2009 International Workshop on Intelligent Systems and Applications

(ISA)

Wuhan, China
23 – 24 May 2009

Volume 1
Pages 1 - 712
TABLE OF CONTENTS

VOLUME 1

Research of Electronic Patient Record Mining Based on Rough Concept Lattice ................................................................. 1
   Weiping Ding, Zhijie Guan, Quan Shi and Zhenguo Shi

A 3D Color Measurement System ........................................................................................................................................ 5
   Henghai Fan, Ganhua Li and Dong Li

A Kind of Exponential Inertia Weight Particle Swarm Algorithm .......................................................................................... 9
   Qiang Li, Jianxin Wu and Yan Sun

Adaptive Genetic Algorithm Simulating Human Reproduction Mode and Its Application in Multi-Peak Function
   Optimization ............................................................................................................................................................................. 15
   Tai-Shan Yan

Investigation on the Nonlinear Time Series Predication of Monitoring Data in Geotechnical Engineering ............................ 19
   Jiawen Zhou, Hongtao Li and Zhenyu Wu

Systems Reliability Analysis and Fault Diagnosis Based on Bayesian Networks ................................................................. 24
   Wenwe Qu, Liyang Xie, Dayan Huang and Xiaowei Yin

Wave Reproduction Simulation for Road Simulator with Iterative Learning Control Applied to Nonlinear Plant
   Model .................................................................................................................................................................................. 28
   Bin Wang, Bo Yang, Xuejun Guo and Gangfeng Tan

Solution to 2D Rectangular Strip Packing Problems Based on ACOs .................................................................................... 32
   Chunyu Yuan and Xinbao Liu

Combined Simulated Annealing Algorithm for Logistics Network Design Problem ............................................................... 36
   Jin Qin and Li-Xin Miao

Insulators ESDD Predicting Based on Wavelet Neural Network ............................................................................................. 40
   Jun Wu and Haiyan Shuai

Enhanced Genetic Algorithm for Selecting Traffic Counting Location ................................................................................. 44
   Chao Yang and Qi Liu

A Supplier Selection Model Based on P-SVM with GA ............................................................................................................. 50
   Sheng Xu and Yuan Xu

Performance of a Low Sampling Rate RAKE UWB Receiver in Multi-path Environments .................................................... 53
   Ai-Jun Liu, Xing-Peng Ma, Wei-Bo Deng and Bin Cao

A Novel Automatic Weighted Image Fusion Algorithm ...................................................................................................... 57
   Le Song, Yuchi Lin, Weichang Feng and Meirong Zhao

Study on the Controlled Volume Method of Operation of Canal System .............................................................................. 61
   Zhiliang Ding, Changde Wang, Guangming Tan and Guanghua Guan

Generalized Possibilistic C-Means Clustering Based on Differential Evolution Algorithm .................................................. 66
   Fuheng Qu, Siliang Ma and Yating Hu

PQPSO Algorithm in Multi-Stage Portfolio Optimization System ......................................................................................... 70
   Yan Ma, Liu Yang and Deyun Yang

Multi-Agent in Ant Colony Algorithm Approach for Solving Traveling Salesman Problem .................................................. 74
   Dong-Sheng Xu and Shi-Liang Yan

New Methods of Transforming Belief Functions to Pignistic Probability Functions in Evidence Theory .............................. 78
   Wei Pan and Hongyi Yang

Fuzzy Inference Trust in P2P Network Environment ............................................................................................................. 83
   Hongwei Chen, Zhiwei Ye, Wei Liu and Chunshi Wang

A New Scheme of Gyroscope Free Inertial Navigation System Using 9 Accelerometers .......................................................... 87
   Fangjun Qin, Jiangning Xu and Jiang Sai

An Investigation on Image Segmentation Algorithm of Distantly-Viewed Trees ................................................................. 91
   Yuqin Yan, Shijun Song, Shijuan He, Lin Cheng and Lizhou Ma

Face Recognition Based on WKPCA ..................................................................................................................................... 95
   Wenging Ma, Yunjie Zhang and Xiaohua Guo

Weighted Center Particle Swarm Optimization .................................................................................................................... 100
   Baoshou Hu, Youcheng Liu, Shuming Guo, Rui Sun and Yue Cao

Image Corner Detection Technique Research on Machine Vision ......................................................................................... 104
   Wei Wang, Yingqiang Tang, Jun Hong and Haixiong Fan

Hybrid Artificial Fish School Algorithm Based on Mutation Operator for Solving Nonlinear Equations .......................... 108
   Yongquan Zhou and Huajuan Huang
The Query Expansion Method Based on Semantic Skeleton
Wensheng Yin, Pinghui Tu, Fan Xu and Hengxi Zhang .......................................................... 113

Automatic Recognition for Losing of Train Bogie Center Plate Screw Based on Multiple-Fuzzy Relation Tree
Peng Dai, Xudong Yang, Peng He and Hongxi Zhang ............................................................... 117

