2009 Asia-Pacific Power and Energy Engineering Conference (APPEEC)

Wuhan, China
28-30 March 2009

Pages 1-580
# TABLE OF CONTENTS

Investigation on Manganese (Mn²+/Mn³⁺) - Vanadium (V²⁺/V³⁺) Redox Flow Battery ....................................................1  
Tao Hong,Fangqin Xue

Investigation on Electrolytes in Vanadium Halide Redox Flow Battery for Energy Storage..........................5  
Tao Hong,Fangqin Xue

Application of Genetic Programming to Identifying Water-Level and Storage-Capacity Curve of the Xingxingshao Reservoir ...........................................................................................................9  
Hongyan Li, Shan Jiang,Xinhua Bao

Series Solution of Dynamics Stability of a Class of Deformed Bubble in Vertical Pipe ........................................12  
Houguo Li,Kefu Huang

Application of Robust Control Theory to Main Steam Temperature of Circulating Fluidized Bed Boiler ....................................................15  
Yi Luo, Zhongshi Yue,Shuangxin Wang

The Regional Stability and the Site Stability of Phase III Qinshan Nuclear Power Plant, China ......................................................................................................................................................................19  
N. Q. Zhou, C. Y. Wei, S. M. Jiang, Z. L. Zhao,M. Qin

Performance Analysis of Doubly Excited Brushless Reluctance Machine Used in Wind Power Generation System ...................................................................................................................................................23  
Huijuan Liu,Longya Xu

Study on Power Flow Calculation and Voltage Profile in Distribution System with Distributed Generation ....................................................27  
Jiandong Duan, Xuying Yang,Wenyu Yang

Study on Hydrogenerator’s Temperature Field through Coupled Field Computation Method ....................................................31  
Dian-Hua Zhu,Wei Guo

Electro-Hydraulic Proportional Synchronous Control System of Ring Gate for Hydraulic Turbine ......................................................................................................................................................................35  
Juliang Xiao, Guodong Wang,Weike Song

Numerical Simulation for Hydraulic Characteristics of Cylindrical Valve in Runaway Protection Process ......................................................................................................................................................................40  
Chunli Guo, Guodong Wang,Juliang Xiao

Study on Application of CSG Cofferdam in Hydropower Station Construction ....................................................44  
Yunfeng Peng,Yunlong He

Experimental Research on Stability of Hydro-Mechanical-Electrical System in Hydropower Station ......................................................................................................................................................................48  
Jiansxu Zhou, Ming Hu, Fulin Cai,Rong Hu

Optimal Operation of Cascade Hydropower Plants ...........................................................................................................52  
Shenglian Guo, Xiang Li, Pan Liu,Fuqiang Guo

Blast Design and Optimization Studies Based on Vibration Control for Excavation of Hydropower Stations ......................................................................................................................................................................56  
Jin Li, Luo Yi, Zhang Fayong,Zhu Qihu

Nonlinear Analytical Rules Based Fuzzy Control for the Hydro Turbine Governing System ....................................................60  
Sha Liu, Yuanchu Cheng, Luqing Ye
Improving Stability by Misaligned Guide Ganes in Pumped Storage Plant ................................. W. Y. Shao

Reservoir Dam Break Flow and Sediment Simulation ................................................................. Bingjiang Dong, Xiaofeng Zhang

Long-Term Risk Dispatching of Cascaded Hydropower Stations in Electricity Market ........... Chao Ma, Jijian Lian

Characteristics of Gas-Liquid Transport Flow through an Axial Flow Impeller ....................... Can Kang, Minguan Yang, Xiaolian Wu, Zhengping Gao

Analysis of Complex Flows in the Whole Passage of an Axial Flow Pump ......................... Can Kang, Minguan Yang, Guangyan Wu, Zhengping Gao

Real-Time Load Distribution Control for the Geheyan Hydropower Plant ............................ Fuqiang Guo, Shenglai Guo, Xiang Li

FEM-Based Reinforcement Design of Surge Shaft Illustrated with a Case Study of Xiaowan Hydropower Plant ................................................................. Yuting Zhang, Ming Xiao, Juntao Chen

Analysis of Impact on the Irrigation at the Irrigated Area along the Yangtze River after the Application of Three Gorges Project ................................. Xia Wu, Hong Lin Guan

Prediction of Euler Energy at Channel Outlet of Runner ......................................................... Na Shen, Fengqin Han, Takashi Kubota

Numerical Simulation of Transient Flow in Pressurized Water Pipeline with Trapped Air Mass .................................................................................................................. Deyou Liu, Ling Zhou

Research on Dynamic Properties of Long Pipeline Monitoring System of Air Cushion Surge Chamber ................................................................. Chuangqi Ou, Deyou Liu, Longhua Li

Simulation on Dam Concrete Construction Processes Using Dynamic Resources Matching Technology ........................................................................................................ Quan Liu, Zhiwen Hu, Qi Han

Unit Consumption Analysis Model of Distributed Combined Cooling, Heat and Power System ........................................................................................................ Qingsheng Bi, Zhiping Song, Yongping Yang

Study on the Static Stability of a High Voltage Cable-Wound Generator .............................. Baojun Ge, Dajun Tao, Zhiqiang Zhang, Yanling Lv

The Simulation Analysis of Leading Phase Operation of Powerformer ................................ Baojun Ge, Xing Guan, Dajun Tao

Analysis and Calculation of the Operation Characteristics for Powerformer ....................... Baojun Ge, Jian Zhang, Peng Lin, Zengfen Chen

