</table>
Reduced Set Support Vector Machines: Application for 2-Dimensional Datasets
A. Hussain, S. Shahbudin, H. Husain, A. Samad, N.M. Tahir

SESSION 4- WIRELESS NETWORKING 1

Comparison of Weighted-Average and Median Filters for Wireless Retransmission Timeout Estimation
A.F. Chan, J. Leis

Development and Performance Evaluation of a Flexible, Low Cost MANET
M. Abolhasan, B. Hagelstein, J.C.P. Wang, D.R. Franklin, F. Safaei, T. Wysocki

Energy Efficient and Stable Weight Based Clustering for Mobile Ad hoc Networks
S.H. Bouk, I. Sasase

Impact of Probability of Transmission on Slotted ALOHA for Wireless Networks Employing MIMO Spatial Multiplexing
K. Hunchangsith, M.E. Bialkowski, F. Wang

Node Localisation in Wireless Ad Hoc Networks using Time Difference Of Arrival
J. Arnold, N. Bean

SESSION 5- WIRELESS NETWORKING 2

Outage Probability Analysis of a Diamond Relay Network with Opportunistic Spectrum Access
N.A. Surobhi, M. Faulkner

Performance of Real-Time Multicast/Broadcast Services over TDD-OFDMA
H.L. Chan, D. Chieng, C.M. Tan, F.T. Lee, S.W. Tan

Route Optimization for Proxy Mobile IPv6 in IMS Network
T. Chiba, H. Yokota, A. Dutta, D. Chee, H. Schulzrinne

Wireless Network Coding in Multi-Cell Networks: Analysis and Performance
J. Manssour, A. Osseiran, S.B. Slimane

SESSION 6- SIGNAL PROCESSING FOR MULTIMEDIA 2

Adaptive Circular Object Detection
C.N. Young, J.J. Zou

Autocorrelation Analysis of Spatial Features for Mobile Video Services
F. Wang, H. Zepernick

Deformable Object Tracking with Statistical Models
Z.Q. Huang, Z. Jiang

Robust EZW Image Transmission Scheme Using Distributed-Alamouti Codes in Relay Networks
T.Q. Duong, H. Zepernick

Performance Evaluation of MPEG-4 Video Transport in Rayleigh Fading Channel
G.A. Al-Suhail
SESSION 7- COMMUNICATION THEORY AND TECHNIQUES 2

A Broadband Antenna Array Pattern Synthesis Technique with Very Low Sidelobes
M.R.S. Jahromi, L.C. Godara

Analysis and Design of Low-Profile High-Gain Resonant Cavity Antennas with Single-Layer Superstrates
Y. Ge, K.P. Esselle

Optimum Discrete Signaling over Channels with Arbitrary Noise Distribution
R. Mathar, A. Schmeink, M. Zivkovic

Signal Sensing for Cognitive Radios Using Synthetic Multipath
M. Alamgir, M. Faulkner, P. Conder

The Effect of Amplifier Distortion and Filter Type on BER of WCDMA-UMTS Mobile Radio Systems
C.J. Kikkert

Distributed Unitary Space-Time Modulation in Partially Coherent and Noncoherent Relay Networks
D.H.N. Nguyen, H.H. Nguyen, H.D. Tuan

SESSION 8- DSP ALGORITHMS AND HARDWARE IMPLEMENTATIONS

A Digital Signal Processing Based Ka Band Satellite Beacon Receiver / Radiometer
C.J. Kikkert, O.P. Kenny

An Optimized Sector Nulling Technique for Broadband Antenna Array
L.C. Godara, M.R.S. Jahromi

Cost-Effective Implementation of TETRA Codec Using the Primitive Functions of the Compiler
K. Byun, B. Koo, N. Eum

Study on Multi-Channel Receiver Based on Polyphase Filter Bank
M. Iwabuchi, K. Sakaguchi, K. Araki

Voice Activity Detection using AdaBoost with Multi-Frame Information
T. Usukura, W. Mitsuhashi