Study on the Behaviour of Access Domain PLC Channel with Low Rate, Low-Voltage
Shewen Sun, Ying Wang and Cong Wang .............................................................................. 122

Study on Prediction of Gas Emission by Data Fusion
Min-Ming Tong, Wei-Yong Huang and Fu-Zhen Xue .............................................................. 126

Robust Active Vibration Control of Flexible Structures Based on H∞/spl infinity/ Control Theorem
Jianguo Zhang, Lili He, Ercheng Wang and Ruizhen Gao ....................................................... 130

Modified S-Plane Control of AUV Based on Motion Compensation
Lei Zhang, Yong-Jie Pang, Lei Wan and Zai-Bai Qin .............................................................. 136

Intelligent Learning Control of Electrohydraulic Proportional Variable Displacement Pump Based on Fuzzy
Neural Network 
Xiao Li, Dongjiao Xie and Zhenhuan Chen ........................................................................ 141

IM-Based Communication Mechanism for an On-Line Monitoring System
Fengwei Wang, Hongsheng Yang and Di Tian .................................................................. 145

Research of Autonomous Control Based on Multi-Agent for AUV
Xin Qian Bian, Tao Chen, Jiagia Zhou and Zheping Yan ...................................................... 149

A Material Control Modeling in MES System of Automobile Engine Assembly Line
Wei Zhou, Yunqing Rao, Xinyu Shao and Fei He .................................................................. 153

Fusion of Infrared and Visible Image Based on Genetic Algorithm and Data Assimilation
Liang Hong, Zongyi He, Jian Xiang and Shixiang Li .............................................................. 157

Joint Power Control and Channel Assignment in Wireless Ad Hoc Networks
Xiwen Hu ......................................................................................................................... 162

Face Expression Recognition Based on Feature Fusion
Peng Wu, Xiao-Hua Li, Ji-Liu Zhou and Gang Lei ................................................................. 166

The Elasticity Algorithm for Automated Route Design Based on Electronic Chart
Qing-Hui Tang, Yong Chen and Gie Chen .......................................................................... 170

PCA-Based Analog Fault Detection by Combining Features of Time Domain and Spectrum
Changjie Zhang, Guo He and Shuai Liang ......................................................................... 174

Evolving Classification Rules by Unconstrained Gene Expression Programming
Jianwei Zhang, Zhijian Wu, Jinglei Guo, Min Peng, Yongjian Zhang and Chunzi Wang ...... 178

An Influence Diagram for Maintenance Strategy Decision Making
Zhiqiang Cui, Shudong Sun, Shubin Si and Bernard Tannou ............................................... 182

Rough Sets Based Hybrid Intelligent Fault Diagnosis for Precision Test Turntable
Baojiu Zhao, Xijun Chen and Qingshuang Zeng .................................................................. 186

One Reduced-Rank Blind Fresh Filter for Spectral Overlapping Interference Signal Extraction and DSP
Implementation
Xiaohuan Li and Shan Ouyang .......................................................................................... 191

Design for Multi-Machine Power System Damping Controller Based on Particle Swarm Optimization
Zhiyuan Duan, Chengxue Zhang, Zhijian Hu and Fangjie Wu .............................................. 195

Robust Discrete Optimization for the Minimum Cost Flow Problem
Rui Mao and Jinfu Zhu ...................................................................................................... 200

Urban Short-Term Traffic Forecasting Based on Grey Neural Network Combined Model: Macao Experience
Yong-Dong Shi, Yuan-Yuan Pan and Jian-Qing Li ................................................................. 204

Analysis on Influential Factors for Meta-Level Control of the Anytime Algorithm for Dynamic WTA Problem
Peng Li, Ling Wu and Faxing Lu .......................................................................................... 208

Genetic Algorithm-Based Fuzzy Cluster Analysis for Flood Hydrographs
Wei-Shuai Cheng, Chang-Ming Ji and Dan Liu ................................................................... 212

Improved Design of Remote Wireless Transmission Terminal using GPRS/GSM Integrated Network
Cheng Li, Tianhui Ding, Ken Chen and Qi Chen .................................................................. 216

A New Neural Network Approach to Machine Tool Thermally Induced Error
Wenjie Tian, Yu Geng, Jicheng Liu and Qi Chen ................................................................ 220

Synchronization of Neural Networks with Mixed Time-Varying Delays Based on Parameter Identification and via
Output Coupling .................................................................................................................. 225
Xiaozheng Mou, Wuneng Zhou, Lin Pan and Tianhe Wang

Multi-Parameter Control for Pre-caliner Kiln System of Cement Using Adaptive Dynamic Programming
Xiaofeng Lin, Baosheng Yang and Deguang Cao ............................................................... 229