Modal Analysis of Hydropower House by Using Finite Element Method ............................. Qiling Zhang, Hegao Wu

Analysis and Calculation of No-Load EFM Waveform for Powerformer .......................... Baojun Ge, Xing Guan, Dajun Tao

On Water Loads of Concrete Dams for Hydropower Generation ............................................ Janrui Chai, Meihua Wu

Discussion of Extended Drucker-Prager Yield Criterion in Slope Stability Analysis ............ Kai Su, Yin Li

Yanzhi Yu, Haichuan Xu, Biguang Tang

Numerical Simulation on the Flow Fields Downstream Nozzles with Tabs by Modified Turbulent Model ..................................................363
Yufang Zhang, Fang Wang, Yong Huang, Jingxuan Li

Boundaries of Power System Frequency Regulation Ability .....................................................................................367
Yu-Feng Guo, Xiao-Min Zhao, Hong Lu

Effect of Burner Offset Angles on Outlet Metal Temperature of Vertical Water Wall Tube in Supercritical Boiler ............................371
Ding-Ping Liu, Xiang-Rong Ye, Bin-Yuan Chen

The Performance Optimization of a Thermoacoustic Refrigeration Micro-Cycle .................................................................376
Xuxian Kan, Feng Wu, Anqing Shu, Shicheng Yu, Kun Wu, Wenjing Zou

Cylinder Process Simulation with Heat Release Analysis in Diesel Engine .........................................................................380
Yu Ding, Douwe Stapersma, Hugo T. Grimmelius, Yu Ding

Environmental/Economic Operation of Thermal Units in Electricity Market using Differential Evolution Algorithm ................384
Chunhua Peng, Hujuan Sun, Haishan Li

Thermodynamic Cycle Analysis of Mars CO2 Thermal Rocket .....................................................................................388
Daren Yu, Xiaowu Lv, Zhanli Yao, Wen Bao
Semiconductivity Variance of Polypyrrole (PPy) Films in HCl Aqueous Solution
Yan-Jie Ren, Jian Chen, Jian-Jun He

558

The Utilisation of Lithium-Ion Batteries in Substations
David Robinson, Shenghong Sun, Ram Parashar, Liangzhong Yao

562

A Comparative Study on Synthesis Methods of LiV3O8
Jijun Feng, Xiangzhe Liu, Xiaozhen Liu, Yufang Wang, Wensen Wang, Jing Zhao, Yanlei Li

566

Heat Transfer of Natural Convection Flow Between Inclined Plate with Heated Face
Guizhu Li, Yong Sun, Zhonghai Chen, Feng Xue, Sanyuan Zhao

569

A New Air-Conditioning System of Liquid Desiccant and Evaporation Cooling
Jin Wang, Cun Nan Li, Jian Hua Liu, Si Chang Liu, Jun Chen

573

Applying Analysis of Solar Composite Wall
Lin Qiu, Yue Zou, Li Huang, Zhi Tan

577

Experimental Study on the Novel Solar Adsorption Refrigeration Cooling Tube
Hui-Zhong Zhao, Min Zhang, Guo-Qing Yu, Jing Lv, Zhenyan Liu

581

A Calculation Method for Evaluating Thermal Loss of Solar Cavity Receiver
Jiabin Fang, Jinjia Wei, Xinwei Dong, Yuehe Wang

585

The Application of Field-Synergy Theory in Enhancing Convective Heat Transfer of Solar Wall
Geng Ren, Lin Qiu

590

The Development and Application of the Solar Lights in Wuhan City, China
Xia Chen, Jinyu Wen

594

Optimal Operating Temperature for Solar Thermal Power System
Jianfeng Lu, Jing Ding

598

Preliminary Determination of Heliostat Field Range and Research of Receiver Depression Angle in Solar Power Tower
Su Guo, Deyou Liu, Feng Wang, Yaoming Zhang

602

Study on the Continuous and Stable Running Mode of Solar Thermal Power Plant
Tai Lu, Nan Li

606

Performance of a Solar-Air Source Heat Pump System for Water Heating on Different Weather Conditions
Guoying Xu, Xiaosong Zhang, Lei Yang, Shiming Deng

611

The Thermodynamic Analysis of Chemistry Stability of Eutectic Salt Phase Change Materials
Jun Chen, Jin Wang, Jin Song Liu, Jian Hua Liu

615

Study on the Application Potential of Solarwall System in Northern China
Lixin Gao, Hua Bai

619

Cosine Efficiency Distribution of Heliostats Field of Solar Thermal Power Tower Plants
Hongli Zhang, Zhifeng Wang, Minghuan Guo, Wenfeng Liang

623

Feasibility Analysis of Constructing Parabolic Trough Solar Thermal Power Plant in Inner Mongolia of China
Mingzhi Zhao, Zhizhang Liu, Qingzhu Zhang

627

Economy Analysis of the Solar Supported Coal-Fired Power Generation (SSCPG) System
Yinghong Cui, Juan Chen, Zhenhua Bei, Yinghong Yang

631

Technology Research of Novel Energy Storage Control for the PV Generation System
Jinhui Xue, Zhongdong Yin, Bingbing Wu, Ziping Wu, Jun Li

637

Identification of Lightning Stroke and Fault in the Transient Component Based Protection .......... 1053
  Guibin Zou, Houlei Gao, Ming Xu, Xin Wang, Tao Wang, Dapeng Wang

The Research UL-P of Loss-of-Excitation Protection for Generator Based on the Artificial Neural Networks................................................................. 1058
  Bo Fan, Xiaoquan Li, Peng Xue, Junjie Liu

