2009 International Conference on Networks Security, Wireless Communications and Trusted Computing

(NSWCTC)

Wuhan, China
25 – 26 April 2009

Volume 1
Pages 1-388
# TABLE OF CONTENTS

- **Modeling the Effects of Ionospheric Scintillation on Satellite to Earth Links**
  Shengbo Hu ................................................................. 1

- **GBSB Model for MIMO Channel and Its Space-Time Correlation Analysis in Tunnel**
  Hong-dang Zheng, Xiao-yan Nie ............................ 6

- **MIMO MRT-MRC Systems with Rate Adaptive Modulation**
  Junkai Huang, Liang Yang ........................................... 10

- **POSTBC-OFDM with Sectorized Antenna Reception over Rapidly Time-Varying Channels**
  Liu Kewen, He Ting, Li Ping'an, Ma Zherui ................. 15

- **The Application of Wireless Sensor Network in the Irrigation Area Automatic System**
  Yan Xijun, Lu Limei, Xu Lizhong ............................. 19

- **Rough Set Weighted Naïve Bayesian Classifier in Intrusion Prevention System**
  Kefei Cheng, Jianghua Luo, Cong Zhang ................... 23

- **Efficient Provably Secure Designated Verifier Signature Scheme without Random Oracle**
  Zhang Jianhong, Geng Qin ........................................... 27

- **Effectiveness of Preamble Based Channel Estimation for OFDM/OQAM System**
  Su Hu, Gang Wu, Gang Yang, Shaoqian Li, Bo Gao ...... 32

- **Throughput Analysis and Frame Length Adaptive for AOS Packet Service**
  Bi Mingxue, Pan Chengsheng, Zhao Yuntao ................. 36

- **Image Self-Embedding Technology Research Based on Discrete Cosine Transform**
  Che Shengbing, Che Zuguo, Huang Qiangbo, Yu Shaojun ... 40

- **Joint Subcarrier and Power Allocation in Uplink OFDMA Systems with Incomplete Channel State Information**
  Dan Wu, Yueming Cai, Chengkang Pan ....................... 45

- **Random Edge Deletion in Directed Scale-Free Graphs**
  Yun-Zhi Yan, Han-Xing Wang ................................... 50

- **SPTM: A Security Protocol for Protecting the P2P Trust Information Management**
  Jianli Hu, Quanyuan Wu, Bin Zhou ............................ 54

- **Energy Balancing Clustering Algorithm for Wireless Sensor Network**
  Lan-ying Li, Xiu-li Jiang, Shenghai Zhong, Lei Hu ....... 59

- **A Wireless Sensor Network for Cropland Environmental Monitoring**
  Hui Liu, Zhijun Meng, Maoqiu Wang ......................... 63

- **On/Off Threshold Group Signature Scheme**
  Wang Xiaoming .......................................................... 67

- **An Improved Mobile IP Scheme Based on MobiCast**
  Ming Tao, Hewei Yu .................................................. 72

- **Research of P-code Direct Acquisition Technology**
  Qin Yong, Zhang Bang-ning, Guo Dao-sheng, Ye Zhan .... 76

- **The Positioning Algorithm of Two Satellites and Its Performance Analysis**
  Jizhong Li, Muqing Wu ............................................. 81

</table>
Availability Analysis Method of Multilevel Security Models with Credibility Characteristics...............................................................................................................................173
Zhiyong Tan, Duo Liu, Jie Lin, Yiqi Dai

Dependability Research of Standby System Based on Stochastic Petri Net.................................................................................................................................177
Shixi Liu, Zhicai Xu, Guilin Chen

Multi-secret Images Sharing Based on Matrix Multiplication.................................................................182
Zhengfeng Hou, Hanjuan Gao

Research of Spectrum Detection Technology in Cognitive Radio................................................................186
Zhao Bing, Guo Lili

Data Aware Clustering for Data Gathering in Wireless Sensor Networks .........................................................190
Jie Zheng, Yugu Qi, Baohua Zhao

Generalized Multicarrier Modulation with Pseudo Nonuniform Carrier Spaces.............................................194
Shichang Xie, Fangjiong Chen, Sam Kwong, Fei Ji

The Application Research of Face Recognition in Network Certification .....................................................198
Liying Lang, Yue Hong

Research on Remediation Model and Its Realization Based on Trusted Network...........................................202
Jing Zhang, Yanheng Liu, Jian Wang, Xiaomin Liu