Qualitative Simulation and Its Application Framework in Human Reliability Analysis
Long Li, Hongwei Xie, Xiaijian Shi and Wei Cai ................................................................. 233

</table>
A Hybrid Approach of Path Planning for Mobile Robots Based on the Combination of ACO and APF Algorithms ........................................... 372
Xin Tan and Dingfang Chen

Design of Robust Controller of Interconnected Power System Considering Signals Transmission Delay ........................................ 376
Zhiyuan Duan, Chengyou Zhang, Zhigian Hu and Yuanbo Sun

Segmentation for Satellite Cloud Image by Combining Fractal Features and Continuous Wavelet Transform ........................................ 381
Changjiang Zhang, Juan Lu and Sufang Shu

A Novel Feature Selection Approach Based on Swarm Intelligence .......................................................... 385
Zhiwei Ye, Wei Liu, Hongye Chen and Enbo Zhao

Evaluation of Regional Sustainable Development Based on Particle Swarm Optimization ....................................... 389
Sheng Chang, Jiangfeng Li, Weisheng Xu and Xiaoli Jiao

IPSO Algorithm of Texture Segmentation Based on MRF Model ........................................................................ 393
Huazhong Jin, Minyi Ke, Junwu Bai and Zhivei Ye

Fingerprint Verification Based on Ridgeline Representations ................................................................. 398
Wei Liu, Cong Zhou and Zhivei Ye

Local Information Preprocessing of Engineering Equipments Based on Rough Set ........................................ 402
Jianhui Liu

Risk Evaluation of the Electric Power Communication Network Based on Compatibility Rough-Fuzzy Set ................. 407
Hui-Sheng Guo and Li-Na Feng

Research Into Maximum Power Point Tracking Method of Photovoltaic Generate System ........................................ 411
Chun-Xia Liu and Li-Qun Liu

Complex System Reliability Allocation Based on Fuzzy Decision Method .................................................. 415
Hong-Bin Zhang and Zhi-Xin Jia

A Simple and Fast Particle Swarm Optimization and Its Application on Portfolio Selection ................................ 419
Wenjun Wang, Hui Wang, Zhijian Wu and Hubei Dai

Nonlinear Dynamic Friction Compensation of Hydraulic Simulator .......................................................... 423
Yan-Liang Dong, Jing Guo and Ke-Ding Zhao

Diagnostic Method of Causal Network Model Based on Swarm Intelligence Algorithm ........................................ 427
Cunhao Ma, Daole Zhu and Haoqiang Shi

Non-Interacting Control of PMSM Based on Exact Linearization Via State Variable Feedback ......................... 431
Zhaojun Meng, Changzhi Su, Yuexun An and Jirong Guo

Distributed ODV-CFAR Detection Based on Fuzzy Logic ........................................................................ 435
Chengpeng Hao, Long Cai and Mojiang Chen

Calibration Algorithm Based on Linear Feature Between Two-Dimensional Laser Range Finder and Platform ........................................ 439
Jiancheng Li, Ganhua Li and Dong Li

The Approach Based on Dividing and Conquering for Non-Negative Matrix Factorization ................................ 443
Xiaohong Pei, Tao Wu and Wenyue Yan

Substation Plan Based on Improved Model and Adaptive Mutation Particle Swarm Optimization Algorithm ........ 446
Zhiqiang Wang, Huakun Que and Lixin Zhang

A New Method Based on KFDA and SVM for Gait Identification ...................................................................... 450
Jian Ni and Libo Liang

A Hybrid Particle Swarm Optimization Algorithm for Multimodal Function Optimization ........................................ 453
Jiyou Gu, Lin Lin and Hui Wang

On Computing Models of Internet Traveling Diameter .................................................................................. 457
Ye Xu, Zhao Wang and Wen-Bo Zhang

Design and Implementation of a Computerized Embroidery Machine’s Controller Based on ARM and DSP .......... 461
Changhua Lu, Miao Tian and Wei Wang

Improving the Performance of Fractional Order Differential Filter by the Fractional Sampling Delay .................. 465
Zhu-Zhong Yang, Ji-Liu Zhou and Bin-Yu Yan

A Multiple Criteria Decision Making Model Based on DEA/AR with AHP Preference Cone .................................. 470
Jianyong Liu, Ling Li, Chengguo Fu and Zhongjun Wu

KPCA SVM with GA Model for Technological Achievements of College Students Forecasting ......................... 474
Jinhua Zhao, Zhishuai Song and Chenfeng Jiao

Coal-Rock Interface Recognition Based on Multiwavelet Packet Energy ...................................................... 478
Shunfeng Zhao and Wei Guo

A Tabu Search Approach for Distribution Network Reconfiguration Based on GIS ........................................ 482
Xuejun Xu, Cheng Wang and Xiaoliang Feng

Fuzzy Model Reference Learning Control for a Nonlinear Model of Hydrogenerator Unit ................................ 486
Daijian Ling