SESSION 9- COMMUNICATION THEORY AND TECHNIQUES 3

A Simplified Implementation of a Probabilistic Equalizer for Impulse Radio UWB in High Data Rate Transmission
S. Mekki, J. Danger, B. M scop e in, J.J. Boutros

An Effective and Scalable Multiuser Architecture for the Base Station Receiver
M. Youssef, F. Monteiro, A. Dandache, C. Diou

FFH/BFSK Suboptimum Maximum-Likelihood Receiver over Frequency-Selective Rician Fading Channel with Worst Case Band Multi-tone Jamming
M. Ghobadi, M. Kamarei

Improved Performance of OFDM Systems for Fast Time-Varying Channels
E. Peiker, J. Dominicus, W.G. Teich, J. Lindner

Optimal Training Sequence Design for MIMO-OFDM in Spatially Correlated Fading
V.D. Luong, N.N. Tran, H.D. Tuan
SESSION 10- COMMUNICATION THEORY AND TECHNIQUES 4

Simplified Local Search Multiuser Detection for QPSK S/MIMO MC-CDMA Systems ........................................300
L.D. Oliveira, T. Abrao, F. Casadevall

Space Sensing Based Random Access in SIMO-OFDM Systems .................................................................306
C. Pan, Y. Cai, Y. Xu

Theoretical Multipath Channel Model During Rain for BFWA Employed in Dense Urban Areas ..........................................................312
M. Cheffena, T. Ekman

User Selection Based on Feedback Threshold for MIMO Broadcast Channels .............................................318
Y. Xu, J. Zhao, Y. Cai

SESSION 11- UNCONVENTIONAL APPLICATIONS OF SIGNAL PROCESSING

Spherical Harmonic Analysis and Model-Limited Extrapolation on the Sphere: Integral Equation Formulation ..................................................................................................323
R.A. Kennedy, W. Zhang, T.D. Abhayapala

Lung Sound Localization Using Array of Acoustic Sensors ........................................................................329
S.M.A. Salehin, T.D. Abhayapala

Efficient Blind Separable Kernel Deconvolution for Image Deblurring .......................................................334
R.A. Kennedy, P.D. Samarasinghe

Automatic Audio Segmentation Using the Generalized Likelihood Ratio .....................................................341
D. Wang, R. Vogt, M. Mason, S. Sridharan

Artificial Neural Network for Identification of Heart Problem ........................................................................346
R.A. Azra’ai, M.N.B. Taib, N.M. Tahir

Multi-site Nerve Cuff Based Implantable System for Wide Bandwidth ENG Signal Recording ..................352
X.H. Xu, C.T. Clarke, J.T. Taylor

SESSION 12- SIGNAL PROCESSING FOR MULTIMEDIA 3

A Study of Phonetic Feature Representations for SVM-Based Speaker Verification ........................................358
E. Merkley, B. Baker, R. Vogt, S. Sridharan

Maximum Likelihood Estimation of Time Delays in Multipath Acoustic Channel ...................................363
T.P. Bhardwaj, R. Nath

Shape Invariant Recognition of Polygonal Road Signs by Deforming Reference Templates ..................367
J. Yuyama, W. Mitsuhashi

Speech Endpoint Detection Using Gradient Based Edge Detection Techniques ........................................373
H. Ghaemmaghami, R. Vogt, S. Sridharan, M. Mason

Statistical Analysis Approach for Posture Recognition ...............................................................................381
N.M. Tahir, A. Hussain, S.A. Samad, H. Husain
POSTER SESSION 1- SIGNAL PROCESSING 1

A Design Technique for Microstrip Filters .........................................................388
C.J. Kikkert

FPGA Implementation of Spectral Subtraction for In-Car Speech Enhancement and Recognition .................................................................393
J. Whittington, K. Deo, T. Kleinschmidt, M. Mason

Non-linear Echo Cancellation – A Bayesian Approach ..................................401
S. Braithwaite, R. Addie

Real-Time Edge Adaptive Color Interpolation for an Ultra Small HD-Grade Video Sensor in Mobile Devices ........................................410
H. Kim, J. Kim, W. Choi, B. Kang

