2009 IEEE International Symposium on Power Line Communications and Its Applications

(ISPLC)

Dresden, Germany
29 March – 1 April 2009
Table of Contents

Keynote 1. PHY LAYER and Standardization
   Stefano Galli, Panasonic Corporation

Keynote 2. ODFM-Based High-Speed Narrowband PLC Approved for Smart Metering and Smart Grids
   Gerd Bumiller, iAd GmbH
   Karsten Pott, arivus GmbH

Keynote 3. PLC Applications in Latin America Utilities: the Smart Grid Approach
   Pedro Jatobá, ELETROBRÁS

   Lee Gould, Panasonic Corporation

Keynote 5. Research and Customized Solutions on Any-Wire IP-Networks for Multiple Infrastructures
   Michael Koch, Devolo

Session 1A
Channel Characterization I

1 An Information Theoretic Analysis on Indoor PLC Channel Characterizations
   Hao Lin; Aawatif Hayar; Pierre Siohan

2 Bottom-Up Transfer Function Generator for Broadband PLC Statistical Channel Modeling
   Andrea Tonello; Tao Zheng

3 A Simplified Model for the Indoor Power Line Channel
   Stefano Galli

4 Novel Approach for PLC Impulsive Noise Modelling
   Mohamed Tlich; Hassina Chaouche; Ahmed Zeddam; Pascal Pagani

5 Analysis of the Periodic Impulsive Noise Asynchronous with the Mains in Indoor PLC Channels
   José Antonio Cortés Arrabal; Luis Diez; Francisco Cañete; Jesús Manuel López Fernández

Session 1B
Error Correction and Multiple Access

1 Impulsive Noise Error Correction in 16-OFDM for Narrowband Power Line Communication
   Anil Mengi; Han Vinck

2 Re-Synchronization of Permutation Codes with Viterbi-Like Decoding
   Ling Cheng; Theo Swart; Hendrik Ferreira
3 Optimal Time Slot Design in an OFDM-TDMA System over Power-Line Time-Variant Channels
Andrea Tonello; José Antonio Cortés Arrabal; Salvatore D’Alessandro

4 Cognitive Power Line Communication System for Multiple Channel Access
Ser Wah Oh; Ronghong Mo; Yinghui Ma; Yonghong Zeng

5 Multi-Band Filters for Frequency Division Multiplexing Networks in Power Line Communications
Yoshihiro Akeboshi

Session 2A
Channel Characterization II

1 Experimental Verification of Common-Mode Current Generation in Home Electrical Wiring in the Powerline Communications Band
Carlos Rodriguez-Morcillo; Abraham Rubinstein; Marcos Rubinstein; Farhad Rachidi; Ana Vukicevic

2 Estimate of ciclostationary PLC channels by a modified Self Organizing Map
Lisa Bellanti; Marco Raugi; Mauro Tucci

3 Radiation and Attenuation of Single Wire Earth Return Power Lines at LF frequencies
Cornelis Kikkert

4 Measurement Study and Transmission for In-vehicle Power Line Communication
Milad Mohammadi; Lutz Lampe; Mario Lok; Mohammad Mirvakili; Shahriar Mirabbasi; Roberto Rosales; Paul van Veen

5 Measurement and Simulation of Powerline Channel using OFDM for UWB Communication
Shuxian Chen; Xiaodong Chen; Clive Parini

Session 2B
Resource Allocation

1 Hidden Terminal of Korea Standard PLC Protocol in Access Network
Jimyung Kang; Yonghwa Kim; Kwan Ho Kim

2 Packet-Oriented Communication Protocols for Smart Grid Services over Low-Speed PLC
Michael Bauer

3 Distributed Dynamic Resource Allocation for Multi-Cell PLC Networks
Le Phu Do; Ralf Lehnert

4 Time Reuse Algorithms: A Novel Approach to Solving the Issue of Scalability in Dense Power Line Networks
Stefano Galli; Yoichi Masuda; Yoshio Urabe

