2009 International Conference on Industrial Mechatronics and Automation

(ICIMA 2009)

Chengdu, China
15-16 May 2009
### Table of Contents

#### Main Conference Papers

<table>
<thead>
<tr>
<th>Title</th>
<th>Page</th>
</tr>
</thead>
<tbody>
<tr>
<td>Novel Comprehensive Bionic Neuron Unified Model</td>
<td>1</td>
</tr>
<tr>
<td>LV Jin, YANG Xiao-jun, GUO Chen</td>
<td></td>
</tr>
<tr>
<td>Research of Intelligence Control Based on Library-similar Knowledge-increasable Neural Network Group</td>
<td>5</td>
</tr>
<tr>
<td>LV Jin, ZHAO Xiang-mo, GUO Chen</td>
<td></td>
</tr>
<tr>
<td>Research on Efficent Coverage Problem of Node in Wireless Sensor Networks</td>
<td>9</td>
</tr>
<tr>
<td>Xueqing Wang, Shuqin Zhang</td>
<td></td>
</tr>
<tr>
<td>Research on Dispatching Model of Inter-basin Diversion Project Based on Multi-intelligent Agents</td>
<td>14</td>
</tr>
<tr>
<td>Zhijun Yin, Jingmin Zhang</td>
<td></td>
</tr>
<tr>
<td>The Research on Personalized Distance learning System Based on ACO Algorithm</td>
<td>18</td>
</tr>
<tr>
<td>Hui Xie, Zhi-gang Zhang, Cheng-hua Yan, Feng Nie</td>
<td></td>
</tr>
<tr>
<td>Using Ant Colony Optimization to Modeling the Network Vulnerability Detection and Restoration System</td>
<td>21</td>
</tr>
<tr>
<td>Xie Hui, Wu Min, Zhang Zhi-ming</td>
<td></td>
</tr>
<tr>
<td>Research on the Control Value of Actuator in Active Optics</td>
<td>24</td>
</tr>
<tr>
<td>Fu Zhao, Yanjue Gong, Jianlong Lin, Huiyu Xiang, Shuailong Zhang</td>
<td></td>
</tr>
<tr>
<td>Design Optimization of Cantilever Beam MEMS Switch</td>
<td>28</td>
</tr>
<tr>
<td>Yanjue Gong, Li Zhang, Fu Zhao, Chunling Meng, Liang Lv</td>
<td></td>
</tr>
<tr>
<td>Detecting Logo-Removal Forgery by Inconsistencies of Blur</td>
<td>32</td>
</tr>
<tr>
<td>Jing Zhang, Yuting Su</td>
<td></td>
</tr>
<tr>
<td>The Application Research on the Production Control of Dilute Acid Delinting</td>
<td>37</td>
</tr>
<tr>
<td>Wang Guifeng, Guan Hongjun</td>
<td></td>
</tr>
<tr>
<td>Efficient Collision Detection Based on Component Technique using OBB Trees in Virtual Assembly</td>
<td>41</td>
</tr>
<tr>
<td>Li Yi, Wang Yi, Xu Changqing</td>
<td></td>
</tr>
</tbody>
</table>
Plasma Etching Process Monitoring with Optical Emission Spectroscopy .................................. 45
Wang Wei, Bi Junjie, Zhao Junpeng

Optimized Design Method for TSHD’s Swell Compensator Basing on Modeling and Simulation .................................................................................................................. 48
LIU Zhi, NI Fusheng, S.A. Miedema

Influence of Improper Installation on Measurement Performance of Pitot Tube .................. 53
Zhiqiang Sun, Zhiyong Li, Jianwu Zheng

The Research on Video Supervision Technology based on Mathematical Morphology .................................................................................................................. 57
Shao Bin, Jiang Yunliang, Yang Zhen

Characteristic Analysis of Gas Detection Basing on Metal Oxide Semiconductor Sensor ........................................................................................................ 61
Dingjun Xu, Zhengyong Zhang