Special Problems in Current Differential Protection Based on Bergeron Model ......................... 1062
  Bin Li, Wenhua Chang, Jiali He, Zhi-Qian Bo

Boundary Protection Algorithm Based on Phase Information of Improved Recursive Wavelet Transform for EHV Transmission Lines ......................................... 1066
  Jiandong Duan, Kuang Jun, Shanshan Wu

Study of the Inrush Current Identification Using the Improved Half-Cycle Fourier Analysis ........................................................................... 1070
  Jiandong Duan, Chang Wu, Jianming Yu

Study of Single-Ended Traveling-Wave Protection for Transmission Line Unsymmetrical Grounded Faults................................................................. 1074
  Jiandong Duan, Li Wang, Xiangqian Tong

Function-Oriented Information Assets Identification on Substation Automation Systems .............. 1078
  Hao Zhang, Jian-Hua Zhang, Nian Liu, Xu Wu

Substation Locating and Sizing in Rural Power System Based on GIS and Modified Differential Evolution Algorithm ......................................................... 1082
  Tongyu Xu, Yan-Hui Sun, Yan-Cheng Zhou, Wei Zheng

Vulnerability Assessment of Power Grid Based on Complex Network Theory ................................ 1087
  Shouzhi Xu, Huan Zhou, Chengxia Li, Xiaomei Yang

A Spot Inspection Information Management System of Units in Thermal Power Plant Based on the Frame of Browser/server ........................................... 1091
  Tao Fang, Jun Yang, Lingling Quan

Multi-Agent Based Control Framework for Microgrids ................................................................. 1095
  Chun-Xia Dou, Shi-Jiu Jin, Guo-Tao Jiang, Zhi-Qian Bo

Three Phase Power Flow for Weakly Meshed Distribution Network with Distributed Generation ........................................................................... 1099
  Ming Ding, Xuefeng Guo, Zhengkai Zhang

Reliability Analysis of transformer Based on FTA And Mente Carlo Method .................................. 1106
  Shuping Liu, Zhengqing Han

Research on the Energy-Saving Management System of Power Generation Groups and Key Supporting Technologies ................................................................. 1109
  Yongping Yang, Ningling Wang, Yong Zhang, Zhiping Yang

Research on Comprehensive Evaluation System of Power Demand Side Management by AHP ........................................................................... 1113
  Zhi-Qiang Chen, Yang Xia, Bo Chen, Hong-Shan Zhao, Dong-Xiao Niu

Analysis of the Circular Volt-Detecting Method of Individual Cells Involved in the Supercapacitor Bank ........................................................................... 1117
  Yicheng Zhang, Haiquan Liang, Haitao Xun, Lulu Wu
CIM Extension of Microgrid Energy Management System ................................................................. 1121
Ming Ding, Zhengkai Zhang, Xuefeng Guo

Research on Condition Information Model of Substation Equipment Based on CIM/XML .......... 1127
Xin-Ye Li, Dong-Xing Duan, Zhao-Hui Xu, Jin-Sha Yuan

Similarity Analysis in Condition Evolution Rule of Transformer in Family Based on Clustering ................................................................. 1131
Jin-Sha Yuan, Xin-Ye Li

Power Grid Crises Management and Research on Load-Model of Power Grid .................................. 1135
Shi-Hua Li, De-Shan Tang

Analysis and Control of Maximum Transfer Power at Cross-Section of Transmission Line with Transient Stability Constraints ................................................................. 1140
Xuefeng Bai, Guodong Jiang

Research on Non-Inferior Nash Equilibrium in Power Spot Market .................................................. 1144
Xianzhi Meng, Hongming Yang, Weilin Feng

A PWM Controller IC for LED Driver Used to Multiple DC-DC Topologies ................................... 1148
Jiaying Lu, Xiaobo Wu

Network Design of Reverse Logistics Intergated with Forward Logistics .......................................... 1152
Xiaoqiang Wang, Lindu Zhao

Swarm Intelligence Based Security Constrained Congestion Management using SSSC .................. 1156
D. M. Vinod Kumar, Ch. Venkataiah

A New Method for Interharmonic Identification ............................................................................... 1162
Yu Ji, Yunlian Sun

Study on the Framework of Natural Disaster Early Warning System for Power System .................. 1166
Jialin Qin, Jingfu Shang, Jian-Hua Zhang, Weimei Zhao

A Multi-Mode Four-Switch Buck-Boost DC/DC Converter .............................................................. 1170
Langyuan Wang, Xiaobo Wu, Jiana Lou

Analysis on Fault Statistics in Wenzhou Electric Power Distribution Network ................................ 1174
Qun Li

Monitoring and Modeling Geomagnetically Induced Currents in Power Grids of China ............. 1178
Chun-Ming Liu, Lian-Guang Liu, Y. Yang

Harmonic Resonance Circuit’s Modeling and Simulation ............................................................. 1182
Caixia Yang, Kaipei Liu, Dongxu Wang

Price Forecasting Based on PSO Train BP Neural Network ............................................................. 1187
Yong Gui He, Li Bo

A Comprehensive Method for Online Voltage Stability Assessment .............................................. 1191
Yu Peng, Wei Zhou, Hui Sun, Jiyan Zou

Power Quality Disturbances Detection Based on Hilbert Phase-Shifting .......................................... 1198
Chun-Ling Chen, Yong Yang, Tongyu Xu, Yingli Cao, Xiaofeng Wang

Research on Frequency Characteristics of the Overhead Line Parameters ..................................... 1202
Xi-Jun Ni, Jian-Feng Zhao, Ke Sun

