## TABLE OF CONTENTS

1. Reliability Evaluation and Application for Systems with Different Phases
   Huairui Guo, Adamantios Mettas, Arai Monteforte
   John D. Andrews, Darren R. Prescott, Rasa Remenyte-Prescott
3. Risk Analysis of Phased-Mission Systems with Multiple Failure Modes
   Takehisa Kohda, Satoshi Matsumoto, Masaki Nakagawa
4. Reliability Analysis of Phased-Mission Systems
   Dong Liu, Chunyuan Zhang, Weiyan Xing, Rui Li
5. Optimal Highway Maintenance Policies under Uncertainty
   Bruno Castanier, Thomas G. Yeung
6. A Study on Optimal Age Replacement of Dozer Engines
   P. V. N. Prasad, K. R. M. Rao
7. World-Class Supply Chain Reliability in General Aviation
   Murad Hamada, Glenn Jarrell
8. Uncertainty in Life Cycle Cost of Railway Track
   Ambika Prasad Patra, Peter Söderholm, Uday Kumar
   Larry H. Crow
10. An Age-Adjusted Comparison of Field Failure Data
    Tony Halim, Loon-Ching Tang
11. Increasing the Effectiveness of FRACAS
    Michael Ciemian
12. Identifying Factors Influencing Reliability of Professional Systems
    Aravindan Balasubramanian, Kostas Kevrekidis, Peter Sonnemans, Martin Newby
13. Assessment of Launch Vehicle Debris Risk During Ascent Aborts
    Ken Gee, Donovan Mathias
    Donovan L. Mathias, Susie Go, Ken Gee, Scott Lawrence
    Scott L. Lawrence, Donovan L. Mathias
16. Software Tools for PRA
    Ming Li, Paula S. Pruessner
17. Bayesian Inference Model for Step-Stress Accelerated Life Testing with Type-II Censoring
    Jinsuk Lee, Rong Pan
18. Construction of Causality Diagram Model for Diagnostics
    Guo Li, Jianmin Gao, Fumin Chen
19. Australian Defence Standard for Bayesian Reliability Demonstration
    Scott Yates
A Case Study on Network Reliability Analysis for Systems with Non-Independent Paths .......................... 110
Meng-Lai Yin, Rafael R. Arellano

Functional and Dysfunctional Analysis of a Mechatronic System ................................................................. 116
Amel Demri, Abdérafi Charki, Fabrice Guérin, Hervé Christofol

On Determining Sample Size and Testing Duration of Repairable System Test ............................................. 122
Huairui Guo, Rong Pan

Life Testing of Plastic Optical Fibers for Lead-Acid Battery Fast Charge Equipment ................................. 128
Jorge Marcos Acevedo, Ana Maria Cao Paz, Santiago Fernandez-Gomez, Maria Luisa Soria

Efficiently represent diverse System Field Usage in Reliability Testing ......................................................... 134
Peter J. M. Somemans, Arvindan Balasubramanian, Kostas Kevrekidis, Martin J. Newby

A Unified Model for Evaluating the Safety Integrity Level ............................................................................ 139
Julia V. Bukowski

Analysis of the Performance of Safety-Critical Systems with Diagnosis and Periodic Inspection ..................... 145
Tieling Zhang, Yiming Wang, Min Xie

Probabilistic analysis of safety-critical ............................................................................................................ 151
Rasmus Adler, Dominik J. Domis, Marc Förster, Mario Trapp

Safety Management for Electromechanical Systems of Railway Vehicles ..................................................... 157
Zdenek Vintr, Michal Vintr

System Reliability Analysis with the Response Surface Method ................................................................. 163
John Z. Gyekenyesi, Bill Strack, Edward J. Zampino, Shantaram S. Pai

Optimizing the Number of Failure modes for Design Analysis Based on Physics of Failure ..................... 168
Valter Loll

Using Competitive Analysis to Get the Competitive Advantage ............................................................. 173
Doug Farel, Mike Silverman

Development of a Design-For-Reliability method for complex systems ..................................................... 177
Guillaume Poncelin, Jean-Pierre Derain, Aline Cauvin, Denis Dufrène

Early Detection of Warranty Issues: A Multi-Disciplinary Literature Survey ........................................... 183
Sameer Vittal, Hemy Neuman

Analysis of Decisions Involved in Offering a Product Warranty ................................................................ 189
Bryan LeBlanc

A Practical Method for Failure Analysis Using Incomplete Warranty Data .................................................... 195
Karen Mohan, Brad Cline, Jennifer Akers

Design For Warranty Cost Reduction ........................................................................................................ 202
Robert H. Mueller