Forecast the Biological Activity of Nitrobenzene Compound Based on RBF Neural Network ........................................................................................................... 65
HuiYu Jiang, Min Dong, Feng Yang

Combining CORDIC Algorithm and FPGA to Design Dual Core FFT Processor .......... 68
Jiang Murong, Yang Jun, Guo Yuedong, Du Xiaogang and Li Na

Study of Control Optimization Methodologies for Storage Bin Capacity in Transport System ........................................................................................................... 72
BAI Xiaoping, MU Jingjing

Intelligent Active Vibration Control of Constrained Manipulators in Robotic Deburring ........................................................................................................ 76
Mohsen M. Daniali and Gholamreza Vossoughi

Self-reconfiguration Robot Modeling and Topology Configurations Enumerating .......... 81
Yi Liu, Mingyao Liu, Cuan Sun, Tao Li, Wanjing Ding

Automatic Classification of Deep Web Databases with Simple Query Interface .......... 85
Xuefeng Xian, Pengpeng Zhao, Wei Fang, Jie Xin, Zhiming Cui

A New Change Detection Method for Two Remote Sensing Images based on Spectral Matching ..................................................................................................... 89
Xingping Wen, Xiaofeng Yang

Non-Fragile Guaranteed Cost Robust Control for Discrete Uncertain Nonlinear Systems
Yongbo LAI, Hui YAN

Identifying the Task Dependence in Computer Supported Large Scale Collaborative Manufacturing via E-CARGO Model

Bin Xu

Design and Research of Digital Meter Identifier Based On Image and Wireless Communication

Limeng ZHAO, Yunzhou ZHANG, Qiushi BAI, Zixin QI, Xintong ZHANG

Recognition of the Numbers of Numerical Civilian Instrumentations Based on BP Neural Network

Qiushi BAI, Yunzhou ZHANG, Jiyuan TAN, Limeng ZHAO, Zixin QI

Fault Pattern Recognition in Power System Engineering

Yagang Zhang, Yutao Liu, Xiaozhe Wang, Zengping Wang

Risk Analysis for Explosion and Burning of Compressed Natural Gas (CNG) Station Vehicles Exclusively

Luo Yong, SUI Yanfei

The Analysis of the Aggressive Driving for the Traffic Safety

Luo Yong, Li Hui

The Fuzzy Regression Prediction of the City Road Traffic Accident

Luo Yong, Zhang shibo

A Particle Swarm Optimization Algorithm Based on Molecule Diffusion

Xiaoxiang Liu, Weigang Jiang, Jianwen Xie

Automation Testing Process Modeling Method of SOA-based Isomerous Software

Wu Deng, Shuqin Liu, Jingjing Liu

Research on Road Tunnel Fire State and Correlative Preventing Measure

Zheng Xuan

Resource Evaluating for Networked Manufacturing Based on Fuzzy AHP

Wang Zhengcheng, Li Xiaopeng

Control of Hovering Manoeuvres in Unmanned Helicopter for Enhanced Situational Awareness

Igor Astrov, Andrus Pedai
Research of Micro Integrated Navigation System Based on MIMU ........................................ 147
Yang Jinxian, Zhang Ying

USB Key-Based Approach for Software Protection ................................................................. 151
Li MeiHong, Liu JiQiang

A Survey of Neuromorphic Vision System--Biological Nervous Systems Realized on Silicon .................................................................................................................. 154
Ji-Hong Liu, Cheng-Yuan Wang, Ying-Ying An

Research and Implementation for Texture of Handback Skin Quantitative Analysis based on Co-occurrence Matrix .......................................................................................... 158
Jihong Liu, Chengyuan Wang, Qian Gao, Yang Liu, Zikuan Chen

Reversing Radar System Based on CAN Bus ............................................................................. 162
Xiao Chen

Game Analysis of Environment Supervision .............................................................................. 166
Jian-jun Liu

Backstepping Control for a Class of Uncertain Systems Based on Non-singular Terminal Sliding Mode .............................................................................................................. 169
Min Jianqing, Xu Zibin