Identifying Power Quality Disturbances in Real Time Using Incremental Wavelet Decomposition and Least Square Support Vector Machine .................................................. 1207
Jinsha Yuan, Yinghui Kong, Tiefeng Zhang
Research on Under-Voltage Load-Shedding to Prevent Voltage Collapse of Electric Power System ............................................................1211
Jingjing Zhang, Ming Ding, Shenghu Li

Performance Improvement of Parallel Active Power Filters Using Droop Control Method ..............................................................1215
Ghazal Falahi, Hossein Mokhtari

Research on Dry Resistance Load Test of Diesel Locomotive for Energy Saving .................................................................1219
Jun Xiao, Hongxia Jiang, Chunqiu Tang, Yimin Mo, Jinfang Xie

Lighting Control and Its Power Management in Railway Passenger Station ..................................................................................1223
Jun Xiao, Chengjun Liu, Yimin Mo, Jinfang Xie

Faraday Rotation and Sensitivity of Bi-Substituted Iron Garnet Single Crystal for Optical Current/Magnetic Field Sensors .................................................................1227
Min Huang, Li Ling

An Image Recognition Method of the Electric Equipment Operation States ..................................................................................1231
Youswen Tian, Linlin Yu

Design and Application of Inspection System in a Self-Governing Mobile Robot System for High Voltage Transmission Line Inspection ..................................................................................1235
Gongping Wu, Heng Cao, Xianjing Xu, Hua Xiao, Shengbang Li, Qingshang Xu, Bin Liu, Qinghong Wang, Zhijun Wang, Yulin Ma

Transitory Harmonic Analysis Using Harmonic Distribution Map ..............................................................................................1239
Jingwen Yu, Boying Wen, Hui Xue

Support Vector Regression Machine with Enhanced Feature Selection for Transient Stability Evaluation ..................................................1243
B. Dora Arul Selvi, N. Kamaraj

Voltage Stability Margin Computation and Visualization for Tri-State South Colorado Area using EPRI Power System Voltage Stability Region (PSVSR) Program ..................................................................1248
Wei Wei, Pei Zhang, Liang Min, Mark Graham, Dilwyn Ramsay

The Study of Generalized S-Transform in Power Quality Disturbances Analysis ..................................................................1254
Jing Wang, Yueyue Shen, Aiqin Xu, Guoqing Weng

On-Line Supervising System for Boiler Combustion of Power Station ..................................................................................1258
Shoujun Zhou, Youen Zhao, Min Guo, Maocheng Tian

A Vibration Based Condition Monitoring System for Power Transformers ..................................................................................1262
Ting-Ting He, Jing-Di Wang, Jie Guo, Hai Huang, Xiang-Xian Chen, Jie Pan

Database Environment of an Inspection Robot for Power Transmission Lines ..................................................................................1266
Jing Guo, Gongping Wu, Binhong Liu, Qinghong Wang, Zhijun Wang, Yulin Ma, Shengbang Li, Qingshang Xu, Bin Liu

Transformer Fault Diagnosis Utilizing Rough Set and Support Vector Machine ..................................................................................1270
Hongzhi Zang, Xiaodong Yu

Leakage Current Pattern for Diagnosing the Contaminated Degree of Ceramic Insulators under Different Humidity .................................................................1274
Jianbo Zhou, Bo Gao, Qingshang Wang, Qiaogen Zhang

Wavelet-Based De-Noising Method to Online Measurement of Partial Discharge ..................................................................1278
Wenjie Li, Jiankang Zhao

Digital System for Detection and Classification of Power Quality Disturbance ..................................................................................1281
Xiaodong Yu, Kui Wang

Inter-Harmonics Spectral Estimation Based on Improved Burg Algorithm ..................................................................................1285
Han Chen, Huijin Liu, Dalu Li
Improved Algorithm of Scaleless Band Identification on Correlation Dimension of Vibration Signal
Bi-Qiang Du, Gui-Fu Deng, Jun-Jie Shi

Power System Fault Diagnosis Based on Fault Information System and Forward and Backward Reasoning
Sihua Liu, Qing Chen, Tipan Gao

Application of LS-SVM by GA for Dissolved Gas Concentration Forecasting in Power Transformer Oil
Hong-Ling Xie, Nan Li, Fang-Cheng Lu, Qing Xie

Harmonic Source Location at the Point of Common Coupling Based on the Nonlinearity Index of Load
Yamei Liu, Hualin Gong, Xian-Yong Xiao, Honggeng Yang

The Optimized Combination of Fault Location Technology Based on Traveling Wave Principle
Ping Chen, Bingyin Xu, Jing Li

Fault Diagnosis Based on PCA and D-S Evidence Theory
Yong-Guang Ma, Ji Zhang

Research of Cloud Neural Network Based on Cloud Transformation and its Application on Vibration Fault Diagnosis of Hydro-Turbine Generating Unit
Liwei Han, Zongkun Li

Development and Implementation of Intelligent System for Gas Insulated Switchgear
Yonggang Guan, Yulong Huang, Weidong Liu, Wensheng Gao, Guozheng Xu

Research on Ultrasonic Locating of Partial Discharge in Power Transformer Based on Modified Multiple Signal Classification
Qing Xie, Nan Wang, Xin Xiang, Yanqing Li, Fangcheng Lu

A New Power System Fault Diagnosis Method Based on Rough Set Theory and Quantum Neural Network
Zhengyou He, Jing Zhao, Jianwei Yang, Wei Gao

A Method for Classifying Power Quality Disturbances Based on Quantum Neural Network and Evidential Fusion
Haiping Zhang, Zhengyou He