Study of Non-Destructive Measurement on Crop Nitrogen Nutrition Based on Mutual Information and PSO Algorithm ........................................................................ 490
Tao Chi and Ming Chen
Kinematics Simulation to Manipulator of Welding Robot Based on ADAMS
Guojian Wen, Linhong Xu, Fanlu He and Xia Zhang

DSP-Based Control of the New Current Hysteresis PWM Rectifier System
Kexin Wei, Huaping Li and Shuiming Wang

Target Detection Algorithm Based on Fractal Features of Variance
Wen-Ming Deng, Lei Hua Wu, De-Lei Jiang and Chao Han

Dynamic Compensation of Pt100 Temperature Sensor in Petroleum Products Testing Based on a Third Order Model
Qingyang Lang, Yuanliang Zhang and Wei Xiu

Fault Detection Based on Data Mining Theory
Yagang Zhang, Jinfang Zhang, Jing Ma and Zengping Wang

A Model of High Voltage Electric Field Affects on Human Blood Based on LS-SVM
Jiang Qiang, Xiaojian Jin, Jin Wang Meng, Jiawei Wei, Yi He Du and Hong-Lian Li

On Control System of the Cable-Supporting Parallel Mechanism Including Actuator Dynamics
Bin Zi, Zhengcai Zhu and Ming-Sheng Wei

A Job Shop Scheduling Algorithm Using Chaotic Neural Network
Changfei Wang, Tao Wang and Bao-Wen Wang

Adaptive Control for a Class of Mismatched Uncertain System
Jianqiang Min and Zihun Xu

Adaptive Fuzzy Sliding-Mode Control for Direct Drive Electro-Hydraulic Servo Rotary Vane Steering Gear
Wenhai Su and Jiachen Xu

Design and Research of Unconnected Point Numeric Recognition System Based on Neural Network
Yibao Li and Jianfeng Xu

The Application of BP Neural Network to Bed Temperature Control System of CFB Boiler
Jingjun Wu, Qingyin Meng, Shaohong Jing and Hongliang Yu

A Military Maneuver Engineering Support Evaluation Model Based on ANN and Super-Efficiency DEA
Jianyong Liu, Jing Li, Chengqing Fu and Zhongjian Wu

Research on Characteristics of Runaway Escapement Driven by Double-Slider Mechanism
Guang-Lin He, Li Luo and Tai-Heng Zhang

A BBN-Based Approach for Fault Localization
Xiaomei Liu, Guochang Gu, Yongge Liu, J. Wu and Xiaoxia Jia

MIMAS Based on Grey Prediction and Cloud Association Rules
Feng Ma and C. Guo-Wang

Multimapping Chaotic Mind Evaluation Algorithm
Jianxia Liu, Minmin Dai and Keming Xie

Development of Automatic Visual Inspection Sensor in Robotic Tailored Blank Welding
Lei Zhang and Yongliang Xie

A Hybrid Fault-Tolerant Scheduling Algorithm of Periodic and Aperiodic Real-Time Tasks to Partially Reconfigurable FPGAs
Jin-Yong Yin, Guo-Chang Guo and Yan-Xia Wu

Intelligent Three-Dimensional Shape Recovery System for Shoes
Limeng Song, Jing Luo and Yuhua Wen

Estimating the State of Charge for Ni-MH Battery in HEV by RBF Neural Network
Hongyu Guo, Jichun Jiang and Zhangguo Wang

An Ant-Based Algorithm for Balancing Assembly Lines in a Mass Customization Environment
Zeqiang Zhang, Wenming Cheng, Lin Song and Qingshun Yu

A Novel Naturally Sampled Space Vector Pulse Width Modulation Algorithm
Yuntao Yue and Zixin Chen

Effect of Front Window Angle on The Automobile Dynamic Performances
Zhizhen Zheng, Zheng Guan, Ailing Wang and Xiangyun Liu

The Optimal Control of Sugar Crystal Process Based on Action Dependent Heuristic Dynamic Programming
Xiaofeng Lin, Wei Li and Huixia Liu

An Novel Dynamical Multiscale ASM for Facial Feature Location
Gang Lei, Xiao-Hua Li, Ji-Liu Zhou and Feng Wu

Interactive Control for the Arm Rehabilitation Robot
Shan Liu, Yongle Xie, Shiyun Jiang and Jiaying Meng

A Hybrid Method of GA and ACO for 2-D Entropic Automatic Thresholding of Digital Images
Xiaohong Shen, Yulin Zhang and Fangzhou Li

LIS-No-Classification Wavelet Image Coding Algorithm Based on Lifting Scheme
Guowei Tang and Guochang Gu

Power Plant Equipment Performance Feature Reduction and Weight Allocation Based on Fuzzy Rough Set
Xiao-Feng Dong, Yu-Jiong Guo and Kun Yang
An Evolutionary ANN Based on Rough Set and Its Application in Power Grid Fault Diagnosis .................................................. 620
Sheng Lin, Zhengyou He, Yang Zhang and Qiongquan Qian