More Robust Price-Based Resource Allocation Scheme on Dynamic Estimation........................................206
Liu JiCheng, Guan AiHong, Xu ZhenQian, Wang ZhiXue

United-of-Channel-Contention Management in IEEE 802.11e Networks ....................................................211
Anbao Wang, Wenrong Jiang, Jian Chen

Lagrange Multiplier Based Fair Resource Allocation for MIMO-OFDMA Systems ........................................216
Dou Ni, Fangjiong Chen, Cunmei Ji

Gaussian MIMO Relay MAC Channels: Inner Bound and Power Allocation ...............................................220
Wei Xie, ChengKang Pan

Performance Analysis of IEEE 802.11 DCF in Multi-hop Ad Hoc Networks ..............................................225
Liying Xie, Hongjiang Wang, Gang Wei, Zaijin Xie

Protecting Data Aggregation from Compromised Nodes in Wireless Sensor Network ..................................229
Fulin Hu, Jing Chen

Research on Distributed and Dynamic Trust Transfer and Measurement ....................................................233
Libo Liu, Jian Peng

Steganalysis of Spread Spectrum Hiding Based on DWT and GMM ..........................................................238
Cairong Li, Wei Zeng, Haojun Ai, Ruimin Hu

Design and Implementation of Hardware Fusion Technology for Super Sink Node ....................................242
Xianjian Xiao, Tanghuai Fan, Huibin Wang, Lizhong Xu

A Classical Conditioning Model for Policy-Based Management ................................................................247
Saping Liu, Yongsheng Ding

The Effect of Execution-Time/Delay Ratio on Stability of Load Balancing Control ......................................251
Qingyang Meng, Su Ge, Jianzhong Qiao, Shukuan Lin

The Multi-beam Transmitting Characteristic of Smart Antennas in CDMA System ....................................256
Xiangdong Jia, Yongqian Deng

TSALS - A Centralized Scheduling and Channel Assignment Scheme in Third Generation Router Based WiMAX Mesh Network .................................................................................260
Jun Xiao, Wei Zhang, Neng Wang
A Spectral Method for Period Detection of PN Sequence for Weak DS-SS Signals in Dynamic Environments
Tianqi Zhang, Wei Zhang, Shaosheng Dai, Guoning Ma, Qingping Jiang

A Group PAKE Protocol Using Different Passwords
Gang Yao, Hongqi Wang, Dengguo Feng

Design of N-way Dual-Frequency Power Divider Base on Genetic Algorithm
Wei Wang, Wencheng Li, Dan Chen

Threshold Certificate-Based Encryption: Definition and Concrete Construction
Yang Lu, Jigu Li, Junmo Xiao

A New Timing Offset Estimation Method for SC-FDE Systems
Lijun Sun, Lixun Huang

Queuing Analysis of Self-Similar Traffic in Rayleigh Fading Channel
Liu Chang, Qin Xiaowei, Zhang Sihai, Zhou Wuyang

Spectral Analysis of UWB Signal Based on Combined Modulation Scheme with Time-Hopping Code
Lin Zhang, Shu Wang, Taoping Zou, Zhen Qin

An Architecture for Energy Efficient Image Transmission in WSNs
Qin Lu, Xiangbin Ye, Liebo Du

Low-Power JPEG2000 Implementation on DSP-Based Camera Node in Wireless Multimedia Sensor Networks
Qin Lu, Liebo Du, Bing Hu

A Traffic-Aware Adaptive Sleep Mode Operation for IEEE 802.16e Based WiMAX
Jianbin Xue, Zhanting Yuan, Heiyan Chen, Aihua Zhang, Weitao Xu

An Access Control Model for Trustworthy Network
Fujun Feng, Chuang Lin, Junshan Li

Mobility Prediction Algorithm with Differential Accuracy Requirements in Target Tracking Sensor Network
Guangcheng Qin, Zemin, Wu, Chang Tian, Panlong Yang

A Hybrid Method for Dynamic Local Path Planning
Li Peng, Huang Xinhang, Wang Min

A New High-Speed Architecture for Reed-Solomon Decoder
Xun Zhou, Xu He, Liang Zhou

Study of Rough Set and Clustering Algorithm in Network Security Management
Zhiming Qu, Xiaoli Wang

Improved Whitening Method of Linear AR Colored Noise in Stable Distribution Environments
Meiying Xiong, Daifeng Zha, Jinhong Jiang

An Energy Efficiency Cooperative Transmission Scheme in Wireless Sensor Networks
Yu Zhang, Wendong Yang, Qiongli Liu, Yueming Cai

