## Table of Contents

### Session: MA1 - Waveform Design Methods
**Session Chair:** Arye Nehorai - Washington University in St. Louis

1. **Optimal Waveform Design for Cognitive Radar**
   - Simon Haykin, Yanbo Xue, Timothy N. Davidson, McMaster University
   - John Benedetto, University of Maryland at College Park; Jeffrey Donatelli, University of California, Berkeley
   - Pages: 3

2. **Frames and a vector-valued ambiguity function**
   - John Benedetto, University of Maryland at College Park; Jeffrey Donatelli, University of California, Berkeley
   - Pages: 8

3. **Novel Waveform and Processing Techniques for Monostatic and Bistatic Radar**
   - Shahzada Basharat Rasool, Mark R. Bell, Purdue University
   - Pages: 13

4. **Analysis of Random Radar Networks**
   - Rani Daher, Raviraj Adve, University of Toronto
   - Pages: 21

5. **Unitary Design of Radar Waveform Diversity Sets**
   - Michael Zoltowski, Tariq Qureshi, Purdue University; Robert Calderbank, Princeton University; William Moran, University of Melbourne
   - Pages: 26

6. **Dynamic Waveform Design for Target Tracking Using MIMO Radar**
   - Jun Zhang, Bhavana Manjunath, Arizona State University; Ghassan Maalouli, Raytheon Missile Systems; Antonia Papandreou-Suppappola, Darryl Morrell, Arizona State University
   - Pages: 31

7. **Bat-Inspired Adaptive Design of Waveform and Trajectory for Radar**
   - Martin Hurtado, Arye Nehorai, Washington University in St. Louis
   - Pages: 36

8. **Compressed Sensing in MIMO Radar**
   - Chun-Yang Chen, P. P. Vaidyanathan, California Institute of Technology
   - Pages: 41

### Session: MA2 - Advances in Bioimaging and Analysis
**Session Chair:** Jean-Christophe Olivo-Marin - Institut Pasteur

1. **Towards Monitoring Cellular Motion and Function**
   - Dirk Padfield, Jens Rittscher, GE Global Research; Badrinath Roysam, Rensselaer Polytechnic Institute
   - Pages: 47

2. **Tracking Live Cells in 4D Microscopy: from Active Surfaces to Active Meshes**
   - Alexandre Dufour, Jean-Christophe Olivo-Marin, Institut Pasteur
   - Pages: 51

3. **Quantitative Analysis of Border Cell Migration**
   - Shann-Ching Chen, Gaudenz Danuser, Scripps Research Institute
   - Pages: 56

4. **Intelligent Acquisition and Learning of Fluorescence Microscope Data Models**
   - Charles Jackson, Robert Murphy, Jelena Kovacevic, Carnegie Mellon University
   - Pages: 61

5. **Quantitative imaging of the collective cell movements shaping an embryo**
   - Willy Supatto, Amy McMahon, Scott E. Fraser, Angelike Stathopoulos, California Institute of Technology
   - Pages: N/A

6. **Quantitative analysis of deconvolution methods for fluorescence microscopy images**
   - Mahsa Ranji, Diego Calzolari, Jeffrey Price, Burnham Institute for Medical Research
   - Pages: N/A

### Session: MA3a - Relaying and Cooperation I
**Session Chairs:** Yingbin Liang - University of Hawaii and Venu Veeravalli - UIUC

1. **Compute-and-Forward: A Novel Strategy for Cooperative Networks**
   - Bobak Nazer, Michael Gastpar, University of California, Berkeley
   - Pages: 69

</table>
A Complete Real-Time 802.11a Baseband Receiver Implemented on an Array of Programmable Processors
Anh Tran, Dean Truong, Bevan Baas, University of California, Davis

A Parallel Decoding Algorithm of LDPC Codes using CUDA
Shuang Wang, Samuel Cheng, University of Oklahoma, Tulsa; Qiang Wu, Soft Imaging, LLC

Efficient Time-Frequency and Bi-Frequency Signal Processing On A Reconfigurable Computer
Gary Upperman, Teresa Upperman, Douglas Fouts, Phillip Pace, Naval Postgraduate School

Session: MA6 - MIMO Radar and Sensor Fusion
Session Chair: Rabinder Madan - ONR
MIMO radar: snake oil or good idea?
Frederick Daum, Jim Huang, Raytheon

MIMO Radar with Broadband waveforms: Smearing Filter Banks and 2D Virtual Arrays
P. P. Vaidyanathan, Piva Pal, Chun-Yang Chen, California Institute of Technology

Communication-Inspired Sensing
Wenhu Zhang, Liqiang Yang, University of Florida

On the Distribution of Ambiguity Levels in MIMO Radar
Mohamed Haleem, Alexander Haimovich, New Jersey Institute of Technology

Distributed MIMO Radar Using Compressive Sampling
Athina Petropulu, Yao Yu, Drexel University; H. Vincent Poor, Princeton University

MIMO Radar Detection of Targets in Compound-Gaussian Clutter
Murat Akcakaya, Martin Hurtado, Arve Nehorai, Washington University in St. Louis

Compressed Sensing for OFDM/MIMO Radar
Christian R. Berger, Shengli Zhou, Peter Willett, University of Connecticut; Bruno Demissie, Joerg Heckenbach, Research Establishment for Applied Science (FGAN)

ADAPTIVE SENSING OF TARGET SIGNATURE WITH UNKNOWN AMPLITUDE
Daniel Fuhrmann, Washington University in St. Louis

Session: MA7 - Adaptive Filtering: Theory and Applications
Session Chairs: Jean-Yves Tourneret - IRIT - ENSEEIHT - TeSA and Neil Bershad - University of California, Irvine
Variable length adaptive filtering within incremental learning algorithms for distributed networks
Leilei Li, Yonggang Zhang, Jonathon Chambers, Loughborough University

An Affine Combination of Two NLMS Adaptive Filters - Transient Mean-Square Analysis
Jose Carlos M. Bermudez, Federal University of Santa Catarina; Neil J. Bershad, University of California, Irvine; Jean-Yves Tourneret, University of Toulouse

Affine combination of adaptive filters
Renato Candido, Magno T. M. Silva, Vitor H. Nascimento, University of Sao Paulo

Interference-Driven Adaptation in Sparse Approximation
Bob L. Sturm, John J. Shynk, University of California, Santa Barbara

Distributed prediction of time series data with kernels and adaptive filtering techniques in sensor networks
Paul Honeine, Cédric Richard, Université de Technologie de Troyes; Jose Carlos M. Bermudez, Federal University of Santa Catarina; Hichem Snoussi, Université de Technologie de Troyes

Diffusion LMS Algorithms with Information Exchange
Federico S. Cattivelli, Ali H. Sayed, University of California, Los Angeles

Analytical Analysis of Transient and Steady-State Properties of the Proportionate NLMS Algorithm
Kevin Wagner, Naval Research Laboratory; Milos Doroslovacki, George Washington University

Fault Tolerant Adaptive Filters Based on Number Theoretic Transforms
Chandrashekar Rhadakrishnan, William Jenkins, Pennsylvania State University

Session: MA8a1 - Array Processing and Source Localization
Session Chair: Brian Evans - University of Texas
On the use of the Global Matched Filter for DOA estimation in the presence of correlated waveforms
Jean Jacques Fuchs, IRISA/INRIA/Université de Rennes
Hybrid Cramer-Rao Bound for Moving Array

Da Xie, Tingting Niu, Jianguo Huang, Northwestern Polytechnical University; Hongya Ge, New Jersey Institute of Technology

Nonparametric and Sparse Signal Representations in Array Processing via Iterative Adaptive Approaches

Tarik Yardibi, Jian Li, University of Florida; Petre Stoica, Uppsala University

Passive Sonar Target Localization Using a Histogram Filter with Model-Derived Priors

Colin Jemmott, R. Lee Culver, Nermal Bose, Pennsylvania State University

Localization of Packet Based Radio Transmitters in Space, Time, and Frequency

Goran Ivkovic, Predrag Spasojevic, Ivan Seskar, Rutgers University

DOA Estimation Using Vector Sensor Arrays

Hung Lai, Lockheed Martin; Kristine Bell, George Mason University; Henry Cox, Lockheed Martin

Array Steered Response Time-Alignment for Propagation Delay Compensation for Acoustic Localization

Pasi Pertilä, Tampere University of Technology

Advanced Sonar Processing Techniques for Underwater Acoustic Multi-Input Multi-Output Communications

Brian Stein, Yang You, Terry Bradner, Brian Evans, University of Texas at Austin

Session: MA8a2 - Multiuser MIMO

Session Chair: James Zeidler - University of California San Diego

A GMD-Based Precoding Scheme for Downlink Multiuser Multistream MIMO Channels

Zhilan Xiong, Ramani Krishna, Sangarapillai Lambotharan, Jonathon Chambers, Loughborough University

A Combinatorial Approach to Maximizing the Sum Rate in the MIMO BC with Linear Precoding

Raphael Hunger, David A. Schmidt, Michael Joham, Technische Universität München

Transceiver Design for Sum-MSE Optimization in MIMO MAC with Imperfect Channel Estimation

Patricia Layec, Orange Labs; Pablo Piantanida, SUPELEC, Department of Telecommunications; Raphaël Vissot, Orange Labs; Antoine O. Berthet, SUPELEC, Department of Telecommunications

Instantaneous and Average Rate Maximization in MIMO Multiple-Access Channels (MAC) with Linear Processing

Adam Anderson, James Zeidler, University of California, San Diego; Michael Jensen, Brigham Young University

LMMSE Channel Estimation for MIMO W-CDMA with Out-of-Cell Interference Mitigation

Roland Tresch, ftw.; Christian Mehlführer, Vienna University of Technology; Maxime Guillaud, ftw.

