1B2 POWER CONTROL II

From Competition to Coopetition: Stackelberg Equilibrium in Multi-User Power Control Games
Yi Su, Mihaela van der Schaar

A Power Allocation Strategy using Game Theory in Cognitive Radio Networks
Enrico Del Re, Gherardo Gorni, Luca Ronza, Rosalba Suffritti

Stochastic Games with One Step Delay Sharing Information Pattern with Application to Power Control
Eitan Altman, Vijay Kamble, Alonso Silva

MAC Games for Distributed Wireless Network Security with Incomplete Information of Selfish and Malicious User Types
Yalin Evren Sagduyu, Randall Berry, Anthony Ephremides

1B3 EQUILIBRIUM ANALYSIS

Mean Field Asymptotics of Markov Decision Evolutionary Games and Teams
Hamidou Tembine, Jean-Yves Le Boudec, Rachid El-Alouzi, Eitan Altman

Job Market Signaling Equilibria with Unobserved Cost Functions and Higher Education Reforms
Giuseppe Rose

How to Find Nash Equilibria with Extreme Total Latency in Network Congestion Games?
Heike Sperber

Nash Equilibrium Design and Optimization
Tansu Alpcan, Lacra Pavel

1C1 SPECTRUM SHARING I

Congestion Games with Resource Reuse and Applications in Spectrum Sharing
Mingyan Liu, Sahand Haji Ali Ahmad, Yunnan Wu

Provider-Customer Coalitional Games
Alireza Aram, Saswati Sarkar, Chandramani Singh

Service Provider Competition and Pricing for Dynamic Spectrum Allocation
Joydeep Acharya, Roy D. Yates

On the Efficiency of Sequential Auctions for Spectrum Sharing
Junjik Bae, Eyal Beigman, Randall Berry, Michael L. Honig, Rakesh Vohra

1C2 RANDOM ACCESS GAMES

Achieving Coordination in Random Access Networks Without Explicit Message Passing
Jaeok Park, Mihaela van der Schaar

Correlated Evolutionarily Stable Strategies in Random Medium Access Control
Hamidou Tembine, Eitan Altman, Rachid ElAzouzi, Yezekael Hayal

A Hierarchical Slotted Aloha Game
Essaid Sabir, Rachid El-Azouzi, Yezekael Hayal
1C3 WIRELESS NETWORKS I

On Achieving Group Strategyproof Information Dissemination in Wireless Networks ........................................... 232
Ajay Gopinathan, Zongpeng Li, Baochun Li

Conjecture-Based Channel Selection Game for Delay-Sensitive Users in Multi-Channel Wireless Networks ................................................................. 241
Hsien-Po Shiang, Mihaela van der Schaar

Widely-Linear Filtering and Non-Cooperative Transceiver Optimization in Wireless Data Networks ................................................................. 251
Stefano Buzzi, Vincent Poor, Alessio Zappone

A Selfish Approach to Coalition Formation among Unmanned Air Vehicles in Wireless Networks ................................................................. 259
Walid Saad, Zhu Han, Tamer Basar, Merouane Debbah, Are Hjorungnes

1C4 GAME-THEORETIC ANALYSIS OF AUCTIONS AND NETWORK SECURITY

Equilibria and Convergence of Auctions on Networks ......................................................................................... 268
Peng Jia, Peter E. Caines

Coexistence with Malicious Nodes: A Game Theoretic Approach ................................................................. 277
Wenjing Wang, Mainak Chatterjee, Kevin Kwiat

Physical Layer Security Game: How to Date a Girl with Her Boyfriend on the Same Table ................................................................. 287
Zhu Han, Nonoslav Marina, Merouane Debbah, Are Hjorungnes

Secure Communication: A Mechanism Design Approach ......................................................................................... 295
Ludovic Renou, Tristan Tomala

2A1 LEARNING

Bidding Efficiently in Repeated Auctions with Entry and Observation Costs ................................................................. 299
Amir Danak, Shie Mannor