Construction of Intelligentized Teaching Resources Center Based on Multi-Agent .............. 173
Hu Kai

The Linkage between Entrepreneurial Intensity and Firm Performance: The Evidence from China’s SMEs .......................................................................................................... 176
Xi-mei DONG

Simulation of Fire Spreading in Underground Mine Based on Cellular Automata and Particle System .......................................................................................................................... 180
Qiu-qin LU, Guang-qiu HUANG, Ya-fei GE

Algorithm Study of Multiple-depot Vehicle Routing Problem Based on Fuzzy Simulation ................................................................................................................................. 184
Rong Li-xia

An Improved Single Variable First-order Grey Model ............................................................ 188
Xiaoxiang Liu, Weigang Jiang, Jianwen Xie

Two-phase Flow Parameters Measurement and Gauss-Newton Image Reconstruction Algorithm for Electrical Capacitance Tomography ...................................................... 192
Chen Yu, Zhang Jian, Chen Deyun

Image Quality Assessment Based on Theil inequality coefficient and Discrete 2-D Wavelet Transform ................................................................. 196
Junfeng Li, Wenzhan Dai, Weihua Xiong

Application of Moving Windows Autoregressive Quadratic Model in Runoff Forecast: 200
Z.REN, Z.C.HAO

The Design of Automobile Braking Performance Test System Based on CPLD+MCU  204
Hongjiang He, Yongan Li

Danger Theory of Immune Systems and Intrusion Detection Systems .................. 208
Lu Hong, Jing Yang

Protection and Evaluation on Virtual Machines Based on Extensible Communication and Symmetric Encryption .......................................................... 212
WANG Yude, WANG Xiaoli

Study on the Impact of Self-Learning Epistemologies on Machine Learning Based on Relational Algorithms and Wide-Area Networks .............................. 216
WANG Yude, WANG Xiaoli

Simulation Model of Passenger Behavior in Transport Hubs ............................. 220
ZHANG Qi, HAN Baoming, LU Fang

Multi-parameter Monitoring System for Coal Mine based on Wireless Sensor Network Technology ................................................................. 225
Shi Wei, Li Li-li

An Immune Inspired Model for Obfuscated Virus Detection ............................... 228
Renchao Qin, Tao Li, Yu Zhang

Research on Vehicle Travelling Data Recorder Based on Radio Frequency Identification (RFID) ................................................................. 232
Hongjiang He, Yamin Zhang

Speed Control of Brushless DC Motor Using Human-Simulated Intelligent Control  236
Zushu Li, Hao Yang

Weight Analysis of Brassiere-wearing Influence Factors Based on Neural Network  .... 241
Min-Zhi CHEN, Wei-Yuan ZHANG, Ying HE, Yan-Ping JING

Improved PSO-BPNN algorithm for SRG modeling ........................................ 245
Xiao Wen-ping, Ye Jia-wei

Computer Control Algorithm of Stochastic Dynamic Leontief Input-output Model .......................... 249

Xiaohong Zhao, Lei Jiang

Correction of Signal Induced Noise for Photo-Multiplier Tube ......................................................... 253

Li Wei, Fu MaiXia, Jin GuangFeng

Comparison of Different Mobility Management Schemes for Reducing handover Latency in Mobile IPV6 .................................................................................................................. 256

Xinyi WU, Gang NIE

Research on Operating Characteristic and Controllability of the Neutral Inductance of Shunt Reactor ................................................................. 260

Yan Xie, Baichao Chen

Research and Application of Multiple Attribute Decision Making based on Triangular Fuzzy Ideal Points ................................................................. 264

Dongjing Pan

Study on Personalized Service Technology Based on Deep Web Database ........................................... 268

Rong Luo, Min-Xia Zhang, Yu-Xi Gong

A Calculating and Verifying System for PCM Electromagnetism Characteristic .................................. 271

Qing-Ke Yuan, Ya-Ping Shi, Ming-Tian Zhang, Yue-Geng Wang, Wei-Yun Wang

The handwriting identification of copyright owners based on fractal features .................................. 274