Detection of Power Quality Disturbances Based on Generalized Morphological Filter and Information Theory
Jing Zhao, Zhengyou He, Qingquan Qian

Distribution System Fault Diagnosis Scheme Based on Multiple Information Sources
J. Zhang, Z. Y. He

New Method of Live Line Measuring the Impedance Parameters of Transmission Lines
Zhijian Hu, Zichun Guo, Lihua Fang, Xingsheng Xie, Zhongzhu Xu, Yang Gao, Dong Liu, Xixiong He

Assessment of Rotor Degradation in Steam Turbine Using Support Vector Machine
Jihong Yan, Haitao Ma, Wanzhao Li, Haiyi Zhu

Experimental Study and Data Processing of On-Line Monitoring System for High Voltage Cables
Jiantao Sun, Xi Shan Wen, Lei Lan, Jing Hu

Research on Vibration Modes and Acoustic Radiation Modes for Civil Aero-Engine Blade
Jian Zhao, Taiyong Wang, Ming Yu

Crack Detection in Structural Systems Using Electro-Mechanical Signatures
Lili Yuan, Wei Yan
Effective Method to Diagnose Abnormal Vibration of Dish Centrifugal Separator’s Helical Gear ................................................................. Xiao-Jian Ma, Xue-Hui Gan

Target Value Surface and Energy Loss Surface in the Steam Turbine Unit Performance Monitoring System ................................................................................................................................. 1367
Zhao-Hui Yi, Nian-Su Hu, Jian Kang, Di Guo, Mei Huang, Jie Liu

Fault Diagnosis Based on Cluster Analysis Theory in Wide Area Backup Protection System .................................................................................. 1371
Yagang Zhang, Jing Ma, Jinfang Zhang, Zengping Wang

A Novel Real-Time Fault Diagnostic System by Using Strata Hierarchical Artificial Neural Network ................................................................. 1375
Changfeng Yan, Hao Zhang, Lixiao Wu

On the Use of Traveling Wave for Fault Location in Coal Mine Distribution Power Systems .................................................................................. 1379
Shu Tian, Shi-Shen Ma

A Novel Commutation Strategy to Suppress the Common Mode Voltage for the Matrix Converter ................................................................................................. 1383
Rui Chen, Mei Su, Yao Sun, Weihua Gui

Upgrade of Fujian Grid On-Line Stability Control System for the Transformer Operating of 500kV Ningde Substation .................................................................................. 1387
Yunmao Wang, Yi Su, Jianhong Huang

A Novel Impulsive Transient Suppression Device Based on TVS Array ................................................................................................. 1391
Jue Lu, Hong Zhou, Li Yu, Jianhui Yang, Zili Liu, Lishu Min

Hysteresis Space Vector Control for Parallel Active Power Filter ................................................................................................. 1396
R. H. Zhang, H. T. Wu, C. Du, L. R. Zhang

A New Control Strategy for Voltage-Type PWM Inverter to Realize Zero Steady-State Control Error ................................................................................................. 1400
Xinrong Wang, Yingchuan Qi

Study on Low Frequency Oscillatory Active Power Increment Distribution Based On Transmission Network Structure-Preserving Model ................................................................................................. 1404
Guowei Cai, Deyou Yang, Lei Xin, Guangming Xiao

Application of Nonlinear PID Controller in Main Steam Temperature Control ................................................................................................. 1409
Jun-Jie Gu, Yan-Juan Zhang, Da-Ming Gao

Power System Oscillation Mode Analysis and Parameter Determination of PSS Based on Stochastic Subspace Identification ................................................................................................. 1414
Guowei Cai, Deyou Yang, Ying Jiao, Chunyu Shao

Inversion Control Method of Components in Power Systems Based on Structural Models ................................................................................................. 1420
Kaifeng Zhang, Xianzhong Dai

Harmonic Signal Detection Algorithm in Parallel of UPQC Studies Based on PSO-FUZZY ................................................................................................. 1424
Hong Shen, Jianru Wan, Chenhu Yuan, Yingpei Liu, Guangye Li

Multi-Objective Synthesis Based on Extended State Observer and LMI Optimization for Excitation System of Synchronous Generator ................................................................................................. 1428
Jiang Li, Guoqing Li

Nonlinear Predictive Control on the Load System of a Thermal Power Unit Based on AOSVR and SAPSO ................................................................................................. 1433
Xiao-Zhi Qiu, Zhi-Gao Xu, Lin-Meng Zhang, Jian-Xin Zhou, Feng-Qi Si

Transient Modeling of Calculation Temperatures of Single-Core Cables ....................................................................... Xin Zhou, Haiqing Niu, Yanping Chen, Zhang Yao, Xiaohing Wang, Youbing Fan, Jiankang Zhao

Modeling and Simulation of Lightning Electromagnetic Transient and Identification of Shielding Failure and Back Striking in ±800kV UHVDC Transmission Lines - Part I: Modeling and Simulation of Lightning Electromagnetic Transient .......................................................... Hong-Chun Shu, Guang-Bin Zhang, Zi-Zhao Zhu, Sheng-Qiang Zhu

Modeling and Simulation of Lightning Electromagnetic Transient and Identification of Shielding Failure and Back Striking in ±800kV UHVDC Transmission Lines - Part II: Identification of Shielding Failure and Back Striking .................................................. Hong-Chun Shu, Guang-Bin Zhang, Zi-Zhao Zhu, Sheng-Qiang Zhu