Agent-Based Timing-Sync Algorithm for Sensor Networks
Yingchun Shen, Hai Jin

A Fast VLSI Design of SMS4 Cipher Based on Twisted BDD S-box Architecture
Xuefei Bai, Li Guo, Lu Huang, Yinhua Xu

Power Saving Routing Protocol with Power Sieving in Wireless Ad Hoc Networks
Yi-Chao Wu, Chiu-Ching Tuan
Fault-Tolerant Algorithm for Distributed Primary Detection in Cognitive Radio Networks …………………………………………351
Hang Qin, Youfu Du, Jun Su

A Low Noise VCO with Quadrature Prescaler for UHF RFID Reader ……………………………………………………………………………355
Chunqi Shi, Runxi Zhang, Lei Chen, Ziyuan Chen, Zongsheng Lai

Optimization of Broadband Patch Antenna Based on Mind Evolutionary Algorithm …………………………………………359
Jianxia Liu, Yongqing Yang, Nan Li, Keming Xie

An Improved Colour Image Encryption Based on Chaotic Map and OCML Model ……………………………………………………363
Jun He, Jun Zheng, Zhi-bin Li, Haifeng Qian

An Adjustable Fine-Grain Cache Assignment Scheduling Algorithm Based on Multi-core Architecture …………………………………………368
Benhai Zhou, Jianzhong Qiao, Shukuan Lin, Jun Liu, Bo Liu

An Independent Component Analysis Based Multiuser MIMO Downlink Transmission Scheme ……………………………………………………372
Zhao Li, Jiawei Yang, Junliang Yao, Ting Chen

An Investigation of Maximizing System Performance in Wireless Sensor Networks ……………………………………………………376
Rui Yang, Tiande Guo, Ge Chen

Research and Realization on Real-Time Interaction in m-Learning ………………………………………………………………………381
Liu Sanya, Qiu Xiangkai

Robust Adaptive Beamforming for Cyclostationary Signals in Spectrum Detection of Cognitive Radios ……………………………………………………385
Xiaolong Ma, Guican Chen

Location-Based Skyline Queries in Wireless Sensor Networks ………………………………………………………………………389
Hailan Shen, Zhigang Chen, Xiaoheng Deng

Research on Behavior Trust Based on Trustworthy Distributed System ………………………………………………………………………394
Ming He, Aiqun Hu, Hangping Qiu

Fuzzy Comprehensive Evaluation of Software Dependability with Rough Set Theory Based Combinational Weight ……………………………………………………398
Cao Yang, Li Bo

Performance of Secondary Access in the Spectrum Sharing System with Call Admission Control Strategy ……………………………………………………402
Xueyuan Jiang, Zhiyuan Shi, Wumei Wang, Lianfen Huang

A Novel Approach to Detect IRC-Based Botnets ………………………………………………………………………………………………………406
Wei Wang, Binxing Fang, Zhaoxin Zhang, Chao Li

The Reciprocity Characteristic of Smart Antennas in CDMA System ………………………………………………………………………410
Xiangdong Jia, Haibao Ding

A Novel Positioning Algorithm with Pseudo Range and Carrier Phase Based on Kalman Filter ……………………………………………………415
Wenfei Gong, Jiaqi Li, Jianxi Yang

A Virtual Collision Solution Scheme Based on Optimal Window for WLAN ………………………………………………………………………419
Junming Guan, Yang Lu, Kai Xie, Feng Sheng, Fei Yang

Performance Bound Analysis of Variable Gain Relaying over Non-identical Nakagami-m Fading Channel ………………………………………………………423
Fang Liu, Dacheng Yang, Zhe Chen, Xin Zhang, Yafeng Wang

A Novel Time Interval Routing Protocol in Delay Tolerant Networks ………………………………………………………………………428
Hui-mei Lu, Lei Yin, Wei He, Yuan-da Cao

A Network Misuse Detection Mechanism Based on Traffic Log ................................................................. 524
   Yahui Yang, Chunfang Huang, Zhijing Qin

Propagation Character of Electromagnetic Wave of the Different Transmitter Position in Mine Tunnel ............................................................................................................................... 528
   Xiaobing Han, Shuqi Wang, Tao Fang, Zhitong Guo

A RFID Network Planning Method Based on Genetic Algorithm .............................................................. 532
   Yahui Yang, Yujie Wu, Min Xia, Zhijing Qin

Clustering Approach for Wireless Sensor Networks Using Spatial Data Correlation and Ant-Colony Optimization ............................................................................................................................... 536
   Chongqing Zhang, Qiang Xu