5 Improvement of Bandwidth Assignment in Broadband PLC Access Networks by Means of Dispatching Method
Abdel Haidine
### Session 3A
#### Electro-magnetic Compatibility and Coupling

1. **Narrowband interference wave immunity characteristics of high-speed PLC with wavelet-OFDM**  
   Kenichi Nakagawa; Satoshi Hosoya; Masamitsu Tokuda  
   Page: 113

2. **OFDM signal transmission characteristics through a switchboard for a power line communication**  
   Satoshi Hosoya; Masamitsu Tokuda  
   Page: 119

3. **Passive, Transformerless Coupling Circuitry for Narrow-Band Power-Line Communications**  
   Mloyiswa Sibanda; Petrus Janse van Rensburg; Hendrik Ferreira  
   Page: 125

4. **An Adaptive Power Control Method to Electromagnetic Environment for PLC in Cargo Ships**  
   Shinji Tsuzuki; Shinpei Tatsuno; Mitsushi Takechi; Toshimasa Okabe; Hiroyuki Kawasaki; Terushi Shinpo; Yoshio Yamada; Shunsuke Takaoka  
   Page: 131

### Session 3B
#### Signal Processing

1. **An Initial Acquisition Method for Channel Synchronization on In-home Power Line Communications**  
   Keita Watanabe; Daisuke Umehara; Satoshi Denno; Masahiro Morikura  
   Page: 137

2. **Coded Narrowband Transmission over Noisy Powerline Channels**  
   Jeebak Mitra; Lutz Lampe  
   Page: 143

3. **Channel Estimation for Power Line OFDM Systems with Unknown Colored Noise Exploiting Real Signal Transmission**  
   Ronghong Mo; Ser Wah Oh; Yonghong Zeng  
   Page: 149

4. **Integrated Wavelet Packet Modulation and Signal Analysis Using Analytic Wavelet Packets**  
   Michael Bauer  
   Page: 154

### Session 4A
#### OFDM

1. **OFDM/OQAM Performance Analysis under Asynchronous Impulsive Noise**  
   Gaetan Ndo; Pierre Siohan; Marie-Helene Hamon  
   Page: 160

2. **Performance of Scaled SLM for PAPR Reduction of OFDM Signal in PLC Channels**  
   Jea Sun Lee; Hui-Myoung Oh; Ji-Tae Kim; Jin Young Kim  
   Page: 166

3. **A Bit-Loaded OFDMA for In-home Power Line Communications**  
   Taro Hayasaki; Daisuke Umehara; Satoshi Denno; Masahiro Morikura  
   Page: 171

4. **Bit-Loading Algorithms for OFDM with Adaptive Cyclic Prefix Length in PLC Channels**  
   Salvatore D'Alessandro; Andrea Tonello; Lutz Lampe  
   Page: 177
5 Influence of Time-Frequency Tiling on BER Performance in Discrete Wavelet Multitone Power Line Transmission  
   Lukasz Zbydniewski; Tomasz Zielinski; Pawel Turcza

6 Phase Based SNR Estimation in OFDM over the Medium Voltage Network  
   Ilias Trachanas; Klaus Dostert; Norbert Fliege

Session 4B  
Network and Services: Coexistence, Management, and System Architectures

1 The Inter-PHY Protocol (IPP): A Simple Co-Existence Protocol  
   Stefano Galli; Akio Kurobe; Masato Ohura

2 Interoperability of Carrier–Modulated OFDM Systems with PRIME  
   Martin Hoch; Gerd Bumiller

3 QoS Broker based architecture design for the PLC access network  
   Agustin Zaballos; Joan Jimenez

4 A novel power line network architecture for managing the energy resources of the residential environment  
   Spyros Tombros; Nikos Mouratidis; Halid Hrasnica

5 Characteristics of 440V Power-Line Channels in Container Ships  
   Jun Nishioka; Shinji Tsuzuki; Yoshio Yamada; Michinori Yoshida; Hiroyuki Kawasaki; Terushi Shinpou