Learning in the Presence of Noise ................................................................................................................................. 308
Panayotic Mertikopoulos, Aris L. Moustakas

Online Learning in Markov Decision Processes with Arbitrarily Changing Rewards and Transitions ................................................................. 314
Jia Yuan Yu, Shie Mannor

Deterministic Approximation of Stochastic Evolutionary Dynamics ......................................................................................... 323
Robert Molzon

2A2 EVOLUTIONARY GAMES

Virulence Evolution Through a Latency-transmission Trade-off. Implications As to the Durability of Resistance in Agriculture. ................................................................. 333
Frederic M. Hamelin

Strategy Dependent Mortality in Life History Games ................................................................................................. 339
David M. Ramsey

Games on Graphs That Grow Deterministically ................................................................................................................................. 347
Richard Southwell, Chris Cannings
Competition Between Foraging Predators and Hiding Preys As a Nonzero-sum Differential Game

Andrei R. Akhmetzhanov, Pierre Bernhard, Frederic Grognard, Ludovic Mailleret

2A3 GAME THEORETIC NETWORK MODELS II

A Tight Characterization Of Strategic Games With A Unique Equilibrium

Antoniya Ganchev, Lata Narayanan, Sunil Shende

Combinatorial Agency with Audits

Raphael Eidenbenz, Stefan Schmid

A Game-Theoretical Approach to Incentive Design in Collaborative Intrusion Detection Networks

Quanyan Zhu, Carol Fung, Raouf Boutaba, Tamer Basar

Efficiency and Stability of Nash Equilibria in Resource Allocation Games

Tobias Harks, Konstantin Miller

3A1 STOCHASTIC GAMES

A Constrained Evolutionary Gaussian Multiple Access Channel Game

Quanyan Zhu, Hamidou Tembine, Tamer Basar

Communication Complexity of Stochastic Games

Nagarajan Krishnamurthy, Parthasarathy T., Ravindran G.

Large Population Games in Radial Loss Networks: Computationally Tractable Equilibria for Distributed Network Admission Control

Zhongjing Ma, Peter E. Caines, Roland P. Malhame

3A2 WIRELESS NETWORKS II

Power Control Game in Protected and Shared Bands: Manipulability of Nash Equilibrium

Eduard Jorswieck, Rami Mochaourab

Deployment Analysis of Cooperative OFDM Base Stations

Gaoning He, Hamidou Tembine, Meronane Debbah

Bargaining Over the Interference Channel with Total Power Constraints

Ephraim Zehavi, Amir Leshem

Competitive Optimization of Cognitive Radio MIMO Systems via Game Theory

Gesualdo Scutari, Daniel P. Palomar, Sergio Barbarossa

3A3 PRICING

Fairer Pricing of Resource Allocation Strategies – Individual Guarantees Approach

Siddharth Naik, Holger Boche

Competition for Subscribers Between Mobile Operators Sharing a Limited Resource

Helene Le Cadre, Mustapha Bouhtou, Bruno Tuffin

Pricing Model for the Secondary Market Architecture in Cognitive Radio Networks

Gulfem Isiklar Alptekin, Ayse Basar Bener
3B1 SPECTRUM SHARING II

Broadcasting Forever ................................................................. 484
  Eitan Altman, Moshe Haviv

Computational Analysis of an Auction for Licensed and Unlicensed Use of Spectrum .......... 488
  William W. Sharkey, Fernando Beltran, Mark Bykowsky

Auction Mechanism for Spectrum Allocation and Profit Sharing ...................................... 498
  Sung Hun Chun, Richard J. La

Evolution and Market Share of Wireless Community Networks ........................................ 508
  Mohammad Hossein Manshaei, Peter Marbach, Jean-Pierre Hubaux

Spectrum Sharing Games on the Interference Channel ....................................................... 515
  Mehdi Bennis, Mael Le Treust, Samson Lasaulce, Merouane Debbah, Jorma Lilleberg

