of Combustion Noise of a Turbofan Engine Using a Phased Array ......................................................... 1615
   Sueshige Yoichi, Masafumi Matusaka, Masato Mikami, Naoya Kojima, Takashi Esaki

0654: Noise Reduction of the Radial Dissipative Silencer in the Intake System of the Medium-duty Diesel Engine ......................................................... 1623
   Jiri Lavrentiev, Heiki Tiskoja

0656: Noise Reduction of the Radial Dissipative Silencer in the Intake System of the Medium-duty Diesel Engine ......................................................... 1630
   Fenggong Stewart Lawrence, Dieter Schellwiek

0707: Acoustic Performance of a Helmholtz Chamber with Leaking Under Different Flow Conditions ......................................................... 1638
   Robert Fairbrother, Andreas Dolinar, Siwei Liu, Werner Biermayer

0203: Study on Noise Reduction of Suction Machine with Complicated Piping System by use of Side Branch ......................................................... 1646
   Masanori Tsuji, Kunihiko Ishihara

0467: Location Optimization of a Long T-Shaped Acoustic Resonator Array for Noise Control Inside an Enclosure Using Simulated Annealing Algorithm ......................................................... 1657
   Ganghua Yu, Li Cheng

0585: The Noise Control of Ventilation Duct by Transparent Plastic Sheet ......................................................... 1668
   S. M. Chan, C. F. Ng

0490: A Study on Characteristics of Noise Generated by Air Flow Through Perforated Plates ......................................................... 1680
   Sueshige Yoichi, Masafumi Matusaka, Masato Mikami, Naoya Kojima, Takashi Esaki
0278: In-duct Propagation Using the Parabolic Equation in Presence of a Complex Flow
Patrice Malbouisson

0844: A Method to Calculate the Radiation Sound Power at the End of the Duct System with Multiple Sound Sources
Feng Tao, Wang Jing, Rui Wu, Li Xiaoqiang, Ke Liu

0618: Sound Reflection from Subsonic Flow Duct Termination Exhausting Hot Jet
Hans Rammert, Jiri Lavenjen

0468: Dual-size MPP Absorber with Coupled Air Cavity
I Made Misasa

0247: Resonant Property of a Rectangular Chamber Partially Shut at the end of the Inner Cylinder Modeling
Akira Sadamoto, Seiji Shirahama, Yasuhiro Ando

DTNV: DRIVE TRAIN NOISE & VIBRATION

0095: Dynamic Responses of a Drivetrain System with Dry Friction Clutch under Time-Varying Normal Load
Chengwu Duan, Rajendra Singh

0114: Characterization of the Audible Magnetic Noise Emitted by Traction Motors in Railway Rolling Stock
Le Bemerais Jean, Lanfranchi Vincent, Leroy Anthony, Sapena Juan, Recorbet Sylvain

0306: Propagation of Ground Vibration Caused by Railway and Road
Yang Xianjun, Lu Li

0775: Surface Vibration Pattern Induced by Underground Trains
Andreu Balastegui, Robert Arco, Jose Ignacio Palacios, Joan Cardona

0105: Condition Monitoring of Internal Combustion Engine Based on Vibration Signal Processing
Zhu Jianyuan

0300: Aero-Acoustic Simulation of Sunroof Concept Design Applying Computation Grid Network
Kangpeng Zhang, Yi Dai

0657: Diesel Engine Mount by Actual Air Spring
Tetsuya Sakai, Jinming Shi, Misu Iwahara, Akio Nagamatsu, Yasuhiro Inogo, Akio Yamasaki, Mitsuo Yajima, TomohisaKatoh, Hiroshi Ohide

0535: Coupled Vibration of the Automotive Brake and Driveline During Stick-Slip Motions
Jin Zhang, Nong Zhang, Ashley Crowther

ENHRC: ENVIRONMENTAL NOISE IN HIGH-RISE CITIES

0164: Application of Quadratic Residue Diffusers to Transportation Noise Control
Buret Marc, In King Kwong, Lam Yiu Wai, Leung Catherine Wai Man