Zhao Yuan

Application and Implementation of CAN Bus Technology in Industry Real-time Data Communication .................................................................................................................... 278

Xiao-feng WAN, Yi-si XING, Li-xiang CAI

Extended Automatic Reasoning of Criminal Investigation .................................................................. 282

Jin Li, Ping He

The Application of Data Communication between VxWorks and Ethernet ........................................ 286

Xiao-feng WAN, Li-xiang CAI, Yi-si XING

Research on Gray Prediction Modeling Optimized by Genetic Algorithm for Energy Consumption Demand ................................................................................................. 289

Yan Xie, Mu Li

Virtual Simulation Study of Shipborne Manipulator Based on CMAC Control .................................. 292
Peng Li, Baoku Su

Research and Implementation Based on Description Logics Reasoning Mechanism ................................................................. 297
Qing Yang, Li Zhu, Wei Chen, Jinqiao Wang

Effect of Return Intervals on Singular Spectrum of Financial Time Series ................................................................. 301
Hong Zhang, Nianpeng Wang, Keqiang Dong

A Comparative Study on Different Port Identification Technology .................................................................................. 305
Zhang Yong, Cheng Chuanqing

Research on the Product Quality Control in the Processing of Low-sugar Preserved Chinese Gooseberry .................................................. 309
Kaisheng Zhang, Qinhui Wang

A Scheme of Virtual Data Auto Integration on the web .......................................................................................................... 313
Zhang Yong, Cheng Xuexian

Motion Control for Rescue Robot Based on PC104 and CPLD ....................................................................................... 317
WANG Xiao-Hong, YU Xiao-Xin, TIAN Lian-Fang, ZHANG Qin, GANG Yi

Research on Force-frequency Characteristic and Stability of Multi-electrode Quartz Crystal Resonator .................................................. 321
Wenjie Tian, Bing Luo, GUO Chen

Stress Distribution of Thin Circular Quartz Wafer and Force Sensitive Characteristic Experiments of Resonator ........................................................................ 325
Bing Luo, Wenjie Tian, Shufang Zou

Research on Effects of Electrode Material on Integrated Resonator Force Sensitive Characteristic .......................................................... 329
Jing Huo, Wenjie Tian, Bing Luo, Shufang Zou

Corner Detection for a Mobile Robot of Power Lines ........................................................................................................ 333
Qi Zuo, Zi Jian Guo, De Xu

Analysis for the Displacement and Inclined Crack of Continuous Rigid Frame Bridge .................................................. 337
WANG Xiangyang, JI Shaobo, ZHONG Pei

A New Testing Method for High-frequency Power Wave Trapper Measurement Based on Correlation Theory ........................................................................ 340
Li Taofeng, Xiong Jian, Wang Jian, Ouyang Hui, Shan Hongtao
Designing and optimizing of the Cutter of Double Partiality Shield based on Genetic Algorithm

Qian Hua

A Method to Support Auto Adaptive Access Network

Li Xinzhan, Wang Li

A discuss of QoS Scheme in Access Network

Zeng Xiyang, Cheng Chuanqing

Discuss of VLAN-IP Technology in Embedded System

Li Xinzhan, Cheng Chuanqing

A Note of Microelectromechanical Systems

Jiemin Zhao

A New Algorithm for Multiple-Source Localization Based On Acoustic Energy In Wireless Sensor Networks

Yunzhou ZHANG, Dingyu XUE, Chengdong WU, Wei MENG

A Robust Mobile Robot Manipulation System Using a Switch-Based Visual-Servo Controller

Ying Wang, Haoxiang Lang, Clarence W. de Silva

The Application Research of Cold-chain Logistics Delivery Schedule Based on JIT

Guangshui MA, Hongjun GUAN

Improvement of the Simultaneous Localization and Map Building Algorithm Applying Scaled Unscented Transformation