Efficient Linear Successive Allocation for the MIMO Broadcast Channel

Christian Guthy, Wolfgang Utschick, Technische Universität München; Guido Dietl, DOCOMO Communications Laboratories Europe GmbH; Pedro Tejera, Technische Universität München

Dirty Paper Coding for Fading Channels with Partial Transmitter Side Information

Chinmay Vaze, Mahesh Varanasi, University of Colorado, Boulder

On Capacity Scaling of (Long) MIMO Amplify-and-Forward Multi-Hop Networks

Jörg Wagner, Wittneben Armin, ETH Zurich

Zero-Forcing-Based Two-Phase Relaying with Multiple Mobile Stations

Hyun Jong Yang, Bang Chul Jung, Joshwan Chun, Korea Advanced Institute of Science and Technology

Coordinated Linear Beamforming in Downlink Multi-Cell Wireless Networks

Luca Venturino, Università degli Studi di Cassino; Narayan Prasad, NEC Labs America; Xiaodong Wang, Columbia University

Session: MA8a3 - Beamforming

Session Chair: Jian Li - University of Florida

Review of User Parameter-Free Robust Adaptive Beamforming Algorithms

Lin Du, Tarik Yardibi, Jian Li, University of Florida; Petre Stoica, Uppsala University

A Semiblind Adaptive Antenna for WCDMA Using a Least-Squares Constant-Modulus Formulation

Sheng-Luen Wei, John J. Shynk, University of California, Santa Barbara
Designing a spatial filter to improve SNR in two-class discrimination problems for BCI ..................................................372

David Gutierrez, Centro de Investigación y de Estudios Avanzados, Unidad Monterrey

Robust Interference Control Techniques for Multiuser Cognitive Radios Using Worst-Case .........................................................378

Performance Optimization

Kanapathippillai Cumanan, Ranaji Krishna, Vimal Sharma, Sangarapillai Lambotharan, Loughborough University

Passive Beamforming Enhancements in Relation to Active- Passive Data Fusion ..................................................383

Bryan Yocom, Thomas Yudichak, Brian La Cour, Applied Research Laboratories: University of Texas at Austin

Preprocessing by Eigenbeams and Doppler Filters to Improve Performance of Detection of Signal ........................................388

Ryuhei Takahashi, Kazufumi Hirata, Hisakazu Maniwa, Mitsubishi Electric Corporation

Antenna Grouping Techniques for MIMO Beamforming Systems ..................................................................................393

Kyungchul Kim, Jungwoo Lee, Seoul National University

Sensibility Study for the Near-Field Sub-Band Beamforming Method for Damage Detection in Bridges ..................398

Alessio Medda, Victor DeBrunner, Florida State University

Adaptive Factored Beamforming For Vector Sensor Arrays ..................................................................................402

Hung Lai, Henry Cox, Lockheed Martin; Kristine Bell, George Mason University

Sidelobe Suppressing Beamforming Using Linearly Constrained Adaptive Arrays for Low Angle Tracking ........407

Jungtai Kim, Hyun Jong Yang, Joohwan Chun, Korea Advanced Institute of Science and Technology

Session: MA8b1 - Topics in Communications

Session Chair: Todd Moon - Utah State University

Long Block Length Reed Solomon Coded M-ary Hyper Phase-Shift Keying ..........................................................413

James Caldwell, Clark Robertson, Naval Postgraduate School

Bandwidth Efficient Constant Envelope Modulation with Binary Convolutional Coding ..........................................418

Douglas Hermes, United States Air Force; Frank Kragh, Clark Robertson, Naval Postgraduate School

Joint Channel and Frequency Offset Estimators for Frequency-Flat Fast Fading Channels ........................................423

Rami Khal, Yuriy Zakharov, Junruo Zhang, University of York

Multi-threshold TOP --- Full-diversity Vector Perturbation Precoding with Finite-rate ........................................428

Feedforward

Johannes Maurer, Joakim Jaldén, Gerald Matz, Vienna University of Technology

Performance of the Bit-interleaved Frequency Domain Turbo Equalization over Experimental ..................................433

Underwater Acoustic Channels

Chantri Polprasert, James Ritcey, University of Washington

Joint Bayesian Soft Multiuser Decoding and Multichannel Estimation Based on the Variational IEM Algorithm ..........438

Alexander Kocian, University of Rome “Tor Vergata”; Bin Hu, Nokia Denmark; Bernard Fleury, Aalborg University

MIMO-BICM with Imperfect Channel State Information: EXIT Chart Analysis and LDPC Code ........................................443

Optimization

Clemens Novak, Vienna University of Technology; Gottfried Lechner, Institute for Telecommunications Research; Gerald Matz, Vienna University of Technology

A Thresholding Algorithm for Improved Split-Row Decoding of LDPC Codes ..........................................................448

Tinoosh Mohsenin, University of California, Davis; Pascal Urard, STMicroelectronics; Bevan Baas, University of California, Davis

Theoretical Models of Oscillators, Phase Noise and the Effects of Nonlinearity ..................................................452

Yenming Chen, University of Southern California / Northrop Grumman; Robert Scholtz, University of Southern California

ISI Effects in a Hybrid ICA-SVM Modulation Recognition Algorithm ..................................................................................457

David Boutte, Bala Santhanam, University of New Mexico

Generalized Minimum Probability of Symbol Error Adaptive Equalization ..................................................461

Jacob Gunther, Todd Moon, Utah State University

Efficient Early Stopping Method for LDPC Decoding Based on Check-Node Messages ........................................466

Z. H. Cai, J. Hao, U. Ubolthip Sethakaset, Institute for Infocomm Research
Optimal Detection in MIMO Rayleigh Fast Fading Channels with Imperfect Channel Estimation
Junruo Zhang, Yuriy Zakharov, University of York; Vladimir Barankin, N. N. Andreev Acoustics Institute

Optimal Power Allocation Policies for the Reliable Transmission of a Single Packet via ARQ
Moritz Wiese, Technical University of Berlin; Anastasios Giovanidis, Gerhard Wunder, Fraunhofer Institute for Telecommunications, Heinrich Hertz Institute

Opportunistic Power Allocation for Point-to-Point Communication in Self-Organized Networks
Mehdi Bennis, Centre for Wireless Communications, University of Oulu; Merouane Debbah, SUPELEC; Jorma Lilleberg, Nokia

Session: MA8b2 - Radar Signal Processing
Session Chair: Scott Hensley - Jet Propulsion Lab (JPL)
Parameter Estimation of Linear Frequency-Modulated Signal Using Integrated Cubic Phase
Pu Wang, Hongbin Li, Stevens Institute of Technology; Braham Himed, Signal Labs Inc.

Wavenumber Domain Focusing of Squinted SAR Data with a Curved Orbit Geometry
Thierry Michel, Scott Hensley, Jet Propulsion Laboratory

A Terrain Elevation Error Model for Stereometric SAR Systems Engineering
Nick Marechal, The Aerospace Corp

The Use of Complementary Sets in MIMO Radar
Stephen Searle, University of Melbourne; Stephen Howard, Defence Science and Technology Organization; Bill Moran, University of Melbourne

Retrodirective Airborne Radar for Urban Surveillance
Louis Fertig, Georgia Tech Research Institute

MIMO Radar Direction Finding Performance Using Swerling Models
Tuomas Aittomäki, Visa Koivunen, Helsinki University of Technology

Overcoming Polar Format Issues in MultiChannel SAR Autofocus
Hyun Jeong Cho, David Munson, University of Michigan

Nonlinear Decision Rules for Robust Noncoherent Integration
Don Day, Johns Hopkins University

Reduced-Rank STAP Algorithm for Adaptive Radar Based on Joint Iterative Optimization of Adaptive Filters
Rui Fa, Rodrigo de Lamare, Danilo Zanatta Filho, University of York

Session: MA8b3 - Multi-rate and Digital Signal Processing
Session Chair: Peter Stoica - Uppsala University
A Nyquist Folding Analog-to-Information Receiver
Gerald Fudge, L-3 Communications Integrated Systems; Ross Bland, University of Texas Southwestern Medical Center at Dallas; Mark Chivers, Sujit Ravindran, L-3 Communications Integrated Systems; Jarvis Haupt, University of Wisconsin-Madison; Phillip Pace, Naval Postgraduate School

Finite Wordlength Digital Filter Design Using Simulated Annealing
Byung Wook Jung, Hyun Jong Yang, Joohwan Chun, Korea Advanced Institute of Science and Technology

Performance Analysis of Post-Doppler STAP
Christopher Teixeira, Northrop Grumman Corporation

Coefficient Dither in Fixed-Point FIR Digital Filters
Sourav Dey, Alan Oppenheim, Massachusetts Institute of Technology

Optimal Preconditioning for the Interpolation of Missing Data in a Band-Limited Sequence
Prabhu Babu, Erik Gudmundson, Petre Stoica, Uppsala University

Fixed-Point Filter Design and Riemannian Geometry
Michael Cerna, Bryan Marker, Jim Nagle, Lothar Wenzel, National Instruments
Shortest Paths in Spaces of IIR-Filters
Michael Cerna, Bryan Marker, Jim Nagle, Lothar Wenzel, National Instruments

The Nth-Order Cyclostationarity of OFDM Signals in Time Dispersive Channels
Anjana Punchihewa, University of British Columbia; Octavia Dobre, Qiyun Zhang, Memorial University of Newfoundland; Sreeraman Rajan, Robert Inkol, Defence Research and Development

Sparsity Adaptive Matching Pursuit Algorithm for Practical Compressed Sensing
Thong Do, Johns Hopkins University; Lu Gan, Brunel University; Nam Nguyen, Trac Tran, Johns Hopkins University

Piece-wise linear DFT interpolation for IIR systems: performance and error bound computation
Vahid Raissi Dehkordi, Fabrice Labeau, Benoit Boulet, McGill University

A Polyphase Nonlinear Equalization Architecture and Semi-blind Identification Method
Benjamin Miller, Joel Goodman, Matthew Herman, Massachusetts Institute of Technology, Lincoln Laboratory

Comparison of multiplierless implementation of nonlinear-phase versus linear-phase FIR filters
Muhammad Abbas, Fahad Qureshi, Zaka Ullah Sheikh, Oscar Gustafsson, Hakan Johansson, Kenny Johansson, Linkoping University

Factorization of Paraunitary Polyphase Matrices Using Subspace Projections
Peter Vouras, Naval Research Lab; Trac Tran, Johns Hopkins University

Session: MP1 - MIMO Radar
Session Chair: Rick Blum - Lehigh University

Sparse signal representation for MIMO radar imaging
William Roberts, Tarik Yardibi, Jian Li, Xing Tan, University of Florida; Petre Stoica, Uppsala University

Target Localization Accuracy and Multiple Target Localization: Tradeoff in MIMO Radars
Hana Godrich, Alexander Haimovich, New Jersey Institute of Technology; Rick Blum, Lehigh University

Antenna Placement for Velocity Estimation using MIMO Radar
Qian He, currently visiting Lehigh University, University of Electronic Science and Technology of China; Rick Blum, Lehigh University; Alexander Haimovich, New Jersey Institute of Technology; Zishu He, University of Electronic Science and Technology of China

Complex Point Target Model for Multistatic Radar
Zhe Zhang, Daniel Fuhrmann, Washington University in St. Louis

Theoretical Assessment of MIMO Radar Performance in the Presence of Discrete and Distributed Clutter
Yuri I. Abramovich, Gordon Frazer, Defence Science and Technology Organization

MIMO STAP Clutter Mitigation Performance Demonstration using Acoustic Arrays
Vito Mecca, Jeffrey Krolik, Duke University

HF Skywave MIMO Radar: The HILOW Experimental Program
Gordon Frazer, Yuri I. Abramovich, Defence Science and Technology Organization; Ben A. Johnson, RLM Pty. Ltd.