0224: Spatial Decomposition of Traffic Noise with Microphone Array Measurement
Kai Chung Tam, Shiu Keung Tang, Sia Kit Lau

0337: The Significance of Temperature Gradient on the Propagation of Noise to High Rise Buildings in Urban Cities
Yiu W. Lam

0371: Options for Traffic Noise Reduction in London
Greg Watts

0445: Delimitation of Quiet Areas in a Compact Dense City
Hai Lin, Kin-Chen Lam

0464: Difficult Solutions for Noise Problems from Open Concerts at the Metropolitan Centre of Hong Kong
C. L. Wong, P. C. Yip

0472: The Application of the Close-proximity Method - Hong Kong Experience
Wai Kwong Ng, Wing Tat Hung, Greg Watts

0473: Review of Traffic Noise Problems and Propose Noise Control Policy for Hong Kong
Thomas T K Ho, C M Mak, H F Chan

0153: Comparison of Traffic Noise Distribution between High and Low Density Cities
Wang Bo, Kang Jian, Zhou Jie

0474: Monitoring of Transport Noise in Large Cities: Comparison and Results of European and Russian Experience
Cerniglia Andrea, Vassiliev Andrei, Alekseeva Natalia

0476: Simulating Noise in a Virtual Environment
Kc Hei, Andy Chung

0553: Controlling Railway Noise in a High-rise City - Tackling the Source Innovatively
Richard K. Kwan, Alson Pang

0652: An Innovative Approach for in-situ Determination of Noise Barrier Insertion Loss in Hong Kong
Kin Wai Cheng, Hon Au, Kwok Leung Yeung Mauric, Shiu Keung Tang

0717: Practical Use of ASJ RTN-Model 2003 on Road Traffic Noise Mapping in City Area
Hirotsuki Imatomi, Kazutoshi Fujimoto, Yasumori Takahashi, Ken Ahai, Yasuhiro Hiraguri

0790: On the Modification of Potential Barrier Correction Chart in the Calculation of Road Traffic Noise Prediction Scheme
Maurice Ki Yeung, Ken Li
0919: Analysis of Integrated Noise Maps for Road Traffic and Railway Noise .........................................................1955
Sang Eun Park, Jin Sun Park, Chun Yeon Park, Jong Wha Oh, Dae Joong Kang, Jae Won Lee

0367: Integration of Noise Monitoring with Video Streaming and Traffic Tracking in Dense High-rise City ..................1964
Andy Chang, Jonathan Kwan, James Choi

0071: Vertical Noise Profile in High-Rise Residential Environment .................................................................1969
S. M. Alam, S. E. Lee, W. L. H. Johnny

0178: Study on Generation Mechanism of High Level Sound Generated in Boiler and Heat Exchanger .......................1983
Kantihiko Ishihara

