TABLE OF CONTENTS

VOLUME 1

Kinetics of the Reaction of Citric Acid With Calcite .......................................................................................................... 1
  M. H. Alkhaldi, H. A. Nasr-El-Din, H. Sarma

Re-commissioning of Mothballed Pipelines Offshore California: A Success Story of Cleaning, Pigging, Monitoring and Integrity Management ......................................................................................... 18
  J. J. Wylde

A New MIC Control Strategy in Low Velocity Gas Gathering Pipelines ................................................................. 28
  C. Smith, C. Li, T. Bedard, J. Kimler

An Innovative Cement Formula to Prevent Gas Migration Problems in HT/HP Wells .................................................. 41
  A. S. Al-Yami, H. A. Nasr-El-Din, Ahmad Al-Humaidi

Low Dosage, High Efficiency and Environment Friendly Inhibitors: A New Horizon in Gas Hydrates Mitigation in Production Systems .................................................................................................................. 51
  Krupa Kannan, Aarti Punase

Sandstone Cores as Reaction Vessels: Synthesis of Calcium Carbonate Particles for Artificial Formation Damage in the Qualification of Matrix Acidizing Solutions ........................................................................... 59
  Michael J. Fuller

Successful Field Application of a High-Temperature Conformance Polymer in Mexico .................................................. 68
  Modesto Mercado, Juan Carlos Acuna, Carlos Caballero, Julio Vasquez, Eduardo Sotiao

Impact of Successful Squeezes on Treatment Lifetime and Well Productivity: Comparative Assessment of Viscosified and Non-Viscosified Treatments ................................................................. 76
  Niall Fleming, Kari Ramstad, Sam Kidd, Laurien Wichers Hoeth

Prevention of Vertical Gas Flow in a Collapsed Well Using ............................................................................................ 93
  I. Lakatos, Boromir Medic, Dragana Jovicic, Ivan Basic, Julianna Lakatos-Szabo

Identification and Analysis of Biocides Effective Against Sessile Organisms .............................................................. 107
  Victor Keaster, Brian Bennett, Raul Diaz, Paul Lindemuth, Dale Kasowski, Craig Adelizzi, Lory Z. Santiago-Vazquez

Sorel Cement for HPHT Downhole Applications ............................................................................................................ 121
  Ashok Santra, Feng Liang, Rocky Fitzgerald

Reaction of CO2 with Portland Cement at Downhole Conditions and the Role of Pozzolanic Supplements .......................................................... 127
  Ashok Santra, B. R. Reddy, Feng Liang, Rocky Fitzgerald

The Modelling, Application and Monitoring of Scale Squeeze Treatments in Heterogeneous Reservoirs, North Sea ................................................................................................................................. 136
  M. M. Jordan

Selection and Application of Scale Inhibitor for Application in Oxygenated Produced Water, Norwegian Sector, North Sea .............................................................................................................. 153
  D. Marlow, A. Madden, L. Sutherland, M. M. Jordan, E. Sorhaug

Development of High-Performance Water-Based Mud Formulation Based on Amine Derivatives .................................. 169
  Nima Gholizadeh-Doonechaly, Korosh Tahmasbi, Ehsan Davani

New Polymer Technology for Sand Control Treatments of Gas Storage Wells .......................................................... 178
  Alain Zaitoun, Thierry Pichery

Core Flood Investigation into Asphaltene Deposition Tendencies in the Marrat Reservoir, South East Kuwait .................................................................................................................................................. 188

An Experimental Study of the Pore Blocking Mechanisms of Aphron Drilling Fluids using Micromodels ................................................................................................................................. 201

Forecasting the Effects of Reservoir Souring From Waterflooding a Formation Containing Siderite............................. 217
  E. D. Burger, G. E. Jenneman

Chemistry and Mechanisms of Completion/Packer Fluids: Annular Environmentally Assisted Cracking (AEAC) of Martensitic Stainless Steel Tubing – Misconceptions Regarding the Chemical Role of Completion / Packer Fluids ................................................................................................................. 232
  Jeffrey S. McKennis, Nam Bae, Enrico J. Termine, Ken Shimamoto, Mitsuo Kimura
47Ca-Aided Studies of CaCO₃ Scaling Rates at Low Saturation Ratios ................................................................. 241
S. Hassfjell, A. Haugan, T. Bjornstad

Development of Environmental Friendly Iron Sulfide Inhibitors for Field Application ................................. 259
Tao Chen, Harry Montgomerie, Ping Chen, Thomas Hagen, Stuart Kegg