Evaluation of Switching Overvoltage in 500 kV Transmission Line Interconnection Nam Theun 2 Power Plant to Roi Et 2 substation ................................................................. T. Keokhoungning, S. Premrudeepreechacharn, K. Ngamsanroaj

A New Transformer Model Based on Modified Multi-Conductor Transmission Line Theory ........................................ Guishu Liang, Xiaoyan Zhu, Huaying Dong

Investigation of Single Phase Reclosing Using Arc Model on the 500 kV Transmission Line from Mae Moh to Tha Ta Ko .................................................................................. K. Ngamsanroaj, S. Premrudeepreechacharn

A New Approach to Coherency Identification of Generators Clusters Based on Wide Area Measurement System .................................................................................................................. Tao Chen, Jingyan Yang, Jian-Hua Zhang, Ziping Wu, Zhe Wei
Simulating Propagation Characteristic of UHF Signal for PD Monitoring in Transformers by FDTD Technique .......................................................... 3603
Bin Xu, Junhao Li, Wenrong Si, Yanming Li

The Influence of Transformer Oil Aging to Dielectric Dissipation Factor and Its Insulating Lifetime .............................................................. 3607
Dou Peng, Daowu Yang, Chengfeng Wang, Ma Li

Research of the Dielectric Loss factor tan delta of Transformer Oil by Multi-Parameter Regression Analysis .................................................. 3611
Dou Peng, Daowu Yang, Chengfeng Wang, Ma Li

Permeability and its Influence on the Broadband Frequency Response of a Power Transformer ................................................................. 3614
Steven D. Mitchell, James S. Welsh

Power Transformer Dga Integrated Diagnosis System Based on Oracle Database ................................................................. 3618
Bin Song, Mingbang Chen

Insulators ESDD Predicting under Various Meteorological Conditions Based on Least Squares Support Vector Machines ........................ 3622
Haiyan Shuai, Qingwu Gong, Jun Wu

Application of Acoustic Emission Technology on Monitoring of Polluted Insulator Discharge .............................................................. 3626
Hongling Li, Xishan Wen, Naiqiu Shu, Chunming Pei

Compare Contamination Discharge AE with Corona Discharge AE ................................................................. 3630
Chengjiang Wang, Yun Guan

Research on HV-Power Equipment Diagnosis by Infrared Image Edge Detection ................................................................. 3634
Huangqiang Li, Yunlun Sun, Hong Li

Partial Discharges Characteristics of Harmful Conducting Particles Around Spacer Under AC Voltage in Atmospheric Air ...................... 3638
Xiangyu Tan, Qiaogen Zhang, Zhijie Jia, Bin Zhang, Jia Li

Fuzzy Clustering Analysis Based on Dissolved Gas in Power Transformer ............................................................. 3642
Wei Li, Ke Zhu

Research on a New Method of Insulator Contamination Detection Based on 8mm Radiometer .......................................................... 3646
Qiang Gao, Meng Liu, He Ming Li, Shan Lu, Dan Tian

Study on the Hydrophobicity of HTV SIR Treated by Different Corona Intensity ................................................................. 3650
Ying Liang, C. R. Li, Lijian Ding

Design of Non-Contact On-Load Automatic Regulate Voltage Transformer ................................................................. 3654
Yulin Zhao, Shoutian Dong, Qiuian Liang, Pinxiu Zhang

WAMS/SCADA Hybrid System State Estimation Algorithm with Double Constraints ................................................................. 3658
Dalu Li, Rui Li, Yuanzhang Sun, Han Chen

Multi-Objective Evaluation for Distribution Network Basing on Hierarchical DEA ................................................................. 3662
Wen-Xia Liu, Li-Xin Zhang, Jian-Hua Zhang, Yong-Feng Fan

Power Distribution Fault Diagnosis Based on Rough-Cloud Sets ................................................................. 3666
Qiuye Sun, Xinrui Liu, Huaguang Zhang

Application of Mobile Agent Technology to Power Generation Control in Microgrid Power System .......................................................... 3670
Junichi Arai, Motohisa Ishikawa, Shuichiro Yamazaki, Toshiyuki Ito
A Real Time Simulation and Forecasting Application of Yellow River Diversion Project Conveyance Line .................................................................367
Xiping Zhao, Jianping Li, Keiming Xie

The Research and Application on Water Transport Control Operating Modes .................................................................3679
Jianping Li, Xiping Zhao, Huakai Liu

The Real-Time Assessment of Electric Distribution Network Load Capability .................................................................3683
Haoming Liu, Zhenkun Li, Kun Yu, Xingying Chen

Influencing Factors of the Induced Voltage in Signal Cable of Electrified Railway .................................................................3687
Baoguo Shen, Tiecheng Lu, Jingqian Wang, Zhaokang Liu

Shielding Effectiveness and Coupling Characteristic of Metallic Enclosures with Apertures under EMP .................................................................3691
Nenghong Xia, Xueqin Yi, Wenwu Song

Investigation on Probabilistic Distribution of Wiring Harness Radiated Immunity of Power Transmission Line .................................................................3695
Binxian Lu, Zezhong Wang, Yanhua Luo

Research on Crosstalk of Shielded Cable Used by Power System .................................................................3699
Binxian Lu, Wei Zhang, Zezhong Wang

Investigate and Control of Power Transformer Noise .................................................................3703
Tan Wen, Yuanfang Wen, Xiaowu Zhang, Xingming Bian

A New Algorithm to Identify Transfer Functions of Antennas Used in EMC Measurement .................................................................3707
Li Zhang, Qingmin Li, Wei Wang, Wah Hoon Siew