Signal Identification for a Wide-Range Sound (Piano) Using Notch and Resonator-Type Comb Filters .........................................................414
Y. Tadokoro, F. Matsushita

Small Signal Modeling for the Smart Power IC ..................................................421
H. Xu, H. Kim, K. Zhang

Towards Smart-Pixel-Based Implementation of Wideband Active Sonar Echolocation System for Multi-target Detection ................................428
C. Tseng, M. Cole

A Multimodal Iris Recognition Using Gabor Transform and Contourlet ........435
H.J. Koh, W.J. Lee, M.G. Chun

Advanced Directionally Weighted Demosaicing for Digital Cameras ..........441
T. Jung, S. Yang, J. Lee, J. Jeong

Affine Registration Using Graph Representations of Images .......................447
T. Nave, J.M. Francos

A Pattern Recognition System for Environmental Sound Classification based on MFCCs and Neural Networks .......................................453
F. Beritelli, R. Grasso

POSTER SESSION 2- COMMUNICATION SYSTEMS 1

A Comparison of Packet Scheduling Algorithms for OFDMA Systems ........457
Y. Cai, J. Yu, Y. Xu, M. Cai

A Low-Complexity High-Performance Decoding Algorithm for Fixed-Point LDPC Decoders .................................................................462
J. Hung, S. Chen

Application of SVD to Sense Wireless Microphone Signals in a Wideband Cognitive Radio Network ..........................................................467
S. Xu, Y. Shang, H. Wang

Effects of Nonlinear Amplifiers and Narrowband Interference in MIMO-OFDM with Application to 802.11n WLAN ......................................474
D.W. Chi, P. Das

Investigation into a Whitening-Rotation-Based Semi-blind MIMO Channel Estimation for Correlated Channels .......................................481
X. Liu, F. Wang, M.E. Bialkowski
Modeling and Validation of the Parameters of a Quad Cable for Common Mode DSL Applications ................................................................. W. Foubert, C. Neus, L. Van Biesen, Y. Rolain

MUSIC-ZF Modal Channel Estimation for an OFDM-OQAM System ................................................................. G. Garbo, S. Mangione, V. Maniscalco

On MIMO K-Best Sphere Detector Architecture Complexity Reductions ................................................................. J. Lofgren, P. Nilsson

Orientation Invariant Diversitgy Gain Using Transmit Polarization Diversity ..................................................... Y.C. Huang, B. Senadjf

POSTER SESSION 3- COMMUNICATION SYSTEMS 2

A Serial MAC Architecture for FPGA Implementation of a Complex Adaptive Beamformer ............................................................. T. Salim

Semantic Web Services Offer Discovery Using OWL-S IDE ......................................................................................... N.Z.C. Htoo, T.T.S. Nyunt

From Ethernet to Synchronous Ethernet .................................................................................................................. D.T. Bui, M. Le Pallec

A Concept on Signaling Spacial Network Conditions to Provide Quality of Service in a VANET ................................................................. B. Wiegel, Y. Gunter, H.P. Grobmann

An Intelligent Scheme of Secure Routing for Mobile Ad Hoc Networks ........................................................................ Z. Zhang

Analysis of Vertical Session Handoff for Self-Similar Traffic in a Heterogeneous Mobile Data Network ........................................................................ K.S. Munasinghe, A. Jamalipour

Application of Directional Antenna to Wireless Multihop Network Enabled by IPT Forwarding ................................................................. K. Mitsunaga, K. Maruta, Y. Higa, H. Furukawa

Connectivity of Ad Hoc Networks: Is Fading Good or Bad? ......................................................................................... X. Zhou, S. Durrani, H.M. Jones

Mobile Ad-hoc Network Key Management with Certificateless Cryptography ................................................................. Z. Zhang, W. Susilo, R. Raad

POSTER SESSION 4- SIGNAL PROCESSING 2

Adaptive Sampling Strategy for Accurate and Scalable Anomaly Detection in NGMN ................................................................. F. Hashim, A. Jamalipour

Fluency Enhancement of Machine Translation ......................................................................................................... S.L. Manion, A. Punchihewa
Audio Data Retrieval and Recognition Using Model Selection Criterion ................................................................. 597
K. Biatov, W. Hesseler, J. Koehler