Session: MP2 - Retinal Image Analysis
Session Chair: Peter Soliz - VisionQuest Biomedical LLC & U. of Iowa

Retinal Fundus Image Contrast Normalization using Mixture of Gaussians
Abhir Bhalerao, Sarabjot Singh Anand, University of Warwick; Ponnusamy Saravanan, University Hospitals of Coventry and Warwickshire
Interactive Image Analysis in Age-related Macular degeneration (AMD) and Stargardt Disease ........................................651
(R Theodore Smith, Noah Lee, Jian Chen, Mihai Busuioc, Andrew Laine, Columbia University)

Interactive segmentation for geographic atrophy in retinal fundus images ..........................................................655
(Noah Lee, R Theodore Smith, Andrew Laine, Columbia University)

Detection and Phenotyping of Retinal Disease using AM-FM Processing for Feature Extraction ..................659
(Carla Agurto, Sergio Marillo, Victor Murray, Marios Pattichis, University of New Mexico; Stephen Russell, Michael Abramoff, University of Iowa; Peter Soliz, VisionQuest Biomedical)

New AM-FM Analysis Methods for Retinal Image Characterization .................................................................664
(Victor Murray, Marios Pattichis, University of New Mexico; Peter Soliz, VisionQuest Biomedical and University of Iowa)

Session: MP3 - Information Theory
Session Chair: Sennur Ulukus - University of Maryland

Secret communication using sources and channels ................................................................................................671
(Krishnan Eswaran, University of California, Berkeley; Vinod Prabhakaran, University of Illinois at Urbana-Champaign; Kannan Ramchandran, University of California, Berkeley)

On Secure Broadcasting .................................................................................................................................676
(Ersen Ekrem, Sennur Ulukus, University of Maryland)

End-to-end Secure Multi-hop Communication with Untrusted Relays is Possible ........................................681
(Xiang He, Aylin Yener, Pennsylvania State University)

Multiple descriptions with codebook reuse .......................................................................................................686
(Young-Han Kim, University of California, San Diego)

Cognitive Relaying with One-sided Interference ...............................................................................................689
(Onur Sahin, Elza Erkip, Polytechnic Institute of New York University)

On the Capacity of Cognitive Radios in Multiple Access Networks ..........................................................695
(Anelia Somekh-Baruch, Princeton University; Sriram Sridharan, Sriram Vishwanath, University of Texas at Austin; Sergio Verdu, Princeton University; Shlomo Shamai (Shitz), Technion Israel Institute of Technology)

Gaussian Fading Interference Channels: Power Control .................................................................................701
(Daniela Tuninetti, University of Illinois, Chicago)

Interference Channels with Source/Destination Cooperation ........................................................................707
(Vinod Prabhakaran, Pramod Viswanath, University of Illinois at Urbana-Champaign)

Session: MP4 - Feedback in MIMO Systems
Session Chairs: David Love - Purdue University and Vasanthan Raghavan - University of Illinois

On the Use of Feedback in Multiple Antenna Common Information Broadcasting ..............................................713
(Chun Kin Au Yeung, David Love, Purdue University)

Two Models for Noisy Feedback in MIMO Channels ......................................................................................718
(Vaneet Aggarwal, Princeton University; Gajanana Krishna, Stanford University; Srikrishna Bhattacharjee, Indian Institute of Technology Madras; Ashutosh Sabharwal, Rice University)

Nested Codebook Design For MIMO Precoders ............................................................................................723
(Badri Varadarajan, Eko Onggosanusi, Anand Babak, Ruhua Chen, Texas Instruments)

On the Capacity of MIMO Broadcast Channels with Reduced Feedback by Antennas Selection ................728
(Matthew Pugh, Bhaskar Rao, University of California, San Diego)

Feedback Requirements in MIMO Broadcast Channels: An Asymptotic Analysis .......................................733
(Ali Reza Bayesteh, Amir K. Khandani, University of Waterloo)

Interpolated Linear Precoding and Space-Frequency Coding for MIMO-OFDM Systems ........................738
(Eunmo Kang, Akbar Sayeed, University of Wisconsin-Madison)

Progressive Refinement for High Resolution Limited Feedback Multiuser MIMO Beamforming ..............743
(Robert Heath, Jr., University of Texas at Austin; Tao Wu, Anthony C.K. Soong, Huawei Technologies (USA))
Session: MP5 - Computer Arithmetic I
Session Chair: Braden Phillips - University of Adelaide
Optimizing addition for sub-threshold logic.................................................................751
   David Blaauw, University of Michigan; James Kitcner, Braden Phillips, University of Adelaide
Fast and Accurate Activity Evaluation in Multipliers.................................................757
   Arnaud Tisserand, LIRMM, CNRS-University Montpellier
Design and FPGA Implementation of Radix-10 Algorithm for Division with Limited Precision ..........762
Primitives
   Milos D. Ercegovac, University of California, Los Angeles; Robert McIlhenny, California State University Northridge
Fused Floating-Point Arithmetic for DSP ........................................................................767
   Earl E. Swartzlander, Jr., University of Texas at Austin; Hani Saleh, Intel Corp
Parallel High-Radix Montgomery Multipliers...............................................................772
   Philip Amberg, Nathaniel Pinckney, David Money Harris, Harvey Mudd College
Dual Base Number System and Elliptic Curve Cryptography......................................777
   Christophe Doche, Macquarie University; Laurent Imbert, CNRS, PIMS, University of Calgary
Improving Fused Multiply Add Performance...............................................................N/A
   David Lutz, ARM

Session: MP6 - Blind System Identification, Multi-channel System Inversion, and Speech Dereverberation
Session Chair: Patrick A. Naylor - Imperial College
Model-Based Dereverberation of Speech in the Mel-Spectral Domain ..........................783
   Armin Sehr, Walter Kellermain, University Erlangen-Nuremberg
Adaptive Inverse Filtering of Room Acoustics ............................................................788
   Wancheng Zhang, Imperial College London; Andy Khong, Nanyang Technological University; Patrick Naylor, Imperial College London
Principles and applications of dereverberation for noisy and reverberant audio signals ........................................793
   Masato Miyoshi, Keisuke Kinoshita, Takaya Yoshioka, Tomohiro Nakatani, NTT Communication Science Laboratories, NTT Corporation
Decomposition and dereverberation of multichannel audio .........................................797
   Michael M. Goodwin, Audience, Inc.
Multi-Microphone Speech Dereverberation Based on Eigen-Decomposition - A Study ............801
   Sharon Gannot, Bar-Ilan University
Towards Multi-Microphone Speech Dereverberation using Spectral Enhancement and Statistical 806
   Reverberation Models
   Emanuel A.P. Habets, Technion - Israel Institute of Technology
Multi-Channel Listening-Room Compensation using a Decoupled Filtered-X LMS Algorithm 811
   Stefan Goetz, University of Bremen; Markus Kallinger, University of Oldenburg; Alfred Mertins, University of Luebeck; Karl-Dirk Kammerer, University of Bremen
A General Derivation of Wave-Domain Adaptive Filtering and Application to Acoustic Echo 816
   Cancellation
   Herbert Buchner, Sascha Spors, Deutsche Telekom Laboratories

Session: MP7 - Signal Processing and Learning for Sensor Signal Exploitation
Session Chair: Emre Ertin - The Ohio State University
Interaction Analysis using Switching Structures Autoregressive Models ........................827
   Michael Siracusa, John Fisher, Massachusetts Institute of Technology
Joint Shape and Texture Analysis of Objects Boundaries in Images Using A Riemannian 833
   Approach
   Wei Liu, Anuj Srivastava, Eric Klassen, Florida State University
Session: MP8a1 - Distributed Detection and Estimation
Session Chair: Weilian Su - Naval Postgraduate School

Resource Allocation for Distributed Detection in Sensor Networks
Frank Namin, Aria Nosratinia, University of Texas at Dallas

Outage Diversity for Distributed Estimation over Parallel Fading Channels
Kai Bai, Arizona State University; Habib Senol, Kadir Has University; Cihan Tepedelenlioglu, Arizona State University

Modeling of Data Fusion Algorithms in Cluster-based Wireless Sensor Networks
Weilian Su, Theodoros Bougioskilius, Naval Postgraduate School

A Distributed Framework for Signal Detection in Wireless Sensor Networks
Yang Yang, Rick Blum, Lehigh University

An Energy-efficient and Distributed Approach to Beamforming in a Wireless Sensor Network
Nikolaos Papalexidis, Owens Walker, Murali Tummala, John McEachen, Naval Postgraduate School

Session: MP8a2 - Wireless Network Management
Session Chair: Keith Teague - Oklahoma State University

A Closer Look at the Physical and Protocol Models for Wireless Ad Hoc Networks with Multi-Packet Reception
Hyunchul Kim, Hamid Sadjadpour, Jose Joaquin Garcia-Luna-Aceves, University of California, Santa Cruz

Doppler Measurements Rendering Random Routing
Liang Dong, Western Michigan University

Protocols For Half-Duplex Multiple Relay Networks
Peter Rost, Gerhard P. Fettweis, Technische Universität Dresden

Admission Control for Power-Controlled Wireless Networks under General Interference Functions
Slawomir Stanczak, Michal Kaliszans, Fraunhofer German-Sino Lab for Mobile Communications; Nicholas Bambos, Stanford University

Multi-Channel Packet Capture in 802.11b/g Wireless Networks
Douglas Geiger, George Scheets, Keith Teague, Jason Pitts, Oklahoma State University

A New Achievable Rate For A Stochastic Two Relay Network With No Interference
Ghosheh Abed Hodtani, Sharif University of Technology

Adaptive Joint Quantization and Power Allocation in Wireless Sensor Networks
Muhammad Hafeez Chaudhary, Luc Vandendorpe, Abdellatif Zaidi, Ecole Polytechnique de Louvain

Session: MP8a3 - OFDM/UWB
Session Chair: Xiaoli Ma - Georgia Institute of Technology

Iterative Detection for the Uplink of an OFDMA System with Frequency Offsets
Sajid Ahmed, Li Zhang, University of Leeds

Performance Evaluation of Adaptive MIMO-OFDM Systems with Imperfect Feedback in Measurement Based Channels
Harri Pennanen, Jouko Leinonen, Xiaojia Lu, Marek Skowron, Matti Latva-aho, Centre for Wireless Communications, University of Oulu

Frequency-Domain Joint Channel and Phase Noise Estimation in OFDM WLAN Systems
Payam Rabiei, Won Namgoong, Naofal Al-Dhahir, University of Texas at Dallas

Fast-Varying Doppler Compensation for Underwater Acoustic OFDM Systems
Taehyuk Kang, Ronald A. Ilitis, University of California, Santa Barbara
Peak-to-Average Power Ratio versus Instantaneous-to-Average Power Ratio for OFDM ........................................938
Qiujia Liu, Xiaoli Ma, G. Tong Zhou, Georgia Institute of Technology; Jie Wu, Futurewei Technologies Inc.