Hear Christopher Fj, Pyke Jonathan, Lee Samantha

  Zheng Si, Hao Peng, Lu Chun, Lian Xiaomin, Li Xiaohu
0401: Study of Combustion Noise under Turbocharged Condition in DI-Diesel Engine........................................5687
  Li Zhouchen, Shi Guoqun, Wei Haisiao
0422: Vibration Excitation in an Electric Traction Motor for a Hybrid Electric Vehicle........................................5697
  Matthias Boening, Knut A. Kasper, Rik W. De Doncker
0152: Prediction and Noise Reduction Design of Car Interior Vibration and Noise..............................................5709
  Cao Youqiang, Deng Zhaoxiang
0197: Chaos in Brake Squeal Noise...........................................................................................................................5717
  Sebastian Oberst, Joseph Cs Lai, Stephen Moore, Antti Papinainen, Saif Hamdi
0238: Modal Based Structural-Acoustic Optimization Strategy to the Target Cascading of Sound and Vibration
  Quality Specifications..................................................................................................................................................5735
  Sophie Bourrachet, Louis Jazquel, Sebastien Bexset
0580: Acoustic Modeling of Heat Exchangers........................................................................................................5752
  Yan Jiang, Maos Abom
0697: Analysis of the Disc/Pad Interface Dynamic Centre of Pressure in Brake Squeal...........................................5769
  Chris Tallbot, John D Fieldhouse, Naveed Ashraf
0617: Vibro-Acoustic Modeling of a Commercial Vehicle to Reduce the Interior Noise Level...............................5778
  Gulsen Kamci, Ipek Basdogan, Aysegul Caymanci, Iker Yilmaz
0665: Transfer Path Analysis to Hydraulic Excavator for Reducing Cabin Noise Caused by Hydraulic Pulsation ............................................................5788
  Yousef Tankhah, Masanori Watanabe, Takuya Aoki, Kazuhiko Beda, Seichihiro Takeshita
0510: Determining the Effect of Pad Lining Geometry on Brake Noise Performance............................................5795
  Stephen Moore, Joseph Lai, Sebastian Oberst, Daniel Stanef, Antti Papinainen
0924: Recent advancements in Dual Clutch Transmission Modelling and Simulation..........................................5812
  Paul David Walker, Nong Zhang, Jeka Jeyakumaran, Richard Tamba, Simon Fitzgerald
0935: Pass-By Noise Measurements Using Beamforming Technique
William D’Andreafonseca, Samir N. Y. Gerges, Robert P. Dougherty

0198: Statistical Analysis of Brake Squeal Noise
Oberst Moritzsebastian, Joseph Cs Lai, Stephen Moore, Antii Papinniemi, Said Hamdi

0909: A Model to Compute and Quantify Automotive Rattle Noises
L. Dervand, N. Hamzaoui, J. M. Duffal

0727: Dynamic Instability Visualization of a Rubber/Glass Interface
Fabrice Deleau, Mazuyer, Perret Liaudet, Koenen, Rigaud

VRM: VIBRATIONS OF ROTATING MACHINERY

0205: Performance of Hybrid-type Vibration Isolation Wall using Gas Cushions
Shinji Kushihara, Makoto Otsuka, Hisashi Fukada, Kiyoshi Hayakawa

0263: FEA for Effects of Sound Bridge Phenomena on Vibration Transmission with Damping Between Automotive Double Walls

0346: Isolation of Performance Spaces from Groundborne Vibration
Steven L. Wolfe, Pablo A. Darous, Deborah A. Jue

0405: Attenuation of Flexural Vibration for Floating Floor Induced by Train Vibration
C. K. Hsi, C. F. Ng

0357: Full-Scale Field Test About the Ground Vibration Reduction on Press-Type Scrap Tire Isolation Wall Without and with Anchoring
Takahiko Kashimoto, Kiyoshi Hayakawa, Masakazu Moriwaki, Yusuke Kashimoto, Tamotsu Matsui

0802: A Simulation of the Torsional Vibration in a Medium Sized Diesel Engine for Condition Monitoring Purposes
P. Charles, F. Gu, A. D. Ball, J. Jiang, J. K. Sinha

0457: A Method to Reflect Frequency and Amplitude Dependence of Dynamic Stiffness on Time Domain Analysis
Jong-Oh Sun, Ki-Sun Kim, Kwang-Joon Kim

0539: FEA of Damped Vibration for Two Viscoelastic Blocks Connected by a Nonlinear Spring with Linear Hysterisis
Takao Yamaguchi, Ken-Ichi Nagai, Shinichi Maruyama, Tomoaki Suito

Yeu-Jong Huang, Chao-Jung Chen, Sheng-Hang Wang, Kuang-Yih Tsuei, Vincent Ting

A. Farshidianfar, N. Nickmehr

0753: Rotor Crack Detection Using Pattern Search and Genetic Algorithm
M. Silani, S. Ziaei-Rad, M. Jamshidian