Study of Emotion Model on the Learner in the Network Environment.................................................................................. 624
Lijun Han and Wanshe Wang

Adaptive Determination Algorithm of Wavelet Decomposing Scale Based on 3 sigma Criterion ........................................... 628
Li Su and Xuewei Zhou

Research on Fine-Grain Cache Assignment Scheduling Algorithm for Multi-Core Processors ........................................... 632
Benzhai Zhou, Jianzhong Qiao and Shu-Kuan Lin

Location-based Services Applied to an Electric Wheelchair Based on the GPS and GSM Networks ................................... 636
Zhihong Tian, Jinxeng Yang and Jianguo Zhang

Multi-Class Image Recognition Based on Relevance Vector Machine ............................................................... 640
Hailin Wu, Guodong Liu and Zhaobang Pu

Particle Swarm Optimization Algorithm Based on Space Mutation and its Application ........................................... 648
Shengqi Song, Li Kong, Pu Zhang and Rifian Su

Temperature Control Strategies for Microwave Hot In-Place Recycling of Asphalt Pavements ........................................... 652
Tongsheng Sun, Jinfei Shi, Zhixing Zhang and Jianyong Zheng

Modified PSO-FLAC Coupling Optimum Method and Application in Underground Engineering Design ....................... 658
Quan Jiang and Xiangbin Wan

Locally Linear Embedding Algorithm with Adaptive Neighbors ........................................................................... 662
Lingchao Huang, Lingshang Zheng, Caiyue Chen and Min Lu

Study of Grey PID Control for Discrete System .............................................................................. 666
Yulin Zhang and Zhiquing Jiao

Adaptive Template Matching Based on Improved Ant Colony Optimization ............................................................ 670
Lianmei Tao, Haibin Duan and Shuai Shao

An IRVS Based Human-Machine Interaction System Using Head-and-Eye Coordination Movement ................. 674
Sheng He, Yu Lei, Yong-Xin Ma, Yun Meng and Lei Huang

Study on Bi-Objective Traffic Counting Location Optimization Using Ant Colony Method ........................................... 678
Yanping Da and San Jian

Stereo Matching Algorithm Using Population-Based Incremental Learning on GPU ............................................. 682
Dong-Hu Nie, Kyo-Phil Han and Heng-Suk Lee

Peanut Shape Recognition Based on Fourier Descriptor ............................................................................... 686
Hong Chen, Chuanhua Zeng and Youquan Diao

The Improving of BP Algorithmic and Its Application in Robot’s FSM .................................................................. 690
Kuo Liu, Xue-Qin Ling, Jie Liu and Ke-Shi Yang

Research and Design of Filter in Ship-Based Passive Tracking System ............................................................... 694
Hai Chen and Xiaoqian Zhang

The Exploration of Buried Hill Reservoir By Multi-Scale Coherence Analysis .......................................................... 698
Junhao Zhang, Hao Ge, Mingyou Tan, Haiyun Chen and Shiling Cai

An Application of Support Vector Machines in Cooling Load Prediction .............................................................. 702
Zhiqian Hou and Zhiwei Lian

Multi-Scale Soft-Threshold De-Noiseing of MEMS Gyro by Wavelet ................................................................. 706
Peipei Yang and Qing Li

An Improved Fingerprint Segmentation Algorithm Based on Mean and Variance ................................................... 709
Feng Wang, Xiyou Wang and Lin Xu

VOLUME 2

Application of Internal Model Control in Hydraulic Servo System ............................................................................ 713
Tao Shi, Rui-Yin Yang and Zhi-Kun Chen

Adaptive Control of Nonlinear Continuous-Time Systems .................................................................................. 717
Lin Niu and Binghong Ye

A Dynamic and Self-Adaptive TCP-Friendly Congestion Control Mechanism in Next-Generation Networks ........ 721
Wei Yan Liu, Xue-Lan Zou, Tao Liu and Bin Liu

Model Selection of Least Squares Support Vector Regression Using Quantum-Behaved Particle Swarm Optimization Algorithm ........................................................................................................... 725
Xiang-Li Li, Lin-Cheng Zhou and Chun-Bo Liu

The Unemployment Rate Forecast Model Based on Neural Network .................................................................. 730
Guangming Wang and Xiangna Zheng

Research on the Key technologies of Simulation Grid Resource Scheduling Based on Machine Learning .................. 734
Xiaoming Xu, Xuefeng Yan and Qiuqing Ding
Study of a Prediction Model for Forest Fire—Initial Burnt Area on Meteorological Factors ................................................................. 739
Zhilin Qu, Haiqing Hu and Lei Yu

Self-Balance Control of Two-Wheeled Robot Based on Skinner’s Operant Conditioning ................................................................. 743
Xiao-Gang Bao, Hong-Ge Ren and Qi-Yuan Wang