Optimal Constellation Distortion for PAR Reduction in MIMO-OFDM Systems ..................................................943
Moshe Malkin, Hao Zou, Alan John Malek, Stanford University; Brian Krongold, University of Melbourne; John Cioffi, Stanford University

A Regularized Least Squares Approach for Ultra-Wideband Time-of-Arrival Estimation with .................................................947
Wavelet Denoising
Ted C.-K. Liu, Xiaodai Dong, Wu-Sheng Lu, University of Victoria

Adaptive Reduced-Rank Interference Suppression for DS-UWB Systems Based on Switched Approximation of Basis Functions
Sheng Li, Rodrigo de Lamare, Danilo Zanatta Filho, University of York

CDMA vs. OFDM for Wideband Cellular Systems .................................................................................................958
Yong Peng, Southern Methodist University; Giridhar Mandyam, Qualcomm Inc.; Dinesh Rajan, Southern Methodist University

New Multi-User OFDM Scheme: Braided Code Division Multiple Access ..........................................................963
Marcos B.S. Tavares, Michael Lentmaier, Technische Universitaet Dresden; Kamil Sh. Zigangirov, University of Notre Dame; Gerhard P. Fettweis, Technische Universitaet Dresden

Diversity Order of Linear Equalizers for Block Transmission in Fading Channels ............................................968
Shakti Prasad Shenoy, Institut Eurecom; Irfan Ghauri, Infineon Technologies France; Dirk Stock, Institut Eurecom

Session: MP8a4 - MIMO OFDM and Cooperative Relaying
Session Chair: Lars Thiele - Fraunhofer Institute for Telecommunications

A Novel Framework for the Utilisation of Dynamic Relays in Cellular Networks ..................................................975
Agisilaos Papadogiannis, Eric Hardouin, Ahmed Saadani, France Telecom R&D; David Gesbert, Eurecom Institute; Patricia Layec, France Telecom R&D

Power Allocation Method for GMD-based Precoded MIMO-OFDM System with Reduced ....................................................980
Feedback
Kyeong Jin Kim, Nokia Inc.; Peter Wang, Nokia Siemens Network; Ronald A. Ilitis, University of California, Santa Barbara

New protocols for the Cooperative MAC ..................................................................................................................985
Charlotte Hucher, Ghaya Rekaya-Ben Othman, TELECOM ParisTech; Ahmed Saadani, Orange Labs

Weighted Sum-Rate Maximization for Downlink OFDMA Systems ...........................................................................990
Chathuranga Weeraddana, Wei Li, Marian Codreanu, Matti Latva-aho, Centre for Wireless Communications, University of Oulu

Temporal Autocorrelation Estimation for OFDM with Application to Spatial Interpolation .........................................995
Peter Klenner, Karl-Diirk Kammeyer, University Bremen

Robust Gain Allocation against Phase Uncertainty at the Relays for Multiuser Cooperative Networks
Cepal Esli, Armin Wittneben, ETH Zurich

Distributed Turbo Coding Using Log-Likelihood Thresholding for Cooperative Communications ..........................................1005
Ghaleb Al-Habian, Ali Ghrayeb, Concordia University; Mazen Hasna, Adnan Abu-Dayya, Qatar University

On Distributed Codes with Noisy Relays ................................................................................................................1010
Ragnar Thobaben, Royal Institute of Technology (KTH)

Low-complexity Doppler compensation in mobile SIMO-OFDM systems ..............................................................................1015
Malte Schellmann, Lars Thiele, Volker Jungnickel, Fraunhofer Institute for Telecommunications, Heinrich-Hertz-Institut

Predicting SINR conditions in mobile MIMO-OFDM systems by interpolation techniques .........................................1020
Malte Schellmann, Lars Thiele, Volker Jungnickel, Fraunhofer Institute for Telecommunications, Heinrich-Hertz-Institut

Cooperation Diversity for Clipped OFDM with Iterative Reception ........................................................................1025
Thomas Kesselgou, California State Polytechnic University, Pomona

Design of Co-phasing Allpass Filters for Full-Duplex OFDM Relays .............................................................................1030
Taneni Rihonen, Stefan Werner, Helsinki University of Technology; Juan Cousseau, Universidad Nacional del Sur; Risto Wichman, Helsinki University of Technology
Implementation Concepts for Distributed Cooperative Transmission

Volker Jungnickel, Lars Thiele, Malte Schellmann, Thomas Wirth, Fraunhofer Institute for Telecommunications; Wolfgang Zirwas, Thomas Haustein, Egon Schulz, Nokia Siemens Networks

Session: TA1b - Compressive Sensing
Session Chair: Emmanuel Candès - California Institute of Technology (Caltech)
Compressed sensing and robust recovery of low-rank matrices
Maryam Fazel, University of Washington; Emmanuel Candès, Ben Recht, California Institute of Technology; Pablo Parrilo, Massachusetts Institute of Technology

Greedy Signal Recovery Review
Deanna Needell, University of California, Davis; Joel Tropp, California Institute of Technology; Roman Vershynin, University of California, Davis

Streaming measurements in compressive sensing: L1 filtering
Muhammad Salman Asif, Justin Romberg, Georgia Institute of Technology

Session: TA2b - Functional Imaging and Analysis
Session Chair: Yongyi Yang - IIT
Current Role of PET in Oncology: Potentials and Challenges in the Management of Non-Small Cell Lung Cancer
Phaneendra Yalavarthy, Daniel Low, Camille Noel, Washington University in St. Louis; Zhouping Wei, Philips Medical Systems; Deshan Yang, Aditya Apte, Jeffrey Bradley, Joseph Deasy, Issam El Naqa, Washington University in St. Louis

System Modeling Studies in Iterative X-Ray CT Reconstruction
Jiao Wang, University of Notre Dame; Jean-Baptiste Thibault, GE Healthcare; Zhou Yu, Purdue University; Ken Sauer, University of Notre Dame; Charles Bouman, Purdue University

Improved PASL EPI Acquisitions With Parallel Imaging and UNFOLD
W. Scott Hoge, Brigham and Women’s Hospital and Harvard Medical School; Huan Tan, Robert A. Kraft, Wake Forest University School of Medicine

Spatio-temporal MAP reconstruction of gated cardiac images using DFT basis functions
Xiaofeng Niu, Yongyi Yang, Illinois Institute of Technology

Hyperpolarized 3He Magnetic Resonance Pulmonary Imaging: Image Processing Tools for Clinical Research
Lindsay Mathew, Robarts Research Institute, The University of Western Ontario; Andrew Wheatley, Robarts Research Institute; David G. McCormack, University of Western Ontario; Grace Parraga, Robarts Research Institute

Session: TA3b - Secrecy Capacity and Interference Channels
Session Chair: Daniela Tuninetti - University of Illinois Chicago
On the Role of Feedback in Two-Way Secure Communication
Xiang He, Aylin Teymur, Pennsylvania State University

On the Noisy Interference Regime of the MISO Gaussian Interference Channel
Berkant Tekiner, Aydin Sezgin, Arogyaswami J. Paulraj, Stanford University

Parameterization of the MISO Interference Channel with Transmit Beamforming and Partial Channel State Information
Johannes Lindblom, Erik G. Larsson, Linköping University; Eduard A. Jorswieck, Dresden University of Technology

Outer bounds for the MIMO interference channel
Peter Parker, Daniel W. Bliss, Massachusetts Institute of Technology, Lincoln Laboratory
## Session: TA4b - Multiuser MIMO Broadcast

**Session Chair: Timothy Davidson - McMaster University**

- Probabilistically Constrained Robust Power Allocation in Downlink Multiuser MISO Systems.................................................1115  
  Nikola Vucic, Fraunhofer Institute for Telecommunications, Heinrich Hertz Institute; Holger Boche, Technical University of Berlin
- Probabilistically-Constrained Approaches to the Design of the Multiple Antenna Downlink.................................................1120  
  Michael Botros Shenouda, Timothy Davidson, McMaster University
- Network MIMO with reduced backhaul requirements by MAC coordination.................................................................1125  
  Federico Boccardi, Howard Huang, Angeliki Alexiou, Alcatel-Lucent
- Spectral Efficiency of Wireless Networks with Multi-Antenna Base- Stations and Spatially Distributed Nodes  
  Siddhartan Govindasamy, Daniel W. Bliss, David H. Staelin, Massachusetts Institute of Technology

## Session: TA5b - Communication Architectures

**Session Chair: Joseph R. Cavallaro - Rice University**

- Configurable High-Throughput Decoder Architecture for Quasi-Cyclic LDPC Codes..................................................1137  
  Christoph Studer, Nicholas Preys, Christoph Roth, Andreas Burg, ETH Zurich
- Forward Error Correction Decoding for WiMAX and 3GPP LTE Modems............................................................1143  
  Seok-Jan Lee, Manish Goel, Yuming Zhu, Jing-Fei Ren, Texas Instruments, Inc; Yang Sun, Rice University
- Next Generation Iterative LDPC Solutions for Magnetic Recording Storage..........................................................1148  
  Kiran Gunnam, LSI Corporation; Mark Yeary, University of Oklahoma; Gwan Choi, Texas A&M University; Shaohua Yang, Yuaxing Lee, LSI Corporation
- FPGA Implementation of High Throughput 600 Mbps Wireless LAN System using 4 X 2........................................N/A  
  MIMO-OFDM  
  Walyul Amien Syafei, Yuhei Nagao, Masayuki Kurosaki, Baiko Sai, Hiroshi Ochi, Kyushu Institute of Technology