3B2 GAME THEORETIC NETWORK MODELS III

Queueing Game Models for Differentiated Services .......................................................... 523
  Parijat Dube, Rahul Jain

Nash Equilibrium Based Fairness ......................................................................................... 533
  Hisao Kameda, Eitan Altman, Corinne Touati, Arnaud Legrand

Cooperation in Underwater Sensor Networks .................................................................... 540
  Florent Garcin, Mohammad Hossein Manshaei, Jean-Pierre Hubaux

Games with Coupled Propagated Constraints in General Topology Optical Networks ........ 549
  Yan Pan, Lacra Pavel

3B3 WIRELESS NETWORKS III

A Prioritized MAC Game Framework for Event Reporting in Sensor Networks .................. 559
  Qiong Shi, Cristina Comaniciu, Prathima Agrawal

Wireless Mesh Networking Games ...................................................................................... 565
  A. Das, A. Neishaboori, G. Kesidis

Resource Allocation Games in Interference Relay Channels ............................................... 575
  Elena Veronica Belmega, Brice Djeumou, Samson Lasaulce

Jamming in wireless networks: the case of several jammers .............................................. 585
  Eitan Altman, Konstantin Avrachenkov, Andrey Garnaev

3C1 P2P AND SOCIAL NETWORKS

Social Motives in Network Formation: An Experiment ...................................................... 593
  Dennie van Dolder, Vincent Buskens

A Simple Reputation Model for BitTorrent-like Incentives ............................................... 603
  A. Tangpong, G. Kesidis

Strategic Reasoning About Bundling in Swarming Systems ............................................. 611
  Daniel Sadoc Menasche, Giovanni Neglia, Don Towsley, Shlomo Zilberstein
3C2 WIRELESS NETWORKS IV

Competitive Scheduling in Wireless Collision Channels with Correlated Channel State ........................................... 621
Utku Ozan Candogan, Ishai Menache, Asuman Ozdaglar, Pablo A. Parrilo

The Role of the Access Point in Wi-Fi Networks with Selfish Nodes ........................................................................ 631
Ilenia Tinnirello, Laura Giarre, Giovanni Neglia

Rate Allocation for Satellite Systems with Correlated Channels Based on a Stackelberg Game ........................................ 638
M. A. Vazquez-Castro, Zhu Han, Are Hjorungnes, Ninoslav Marina

Game Theoretic Rate Control for Mobile Devices ........................................................................................................ 646
Dimitrios Tsamis, Tansu Alpcan, Nick Bambos

3C3 GAME THEORETIC NETWORK MODELS IV

How to Hide Information for Later Use on Networks .................................................................................................. 653
Steve Alpern, Robbert Fokkink

Selection of Efficient Pure Strategies in Allocation Games .............................................................................................. 658
Pierre Coucheney, Corinne Touati, Bruno Gaujal

Congestion Games: Equilibria, Convergence and Complexity ......................................................................................... 667
Berthold Vocking

Convergence of Population Dynamics in Symmetric Routing Games with a Finite Number of Players ........................................ 668
Éitan Altman, Vijay Kamble, Vivek Borkar

3C4 SECURITY GAMES

Uncertainty in the Weakest-Link Security Game ........................................................................................................ 673
Jens Grossklags, Benjamin Johnson

Towards Behavioral Control in Multi-Player Network Games ......................................................................................... 683
Andrey Lukyanenko, Andrei Gurtov

On the Number and the Distribution of the Nash Equilibria in SuperModular Games and their Impact on the Tipping Set ........................................................................................................ 691
Sadarshan K. Dhall, S. Lakshmivarahan, Pramode Verma

Stochastic Games for Security in Networks with Interdependent Nodes ..................................................................... 697
Kien C. Nguyen, Tansu Alpcan, Tamer Basar

EXTRA PAPERS

The Majority and Minority Models on Regular and Random Graphs ........................................................................ 704
Chris Cannings