Evaluation of Enterprises Learning Capacity Based on BP Neural Network ...................................................................................... 747
Tian-Ying Jiang

Intelligent Fire Alarm System Based on Fuzzy Neural Network .................................................................................................. 751
Qiongfang Yu, Dezhong Zheng, Yongji Fu and Aihua Dong

The Upper Bound on the Number of Hidden Neurons in Multi-Valued Multi-Threshold Neural Networks ........................................ 755
Nan Jiang, Zhaozhi Zhang, Jian Wang and Xiaomin Ma

Optimization Design of 3-TPT Parallel Robot Based on ADAMS Simulation Technology ............................................................... 759
C. H. Li, B. J. Yang and G. Q. Cai

Integrated GIS and Interactive Spatial Data Mining for Land Evaluation .................................................................................... 763
Zehu Jia and Yaolin Liu

Research on an Improved Evolution Algorithm and its Application in Function Optimization Problem ........................................... 767
Juan Li, Jingfeng Yan and Guanghui Zhai

Research of Predictive Function Control of Basis Weight and Moisture Content ........................................................................ 771
Zhongqian Xiao and Yarong Wang

Real Time Control Method Based on Fuzzy Logic for Autogenous Mill Power ........................................................................... 775
Chong Liu, Hui Long and Yao Geng Tang

Intelligent Control on Work-in-Progress Inventory Based on Biological Modulation Mechanism ..................................................... 779
Jiang Wei

Design of the Inner Communication Bus in Underwater Detection System ................................................................................ 783
Bo Li and Sui-Hua Zhou

Correspondence Analysis for Groundwater Quality System ........................................................................................................ 788
Fu-Quan Ni, Guodong Liu, Jian Ye, Shang-Chuan Yang and Zhihuan Zhang

Decision Support System for Drinking Water Safety in Rural Area in Ya’an of China ................................................................. 792
Fu-Qian Ni, Guodong Liu, Jian Ye, Shang-Chuan Yang and Cai-Xia Zheng

Synchronization of Neural Networks with Time-Varying Delays by Decentralized Linear Feedback .............................................. 796
Zhenghong Wang and Yanjun Liang

Decision-Feedback Equalizer Based on Zeros-Order Statistics in Impulsive Noise ....................................................................... 801
Tian-Cheng Huang and Jin-Long Jiang

Research on Sensor Management Algorithm of Midcourse Object Tracking .............................................................................. 805
Bo Wang, Wei An and Yi-Yu Zhou

Minimal Unembedded Renamable Horn Sets ................................................................................................................................. 809
Yongbin Qin and Daoyuan Xu

An Outlier Detection Method Based on Voronoi Diagram for Financial Surveillance ................................................................. 813
Jin Qin, Wen Qin, Yumei Feng and Ying Sai

A Novel Feature Extraction Method—alpha-Based Supervised Orthogonal Projection Reduction by Affinity ....................................... 817
Run Jiang, Xiao-Hua Li, Ji-Liu Zhou and Gang Lei

A Formal Refinement Method for Transactional Web Service Composition Compensation Based on Paired Petri Net ................ 821
Xiao Yong Mei, Fudan Zheng, Aijun Jiang and Shixian Li

Generalized Rough Fuzzy Sets Based on Soft Sets ....................................................................................................................... 825
Feng Feng

Pneumatic Servo Ball & Plate System Based on Touch Screen and Oscillating Cylinder ............................................................... 829
De-Hua Yuan

Basic Properties of Balanced Triangular Norms ............................................................................................................................. 833
Xiao Shuo Guo, Yunjie Zhang and Wenging Ma

Research on Work-in-Progress Control System of Integrating PI and SPC .................................................................................. 838
Wei Li and Caifen Guo

New Differential Evolution Algorithm with a Second Enhanced Mutation Operator ................................................................. 847
Changzhou Deng, Bingyan Zhao, Anyuan Deng and Rixin Hu

Calibration System of Large Diameter Flowmeter Based on LabVIEW ............................................................................................ 851
Ming-Jian Huang, Zhen-Juan Tang, Jiang Zhou, Shi-Xiang Sun and Cui-Cui Xu

A New Level Measurement Method of Acoustic Standing Wave Based on Particle Filter ............................................................. 855
Jianjun Chen and Xiaobin Xu

The Research on Torsional Predictive Control of Rotary Machine .................................................................................................... 859
Dongxiao Hou, Bin Liu and Hao Chen

Optimal Inversion of Open Boundary Conditions Using BPNN Data-Driven Model ................................................................. 863
Mingchang Li, Guangyu Zhang, Bin Zhou, Shuchun Liang and Zhaochen Sun
Inertial Navigation Position Algorithm in Frequency-Domain with Gibbs Oscillation Restraining in Acceleration