Feature Optimization Based on Artificial Fish-Swarm Algorithm in Intrusion Detections .......................... 540
   Tao Liu, Ai-ling Qi, Yuan-bin Hou, Xin-tan Chang

Investigating the Optimum Carrier Sensing Range in Wireless Ad Hoc Networks ........................................... 544
   Chongqing Zhang, Qiang Xu

Tree-Based RFID Yoking Proof ..................................................................................................................... 548
   Hung-Yu Chien, Shih-Bin Liu

The Design and FPGA Implementation of GF(2128) Multiplier for Ghash .................................................. 552
   Jia Huo, Guochu Shou, Yihong Hu, Zhigang Guo

The Research on Routing Protocol of Sense Wireless Network Based on the Greedy Algorithm ................. 556
   Yuan Xin, Xu Guang-hua, Chen Xiao-jun

High-Dimensional Packet Classification Algorithm Research and Application in MAC QoS System of Access Network .............................................................................................................................. 560
   Lihua Song, Peiya Li

The Research and Design of High Reliability Routing Protocol of Wireless Sensor Network in Coal Mine ................................................................. 566
   Dong Jiang, Qianping Wang, Yan Zhao, Ke Wang

A Wireless Design of Low-Cost Irrigation System Using ZigBee Technology ........................................... 570
   Yiming Zhou, Xianglong Yang, Liren Wang, Yibin Ying

Joint Source Channel Soft Decoding Using Dynamic Redundancy Detection ........................................... 574
   Weiwei Xiang, Peizhong Lu

   Liyang Yu, Xinli Huang, Fenghua You, Wei Zhang

Against Code Injection with System Call Randomization ................................................................................. 582
   Zhaochu Liang, Bin Liang, Luping Li, Wei Chen, Qingqing Kang, Yingqin Gu

An Improved Hierarchical AODV Routing Protocol for Hybrid Wireless Mesh Network ........................................... 586
   Pei Tingrui, Zeng Wenli, Zhang Zhaoxiao, Peng Tao

An Intra-cluster Routing Protocol——IHMDA ........................................................................................... 592
   Cheng Li, Chen Bing

Locating Internet Congestion: Model and Algorithm ...................................................................................... 597
   Ye-kui Qian, Ming Chen, Yu-ming Zhou

Actively Measuring Bots in Peer-to-Peer Networks ...................................................................................... 601
   Binbin Wang, Zhitang Li, Hao Tu, Zhengbing Hu, Jun Hu

A Fuzzy Logic-Based Trust Model in Grid ..................................................................................................... 606
   Hongmei Liao, Qianping Wang, Guoxin Li
Formally Analyzing Software Vulnerability Based on Model Checking ........................................... 613
Wang Chunlei, Huang Minhuan, He Ronghai

Application of Boolean Kernel Function SVM in Face Recognition ........................................... 617
Kebin Cui, Yingshuag Du

A Digital Adaptive Predistortion Method of OFDM Power Amplifier ......................................... 621
Wei Jian, Chongxisu Yu, Jianxin Wang, Jianguo Yu, Lin Wang

Two Scalable Analyses of Compact Attack Graphs for Defending Network Security ...................... 625
Feng Chen, Ri Tu, Yi Zhang, Jinshu Su

Study of Fast Clustering Algorithm Based on Foregone Samples in Intrusion Detections ...................... 631
Tao Liu, Yuan-bin Hou, Ai-ling Qi, Xin-tan Chang

Application of Bridge Function Sequences in Passive Beamformer ............................................. 635
Sheng Hong, Huagang Xiong, Kefei Liu, Qing Chang, Qishan Zhang, Yongjiang Liu, Xiaoxiang He, Manos M. Tentzeris

A Sequence Encoding Scheme for Multi-match Packet Classification ......................................... 639
Xia Deng, Zhiping Huang, Shaoping Su, Chunwu Liu, Guilin Tang, Yimeng Zhang

Network Performance Analysis of VPN Protocols: An Empirical Comparison on Different Operating Systems ................................................................. 643
Shaneel Narayan, Kris Brooking, Simon de_Vere

Ming Zhang, Cheng Long Gong, Yuan Feng, Yanhong Lu

Performance Evaluation of IPv4 and IPv6 on Windows Vista and Linux Ubuntu ................................ 651
Shaneel Narayan, Peng Shang, Na Fan

