Proceedings

IEEE Joint Conference on E-Commerce Technology (CEC’08) and Enterprise Computing, E-Commerce and E-Services (EEE’08)

CEC & EEE 2008

21-24 July 2008
Crystal City, Washington, D.C., USA
Table of Contents

IEEE Joint Conference on
E-Commerce Technology (CEC’08)
and
Enterprise Computing, E-Commerce and E-Services
(EEE’08)

CEC & EEE 2008

Message from the General and Program Co-chairs ................................................ xi
Organizing Committee ............................................................................................ xii
CEC Program Committee ....................................................................................... xiii
EEE Program Committee........................................................................................ xiv
Keynote Speakers .................................................................................................. xv

CEC - Paper Session: Resource Management

Advance Reservation of Grid Resources via Real Options ........................................ 3
Thomas Meinl

A Randomized Pay-as-Bid Mechanism for Grid Resource Allocation ................................. 11
Jochen Stößer

Planning and Pricing of Service Mashups ........................................................................ 19
Benjamin Blau, Dirk Neumann, Christof Weinhardt, and Steffen Lamparter

CEC - Paper Session: Security and Privacy in E-Commerce

Password Management for EPC Class 1 Generation 2 Transponders ............................... 29
Claus Wonnemann and Jens Strücker

Verification of Receipts from M-commerce Transactions on NFC Cellular Phones ........ 36
Jungha Woo, Abhilasha Bhargav-Spantzel, Anna Cinzia Squicciarini, and Elisa Bertino

On Providing One-to-One Marketing with Customers’ Privacy in Stationary Retail .......... 44
Jens Strüker, Rafael Accorsi, and Günter Müller

CEC - Paper Session: Markets and Mechanisms

Arbitrage Opportunities and Market-Making Traders in Prediction Markets .................. 53
Stefan Luckner and Christof Weinhardt

Belief Based Distributed Buyer Coalition Formation with Non-transferable Utility ........ 60
Chi-Kong Chan and Ho-fung Leung
Reverse Pricing in Supply Chains: An Assessment of Sourcing Strategies .............................. 68
  Yll Mujaj, Joerg Leukel, and Stefan Kirn

CEC - Paper Session: Compliance

A Classification Model for Automating Compliance ................................................................. 79
  Stefan Sackmann, Martin Kähmer, Maike Gilliot, and Lutz Lowis

Automating Privacy Compliance with ExPDT ........................................................................ 87
  Martin Kähmer, Maike Gilliot, and Günter Müller

CEC - Paper Session: Applications of Economic Methods

SVNNAT: Measuring Collaboration in Software Development Networks ................................ 97
  Michael Schwind and Christian Wegmann

Auction-Based Traffic Management: Towards Effective Concurrent Utilization
  of Road Intersections ........................................................................................................... 105
  Heiko Schepperle and Klemens Bhm

Multi-attribute Inter-enterprise Exchange of Logistics Services ............................................ 113
  Oleg Gujo

CEC - Paper Session: Commerce Systems

Optimal Contracting for E-Mall Services .................................................................................. 123
  Manoj Parameswaran and Dongsoo Shin

Needs-Centric Searching and Ranking Based on Customer Reviews .................................. 128
  Thomas Y. Lee, Simon Li, and Ran Wei

A Model-Driven Top-Down Approach to Inter-organizational Systems: From Global
  Choreography Models to Executable BPEL .......................................................... 136
  Birgit Hofreiter and Christian Huemer

EEE - Paper Session: Service-Oriented E-Commerce

The Human-Provided Services Framework ............................................................................ 149
  Daniel Schall, Hong-Linh Truong, and Schahram Dustdar

WSDL-D: A Flexible Web Service Invocation Mechanism for Large Datasets .................. 157
  Mark Wiley, Aihua Wu, and Jianwen Su

Price Trust Evaluation in E-service Oriented Applications ................................................. 165
  Yan Wang, Lei Li, and Ee-Peng Lim