## Session: TA6b - Wireless Sensor Networks

**Session Chair: Lang Tong - Cornell University**

- Information Quality Aware Sensor Network Services .................................................................1155  
  Sadaf Zahedi, University of California, Los Angeles; Edith Ngai, Erol Gelenbe, Imperial College; Dinkar Mylaraswamy, Honeywell; Mani Srivastava, University of California, Los Angeles
- A Linear Iterative Algorithm for Distributed Sensor Localization..............................................................................1160  
  Usman Khan, Soumya Kar, José M. F. Moura, Carnegie Mellon University
- Utility-Based Joint Sensor Selection and Congestion Control for Mission-Oriented WSNs...........................................1165  
  Hosam Rowaihy, Pennsylvania State University; Matthew Johnson, City University of New York; Sharanya Eswaran, Pennsylvania State University; Diego Pizzocaro, Cardiff University; Amotz Bar-Noy, City University of New York; Thomas La Porta, Pennsylvania State University; Archan Misra, Telecordia Technologies; Alun Preece, Cardiff University
- Distributed Demodulation Using Consensus Averaging in Wireless Sensor Networks......................................1170  
  Hao Zhu, Alfonso Cano, Georgios B. Giannakis, University of Minnesota
- Network Information Flow: Gossiping with Groups .........................................................................................1175  
  Mehmet E. Yildiz, Tuncer Can Aysal, Anna Scaglione, Cornell University

## Session: TA7b - Adaptive Methods and Monte Carlo Signal Processing

**Session Chair: Petar Djuric - Stony Brook University**

- Complex systems and particle filtering..............................................................................................1183  
  Monica F. Bugallo, Petar M. Djuric, Stony Brook University
- Multiple Target Tracking Using Likelihood Particle Filtering and Adaptive Waveform Design......................1188  
  Ioannis Kyriakides, University of Nicosia; Tom Trueblood, Darryl Morrell, Antonia Papandreou-Suppappola, Arizona State University
Detection of variance changes and mean value jumps in measurement noise for multipath mitigation in urban navigation

Mariana Spangenberg, TéSA; Jean-Yves Tourneret, ENSEEIHT; Vincent Calmettes, University of Toulouse; Grégoire Duchâteau, Thales Alenia Space

Cooperative Blind Equalization of Frequency-Selective Channels in Sensor Networks using Decentralized Particle Filtering

Claudio Jose Bordin, Jr., Marcelo G. S. Bruno, Instituto Tecnologico de Aeronautica

Adaptive Local Quantizer Design for Tracking in a Wireless Sensor Network

Onur Ozdemir, Ruixin Niu, Pramod K. Varshney, Syracuse University

Session: TA8b1 - Image/Video Processing, Quantization and Coding

Session Chair: John Fisher - MIT CSAIL

Joint Detection, Segmentation, and Registration of Elastically Deformable Objects

Gilad Cohen, Joseph Francos, Rami Hagege, Ben Gurion University

A Neighborhood Model for Detection in Hyperspectral Images

Todd Moon, Cameron Grant, Jacob Gunther, Utah State University; Gustavious Williams, Brigham Young University

Iris Recognition using the Ridge Energy Direction (RED)Algorithm

Robert Ives, Randy Broussard, Lauren Kennell, Ryan Rakvic, Deolores Etter, U.S. Naval Academy

Complex Wavelet Based Modulation Analysis

Jean-Marc Lanneau, Aalborg University; Jerome Lebrun, CNRS; Søren Holdt Jensen, Aalborg University

Algorithms for Old Master Painting Canvas Thread Counting from X-Rays

Andrew Klein, Worcester Polytechnic Institute; Don H. Johnson, Rice University; William Sethares, Heichang Lee, University of Wisconsin-Madison; C. Richard Johnson, Jr., Cornell University; Ella Hendriks, Van Gogh Museum

Session: TA8b2 - Speech Analysis and Recognition

Session Chair: John Fisher - MIT CSAIL

LSF and LPC - Derived Features for Large Vocabulary Distributed Continuous Speech

Recognition in Brazilian Portuguese

Vladimir Alencar, Abraham Alcaim, PUC-RIO

Automatic Labelling of Foreign-accented Speech

Rene O. Arechiga, New Mexico Tech

Objective Analysis of Temporally Varying Audio Quality Metrics

Joseph Hardin, Charles Creusere, New Mexico State University

Improved Detection Performance of a Speech Recognizer in an Automotive Environment

Ashtosh Sapru, Ravi Lakkundi, Nisar Ahmed, Aricent Communications Pvt. Ltd.

Waveform Approximating Residual Audio Coding with Perceptual Pre- and Post-Filtering

Jesper Kjær Nielsen, Jesper Rindom Jensen, Mads Grøsbøll Christensen, Søren Holdt Jensen, Torben Larsen, Aalborg University

Efficient Speaker Identification Using Distributional Speaker Model Clustering

Vijendra Raj Apsingekar, Phillip De Leon, New Mexico State University

Session: TA8b3 - Quantization, Coding, and Encryption

Session Chair: John Fisher - MIT CSAIL

An Improved WSQ Fingerprint Image Compression Algorithm

Jinshan Tang, Xiaoming Liu, Alcorn State University
Efficient Correlation Extraction for Distributed Audio Coding
Sandeep Matta, Charles Creusere, New Mexico State University .......................... 1272

Weighted Distortion for Robust Video Coding
Sunday Nyamweno, Ramdas Satyan, Sedar Burak Solak, Fabrice Labeau, McGill University .......................... 1277

Optimization of Audience Encoding in Low-Resolution Soccer Video Sequences
Luca Superiori, Alfredo Font Perez, Markus Rupp, Vienna University of Technology .......................... 1282

Generalized Fast Index Assignment for Robust Multiple Description Scalar Quantizers
Rui Ma, Fabrice Labeau, McGill University .......................... 1287

Session: TA8b4 - Limited Feedback and Precoding
Session Chairs: P. P. Vaidyanathan - Caltech and Eduard Jorswieck - TU Dresden
Limited CSI Feedback based on an Adaptive Codebook for Temporally Correlated MISO Fading
Dan Zhang, Meik Dörpinghaus, Gerd Ascheid, RWTH Aachen University .......................... 1295

Per-Antenna Power Constrained MIMO Transceivers Optimized for BER
Ching-Chih Weng, P. P. Vaidyanathan, California Institute of Technology .......................... 1300

Joint Design of Limited Feedback and Multiuser Precoding Based on a Precoding MSE Metric
Michael Johan, Technical University of Munich; Paula Castro, University of A Coruna; Jian Zhen, Technical University of Munich; Luis Castedo, University of A Coruna; Wolfgang Utschick, Technical University of Munich .......................... 1305

Joint Optimization of Transceivers with Decision Feedback and Bit Loading
Ching-Chih Weng, Chun-Yang Chen, P. P. Vaidyanathan, California Institute of Technology .......................... 1310

Mobility Dependent Feedback Scheme for point-to-point MIMO Systems
Gonzalo Vazquez-Vilar, Vinay Majjigi, Aydin Sezgin, Arogyaswami Paudraj, Stanford University .......................... 1315

Joint Throughput Optimized CQI and Precoding Weight Calculation for MIMO HSDPA
Christian Mehlführer, Sebastian Caban, Martin Wurlich, Markus Rupp, Vienna University of Technology .......................... 1320

Tile-based MIMO OFDM systems: The Impact of Inaccurate Channel State Information
Aydin Sezgin, Bernd Bandemer, Arogyaswami Paudraj, Stanford University; Eduard A. Jorswieck, Dresden University of Technology .......................... 1326

Distortion-Rate Tradeoff of a Source Uniformly Distributed over Positive Semi-definite Matrices
Rajesh Krishnamachari, Mahesh Varanasi, University of Colorado .......................... 1330

LR-Aided Precoding with a Modified LLL Algorithm for Limited Feedback MIMO Systems
Hyun Jong Yang, Joohwan Chun, Korea Advanced Institute of Science and Technology .......................... 1335

Hybrid ARQ Schemes in Multiple-Antenna Slow Fading Channels: A Capacity Perspective
Cong Shen, Michael Fitz, University of California, Los Angeles .......................... 1340

Session: TP1a - Distributed Statistical Inference
Session Chairs: Lang Tong - Cornell University and Parv Venkitasubramaniam - UC Berkeley
Distributed Linear Parameter Estimation in Sensor Networks: Convergence Properties
Soummya Kar, José M. F. Moura, Carnegie Mellon University .......................... 1347

Decentralized Detection with Long-Distance Communication
O. Patrick Kreidl, Alan S. Willsky, Massachusetts Institute of Technology .......................... 1352

On the Divergence-Cost Function in Distributed Detection with a Secrecy Constraint
Stefano Marano, Vincenzo Matta, University of Salerno; Peter Willett, University of Connecticut .......................... 1357

Session: TP1b - Statistical Signal Processing for Forensics and Security
Session Chair: Hong (Vicky) Zhao - University of Alberta
Secure Methods for Fuzzy Key Binding in Biometric Authentication Applications
Francis Minhthang Bui, Dimitrios Hatzinakos, University of Toronto .......................... 1363

Detection of Collusion Behaviors in Online Reputation Systems
Yuhong Liu, Yafei Yang, Yan Sun, University of Rhode Island .......................... 1368

Attack-Resistant Cooperation Strategies in P2P Live Streaming Social Networks
W. Sabrina Lin, University of Maryland, College Park; H. Vicky Zhao, University of Alberta; K. J. Ray Liu, University of Maryland, College Park .......................... 1373
Mixing Bounded Laplace and Gaussian Fingerprints

Shan He, Thomson Corporate Research; Darko Kirovski, Microsoft Research

Statistical Fusion of Multiple Cues for Image Tampering Detection

Yu-Feng Hsu, Shih-Fu Chang, Columbia University

Session: TP2 - Analysis Methods for Functional and Structural Brain Imaging

Session Chairs: Vince Calhoun - U. of New Mexico & MIND Institute and Sunanda Mitra - Texas Tech University

Generating Structure-Function Correlations by ICA- Based Mapping of Activation Patterns on Co-registered fMRI and FA-DTI Data

Optimal Sampling Geometries for TV-Norm Reconstruction of fMRI Data

Oliver Jeromin, Vince Calhoun, Marios Pattichis, University of New Mexico

Spatial Patterns and Functional Profiles for Discovering Structure in fMRI Data

Polina Golland, Danial Lashkari, Archana Venkataraman, Massachusetts Institute of Technology, CSAIL

Exploration of Optimal Group-discriminating Features Using CC-ICA

Jing Sui, Vince Calhoun, The Mind Research Network

Pushing the Acquisition Time Limit of Magnetic Resonance Diffusion Tensor Imaging

Edward Hsu, University of Utah

Session: TP3a - Delay-Rate Tradeoffs

Session Chair: Tara Javidi - University of California San Diego

Achievable throughput and queueing delay for imperfect cooperative retransmission MAC protocols

Steven Weber, Athina Petropulu, Drexel University

Delay-minimal Transmission for Average Power Constrained Multi-access Communications