A Simple Classification Approach to Build a Bathtub .................................................................................. 208
Brian Douglas Haan

System Reliability Evaluation Using Normalized Test Data ..................................................................... 214
James B. Farmer, Paul M. Ellner

Reliability Improvement of Deformation Tools with the Taguchi Robust Design ........................................ 220
Calin Florin Baban, Marius Baban, Ioan Eugen Radu

Use of Heritage Data and Other Partially Applicable Information in Reliability Prediction of Systems under Development ................................................................. 226
Enrique López Droguett, Ali Mosleh
Analysis of Multi-State Systems Using Multi-Valued Decision Diagrams .............................................................. 348
Jennifer Akers, Robert Bergman, Suprasad V. Amari, Liudong Xing

Probabilistic Common-Cause Failures Analysis .................................................................. 355
Liudong Xing, Wendai Wang

Fault Propagation Analysis for Complex System Based on Small-World Network Model .......... 360
Jianmin Gao, Guo Li, Zhiyong Gao

Advanced Human Factors Process Failure Modes and Effects Analysis ................................ 366
Mei Rong, Tingdi Zhao, Yang Yu

Intermittent Faults and Effects on Reliability of Integrated Circuits .................................. 372
Cristian Constantinescu

How to Develop a Qualification Test Plan for RoHS Products .............................................. 377
Mike Silverman, Fred Schenkelberg, Craig Hillman

Reliability Assessments of Vibration-Induced Tube Fatigue Failure .................................. 383
Jianxiong Chen, Wenzhen Yan

What’s Wrong With Bent Pin Analysis, And What To Do About It ...................................... 388
Nathaniel Ozarin

Optimal Software Release Time Determination with Risk Constraint .................................. 395
Bo Yang, Huajun Hu, Jun Zhou

A Methodology for Quantitative Evaluation of Software Reliability using Static Analysis .... 401
Walter Schilling, Mansoor Alam

Parameter Estimation for Software Reliability Models Considering Failure Correlation ....... 407
Bo Yang, Suchang Guo, Ning Ning, Hong-Zhong Huang

Hybrid Methodology and Software Platform for Probabilistic Risk Assessment .................. 413
Katrina Groth, Dongfeng Zhu, Ali Mosleh

Changes in Items’ Failure Pattern during Maintenance: An Investigation of the Perfect Repair Assumption .......................................................... 419
J. M. Block, P. Söderholm, T. Tyrberg

System Reliability and Condition Based Maintenance .......................................................... 426
Jeffrey Banks, Karl Reichard, Michael Drake

Parameter Estimation for a Repairable System under Imperfect Maintenance .................. 431
Pingjian Yu, Joon Jin Song, C. Richard Cassady

Bayesian Analysis, Imperfect Maintenance, Parameter Estimation, Reliability and Maintainability .......................................................... 437
Steffen Nebel, Bernd Bertsche

Reliability Analysis of k-out-of-n Load-Sharing Systems .................................................... 443
Suprasad V. Amari, Robert Bergman

Reliability Predictions – More than the Sum of the Parts .................................................... 449
James A. McLinn

Telcordia Reliability Prediction Procedure: Upper Confidence Levels ............................... 455
Jay Bennett

Electronics in Harsh Environments - Product Verification and Validation .......................... 459
Kirsten Stentoft, Marie Louise Petersen

Threat Effects Analysis: Applying FMEA to Model Computer System Threats .................. 466
John B. Bowles, William Hanczaryk
Nonparametric Model-Based Prognostics ................................................................. 472
  J. Wesley Hines, Dustin R. Garvey

Examination of the Interplay of Reliability and Security using System Modeling Language ............. 478
  Brian Douglas Haan

Prognostics and Health Management Using Physics-of-Failure ......................................................... 484
  Jie Gu, Michael Pecht

Maintainability Readiness Assessment (MRA) .................................................................................... 491
  Gary J. Zukowski, Donald Dzedzy

A Historical Survey with Success and Maturity Estimates of Launch Systems with RL
Upper Stage Engines ......................................................................................................................... 494
  Susie Go

Maintenance Policy for a Non-stationary Deteriorating System ...................................................... 499
  Estelle Deloux, Bruno Castanier, Christophe Bèranguer

Spare Parts Management Considering New Sales ............................................................................. 505
  Haitao Liao, Peng Wang, Tongdan Jin, Sunny Repaka

An Integrated Maintenance Management Information System is the Key to Enabling
Condition Based Maintenance ........................................................................................................ 511
  F. Chris Sautter, Patrick W. Jemison, Christopher M. Goes, Jerod M. Wooten