Estimation of Data Hiding Capacity of Digital Video based on Human Visual Model in Temporal Domain ................................................................. 602
H. Khalilian, S. Ghaemmaghami

Global Featureless Estimation of Radial Distortions ........................................................................................................ 606
T. Nave, J.M. Francos

Impulse Response Measurement with Sine Sweeps and Amplitude Modulation Schemes ........................................... 617
Q. Meng, D. Sen, S. Wang, L. Hayes

Investigation & Comparison of Robust Stereo Image Matching using Mutual Information & Hierarchical Prior Probabilities ........................................................................ 622
C. Fookes, S. Sridhara

Local-DCT Features for Facial Recognition .................................................................................................................. 632
B. Schwerin, K. Paliwal

Most Probable Mode-Based Fast 4 × 4 Intra-Prediction in H.264/AVC ........................................................................ 638
B. La, J. Jeong, Y. Choe

Comparative Evaluation of Two Multisensory Video Surveillance Techniques for Pedestrian Tracking .................. 642
G. Chetty

Investigating a Two Stage Facial Expression Rating and Classification Technique ...................................................... 648
G. Chetty

POSTER SESSION 5- SIGNAL PROCESSING 3

Naive Bayes Classification of Adaptive Broadband Wireless Modulation Schemes with Higher Order Cumulants ........................................................................................................................................ 656
M.L.D. Wong, S.K. Ting, A.K. Nandi

Multi-Modal Deformable Medical Image Registration ........................................................................................................ 661
C. Fookes, S. Sridhara

Object Tracking using Multiple Motion Modalities ......................................................................................................... 670
S. Denman, C. Fookes, S. Sridhara, V. Chandran

Adjusted Training of HMM models for Slovak Speech Recognition System ............................................................... 680
J. Kacur

Scene Invariant Crowd Counting for Real-Time Surveillance .......................................................................................... 685
D. Ryan, S. Denman, C. Fookes, S. Sridhara

Using Noise Reduction in Mode Selection and Pitch Search .......................................................................................... 692
L. Laaksonen, A. Ramo

A Modeling Component for SSF based Network Simulation Package ........................................................................ 698
S. Yoon, S. Kim

Effect of Background Noise on the SNR Estimation of Biometric Parameters in Forensic Speaker Recognition .................................................................................................................. 704
F. Beritelli

Experimental investigation of Signal-to-Noise Ratio Gain and Stochastic Resonance For Filtered Signals in Static Nonlinearities .............................................................................................................. 709
A. Davidovic, E.H. Huntington, M.R. Frater
Iterative Clustering Approach for Text Independent Speaker Identification using Multiple Features

A. Revathi, Y. Venkataramani

POSTER SESSION 6- COMMUNICATION SYSTEMS 3

Methods of Detection and Analysis of UMTs Signals

P. Skokowski, J. Lopatka

Monopulse Antennas for Radar Seekers

P. Gajewski, W. Kolosowski, J. Lopatka, A. Jeziorski

Mobile Node Tracking in an Ad Hoc Network Using Double Time Difference of Data Arrival and Kalman Filtering

H.Y. Zhang, J. Li, M. Bialkowski, G. Einicke, J. Homer, F. Wang

Performance of Coded Multi-hop Ad-hoc Networks in OFDM Wireless Environments

M.M. Abdellatif, S.A. Zummo

Power Aware Wireless Receiver Design Utilizing Carrier Sensing Based on Cross-Correlation

I. Lee, Y. Kim, S. Lee

Relay Selection Utilizing Power Control for Decode-and-Forward Wireless Relay Networks

Y. Zhang, Y. Xu, Y. Cai

Securing Wireless Mesh Networks with Ticket-Based Authentication

S. Qazi, Y. Mu, W. Susilo

Wireless Interactive System for Patient Healthcare Monitoring using Mobile Computing Devices

M. Ros, M. D'Souza, A. Postula

On the Spatial Localization of a Wireless Transmitter from a Multisensor Receiver

G.N. Dickins, R.A. Kennedy

Author Index