Guoshin Chang, Jingming Xu, Fangjun Qin and An Li

An Adaptive Weighted Support Vector Machine

Limin Sun and Pan Yan

An Ontology-Based Framework for the Construction of Teaching Resource Library

Xiangsheng Yang, Ruowang Zhao and Chaun Zhang

Survivability Analysis of Integrative Emergency Communication Network for Power System

Qiang Guo, Xianwei Liu and Zhixiong Chen

An Efficient Materialized Views Selection Algorithm Based on PSO

Xia Sun and Ziqiang Wang

Research on a Scale-Free Network with Tunable Clustering Coefficient

Qin Yang, Lulong Lan and Jianhui Zhang

A Flexible CBR Tool for Intelligent System of Vehicle Body Conceptual Design

Wenbin Hou, Hongzhe Zhang, Ping Hu and Shihua Guo

Research on Customer Relationship Management Intelligent Decision-Making Mechanism of University Based on System Dynamics

Bing Liu, Yuan Su and Yuan Li

Three Sub-Swarm Particle Swarm Optimization Algorithm

Hai Sun, Lie-Yang Wu, Ze-Tao Jiang, Wen-Huan Wu and Meng-Ming Bai

The Algorithm of Data Repairing for Expendable Current Profiler Based on Neural Networks

Jiequan Sun, Linbin Du, Yingyang Zhang and Guoxing Ren

A Large-Scale Open Space Emergency Evacuation Model

Jianfeng Li and Bin Zhang

Tide Table Digit Recognition Based on Wavelet-Grid Feature Extraction and Support Vector Machine

Shuang Liu and Peng Chen

Xiaoxue Chen, Meng Xu, Xiangou Zhu and Xinxian Lei

Multi-Document Summarization Using Clustering Algorithm

Xiao-Chen Ma, Gui-Bin Yu and Liang Ma

Research on the Model of the Dispatching System of the Industrial Railway Based on GWFN

Jin Guo and Pei-Yan Yun

A Novel Algorithm Based on TOPSIS Group Ideal Solution for Adaptively Adjusting the Weights of Experts in Group Decision

Jianying Wang, Dehua Li and Ying Pan

Research and Implementation of Wushu Video Retrieval Based on Semantic

Yaqi Hu and Guangyu Zhai

Influence of Cavity Effect on the Dynamic Performance of Resonant Vibration Cylinder Pressure Transducers

Dechi Zheng, Qiong Yan and Jing Tian

Toward a Comprehensive Evaluation of Effectiveness of Organizational Culture

Weiping Wu and Renzhong Peng

Application Research of an Improved HSIC Controller in Autonomous Soccer Robot Based on Omni-Directional Vision

Tian-Song Zhai, Xue-Jun Guo and Shuo-Jun Liu

Development of Hardware Driver for MATLAB/Simulink Real-Time Simulation

Lidong Miao, Guangde Zou, Peilin Shi and Xuhua Jiao

Multi-Target Decision-Making of Saturation Attack for Anti-Ship Missile Weapon-Target Assignment

Fei Yang, Chaoqiang Dong and Qing Wang

Optimal Retailer’s Replenishment Policy under Multiple Stages Trade Credit Linked to Payment Time

Tao Liu, Bang-Yi Li and Tao Sun

Fault Diagnosis of Relay Control Circuit Based on Discrete Event System

Xing-Long Pan, Guo He and Chao-Jie Zhang

Optimization and Application Research of Wavelet Neural Network

Guihua Li, Teng Huang, Minwei Jiang and Ronghua Yue

Robot Simultaneous Localization and Mapping Based on Non-Linear Interacting Multiple Model

Yingmin Yi and Ding Liu

Research on Method to Generation of Virtual Hand Motion ................................................................................................. 2262
Xiao Song Miao and De-Guo Yuan

Converting XML DTD to Database ........................................................................................................................................... 2266
Feng Ye

Design of the Interweave Encoder Based on FPGA ...................................................................................................................... 2270
Ming Xue and Jing Zhang

Research on Collaborative Structures of Agricultural Supply Chains ............................................................................................ 2274
Lina Fang and Xiuxue Meng

Rearrange and Reform of Product Line Based on Computer Simulation Technology ............................................................... 2278
Xue-Feng Yang, Xiong-Bo Ze, Hui Wang and Hong-Jun Wang

AS/RS Simulation and Optimization Based on Flexsim .......................................................................................................... 2282
Bo Yan and Daming Lee

Goal Theory Based on Defeasible Logic ........................................................................................................................................... 2286
Yanbin Peng, Lv Ye, Zhijun Zheng, Jian Xiang, Ji Guo, Jieqing Ai, Zhenyu Lu, Jin Yu and Xueqin Jiang
Feature Extraction of Vibration Signal Detected by Optical Fiber along Crude Oil Pipeline and Forewarning System Based on ICA ................................................................................................................................................................................... 2290
Lin Zhu, Zhoumo Zeng, Jingchuang Zhang and Shijiu Jin