Understanding the Mechanisms of Halite Inhibition and Evaluation of Halite Scale Inhibitor by Static and Dynamic Tests ........................................................................................................................................................................... 269
Tao Chen, Harry Montgomerie, Ping Chen, Tim Jackson, Olav Vikane

Stability of Partially Hydrolyzed Polyacrylamides at Elevated Temperatures in the Absence of Divalent Cations ........................................................................................................................................................................................................................................ 277
R. S. Seright, A. R. Campbell, P. S. Mozley

The Corrosiveness of Nitrite in a Produced Water System ......................................................................................... 292
Gary Jenneman, Mohsen Achour, Mike Joosten

A Study of Proppant-Formation Reactions .................................................................................................................. 300
Jim Weaver, Richard Rickman, Hongyu Luo, Ray Loghry

Effects of Hydrogen Sulfide on Gel Typed Plugging Agents ....................................................................................... 316
Qing You, Yefei Wang, Wei Zhou, Fulin Zhao, Jian Zhang, Guang Yang

Successful Naphthenate Scale and Soap Emulsion Management ................................................................................ 326
Gerard Runham, Colin Smith

Physico-Chemical Interactions Perturbing The Effectiveness Of An ATBS-based fluid Loss Polymer Used In Oil Well Cementing ................................................................................................................................................................................. 338
J. Plank, N. Recalde Lummer, F. Dugonjic-Bili

Comparative Study of the Working Mechanisms of Chemically Different Cement Fluid Loss Polymers ............................................................................................................................................................................. 354
J. Plank, F. Dugonjic-Bili, N. Recalde Lummer, D. Sadasiwan

Experimental Methodology to Evaluate DRA: Effect of Water Content and Waxes on Their Efficiency ............................................................................................................................................................................. 380
I. Henaut, M. Darbouret, T. Palermo, P. Glenat, C. Hurtevent

Formate Brines for HPHT Well Control—New Insights into the Role and Importance of the Carbonate/Bicarbonate Additive Package .............................................................................................................................................................................. 388
Siv Howard, John D. Downs

Surfactant-Assisted Synthesis of Metal-Phosphonate Inhibitor Nanoparticles and its Transport in Porous Media ................................................................................................................................................................................. 400
Ping Zhang, Dong Shen, Chunjung Fan, Amy T. Kan, Mason B. Tomson

Molar Ratio of Ca²⁺ to Fe³⁺ in the Supersaturated Solution of Iron Carbonate and Calcium Carbonate and in the Precipitate: Relation and Interpretation ..................................................................................................... 412
H. A. Alsaiari, A. Kan, M. B. Tomson

Self-Healing Cements that Heal without Dependence on Fluid Contact ......................................................................... 430
B. R. Reddy, Feng Liang, Rocky Fitzgerald

Enhanced Effect of Transition Metal Ions on Inhibitor Squeeze Treatments .......................................................... 437
Gongmin Fu, Amy T. Kan, Mason B. Tomson

Barite Nucleation and Inhibition at 0-200°C, With and Without Hydrate Inhibitors .................................................... 450
Chunjung Fan, Amy T. Kan, Mason B. Tomson

Effects of Monoethylene Glycol on Carbonate Equilibrium and Calcite Solubility in Gas/Monoethylene Glycol/Water/Salt Mixed Systems ............................................................................................................................................................................. 466
Haiping Lu, Amy T. Kan, Mason B. Tomson

Quantitative Evaluation of Calcium Sulfate Precipitation Kinetics in the Presence and Absence of Scale Inhibitors .............................................................................................................................................................. 485
Amy T. Kan, Gongmin Fu, Chunjung Fan, Mason B. Tomson, Dong Shen

Testing Gas Well Deliquification Chemicals at Real Downhole Conditions ............................................................. 504
Marek Pakalski

Chemistry of Injection Water and its Impact on Oil Recovery in Carbonate and Clastic Formations ............................. 512
M. B. Abolattabi, H. A. Nasr-El-Din

Troubleshooting Nitrate Field Injections for Control of Reservoir Souring ............................................................ 522
T. R. Jack, A. Grigoryan, A. Lambo, G. Voordouw, T. Granli

Viscometer for Opaque, Sealed Microemulsion Samples ............................................................................................ 534
Jose Lopez Salinas, Clarence A. Miller, Kay Hun Koh Yoo, Maura Puerto, George J. Hirasaki
VOLUME 2