Jing Yang, Sennur Ulukus, University of Maryland

Delay analysis of Block Coding over a Noisy Channel with Limited Feedback

Raghuva N. Swamy, Tara Javidi, University of California, San Diego

Throughput Delay Tradeoff for Wireless Multicast Using Hybrid-ARQ Protocols

Jianqi Wang, Seung Young Park, David Love, Michael Zoltowski, Purdue University

Session: TP3b - Relaying and Cooperation II

Session Chair: Osvaldo Simeone - New Jersey Institute of Technology

Inter-cell Relay Cooperation In Heterogeneous Cellular Uplink Systems

Harish Ganapathy, Jeffrey Andrews, Constantine Caramanis, University of Texas at Austin

Training Design for Information Rate Maximization over Amplify and Forward Relay Channels

Yupeng Jia, Azadeh Vosoughi, University of Rochester

Distributed Space-time Codes with Relay Preprocessing for Low SNR Source-Relay Links

Birsen Sirkeci-Mergen, San Jose State University

Analysis of Amplify-and-Forward DSTBCs over the Random Set Relay Channel

Qiangu Xue, Giuseppe Abreu, University of Oulu; Behnaam Aazhang, Rice University

Circumventing Base Station Cooperation through Kalman Prediction of Intercell Interference

Ralf Bendlin, Yih-Fang Huang, University of Notre Dame; Michel Ivrlac, Josef Nossek, Munich University of Technology

Session: TP4 - Cooperative MIMO

Session Chair: Aria Nosratinia - University of Texas at Dallas

Switching Between Antenna Selection and Spatial Multiplexing in the Nonregenerative MIMO Relay Channel

Steven Peters, Robert Heath, Jr., University of Texas at Austin
MIMO Two-way Relay Channel: Diversity-Multiplexing Trade-off Analysis
Deniz Gunduz, Princeton University / Stanford University; Andrea Goldsmith, Stanford University; H. Vincent Poor, Princeton University

Deterministic capacity of MIMO relay networks
Anders Host-Madsen, University of Hawaii

Layered Randomized Cooperation for Multicast
Ozgu Alay, Ran Ding, Elza Erkip, Yao Wang, Polytechnic University; Anna Scaglione, Cornell University

Diversity Multiplexing Trade-off for Opportunistic Multiple Access Relay Channel
Mohamed Abouelseoud, Aria Nosratinia, University of Texas at Dallas

Optimum Time-Division in MIMO Two-Way Decode-and-Forward Relaying Systems
Jian Zhao, Marc Kuhn, Armin Wittneben, ETH Zurich; Gerhard Bauch, DoCoMo Euro-Labs

Resource Allocation in Wireless Networks with Multiple Relays
Kagan Bakanoglu, Polytechnic Institute of New York University; Stefano Tomasin, University of Padova; Elza Erkip, Polytechnic Institute of New York University

End-to-End Antenna Selection Strategies for Multi-Hop Relay Channels
Rahul Vaze, Robert Heath, Jr., University of Texas at Austin

Session: TP5a - Integrated Algorithm and Architecture Implementation
Session Chair: Keshab Parhi - University of Minnesota
Forward Error Correction for High-Speed I/O
Rajan Narasimha, Naresh Shanbhag, University of Illinois at Urbana-Champaign
VLSI Architecture Design for Algebraic Soft-decision Reed-Solomon Decoding
Xinniao Zhang, Case Western Reserve University
Motion Compensation Aided Motion Adaptive De-interlacing for Real-Time Video Processing
Hongbin Sun, Xi’an Jiaotong University; Yang Liu, Rensselaer Polytechnic Institute; Nanning Zheng, Xi’an Jiaotong University; Tong Zhang, Rensselaer Polytechnic Institute
High-Speed Implementation of Smith- Waterman Algorithm for DNA Sequence Scanning in VLSI
Chao Cheng, Marvell Semiconductor; Keshab K. Parhi, University of Minnesota, Twin Cities

Session: TP5b - Cognitive Systems and Spectrum Sharing
Session Chair: Sriram Vishwanath - University of Texas Austin
Cellular Networks with an Overlaid Device to Device Network
Brett Kaufman, Behnaam Aazhang, Rice University
Spectrum Allocation from a Game Theoretic Perspective: Properties of Nash Equilibria
Peter von Wrycza, M. R. Bhavani Shankar, Mats Bengtsson, Bjorn Ottersten, Royal Institute of Technology (KTH)
Secondary Transmission Profile for a Single-band Cognitive Interference Channel
Debashis Dash, Ashutosh Sabharwal, Rice University
Experimental Study of a Wavelet-based Spectrum Sensing Technique
Eric Portela Lopes de Almeida, Paulo Henrique Portela de Carvalho, Pedro Antero Braga Cordeiro, University of Brasilia; Robson Domingos Vieira, Instituto Nokia de Tecnologia
Wireless Resource Allocation With Perceived Quality Fairness
Andreas Saul, DoCoMo Euro-Labs

Session: TP6 - Interference Management and Cooperative Communication in Ad-hoc Networks
Session Chairs: Min Dong - QUALCOMM Inc. and Ben Liang - University of Toronto
Generalized Degrees of Freedom of the (Noisy) X Channel
Chiachi Huang, Viveck Cadambe, Syed Jafar, University of California, Irvine
An Observation about Feedback from Cognitive Radio
Krishnan Eswaran, Michael Gastpar, University of California, Berkeley
Codes to Unmask Spectrum Violators in Cognitive Radio Systems
George Atia, Venkatesh Saligrama, Boston University; Anant Sahai, University of California, Berkeley
Session: TP7a - Detection, Processing and Fusion in Distributed Sensor Systems
Session Chair: Janos Sallai - Vanderbilt University
Lightweight Acoustic Classification for Cane-Toad Monitoring ..................................................1601
   Thanh Dang, NIRupama Bulusu, Portland State University; Wen Hu, CSIRO ICT Centre
Target Tracking in Urban Environments using Audio-Video Signal Processing in Heterogeneous ..........1606
   Wireless Sensor Networks
   Manish Kushwaha, ISIS, Vanderbilt University; Songhwa Oh, University of California, Merced; Isaac Amundson, Xenofon Koutsoukos, Akos Ledeczi, ISIS, Vanderbilt University
Energy-efficient Sensor Management in Multi-static Active Sonar Networks ....................................1611
   I-Jeng Wang, Jong Hyun Lim, Andreas Terzis, Johns Hopkins University

Session: TP7b - Performance Prediction and Analysis for Signal and Image Processing Systems
Session Chair: Matthew Ferrara - Air Force Research Laboratory
Performance of Cued Target Acquisition Systems: Impact of Automatic Target Recognition .................1619
   Robert Frankot, Raytheon Missile Systems
Confuser Rejection Modeling ............................................................................................................1624
   David Doria, Raytheon Space and Airborne Systems
SAR Focusing Performance for Moving Objects with Random Motion Components ............................1628
   Ahmed Fasih, Emre Ertin, Joshua Ash, Randolph Moses, Ohio State University

Session: TP8a1 - Adaptive Systems and Processing
Session Chair: Victor DeBrunner - Florida State University
Reduced-Rank Interference Suppression for GPS Systems based on Adaptive Basis-Function .................1635
   An Efficient and Effective Variable Step Size NLMS Algorithm ................................................1640
   Hideki Takekawa, Tetsuya Shimamura, Saitama University; Shihab Jimaa, KUSTAR University
A Robust Active Noise Control Algorithm without identifying secondary path ..................................1644
   Hieu Thai, Minh Ta, Victor DeBrunner, Florida State University
New Stable IIR Modeling of Long FIR filters with Low Complexity ..............................................1649
   Jie Chen, Keshab K. Parhi, University of Minnesota

Session: TP8a2 - Detection and Estimation
Session Chair: Antonia Papandreou-Suppappola - Arizona State University
Estimating Homeomorphic Deformations of Multi-Dimensional Signals - An Accuracy Analysis ............1657
   Benjamin Friedlander, University of California, Santa Cruz
Subspace-based Cooperative Spectrum Sensing for Cognitive Radio ..............................................1662
   Raghavendra Rao, Qi Cheng, Oklahoma State University; Priyadip Ray, Syracuse University
An Exact Recursive Filter For Quadrature Amplitude Modulation Dynamics ...................................1667
   Robert Elliott, University of Calgary; William Malcolm, Australian National University
Propagator Method for Joint Time Delay and Frequency Estimation ................................................................. 1671
  Mahmoud Qasayneh, Hiren Kumar Gami, Wichita State University; Nizar Tayem, Miami University;
  Ravi Pendse, Edwin Savan, Wichita State University
Joint Estimation of Gain/Phase Mismatches And I/Q Imbalances In Array Antenna Subsystems .......................... 1675
  Zhiwen Zhu, Xinpeng Huang, Communications Research Centre Canada
Nonparametric detection of the number of signals and random matrix theory .................................................. 1680
  Shira Kritchman, Boaz Nadler, Weizmann Institute of Science
Extension of the Reed-Mallett-Brennan Loss for Application to STAP with Collected Data ............................... 1684
  Christoph Teixeira, Northrop Grumman Corporation
Parameter Estimation in Wireless Channel Networks using Second Order Statistics .......................................... 1690
  Magnus Mossberg, Karlstad University
Structured Non-negative Matrix Factorization with Sparsity Patterns ............................................................. 1693
  Hans Laurberg, Aalborg University; Mikkel N. Schmidt, Technical University of Denmark; Mads
  Grøsbøll Christensen, Søren Holdt Jensen, Aalborg University
An Overview of Renyi Entropy and Some Potential Applications ................................................................. 1698
  Ed Beadle, Jim Schroeder, Harris Corp.; Bill Moran, Sofia Suvorova, University of Melbourne
Detection of Signal Discontinuities from Noisy Fourier Data ............................................................................ 1705
  Adityavikram Viswanathan, Douglas Cochran, Anne Gelb, Dennis Cates, Arizona State University
On the Effect of Channel Estimation Error Upon the Performance of Distributed Detection ............................ 1709
  Systems
  Hamidreza Ahmadi, Azadeh Vosoughi, University of Rochester
Sequential Unfolding SVD for Low Rank Orthogonal Tensor Approximation ................................................... 1713
  Jussi Salmi, Andreas Richter, Visa Koivunen, Helsinki University of Technology
On Separation Performance Enhancement in Convolutive Blind Source Separation ........................................... 1718
  Radoslaw Mazur, Alfred Mertins, University of Luebeck
The Decentralized Estimation of the Sample Covariance .................................................................................. 1722
  Anna Scaglione, Roberto Pagliari, Cornell University; Hamid Krim, North Carolina State University
Adaptive Discovery of Sparse Signals in Noise ................................................................................................... 1727
  Jarvis Haupt, University of Wisconsin-Madison; Rui Castro, Columbia University; Robert Nowak, University of Wisconsin-Madison
Maximum Likelihood Parameters Estimation in Non-Uniform Noise Fields using Moving Array .................... 1732
  Da Xie, Tingting Niu, Jianguo Huang, Northwestern Polytechnical University; Hongya Ge, New Jersey Institute of Technology