Assessing Method of Voltage Sag Frequency Caused by Transmission Line faults .................................................................3711
Xian-Yong Xiao, Chao Ma, Zheng-Guang Li, Yin Wang

Study on Method of Transient Huge Current Measurement by Magnetic Sensor Array .................................................................3715
Qian Zhang, Huanlin He, Lan Wang

Analysis Model of Electromagnetic Interference Flowing in a Substation Cable .................................................................3720
Zhengguang Liang, Hui Dou

Analysis and Calculation on Indices of Voltage Sag .................................................................3723
Yuan Yuan, Xuemeng Zhang, Yonghai Xu, Yan Lin, Danyue Wu

Stress Determination of Oxide Film Formed on Lanthanum Ion-Implanted Pure Nickel .................................................................3728
Huiming Jin, Adriana Felix

A Converter of High Voltage Capacitor Charging Power Supply Using Piezoelectric Transformer .................................................................3732
Chunyu Bai, Shiyi Li, Qiang Shen, Debang Cui

A High-Energy Graphite Spark Gap Switch .................................................................3736
Meng-Bing He, Ning Liu, Guan Hu, Tao Li, Yuan Pan

Research of Conduction Immunity of Control Shielded Cable .................................................................3740
Binxian Lu, Wei Zhang, Zezhong Wang

The Influence of Gap Length on Flashover Under Nanosecond Pulsed Coaxial Electric Field .................................................................3743
W. L. Huang, L. L. He, G. S. Sun

Experimental Study and Numerical Simulation on Interaction of Plasma Jet and Liquid media .................................................................3747
Yonggang Yu, Shanheg Yan, Na Zhao, Xin Lu, Yanhuang Zhou
A Zero Current Switching Half-Bridge Power Supply for High Speed Drilling Electrical Discharge Machining
He Huang, Jicheng Bai, Zesheng Lu, Yongfeng Guo

A Novel Detecting and Controlling Strategy of the Discharge Status in High Speed Wire Electrical Discharge Machining
Jicheng Bai, He Huang, Zesheng Lu, Guanqun Deng, Yongfeng Guo

Intermediate Frequency Vacuum Arc Under Axial Magnetic Field
Jing Wang, Jianwen Wu

The Study on the Anode Current Density Distribution in a Moving Arc Root
Tiejun Xu, Mingzhe Rong, Yi Wu, Qiang Ma

Impact of Inner Electrode Diameter on Surface Flashover under Nanosecond Pulsed Coaxial Electric Field
M. X. Miao, W. L. Huang

A Novel Pulse Power Supply for Insulated Ceramics by HS-WEDM
Guanqun Deng, Yongfeng Guo, Zesheng Lu, Jicheng Bai

A Rogowski Coil Model Based on the Principle of Magnetic Potential Balance
Weihua Xu, Hai Bao, Yihan Yang

Iron-Loss Simulation of Laminated Steels Based on Expanded Generalized Steinmetz Equation
Kuofeng Chen

Study on the Reduction of Vibration and Acoustic Noise in the Switched Reluctance Motor
Xianming Deng, Qidong Yuan, Jia Lu, Xinyu Li

Research on Stator 3D Temperature Field of Hydro-Generator Under Sudden Short Circuit
Yadong Fan, Xishan Wen, Qiang Liu

Solution for Voltage Distribution in Transformer Winding Model
Chun Zhao, Jiangjun Ruan, Zhiye Du, Liang Chen, Ling Ruan, Yu Shen

Analysis of High-Power Rectangular Waveguide Filter with Capacitive Coupling Iris for Satellite
Shengxian Li, Junmei Fu, Xuda Wu

Calculation of distribution parameters for Research on Propagation Characteristic of PD in Transformer Winding
Zhi-Ye Du, Chun Zhao, Jiang-Jun Ruan, Shi-Feng Yu, Wen-Bing Yun

Electromagnetic Fields of Energized Conductors in Multilayer Medium with Recursive Methodology
Simon Fortin, Yixin Yang, Jinxin Ma, Farid Dawalibi

A Fault Line-Selection Method of Hybrid Cable-Overhead Line in Distribution Network Based on Morphology Filter and Hilbert-Huang Transform
Hong-Chun Shu, Wen-Yuan Zhao

Man-Machine Interface Design of Distribution Management Terminal
Weiqing Tao, Jianwei Mao

Utilizing STATCON to Resolve Delayed Voltage Recovery Problem in SEC-WR
Mingming Du, Minxiao Han, Zhihui Cao, Frank Chu, Moe El-Kady

Relation of Damping to Power Flow on Transmission lines
Xuezhi Liu, Dichen Liu, Qingfen Liao, Yong Huang, Xiaojie Pan
Research and Application of Wavelet on Power System Voltage Monitor .................................................3831
Yu Chen, Guo Lin

Simulation Research on Unified Power Quality Compensator for Distribution System ..............................3835
Baoan Wang, Wenjin Yan, Nannan Wang, Xueliang Huang

Research on Multi-Carrier PWM Modulation Strategies of Three-Level Inverter ......................................3839
Jinghua Zhou, Zhengzi Li

Strategy on Eliminating Transformer Bias Magnet in Push-Pull Forward Converter .................................3844
Dandan Jia, Tian Xu, Zhizhong Ju, Quanmin Niu

Experimental Study of Depressurization at Polymer Injection Wells by Surfactant .................................3848
Jingchun Wu, Jinghua Qi, Shengguo Qin, Xiaobo Liu

Mathematical Model and Operating Performance of YNvd Transformer .....................................................3851
Minwu Chen, Qunzhan Li, Shaofeng Xie

