TABLE OF CONTENTS

Volume 1

Case History – World’s First Slim Open Hole Smart MRC Wells ...............................................................1
  Khalifah M. Al-Amri

Solid Expandable Technology for Zonal Isolation of Loss Circulation Formation: Case Study Shuaiba Formation ............................................................................................................................... 7
  J. Ekpe, A. Alexeenko, J. Al-Thuwaini, M. Emad, R. Khanlarov

Evidences for New Attractive Gas Exploration Targets in Abu Dhabi Upper Permian Section .................................................................................................................................................................................13
  Ahmed K. Taher, Ahmad S. Al Suwaidi, AbdulRahman Al Habshi

A New Approach For Improving Permeability Estimation by Integrating Sequential Gaussian Simulation (SGS) With Co-Active Neuro Fuzzy Inference System (CANFIS) Network ..................................................................................................................................................27
  Yousef Rajfei, S. M. Mousavi Mirkalahi, Rahim Masoudi, A. Ataei

Innovative Solution to Isolate Cross Communicating Reservoirs in Short Radius Wells .................................................40
  Adib A. Al-Mumen, Hatem F. Balghoneim, Khalifa M. Al-Amri, Zaki A. Al-Baggal

Improved Method for Compositional Modeling Using a Fine Scale Geological Description Within Gas Injection Pattern in Carbonate Reservoir ..........................................................................................................................................................49
  Tawfiq Obeida, Adrian Gibson, Hussain Al-Hashemi, Bikram Barua

Where is the Gap? Is it in More Reservoir Engineers or in Leveraging New Skills and Workflows that Enhances Individual Productivity? ..................................................................................................................................................55
  C. Amudo, T. Graf

Advanced Technologies for Critical Drilling Applications ..........................................................................................................................62
  Michael J. Jellison, Hermann F. Spoerker

Permeability Estimation Using Log Data, Abu Dhabi Offshore Field, UAE ..........................................................................................74
  Magdi Bazara, Salman M. Salman

An Update and Perspective on Field-Scale Chemical Floods in Daqing Oilfield, China ........................................................................79
  Hui Pu, Qinglong Xu

Mechanical Earth Model (MEM): An Effective Tool for Borehole Stability Analysis and Managed Pressure Drilling (Case Study) ...............................................................................................................................................87
  M. Afsari, M. R. Ghafoori, M. Roostaeian, A. Haghsenas, A. Ataei, R. Masoudi

Understanding of Oilfield Souring and Effective Monitoring: Two Cases Study ..........................................................................................................................99
  Ardian Nengkoda, Musallam Manidhari, Mohammed Hajri, Hilal Barhi, Liali Qasmi, Ron Hofland

Sulfur and Asphaltene Deposition During CO2 Flooding of Carbonate Reservoirs ................................................108
  Abdulrazag Y. Zekri, Shedid A. Shedid, Reyadh A. Almehaideb

Reservoir Simulation Study on Improvement of Waterflooding Effect for a Naturally Fractured Low Permeability Field in Daqing, China: A Successful Case ..................................................................................117
  Hui Pu, Guofeng Wang, Yingxin Li

The Use of Tracers for Reservoir Characterization ..........................................................................................................................128
  L. A. Anisimov, V. N. Kilyakov, I. V. Vorontsova

Integrated Fracture Study using Formation Micro Imager, Stoneley Waves and Formation Evaluation Results in Carbonate Reservoir at Gulf of Suez, Egypt ..................................................................................136
  Essam A. E. A. Bassim, Kaoru Yamaguchi, Dedi Juandi, Mahmoud Eman, Aziza Ali