Session: TP8a3 - Space-Time Coding and Decoding
Session Chair: Benjamin Friedlander - University of California at Santa Cruz

Full-Rate Full-Diversity Differential MIMO ........................................................................................................ 1739
  M. Rezk, Benjamin Friedlander, University of California, Santa Cruz
Joint Channel-Symbol Estimation for High-Performance Differential MIMO ....................................................... 1744
  M. Rezk, Benjamin Friedlander, University of California, Santa Cruz
Embedded Alamouti Space-Time Codes for High Rate and Low Decoding Complexity .................................... 1749
  Mohanned Sinnokrot, John Barry, Vijay Madisetti, Georgia Institute of Technology
New Soft Stack Decoder for MIMO Channel ....................................................................................................... 1754
  Abdellatif Salah, Ghaya Rekaya Ben-Othman, Rym Ouertani, TELECOM ParisTech; Samuel
  Guillouard, Thomson R&D
Multiple Phase Decoder for MIMO Systems ........................................................................................................ 1759
  Zhi Quan, Yuriy Zakharov, Junruo Zhang, University of York
4x4 Perfect Space-Time Code Partition ............................................................................................................. 1763
  Mireille Sarkiss, Ghaya Rekaya-Ben Othman, Jean-Claude Belfiore, Ecole Nationale Supérieure des
  Télécommunications
Systematic Design of Space-Time Convolutional Codes .................................................................................... 1768
  Christophe Rouchy, Hamid Sadjadpour, University of California, Santa Cruz
Iterative Inter-symbol Interference Canceling Receiver for Direct Space-Time GF(q) LDPC ............................. 1772
  Modulation
  Adam R. Margetts, Nicholas B. Chang, Keith W. Forsythe, Daniel W. Bliss, Massachusetts Institute of
  Technology, Lincoln Laboratory
Space-Time Coding for Receive Switch and Stay Combining ......................................................................... 1777
  Adarsh Narasinhamurthy, Cihan Tepedelenlioglu, Arizona State University
Session: TP8b1 - Computer Arithmetic II
Session Chair: Alberto Nannarelli - Technical University of Denmark
A Residue to Binary Converter for the \(\{2n + 2, 2n + 1, 2n\}\) Moduli Set ................................................................. 1785
Kazeem Alagbe Gbolagade, Delft University of Technology, Netherlands / University For Development Studies, Ghana; Sorin Dan Cotofana, Delft University of Technology
Power Dissipation in Division .................................................................................................................... 1790
Wei Liu, Alberto Nannarelli, Technical University of Denmark
Transcendental Functions on a Shift-Enabled Reconfigurable Device: CORDIC as a Case-Study ................. 1795
Scott Miller, Mihai Sima, Michael McGuire, University of Victoria
A Decimal Fully Parallel and Pipelined Floating Point Multiplier .............................................................. 1800
Ramy Eissa, Amira Mohamed, Rodina Samy, Tarek Eldeeb, Yasmine Farouk, Mostafa Elkholy, SilMinds; Hossam A. H. Fahmy, Cairo University
Towards Optimal Multiple Constant Multiplication: A Hypergraph Approach ........................................ 1805
Oscar Gustafsson, Linkoping University
An Empirical Study on Standard Cell Synthesis of Elementary Function Lookup Tables ............................. 1810
Oscar Gustafsson, Kenny Johansson, Linkoping University
A Rounding Method with Improved Error Tolerance for Division by Convergence ..................................... 1814
Inwook Kong, Earl E. Swartzlander, Jr., University of Texas at Austin
A Low Power Radix-4 Dual Recoded Integer Squaring Implementation For Use in Design of ... 1819
Application Specific Arithmetic Circuits
Jason Moore, Mitchell A. Thornton, David W. Matula, Southern Methodist University
High-Speed Parallel CRC Circuits ........................................................................................................... 1823
Christopher Kennedy, Arash Reyhani-Masoleh, University of Western Ontario
Forcing one-sided results in Goldschmidt algorithm .................................................................................. 1830
Daniel Piso Fernandez, Javier Diaz Bruguera, University of Santiago de Compostela

Session: TP8b2 - Architectures and Implementation
Session Chair: Oscar Gustafsson - Linkoping University
Bipolar sequences correlator and squarer for multiple-access systems ....................................................... 1837
Hossam A. H. Fahmy, Cairo University; Ayman Elezabi, American University in Cairo
Power Estimation Methodology for VLIW Digital Signal Processors ....................................................... 1840
Mostafa E. A. Ibrahim, Cairo University; Markus Rupp, Vienna University of Technology; Hossam A. H. Fahmy, Cairo University
Filter Designs for a Reconfigurable Photonic Integrated Circuit ................................................................ 1845
Yujia Wang, John J. Shynk, Larry A. Coldren, University of California, Santa Barbara
High Performance On the Fly Reconfigurable MIMO Detector ................................................................. 1849
Pankaj Bhagawat, Rajballav Dash, Gwan Choi, Texas A&M University
Implementation and Complexity Analysis of List Sphere Detector for MIMO-OFDM systems .................. 1852
Markus Myllylä, Markku Juntti, Centre for Wireless Communications, University of Oulu; Joseph R. Cavallaro, Rice University
The Cube Coefficient Subspace Architecture for Nonlinear Digital Predistortion ........................................ 1857
Matthew Herman, Benjamin Miller, Joel Goodman, Massachusetts Institute of Technology, Lincoln Laboratory
Sparse FIR filters and its impact on FPGA area usage ................................................................................ 1862
Sean Patronis, Linda DeBrunner, Florida State University
Implementing Indoor Positioning System via ZigBee Devices ........................................................................ 1867
Yao Zhao, Liang Dong, Western Michigan University; Jiang Wang, Bo Hu, Yuzhuo Fu, Shanghai Jiao Tong University
Iris Template Generation with Parallel Logic ............................................................................................. 1872
Ryan Rakvic, Bradley Ulis, Randy Broussard, Robert Ives, U.S. Naval Academy
Dynamically regularized RLS-DCD algorithm and its FPGA design ......................................................... 1876
Jie Liu, Yuriy Zakharov, University of York
ASIC implementation comparison of SIC and LSD receivers for MIMO-OFDM ......................................... 1881
Johanna Ketonen, Markus Myllylä, Markku Juntti, Centre for Wireless Communications, University of Oulu; Joseph Cavallaro, Rice University
Optimally Quantized Offset Min-Sum Algorithm for Flexible LDPC Decoder ........................................... 1886
Daesun Oh, Keshab K. Parhi, University of Minnesota
A New MIMO Detector Architecture Based on a Forward-Backward Trellis Algorithm .................................................. 1892
Yang Sun, Joseph R. Cavallaro, Rice University
Architecture-aware design of a decimation filter based on a dual wordlength multiply-accumulate ................. 1897
unit
Erik Lindahl, Oscar Gustafsson, Linkoping University

Session: TP8b3 - Image Analysis for Biomedical Applications
Session Chair: Nilanjan Ray - U. of Alberta
An Image enhancement technique in the DCT domain for cancer detection .................................................................. 1905
Xiaoming Liu, Qingling Sun, Jinshan Tang, Alcorn State University
MRI Reconstruction using Real-Time Motion Tracking: A Simulation Study .................................................. 1910
Jeff Orchard, University of Waterloo; Robert Staruch, University of Toronto
Automatic Blood Cell Classification by Joint Histogram Based Feature and Bhattacharya Kernel .................. 1915
Sharmin Nilufar, Nilanjan Ray, Hong Zhang, University of Alberta
Estimation in real-time affinity-based biosensors ........................................................................................................ 1919
Haris Vikalo, Arjang Hassibi, University of Texas at Austin
Reduced Rank Formulation for Increased Computational Efficiency in Medical Ultrasound .................. 1923
Model-Based Beamforming
Michael Ellis, William Walker, University of Virginia
Joint Maximum Likelihood Estimation of the fMRI Hemodynamic Response Function and .................. 1927
Activation
Negar Bazargani, Aria Nosratinia, University of Texas at Dallas
A Fast Inverse Consistent Deformable Image Registration Method Based on Symmetric Optical .................. 1931
Flow Computation
Deshan Yang, Hua Li, Daniel Low, Joseph Deasy, Issam El Naqa, Washington University in St. Louis
An Automated Three-Dimensional Visualization and Classification of Emphysema using Neural ............. 1936
Network
Kok Liang Tan, Toshiyuki Tanaka, Keio University; Hidetoshi Nakamura, Tokyo Electric Power
Hospital; Toru Shirahata, Hiroaki Sugiuura, Keio University

Session: WA1 - Sensor Networks
Session Chair: John W. Fisher, III - MIT
Estimating a Random Field in Sensor Networks Using Quantized Spatially Correlated Data .................. 1943
Aleksandar Dogandzic, Kun Qiu, Iowa State University
Quantization for Distributed Detection under Link Outages ................................................................................. 1948
Ying Lin, State University of New York, New Paltz
Distributed Estimation of Channel Gains in Sensor Networks .............................................................................. 1953
Sivagnanasundaram Ramanan, John MacLaren Walsh, Drexel University
Evaluation of Local Decision Thresholds for Distributed Detection in Wireless Sensor Networks ............ 1958
using Multiobjective Optimization
Engin Masazade, Sabanci University; Ramesh Rajagopalan, Florida State University; Pramod K.
Varshney, Syracuse University; Gullu Kiziltas Sendur, Mehmet Keskinoz, Sabanci University
Source Localization using Random Arrays of Sensors under Multipath Fading .................................................. 1963
Georgios Tsigouris, Owens Walker III, Murali Tummala, John Mccachen, Naval Postgraduate
School
Distributed Estimation over Fading Channels Using One-bit Quantization .................................................. 1968
Tao Wu, Qi Cheng, Oklahoma State University

Session: WA2 - Biological Imaging: Acquisition, Analysis and Modeling
Session Chair: Michael Liebling - UCSB
Improved Signal Extraction from Fluorescence Immunoassay Image Sequences

Prasun Mahanti, Fulton School of Engineering; Thomas Taylor, Arizona State University; Douglas Cochran, Fulton School of Engineering; Mark Hayes, Arizona State University; Matthew Petkus, The Dial Corporation

Signal processing for rapid bacterial detection

Vivek Nandakumar, Arizona State University; Jeffrey La Belle, Biodesign Institute; Terry Alford, Arizona State University