The Risk Evaluation of Construction Programme Based on Gray-AHP Method ................................................................................................................................................................................... 2294
Yi-Lan Liu and Xiao-Li Wang

Study on Expressway Control Method Based on FNN ............................................................................................................................................................................................................... 2298
Yin Zhu

Research and Application of the Quality Evaluation Model Based on Fuzzy Theory for the Emergency Rescue Command System ................................................................................................................................................................................... 2302
Liang Ye, Jingxiang Li, Xiaojing Gu, Li Huang and Yunao Zhu

Analysis About Drill String Vibration of Horizontal Well ...................................................................................................................................................................................................... 2306
Chunjie Han and Tie Yan

An Executable File Encryption Based Scheme for Malware Defense .................................................................................................................................................................................................. 2310
Chenggu Yan and Min Wu

A Novel Model of Vulnerability Detection and Restoration System Based on Ant Colony Optimization ................................................................................................................................................................................... 2315
Chenggu Yan and Min Wu

VRP Problem with Time Windows in the Logistics and Distribution Solved by Immune Genetic Algorithm ...................................................................................................................................................................................................... 2319
Li-Min Zhi, Jun Zhi, De Zhi, Jian Yu and Li-Ping Song

An Autogenerating Test Paper Method Based on Latent Semantic Analysis and Genetic Algorithm ...................................................................................................................................................................................................... 2324
Huming Gao and Yanjie Li

The SOC Estimation of NIMH Battery Pack for HEV Based on BP Neural Network ...................................................................................................................................................................................................... 2328
Bingsiang Sun and Lifang Wang

Intelligent Decision-Making and Information Security in the Process of Urban Planning and Management ...................................................................................................................................................................................................... 2332
Dong Fei and Sizhong Wu

Risk Assessment of International Project Contracting Based on Unascertained Set ...................................................................................................................................................................................................... 2337
Shu Jing Zhou, Li Bo Liu, Chao Wu and Yuncang Li

The Design of System for Unmanned Driving Target Car ...................................................................................................................................................................................................... 2341
Yonghong Hu and Xiaolin Zhang

Research into Behaviors at Initial Stage of IT and Courses Integration Project Based on Innovative Diffusion ...................................................................................................................................................................................................... 2345
Kang Yan

Research in Role-Enabled and Cooperation Model in Distributed Environment ...................................................................................................................................................................................................... 2349
Yangfeng Qian and Chunhua Ju

Study on Retail Customer Classification Based on Support Vector Machine ...................................................................................................................................................................................................... 2354
Yangfeng Qian and Chunhua Ju

The Design of Adjusting Shading based on Microcontroller ...................................................................................................................................................................................................... 2359
Zhi Zhang, Wei Long and Liguo Zhai

The Control System of Adaptive Smith Estimating Pre-compensation on Chloroacetic Acid Preheating Water Temperature ...................................................................................................................................................................................................... 2363
Mingru Zeng, Liguo Zhai and Li Wang

Establishment and Simulation of the RBF Model of the Unit Process Energy Consumption of an Automobile Enterprise ...................................................................................................................................................................................................... 2368
Ling Tao, Lin Hu, Rongling Chen and An Chen

Research on Optical Communication Network Structure for IP over WDM ...................................................................................................................................................................................................... 2372
Ning Zhang and Hong Bao

Face Tracking Based on Camshift Algorithm and Motion Prediction ...................................................................................................................................................................................................... 2376
Dongye Tang and Jinsong Xia

A Recursive Algorithm of All Attribute Reductions Based on Boolean Matrix ...................................................................................................................................................................................................... 2380
Aiceng Qian

Research on Assembly Line Balance of Jiu Wei Mechanical and Electronics Enterprise Based on the Standard Time ...................................................................................................................................................................................................... 2384
Yan Xu, Qun Liu, Quo Xie and Qijie Zong

Filter Design of New Protective Relaying System for Power Line Carrier ...................................................................................................................................................................................................... 2388
Zhi Dong, Guolin Tang, Zhiping Huang, Chunwu Liu and Yineng Zhang

Simulation on Matrix Converter Fed Induction Motor DTC Drive System ...................................................................................................................................................................................................... 2392
Zheng Li

The Action of Knowledge Management in Facilitating Construction Enterprise Reform and Development ...................................................................................................................................................................................................... 2396
Mingliang Zhu

Study on the Synthetic Evaluation for the Essential Management Factors of Commercial Banks Based on Factor Analysis ...................................................................................................................................................................................................... 2400
Lingmin Jiang

Reverse Optimize Design of Controlled Five-Bar RRRPR Mechanism Based on Generation Algorithm ...................................................................................................................................................................................................... 2406
Liangbo Sun, Jiangyi Kong, Jinggang Yang and Hui Gui