Fuzzy Based Robust Speed Controller for IM Drive ..................................................................................3855
Shengxian Zhuang, Xingjian Dong

Simulation for Switched Reluctance Drive Based on the Measured Flux Linkage Characteristics ..............3860
Bingni Qu, Jiancheng Song, Hongda Zhang

Modeling and Control Analysis of a Hybrid Unified Power Quality Conditioner ......................................3864
Long-Hua Zhou, Qing Fu, Chang-Shu Liu

Anti-Icing Method Based Synchronous OLTC Technology in Transmission Lines ....................................3869
Xiaoming Li, Junjie Huang, Xin Shu, Shiqi Liu

Optimized Design and Performance Evaluation of New Cophase Traction Power Supply System .................3874
Minwu Chen, Qunzhan Li, Guang Wei

Design and Stability Analysis of Comprehensive Compensation System Based on Active Power Filter and Capacitors ..................................................................................................................3880
Jingrong Yu, Kai Hu, Zhang Jing

Calculation and Test for Ampacity of Underground Single-Core Cable ......................................................3885
Yanping Chen, Haiqing Niu, Xin Zhou, Xiaoqing Wang, Yao Zhang, Youbing Fan, Jiankang Zhao

Measures of Suppressing Harmonic Pollution generated by Power Electronic Equipment .........................3888
Zheng Zheng, Wang Cong

Research on a Novel Control Strategy for Unbalanced Loads ..................................................................3892
Wen-Hua Hu, Wei-Ming Ma, Chun-Xi Liu

Dead Time Compensation for General-Purpose Inverters Based on Resampling and Feedback Theory ......................3896
Jun-Min Zhang, Gao-Jun Chen

Coupled Electromagnetic-Thermal Modeling the Temperature Distribution of XLPE Cable ....................3900
Yanmu Li, Yongchun Liang, Yanming Li, Wenrong Si, Peng Yuan, Junhao Li

A New Approach for Designing of PID Controller for a Linear Brushless DC Motor with Using Ant Colony Search Algorithm ..................................................................................................................3904
N. Navidi, M. Bavafa, S. Hesami

One Phase to Three Phase Converter Based on Thyristor Controlled Reactor .........................................3909
Shi-Long Chen, Hong-Chun Shu

AC Flashover Characteristics of Ice-Covered Suspension Insulators ....................................................3913
Zhou Li, Qingliang Wang, Jun Zhang, Huidong Jia, Qiaogen Zhang
Closed-Loop Control Method and Implementation of Selective Harmonic Type Active Power Filters
Xiaodan Wang, Xizheng Guo, Fuzhong Wang

Research and Realization of DSP-Based Dynamic Voltage Restorer
Yan Du, X. S. Chen, Fei Liu, Ting Yin

Application of Voltage Space Vector PWM in Electronic Load
Guixiu Jiang, Xiaolei Zhang

Simulation Analysis on the Creep Deformation of High Rock Slope at Discharge Structure Entrance of Jiang Ping River Hydropower Station
Jiaguan Wu, Yahui Duan

Research Advances in Regional Water Security
Li Ren, Zengchuan Dong

The Study on Aseismic Test of High-Voltage Electrical Switch Cabinet
Shanfa Ruan, Meiying Wu, Miaolin Dai, Xiaofeng Fu, Jiyong Zhu

Environment Effects of Energy Consumption Structure Based on Comprehensive Grey Correlation Degree: from 1998 to 2006 in China
Yingling Shi, Nansheng Pang, Yawei Ding

Preliminary Discussion on the Creep of the Vessel's Propulsion Shaft Segment
Wei Wu, Chun-Xiao Rao, Gang Liu, Fan Yang

Performance of Separated Heat Pipe Heated by Hot Water
Jie Zhou, Wei Shi Han

Voltage Sag Disturbance Detection Based on RMS Voltage Method
Ning Ding, Wei Cai, Juan Suo, Jianwei Wang, Yonghai Xu

An Experimental Investigation of Miniature Loop Heat Pipe with Flat Evaporator
Dongxing Gai, Wei Liu, Zhichun Liu, Jinguo Yang

Simulation of Stormwater Flooding Processes in Urban Basin
Xiangyang Xu, Tianyi Xu

Research on Integration Technology Between Distribution Automation System and Geographical Information System
Ke Zhang, Shijun Zhang, Benxiong Huang, Xin Ma

Research of Reservoir Sedimentary Microfacies of Lower Member Es2 in Shanghe Oilfield
Lihua Gao, Zuozen Han, Xuebei Xu, Juan Zhao

The Stability of Hybrid Simulation of Power System
Luojiang Qian, Hongyu Zhang

Climatic Investigation of a Drive for High Voltage Circuit-Breakers
Matthias Schmidt, Hubertus Murrenhoff

Decomposition of Chinese Energy Consumption from 1990 to 2005 and its Energy Consumption Forecasting in 2010
Yingling Shi, Nansheng Pang, Jianbao Zhao

The Average Intensity of Illumination and the Power Optimization
Y. C. Chin, G. W. Chang, S. Y. Chu, H. L. Wang

Predict the Temper Embrittlement Extent of Turbine Rotor Steel by Using Chemical Corrosion Method
Ying-Min Chen, Yuan Long, Zhong-Ge Han, Ya-Hui Wang

Finite Element Dynamic Study on Large-Framed Foundation of Steam Turbine Generator
Hui Zhou, Jiansheng Fan, Jianguo Nie, Jianjun Zhou, Weidong Wang