Energy Consumption & Lifetime Analysis in Cluster-Based Wireless Sensor Networks for Periodic Monitoring Applications ................................................................. 655
Abdul Sattar Malik, Jingming Kuang, Jiakang Liu, Wang Chong

Performance Analysis of Bandwidth Allocation of Convergence of WiMAX and EPON .................... 660
Tao Tang, Guochu Shou, Yihong Hu, Zhigang Guo

A Dynamic Adaptive Routing Protocol for Heterogeneous Wireless Sensor Network ....................... 664
Luqun Li, Minle Zuo

A Range Query Model Based on DHT in P2P System ................................................................. 668
Wang Dan, Li Maozeng

A Novel Call Admission Control Routing Mechanism Using Bloom Filter in MANET .................... 673
Ding Yi

Impact of HTTP Compression on Web Response Time in Asymmetrical Wireless Network ............... 677
Xiaohui Chen, Weidong Wang, Guo Wei

Modeling for Mobile Communication Fading Channel Based on Regression Support Vector Machine ................................................................. 681
Jingwen Tian, Meijuan Gao, Shiru Zhou

Detecting New P2P Botnet with Multi-chart CUSUM ................................................................. 686
Jian Kang, Jun-Yao Zhang, Qiang Li, Zhuo Li

A Stable Hierarchical Peer-to-Peer Overlay for Scale Free Networks ........................................... 690
Wen-xiang Li, Cheng-cheng Guo

The Upper and Lower Bound of Distributed Cooperative Communication ...................................... 694
Changsong Xia, Weijun Cheng, Bocheng Zhu
A Role-Based Access Control Architecture for P2P File-Sharing Systems Using Primary/Backup Strategy ................................................................. Jianfeng Lu, Ruixuan Li, Zhengding Lu, Xiaopu Ma

An Identity Privacy Enhanced Trust Model in Fully Distributed Virtual Computing Environments .......................................................................................... 702 Yunzhao Wei, Yunxiang He, Liming Hao

A New Method to Reduce the PAPR in the IRA-OFDM System .................................................. 713 Xiaosong Wang, Guiran Chang

Improvement on APIT Localization Algorithms for Wireless Sensor Networks .................................................. 717 Ji zeng Wang, Hongxu Jin

A Simple Iterative Carrier Frequency Estimation Algorithm ............................................................. 722 Hua Xu, Dongmei Zhang

C-MAC: A TDMA-Based MAC Protocol for Underwater Acoustic Sensor Networks ...................................... 726 Yutao Ma, Zhongwen Guo, Yuan Feng, Mingxing Jiang, Guanglei Feng

A Probabilistic Drop Scheme for Mitigating SYN Flooding Attacks .................................................. 730 Yu Ming

An Improved LS Time Domain Channel Estimation Algorithm Based on MIMO-OFDM System ................................................................. 733 Qian Zhao, Zhaohua Zeng

Design of Node Power Management in WSN Based on Ant Colony Algorithm ............................................ 737 Li Hongsheng, Liu Sumin, Hu Bing

The Variances of VaR for the Poisson-Gumbel Compound Extreme Value Distribution and for the Poisson-Generalized Pareto Compound Peaks over Threshold Distribution ................. 746 Yueli Han, Daoji Shi

The Frequency Offset Estimation and Tracking in MIMO-OFDM BASED 802.11n System ................. 752 Yi Yong, Jian Haifang, Fang Zhi, Shi Yin

Information Exchange in the Process of Establishing on Base Station Cooperation ................................... 756 Jiang Weizhen, Zhang Zhongzhao, Sha Xuejun, Sun Linan

Containing Proactive P2P Worm Based on its Multicast Characteristic .............................................. 760 Zhiting Li, Yejiang Zhang, Zhengbing Hu, Huaqiang Lin, Chiuwei Lu

The Research of Bluetooth Wireless Communication Network in NC System ............................................. 764 Kunqi Wang, Peng Wang, Yanan Wang

Location-Aware and Secret Share Based Dynamic Key Management Scheme for Wireless Sensor Networks ............................................................. 768 Chunguang Ma, Guining Geng, Huaqi Wang, Guang Yang

Measuring and Modeling Message-Level Characteristics of BitTorrent .............................................. 772 Feng Liu, Zhiting Li, Lihui Huang

Research on Auto Extraction of Interested Region in Fire Image Compression ............................................. 776 Yongchun Zhang, Yudong Guan, Xiao Xu, Yan Li, Ti Han

Application of the Fuzzy Semantic Distance Model and Algorithms for Transporter Selection Problem ............................................................. 780 Lin Qiang, Xu Wenting
Design and Analysis of VCO in PLL System ................................................................. 784
   Wu Xiu-long, Chen Jun-ning, Meng Jian