   Hiroshi Kuriyama

Session 5A  
Modulation Schemes

1 On the Design of Filter Bank Systems in Power Line Channels Based on Achievable Rate  
   Francesco Pecile; Andrea Tonelio

2 Transmission Capacity for Indoor PLC: A comparison between DMT and HS-OQAM  
   Hao Lin; Pierre Siohan

3 Multi-Emitting/Receiving Points MMFSK for High-Rate Power-line Communications  
   Bamidele Adebesi; Saqib Ali; Bahram Honary

4 QC-LDPC codes and their performance on Power Line Communications Channel  
   Nikoleta Andreadou; Fotini-Niovi Pavlidou

5 Channel Adaptation for Time-varying Powerline Channel and Noise Synchronized with AC Cycle  
   Kyong-Hoe Kim; Han-Byul Lee; Yong-Hwa Kim; Seong-Cheol Kim
### Session 5B
**Power System Applications**

1. **Power Line Communication over Feeder Cables in an Industrial Application**  
   Marc Anthony Mannah; Christophe Batard; Nicolas Ginot; Mohamed Machmoum
2. **Induction Motor Speed Control Using Power Line Communication**  
   Konate Christophe; Antti Kosonen; Jero Ahola; Mohamed Machmoum
3. **Channel Emulation of Low-Speed PLC Transmission Channels**  
   Michael Bauer; Wenging Liu
4. **Data Communication in the Smart Grid**  
   S. Prasanna; Jyotsna Bapat; George Koomullil; Amrita Lakshmi
5. **Experience of AMR Systems Based on BPL in China**  
   Qingyang Liu; Bingzhen Zhao; Yirong Wang; Jing Hu

### Session 6A
**Channel Estimation and Transmission Systems**

1. **Statistical analysis of the cyclic prefix impact on indoor PLC capacity**  
   Meryem Ouzzif; Jérome Le Masson
2. **Analysis of the Power Line Channel Estimation Error based on Comb-type Pilot Arrangement**  
   David Bueche; Patrick Corlay; François-Xavier Coudoux; Marc Ganzalet; Marie Zwingelstein-Colin
3. **Improved HomePlug AV channel estimation exploiting couding procedure**  
   Raffaele Riva; Marco Odoni; Eleonora Guerrini; Paola Bisaglia
4. **MISO Single-Carrier System with Feedback Channel Information for Narrowband PLC Applications**  
   Fabricio de Campos; Renato Machado; Moises Ribeiro; Marcello Campos
5. **Bit and Power Allocation for Power-Line Communications under Nonwhite and Cyclostationary Noise Environment**  
   Naoya Sawada; Takaya Yamazato; Masaaki Katayama
6. **Very High Bit Rate Power Line Communications For Home Networks**  
   Ali Maiga; Jean-Yves Baudais; Jean-François Hélard

### Session 6B
**Regulation and Experimental Systems**

1. **A Regulatory Framework for Broadband PLC**  
   Diana Tomimura; Victor Vellano Neto
2. **Physical Layer Certification System of Power Line**  
   SeungSik Eom; Hui-Myoung Oh; Taehyun Jeon; Younggyun Kim; Jae-Jo Lee; Sungsoo Choi; Young-Chai Ko
3. **A Study on Non-Intrusive Blocking Filter with Non-Saturation Characteristic to High Current**  
   Jae-Jo Lee; Dong-Seok In; Hui-Myoung Oh
4  SAMBA Project: Performance Analysis of the PLC Network as Return Channel for Interactive Digital Television Applications
   Andre Hirakawa; Moacyr Martucci; Eduardo Polo; Rodrigo Maia

5  Broadband over Powerline Field Trial For Commercial In-Building application in a Multi-Dwelling-Unit Environment
   YaoJung Yang; Charlie Arteaga

6  PRIME from the definition to a SoC solution
   Alfredo Sanz; José_Ignacio Garcia-Nicolás; Pedro Estopiñán; Santiago Miguel