EEE - Paper Session: E-Technologies

SSWiM: A Semantic Service, Wrapper and Invocation Manager .......................................... 175
  Anna Sibirtseva, Zhongnan Shen, Jianwen Su, Fullang Weng, Baoshi Yan,
  and Yao Meng
A Dynamic Capability Framework for Context-Aware Mobile Services................................. 183
Chin-Chih Chang, Judy C. R. Tseng, and Kwei-Jay Lin

Creating User Profiles of Web Visitors Using Zones, Weights and Actions............................ 190
Natascha Hoebel and Roberto V. Zicari

EEE - Paper Session: E-Applications

Papyres: A Research Paper Management System ............................................................... 201
Amine Naak, Hicham Hage, and Esma Aïmeur

Resource Provisioning in an E-commerce Application ......................................................... 209
Jijun Lu and Swapna S. Gokhale

Tracking Topic Evolution in News Environments .................................................................. 215
Maximilian Viermetz, Michal Skubacz, Cai-Nicolas Ziegler, and Dietmar Seipel

EEE - Paper Session: Business Collaboration and Agents

Enforcing Business Collaboration Consistency in Business Transaction Net......................... 223
Haiyang Sun and Jian Yang

Enterprise Knowledge Agents: Agent-Based Discovery of Like-Minded Individuals.............. 231
Joshua Church and Ruhollah Farchtchi

An Approach for Maintaining Models of an E-commerce Collaboration ............................. 239
Lianne Bodenstaff, Andreas Wombacher, Roel Wieringa, and Manfred Reichert

CEC - Short Paper Session: Media Management

Use of Content Tags in Managing Advertisements for Online Videos ................................. 249
Chia-Hsin Huang, H. T. Kung, and Chia-Yung Su

Handling Multiple Bottlenecks, Service Differentiation, and Demand Uncertainty in Media on Demand Infrastructures ................................................................. 255
Thomas Setzer

Multicast and Individual Service Provisioning in Mobile TV .................................................. 261
André Deuker and Mike Radmacher

Virtual Money Systems: A Phenomenal Analysis ................................................................. 267
Jingzhi Guo and Angelina Chow

Design and Implementation of Context-Sensitive Mobile Marketing Platforms.................. 273
Andreas Albers and Christian Kahl

Reactivity in Online Auctions: Understanding Bidding Behavior through Reactive Transitions ................................................................. 279
Adriano Pereira, Leonardo Rocha, Fernando Mourão, Wagner Meira, and Paulo Góes

Towards Reputation Enhanced Electronic Negotiations for Service Oriented Computing...... 285
Stefan König, Sebastian Hudert, Torsten Eymann, and Mario Paolucci
EEE - Short Paper Session: Media Management

A Quality Model for Evaluating Reusability of Services in SOA .................................................. 293  
   Si Won Choi and Soo Dong Kim

Association Rule Based Context Modeling for Web Service Discovery ........................................ 299  
   Wenge Rong, Kecheng Liu, and Lin Liang

License-Aware Service Selection ................................................................................................. 305  
   G. R. Gangadharan, Marco Comerio, Hong-Linh Truong, Vincenzo D’Andrea,  
   Flavio De Paoli, and Schahram Dustdar

Service Process Composition with QoS and Monitoring Agent Cost Parameters ....................... 311  
   Yue Zhang, Mark Panahi, and Kwei-Jay Lin

Deriving IT Configurations from Business Processes .................................................................... 317  
   Sven Graupner, Jerry Rolia, and Nigel Edwards

Designing Support Systems for Applications Outsourcing .......................................................... 323  
   Igor Hawryszkiewycz

Web Services Challenge

Type-Aware Web Service Composition Using Boolean Satisfiability Solver .................................. 331  
   Wonhong Nam, Hyunyoung Kil, and Dongwon Lee