Design of CMOS Variable Gain Amplifier for DTV Tuners ......................................... 787
   Shuping Yu, Yunfei Ye

A DNA Algorithm of a Kind of Circular Forbidden Permutation Problem .......................... 790
   Lei Wang, Yu-xing Yang, Ai-min Wang, Ji-lan Ma

The Impact of B2C Website Design Features on Consumers’ Purchase Intention .................. 794
   Chang Yaping, Han Dan, Yan Jun

Coordinate Control Modeling among Enterprises in B2B EC Based on CBR ...................... 798
   ShiBin Su, ZhenYu Liu, ZhengBing Hu

A Modified MRSVP Scheme Based on Motion Prediction ............................................. 802
   Fu Lin, DengYi Zhang, WenBin Hu, WenHai Li

Design and Application of Wirless Sensor Network Web Server Based on S3C2410 and Zigbee Protocol ................................................................. 805
   Jiang Yongping, Feng Zehao, Xu Du

A Novel DOA Algorithm for CDMA System .................................................................... 809
   Zhenzhe Peng, Fangjie Wan

DOA Estimation Algorithm Based on Cumulant for CDMA System ................................. 813
   Zhenzhe Peng, Youquan Mo, Maoliang Chen

Impact of Security on QoS in Communication Network .................................................. 817
   Jianyong Chen, Cunying Hu, Huawang Zeng, Jun Zhang

Distributed Guarding and Alarming System Based on Telephone Automatical Dialing and Remote Communication Technology ......................................................... 821
   Yu Chen

A Hybrid QR and PIC Detection Scheme Based on MIMO-OFDM Systems .................... 825
   Zhongpeng Wang

A New Algorithm to Testing Departure from Gaussianity of Stationary Process Based on Trispectrum ......................................................................................... 829
   Yongpeng Wu

Semantic Access Control for Web Services ..................................................................... 832
   Miao Liu, Dongqing Xie, Peng Li, Xunlai Zhang, Chunming Tang

An Empirical Analysis of Online Consumer Initial Trust Building Based on ELM .............. 836
   Tao Zhou, Yanjun Sun

Impossible Differential Cryptanalysis of SNAKE-2 ........................................................ 840
   Bing Sun, Longjiang Qu, Chao Li

An Information Security Model Based on Reputation and Integrality of P2P Network .......... 844
   Yihe Liu

Study the Logic Invariability in Subroutine’s Junk Code Fuzzy Transformation ................... 848
   Guo-Zi Sun, Bao-Bing Wang, Dan-Wei Chen, Qiang Cai

A Spanning Subtree Based Event-Triggered Time Synchronization Algorithm for Sensor Networks ........................................................................................................ 852
   Nuo Wei, Qiang Guo, Ruixia Liu, Jiuliang Lv

A Distributed Energy-Efficient and Delay-Aware Data Gathering Protocol for Wireless Sensor Networks ......................................................................................... 856
   Zuzhi Fan
The Research on Access Control for Bi-directional Multicast Routing ................................................................. 860
Zhikuan Sun, Shiwei Lin

An Adaptive Load Balanced on Demand Routing Protocol ....................................................................................... 863
Hao Jutao, Chen Qingkui, Huo Huan, Zhao Jing Jing

Ad Hoc Wireless Network to Support QoS in an Industrial Work Environment: Power Management ................................................................. 867
Long Zhao-Hua, Luo Jiang

Hidden Markov Model Based Real Time Network Security Quantification Method .................................................... 871
Weiming Li, Zhengbiao Guo

Minimum Mutual Information Criteria for Convolutitive Blind Source Separation ................................................... 878
Zhang Yan-liang, Li Bao-ping, Guo Hui

Shortest Path Routing Protocol for Multi-layer Mobile Wireless Sensor Networks .................................................. 883
Zhi-feng Duan, Fan Guo, Ming-xing Deng, Min Yu

An Encryption Algorithm Based on Transformed Logistic Map ........................................................................... 888
Jianquan Xie, Chunhua Yang, Qing Xie, Lijun Tian

Improved Block Soft Feedback Equalization Based on Sequence Detection ........................................................... 892
Xiaotao Deng, Jun Gao, Gaoqi Dou

Hybrid Protocol for Password-Based Key Exchange in Three-party Setting ........................................................... 896
He Xinzheng, Ru Bei, Fei Jinlong, Xun Baoceng