Fractional-Flow Theory of Foam Displacements With Oil ................................................................. 553
E. Ashoori, T. L. M. van der Heijden, W. R. Rossen

Chromatographic Separation of Chemicals in Alkaline Surfactant Polymer Flooding in Reservoir
Rocks in the Daqing Oilfield .................................................................................................................. 570
Daoshun Li, Mingyu Shi, Demin Wang, Zhao Li, He Fei

Remediation of Naphthenate Stable Emulsion for Malaysian Oilfields ........................................... 581
Intan Khalida Salleh, Muhammad Nadeem, Khairul Mustaqim A. Aziz, Noraliza Alwi, Pauziyah A. Hamid, Arif Azhan

Spectroscopic Determination of Naphthenic Acid Composition from Various Calcium Naphthenates
Field Deposits ........................................................................................................................................ 595
Mohammed Murtala Ahmed, K. S. Sorbie

Completion Fluids Challenges in Maximum Reservoir Contact Wells .......................................... 605
A. S. Al-Yami, H. A. Nasr-El-Din

A New Look at the Viscoelastic Fluid Flow in Porous Media—A Possible Mechanism of Internal Cake
Formation and Formation Damage Control ...................................................................................... 617
H. Dehghanpour, E. Kuru

The Application of Bioassays for Evaluating In-Situ Biocide Efficiency in Offshore Oil Production in
the North Sea.................................................................................................................................... 632
Lars Hvejsel Hansen, Jan Larsen, Michael Jensen, Uffe Sognstrup Thomsen, Ketil Sørensen, Thomas Lundgaard,
Torben Lund Skovhus

New Method for Scale Inhibitor Testing ........................................................................................... 641
Erling Notto Halvorsen, Anne Marie Koren Halvorsen, Kristin Reiersølmoen, Tore Roberg Andersen, Cecile
Bjornstad

Qualification of Scale Inhibitors for Sub Sea Tie Backs With MEG Injection .................................. 652
Erling Notto Halvorsen, Anne Marie Koren Halvorsen, Kristin Reiersølmoen, Tore Roberg Andersen, Cecile
Bjornstad

Improved Oil Recovery With Chemicals in Carbonate Formations ................................................. 666
René Tabary, Antoine Fornari, Brigitte Bazin, Bernard Bourbiaux, Christine Dalmauzone

Development of a Methodology for the Optimization of Dehydration of Extra-Heavy Oil Emulsions .................................................................................................................. 679
C. Dalmauzone, C. Noik, P. Glénat, F. Dang

Development of Fourier Transform-Ion Cyclotron Resonance Mass Spectrometry Protocol for the
Analysis of Asphaltene Field Samples and Solubility Fractions ..................................................... 695

New Viscoelastic Fluid for Chemical EOR ......................................................................................... 702
Mikel Morvan, Guillaume Degré, Jacques Leng, Chloé Masselon, Patrick Moreau, Jérôme Bouillot, Alain Zaitoun

An Improved Oil-Based Chemical Gel System for Wellbore Stabilization ...................................... 717
Jason T. Scorsone, Mark W. Sanders, Arvind D. Patel

Successful Scale Mitigation Strategies in Saudi Arabian Oil Fields ............................................... 722
Kris U. Raju

Integration of Kinetics into Scale Prediction Software, ScaleSoftPitzer ......................................... 732
Mason Tomson, Chunfang Fan, Haiping Lu, Ping Zhang, Hamad Alsaiari, Amy T. Kan

Modelling Staged Diversion Treatments and Chemical Placement in the Presence of Near-Wellbore
Fractures ............................................................................................................................................ 745
Robert Stalker, Gordon M. Graham, Gbenga Ohenyemi

pH-Sensitive Polymers for Novel Conformance Control and Polymerflood Applications ................. 758
Suk Kyooon Choi, Mukul M. Sharma, Steven L. Bryant, Chun Huh

Laboratory Measurement of pH of Live Waters at High Temperatures and Pressures .................. 781
S. G. Mathews, B. Raghubaraman, D. W. Rosiere, W. Wei, S. Colacelli, H. A. Rehman

Evaluation of H₂S Scavengers for Matrix Acidizing Treatment ................................................... 792

Reacting Ions Method to Identify Injected Water Fraction in Produced Brine ................................ 801
O. Ishkov, E. Mackay, Ken Sorbie

An Environmentally Friendly Stimulation Fluid for High Temperature Applications ..................... 817
J. N. LePage, C. A. De Wolf, J. H. Bemelaar, H. A. Nasr-El-Din