Session: WA3a - Ultra Wide Band

Session Chair: Lutz Lampe - University of British Columbia

Effects of Imperfections on the Performance of OFDM-based UWB Systems

Juan Montojo, Laurence Milstein, University of California, San Diego

Performance of Coded Transmitted Reference Pulse Cluster UWB Systems

Zhonghua Liang, Xiaodai Dong, T. Aaron Galliver, University of Victoria

Optimization of Frequency-Shifted Reference Ultrawideband Systems

Harshit Joshi, Zhiguo Lai, Kyle Morrison, Cagatay Capar, Dennis Goeckel, University of Massachusetts

Performance of Concatenated Coded IR-UWB in the Presence of Multiple-access Interference

Zahra Ahmadian, Lutz Lampe, University of British Columbia

Session: WA3b - OFDMA and Multiple Access

Session Chair: Chia-Chin Chong - DoCoMo USA Labs

Reduced-Feedback Opportunistic Scheduling and Beamforming with Power Allocation for MIMO-OFDMA

Man-On Pun, Princeton University; Kyeong Jin Kim, Nokia, Inc.; Ronald A. Itis, Nokia; H. Vincent Poor, Princeton University

OFDMA based Cooperative Relay Networks

Chinthar Tellambura, Zhongshan Zhang, University of Alberta

A Practical SDMA Protocol for 60 GHz Millimeter Wave Communications

Pengfei Xia, Su-Khiong Yong, Jisung Oh, Chia Ngo, Samsung Electronics

Session: WA4 - New Directions in MIMO

Session Chair: Venu Veeravalli - University of Illinois at Urbana-Champaign

Adaptive Time Reversal Beamforming in Dense Multipath Communication Networks

Yuanwei Jin, University of Maryland Eastern Shore; José M. F. Moura, Nicholas O’Donoghue, Carnegie Mellon University

Finite Lattice-Size Effects in MIMO Detection

Christoph Studer, Dominik Seethaler, Helmut Bölcskei, ETH Zurich

Space-time Reversal Techniques for Wideband MIMO Communication

Thiagarajan Sivanadayan, Akbar Sayeed, University of Wisconsin-Madison

Angular domain processing for MIMO wireless systems with non-uniform antenna arrays

Dayu Huang, Vasanthan RagHAVAN, Ada Poon, Venugopal Veeravalli, University of Illinois at Urbana-Champaign

Compressed Sensing of Wireless Channels in Time, Frequency, and Space

Waleed Uz Zaman Najwa, Akbar Sayeed, Robert Nowak, University of Wisconsin-Madison

Broadband SVD and Non-Linear Precoding and Equalisation Applied to Broadband MIMO Channels

Waleed Al-Hanafy, Andrew Millar, Chi Hieu Ta, Stephan Weiss, University of Strathclyde

Diversity-Fidelity Tradeoff in Transmission of Analog Sources over MIMO Fading Channels

Mahmoud Taherzadeh, Princeton University; Kamyr Moshkhar, Amir K. Khandani, University of Waerloo
Cooperative Multi-User MIMO Based on Limited Feedback in Downlink OFDM Systems
Lars Thiele, Malte Schellmann, Thomas Wirth, Volker Jungnickel, Fraunhofer Institute for Telecommunications, Heinrich-Hertz-Institut

Session: WA5a - Architectures for Positioning and Navigation
Session Chair: Andrew Dempster - University of New South Wales

Efficient Signal Acquisition and Tracking for a Real Time GPS/Galileo Software Receiver
Fabio Dovis, Politecnico di Torino; Maurizio Fantino, Marco Pini, Istituto Superiore Mario Boella

An Unambiguous Detector Architecture for Galileo E5 Signal Acquisition
Nagaraj Channarayapatna Shivaramaiah, Andrew Dempster, University of New South Wales

On the Implications of Analog to Digital Conversion on Variable-Rate Bandpass Sampling GNSS Receivers
Alper Ucar, Ediz Cetin, Izzet Kale, University of Westminster

Understanding the GIOVE-B Broadcast Codes of the Galileo System
Grace Xingxin Gao, Stanford University; Dennis Akos, University of Colorado; Todd Walter, Per Enge, Stanford University

Session: WA5b - Low Power Methods
Session Chair: James E. Stine, Jr. - Oklahoma State University

Analysis of Voltage Overscaled Computer Arithmetics in Low Power Signal Processing Systems
Yang Liu, Tong Zhang, Rensselaer Polytechnic Institute; Keshab K. Parhi, University of Minnesota

Reducing Power Dissipation in Pipelined Accumulators
GianCarlo Cardarilli, University of Rome “Tor Vergata”; Alberto Nannarelli, Technical University of Denmark; Marco Re, University of Rome “Tor Vergata”

Self Modifying Finite Automata (SMFA) based State Machine Implementation for Lower Energy
Ka-Ming Keung, Akhilesh Tyagi, Iowa State University

Single-ended half-swing low-power SRAM design
Harsha Choday, James E. Stine, Oklahoma State University

Session: WA6a - Network Information Theory and Security
Session Chair: Faramarz Fekri - Georgia Institute of Technology

Capacity of Ad-Hoc Networks under Multipacket Transmission and Reception
Shirish Karande, Zheng Wang, Hamid Sadjadpour, Jose Joaquin Garcia-Luna-Aceves, University of California, Santa Cruz

Analysis of Latency in Secure Wireless Sensor Networks with Key Predistribution
Ramanan Subramanian, Kevin Chan, Faramarz Fekri, Georgia Institute of Technology

Capacity Scaling Laws for Underwater Networks
Daniel E. Lucani, Muriel Médard, Milica Stojanovic, Massachusetts Institute of Technology

On the Entropy Region of Discrete and Continuous Random Variables and Network Information Theory
Sormeh Shadbakht, Babak Hassibi, California Institute of Technology

Session: WA6b - Wireless Network Utility Maximization: Fundamental Limits and Protocols
Session Chairs: Alejandro Ribeiro - University of Minnesota and Georgios Giannakis - University of Minnesota

Delay Analysis of Scheduling Policies in Wireless Networks
Gagan Gupta, Purdue University; Ness Shroff, Ohio State University

Optimal Spectrum Allocation in Gaussian Interference Networks
Hongxia Shen, Hang Zhou, Randall Berry, Michael Honig, Northwestern University

Asymptotic Delay Guarantees for Throughput Optimal Scheduling
Koushik Kar, Rensselaer Polytechnic Institute; Saswati Sarkar, University of Pennsylvania

Optimal layered architectures for wireless networks
Alejandro Ribeiro, University of Pennsylvania; Georgios B. Giannakis, University of Minnesota

Opportunism, Backpressure, and Stochastic Optimization with the Wireless Broadcast Advantage
Michael Neely, Rahul Urgaonkar, University of Southern California
**Session: WA7a - Speech Recognition and Analysis**

**Session Chair: Jerry Gibson - University of California, Santa Barbara**

A Double-Talk Detector Based on Generalized Mutual Information for Stereophonic Acoustic .........................................................2161

Echo Cancellation Systems with Nonlinearity

Kun Shi, Xiaoli Ma, G. Tong Zhou, Georgia Institute of Technology

A Phonetically Switched ADPCM speech coder..................................................2165

Pravin Kumar Ramadas, Jerry D. Gibson, University of California, Santa Barbara

A probabilistic principal component analysis based hidden Markov model for audio-visual speech recognition

Zhanyu Ma, Arne Leijon, Royal Institute of Technology (KTH)

Synthesis of Enhanced Audio from Low Bitrate Compressed Audio Based on Unit Selection and Statistical Conversion Methods

Demetrios Cantzos, University of Southern California; Athanasios Mouchtaris, Foundation for Research and Technology; Chris Kyriakakis, University of Southern California

**Session: WA7b - Adaptive Receivers for OFDM and UWB Systems**

**Session Chair: Richard Martin - The Air Force Institute of Technology**

Adaptive MIMO Channel Shortening with Post-FEQ Diversity Combining..........................................................................................2183

Gokhan Altin, Richard Martin, Air Force Institute of Technology

A Cold Startup Strategy for Blind Adaptive M-PPM Equalization..........................2188

Andrew Klein, Xinning Huang, Worcester Polytechnic Institute (WPI)

A Cost Function Level Analysis of Autocorrelation Minimization Based Blind Adaptive Channel Shorteners

Ciira Wa Maina, John Walsh, Drexel University

Adaptive Resource Allocation Within Three-Stage OFDM Relay Networks......................................................2198

Nasr Eldin Eltayeb, S. K. Kassim, Jonathan Chambers, Loughborough University

Adaptive Downlink OFDMA Resource Allocation..................................................2203

Ian Wong, Freescale Semiconductor; Brian Evans, University of Texas at Austin

**Session: WA8a - Network Coding**

**Session Chair: Rick Blum - Lehigh University**

On Robust Network Coding Subgraph Construction under Uncertainty..........................................................2211

Christopher Chang, Tracey Ho, Michelle Effros, California Institute of Technology

Randomized Network Coding in Broadcast Wireless Networks with Fading Edges........................................................2216

Yingda Chen, Shalinee Kishore, Lehigh University

Two-Way Relaying with Network Coding for Frequency-Selective Fading Channels..........................................................2221

Petar Popovski, Aalborg University / Oticon A/S; Toshiaki Koike-Akino, Vahid Tarokh, Harvard University

A Study of the Routing Capacity Regions of Networks.............................................................................2226

Ali Kakhbod, University of Michigan; Serap A. Savari, S. M. Sadegh Tabatabaei Yazdi, Texas A&M University

**Session: WA8b - Video Coding**

**Session Chair: Lina Karam - Arizona State University**

Determining Efficient Bit Stream Extraction Paths in H.264/AVC Scalable Video Coding......................................................2233

Dongeun Lee, Yonghee Lee, Heejung Lee, Jonghun Lee, Heonshik Shin, Seoul National University

Bitplane Selective Distributed Video Coding..........................................................2238

Wei-Jung Chien, Lina Karam, Arizona State University

Refined Error Concealment for Multiple State Video Coding over Ad Hoc Networks........................................2243

Yiting Liao, Jerry D. Gibson, University of California, Santa Barbara

Bitrate allocation for multiple video streams at competitive equilibria................................................2248

Mayank Tiwari, Theodore Groves, Pamela Cosman, University of California, San Diego

Rate Estimation Via Maximum Likelihood Parameter Estimation: Application in Fast Mode-Selection within the H.264/AV

Koolyar Minoo, Truong Nguyen, University of California, San Diego

**Session: MISC - Miscellaneous**

Feedback Induced Cooperation..........................................................................................2261

Debashis Dash, Ashutosh Sabharwal

**Author Index**