Implementation of QKD in 802.11 Networks ........................................................................................................... 902
Xu Huang, Shirantha Wijesekera, Dharmendra Sharma

Analysis of Packet Interference and Aggregated Throughput of Bluetooth Piconets ............................................. 906
Niu Yufeng, Zhuang Yiqi, Chen Naikuo

The Maneuverable Single Based Station Position Method in the Non-Line-of-Sight Cellular Environment ............................................................................................................................... 910
Yang Tianchi, Jin Liang

A MIH Based Architecture for WiMAX and TD-SCDMA Interworking ................................................................. 913
Yuan Jinsha, Bo Cui

A New Method for Constructing Families of Perfect Periodic Complementary Binary Sequences Pairs .................. 917
Jin Hui-long, Xu Cheng-qian, Zhang Jin-bo, Chen Jia-xing

An Energy-Aware Relay Selection Algorithm Based on Fuzzy Comprehensive Evaluation ................................ 921
Wendong Yang, Yueming Cai, Youyun Xu

Tamper Discrimination in RFID Tags Using Chaotic Fragile Watermark ............................................................... 924
Ming-Quan Fan, Hong-Xia Wang

An Efficient Multi-secret Sharing Scheme with the Quasi-threshold Multipartite Access Structure ................................................................. 928
Runhua Shi, Liusheng Huang, Wei Yang, Hong Zhong

A New Handover Arithmetic of Air-to-Ground Data Communication Over-section Networking ........................................... 932
Jing-bo Xia, Ming-hui Li, Lu-jun Wan, Huan-bin Wang

Research on Mandatory Access Control Model for Application System ............................................................ 936
Lu Xu, Hongqi Zhang, Xuehui Du, Chao Wang

Research on Policy-based Access Control Model .................................................................................................... 941
Lin Zhi, Wang Jing, Chen Xiao-su, Jia Lian-xing
A Novel Method of Breadth-first Searches with AI-Properties of VCN .......................................................... 945
Qiu-Sun Ye

A State-Adaptive Access Control Model for Web-Based IDRS System ................................................................. 949
Xinsong Wu, Yeping He, Zhouyi Zhou

Environment Monitoring System of Household Security Robot Based on Wireless Mesh
Network .............................................................................................................................................. 953
Wen-Tian, Yu Geng

Study on Fraud Risk Prevention of Online Banks ................................................................................................. 958
Qinghua Zhang

A Dynamic Scheduling Model for Real-Time Tasks in Reliable System ................................................................. 962
Zhang Jie, Yang Fumin, Tu Gang

Research and FPGA Implementation of MUSIC DOA of Smart Antenna Array ...................................................... 966
Song Wen-miao, Zhang Jing-ying

Fault Tolerance and Transmission Delay in Wireless Mesh Networks ................................................................. 970
Zhang Lili, Wang Huibin, Xu Lizhong, Xu Zhuoming, Li Chenming

MANET Routing Protocol for Improving Routing Discovery Based on AODV ...................................................... 974
Zhang Jianwu, Zou Jingyuan, Zhao Qi

Security Difference between DSA and Schnorr's Signature .................................................................................... 978
Zhengjun Cao, Olivier Markowitch

The CDMA/TDMA Reform Scheme of WCDMA HSDPA ................................................................................... 982
Xiangdong Jia, Haiyang Fu

Application of Comprehensive Fuzzy Evaluation in LAN Security ......................................................................... 986
Zhiming Qu, Xiaoli Wang

Application Research on Primary Components Analysis in Assessing Influential Factors of
Campus Network Security .................................................................................................................................... 991
Zhiming Qu, Xiaoli Wang

The Design of Retrodirective Array in Wireless Sensor Networks ......................................................................... 996
Ling Chen, Shu Yan

Medical Image Testing Based on Fractal Spectrum Theory ..................................................................................... 1000

Privacy Preserving C4.5 Algorithm over Vertically Distributed Datasets ...................... 1223
Yanguang Shen, Hui Shao, Li Yang

Transmit Antenna Selection for the Distributed MIMO Systems .................................. 1226
Peng Shang, Guangxi Zhu, Li Tan, Gang Su, Tan Li

The Mobile ECG Telemonitoring System Based on GPRS and GPS .......................... 1231
Jun Zhang, ZhenGrong Lu

A QoS Mechanism for CM in HFC Network .......................................................... 1234
Lihua Song, Peiya Li, Yan Zhang

Research on Network Attack-Defense Simulation Training Platform .......................... 1239
Zhi Wei Lin, Gang Chen