Automatic Service Composition Using AND/OR Graph ............................................................... 335  
   Yixin Yan, Bin Xu, and Zhifeng Gu

A Planning Graph Based Algorithm for Semantic Web Service Composition .............................. 339  
   Yuhong Yan and Xianrong Zheng

Experiences Building a Standards-Based Service Description Repository ....................................... 343  
   Paul A. Buhler and Robert W. Thomas

A Web Service Composition Framework Using Integer Programming  
   with Non-functional Objectives and Constraints .......................................................................... 347  
   John Jung-Woon Yoo, Soundar Kumara, Dongwon Lee, and Seog-Chan Oh

WSC-08: Continuing the Web Services Challenge .......................................................................... 351  
   Ajay Bansal, M. Brian Blake, Srividya Kona, Steffen Bleul, Thomas Weise,  
   and Michael C. Jaeger

Semantic Web Service Composition for Service-Oriented Architectures ...................................... 355  
   Thomas Weise, Steffen Bleul, Marc Kirchhoff, and Kurt Geihs

Visualizing Compositions of Services from Large Repositories .................................................. 359  
   Marco Aiello, Nico van Benthem, and Elie El Khoury

Customizable Business Process Composition with Query Optimization ....................................... 363  
   Krishna Raman, Yue Zhang, Mark Panahi, and Kwei-Jay Lin
The Semantic Web Meets the Deep Web

IntegraL: Lightweight Link-Based Integration of Heterogeneous Digital Library Collections and Services in the Deep Web ................................................................. 369  
  Min Song and Michael Bieber

Customizable Search Engine with Semantic and Resource Aggregation Capability ............... 376  
  Sunil Movva, Rahul Ramachandran, Sara Graves, and Helen Conover

Assessment for Ontology-Supported Deep Web Search ............................................................ 382  
  Yoo Jung An, Soon Ae Chun, Kuo-chuan Huang, and James Geller

Semantic Annotation and Search for Deep Web Services ........................................................ 389  
  Soon Ae Chun and Janice Warner

ISENS: A Multi-ontology Query System for the Semantic Deep Web .................................... 396  
  Abir Qasem, Dimitre A. Dimitrov, and Jeff Heflin

Business-Driven Enterprise Application Design & Implementation

Introduction to the Workshop on Business-Driven Enterprise Application Design & Implementation ............................................................................................................. 403  
  Markus Stolze, Jean Vanderdonckt, Kenia Sousa, and Joseph Kramer

How to Describe Workflow Information Systems to Support Business Process ......................... 404  
  Josefina Guerrero García, Jean Vanderdonckt, Christophe Lemaige, and Juan M. González Calleros

Business Process Illustration: Supporting Experience-Grounded Validation of New Business Processes by Subject Matter Experts ............................................................. 412  
  Markus Stolze

Data-Centric Service-Oriented Architecture

The Social Service Network - Web 2.0 Can Make Semantic Web Services Happen ................ 419  
  Khaled El-Goarany, Iman Saleh, and Gregory Kulczycki

A SOA-Driven Content Discovery and Retrieval Platform ....................................................... 424  
  Scott Mitchell, M. Brian Blake, David Cunningham, and Sri Gopalan

Securing Enterprise Applications: Service-Oriented Security (SOS) ...................................... 428  
  Csilla Farkas and Michael N. Huhns

A Domain-Driven Development Approach for Enterprise Applications, Using MDA, SOA and Web Services ......................................................................................... 432  
  Fabio Perez Marzullo, Jano M. de Souza, and Jos. R. Blaschek
Student Papers

Restructuring Ontologies through Knowledge Discovery..........................................................441
  Sylvia M. Henshaw, Ala’a El-Masri, and Philip A. Sage

Semantic Foraging in Defined Contexts ...................................................................................445
  Duncan Carmichael and Bonnie Swart

Multi-agent System Service and Ontology Design Methods.....................................................453
  Larry Gloss, Brad Mason, and John McDowall