Energy-aware AODV Routing for Ad Hoc Networks ............................................... 1243
Cao Jianglian, Zhang Zhaoxiao, Zeng Wenli, Pei Tingrui

Energy-Efficient Multi-hop Hierarchical Routing Protocol for Wireless Sensor Networks ................................. 1246
Wen-Wen Huang, Ya-Li Peng, Jian Wen, Min Yu

A Trustworthy Next Generation Internet Protocol Model ......................................... 1250
Yong-Min Liu, Xin-Hua Jiang, Xiao-Hong Nian, Wu-Yi Lu, Sheng-Yue Yang

A Security Protocol for Mobile E-service Oriented Architecture (MSOA): Design and Implementation .............................................................. 1254
Mingjun Xin, Zhangwei Huang, Quan Qian

P2P-based E-commerce Trust Model and Strategies ............................................ 1258
Chen Xin

Modeling Distributed Multi-Granularity P2P Traffic Identifying and Controlling System .................. 1261

Research on Immune Based Adaptive Intrusion Detection System Model .................. 1265
Lei Deng, De-yuan Gao

A Novel Design of Mobile IM System with Network Management ............................. 1269
Yunxiang Gao, Chuangbai Xiao, Chaoqin Gao, Huiguang Chen
Design of Sight Spot Ticket Management System Based on RFID ............................................................. 1273
Bo Yan, Danyu Lee

Spray and Wait Routing Based on Average Delivery Probability in Delay Tolerant Network ............................................................. 1277
Jingfeng Xue, Xiamei Fan, Yuanda Cao, Ji Fang, Jiansheng Li

Study on Security Management Architecture for Sensor Network Based on Intrusion Detection ............................................................. 1280
Xi Peng, Zheng Wu, Debo Xi, Yang Yu

Adaptively Secure On-line/Off-line Threshold Signatures ................................. 1285
Chong-qi Gao, Chunming Tang, Zheng-an Yao, Dongqing Xie

A New Anonymous Conference Authentication Scheme Based on Knapsack Problem .......... 1289
Bin Wang, Yun-fei Guo, Jia Zhou, Jian-hui Zhang

An Organization-Structure Oriented Access Control Policy and its Formal Description ............................................................. 1293
Xiaolong Zhao, Yusen Zhang, Yingxun Zhu

An Identity-based and Threshold Key Management Scheme for Ad Hoc Networks ............................................................. 1297
Hua Sun, Xuefeng Zheng, Zhongjun Deng

QoS-Guaranteed Algorithm for Composed Service Path Selection in the SON ............................................................. 1301
Yan-mei Zhang, Zhen-wei Yu, Huai-hu Cao

Short-Term Load Forecasting Based on the BKF-SVM ................................. 1305
Kebin Cui, Yingshuang Du

Design and Implementation of an E-card System Based on a Variety of Network Access ............................................................. 1309
Ning Li, Lingyan Bi, Zewei Feng, Haobin Zhong

A Study of Anti-phishing Strategies Based on TRIZ ................................................ 1313
Ming Qi, Chang-Yi Zou

A Trust Model for Heterogeneous Trusted Computing Architectures ............................................................. 1316
Lu Zhu, Sheng Yu, Xing Zhang

Binary Zero Correlation Zone Sequence Pair Set Constructed from Difference Set Pairs ............................................................. 1320
Kai Liu, Chengqian Xu, Gang Li

A Solution for Whitewashing in P2P Systems Based on Observation Preorder ............................................................. 1324
Jianguo Chen, Huijuan Lu, Stefan D. Bruda

Model Checking Needham-Schroeder Security Protocol Based on Temporal Logic of Knowledge ............................................................. 1328
Xiangyu Luo, Yan Chen, Ming Gu, Lijun Wu

On-Demand Multimedia Broadcast for Asymmetric Wireless Communication ............................................................. 1332
Tengyue Zou, Huiyou Chang, Qing Wang

Research of Secure Multicast Key Management Protocol Based on Fault-Tolerant Mechanism ............................................................. 1337
Guangwei Liu, Jian Xu, Mengmeng Cao, Fucai Zhou, Bin Zhang

Topology and Routing Schemes for Fault-Tolerant Clos Network ............................................................. 1341
Xinming Duan, Dakun Zhang, Xuemei Sun

Immune Mechanism Based Intrusion Detection Systems ............................................................. 1345
Lu Hong

Routing Schemes of an Irregular Mesh-Based NoC ............................................................. 1349