WEI Yu-wei, ZUO Zong-yi

Mathematical Model and Its Self-learning Algorithm for Hot Strip Laminar Cooling

Haifang Wang, Yiqun Wang

Retrieval Oriented Robust Image Hashing

Jinglong Zuo, Delong Cui

The Model of Target Classification and Taxis based on the Analysis of Grey Relevancy

Tong Haipeng, Liu Xiaojing

A Design of a Fire Alarm System Based on Dual-Signal Detection and Transmission

Chai Chunlai
Model for Selecting an ERP System Based on IIFWA Operator under Interval-valued Intuitionistic Fuzzy Environment ................................................................. 392
Hongjun Wang

Application DIFWG operator to select supplier with intuitionistic fuzzy information ........................................................................................................... 396
Hongjun Wang, Guiwu Wei

Evaluation Model for Intellectual Capital with Intuitionistic Fuzzy Information .......... 400
Xiaofei Zhao

OWC-LOWA Operator and Its Application to Risk Investment in Uncertain Linguistic Setting .................................................................................................. 404
Rui Lin, Guiwu Wei

Stress Analysis of Bearings for Universal Rolling Mills ............................................. 408
Xianzhang FENG, Songyang ZHANG, Yanmei CUI, Cai LIU

Design and Implementation of Network Set-Top Box ............................................. 412
Xianzhang FENG, Yanmei CUI, Zhiqiang JIANG, Cai LIU

Research on Active Control of Diesel Engine Based on Wavelet Neural Network .......... 416
Yanmei CUI, Xianzhang FENG, Li LIU, Tao HOU, Cai LIU

Chaos Analysis of The Influence of Tensile Stress on Electrochemical Noise .......... 420
Jun Zhan, Xiaofang Liu, Qian Zhang, Qingjie Liu, Feng Long

Data Analysis and Constituting Model of Capital Budgeting .................................. 424
Wang Qi, Liu Xiaoshan, Duan Shenggui

S&T Text Ming and Visualization Applied on Enterprise’s R&D:A Case Study ........... 428
Hongjiang Yue

Electromagnetic Tomography based on Finite Element Method and Improved Genetic Algorithm ......................................................................................... 432
Hua Li, Tingting Pan, Yinxue Zhang, Jing Sun, Zhiqiang Liu

United Grey System-Neural Network Model and its Application in Prediction of Groundwater Level ................................................................. 436
Changjun Zhu, Qin Ju

Non-darcy Seepage Modeling of groundwater Flow and its Simulation .................. 440
Changjun Zhu, Zhenchun Hao
Body Surface Representation Using Adjustable Template Model ........................................ 444
Xinrong Hu, Xiaoqin Du, Shuqin Cui, Zhongmin Deng, Bugao Xu

Geometrical Model Smoothing with Multi-curvature ....................................................... 450
Xinrong Hu, Xiaojin Du, Cui Shuqin, Zhongmin Deng

Development of Mine Microseism Monitoring 3D Visualization System Based on OpenGL
........................................................................................................................................... 454
Dezhi Wang, Dachao Lin, Zilin Geng, Jinying Gan

CAD of Throttle Valves parameters of Telescopic Shock Absorber Based on Multi-Points
Speed Characteristic ........................................................................................................... 458
Changcheng Zhou, Shicai Ji, Zhiyun Zheng

CAE of Outer Characteristic of Telescopic Shock Absorber for Three Wheel Agricultural
Vehicle .................................................................................................................................. 462
Changcheng Zhou, Yuanyi Liu

Reliability-Based Robust of Symmetric Laminated Plates Subject to Last-ply Failure
WANG Xiangyang, LI Zhuoqiu .......................................................................................... 466

Research on the Modulation and Coding Scheme in LTE TDD Wireless Network .......... 470
Chen Yu, Wen Xiangming, Lin Xinqi, Zheng Wei

Constructing Innovative Laboratory through Intelligent Learning Objects ................. 474
Li Xuemei, Lu Jin-hu, Ding Lixing

Effect of Heating Temperature on Microstructure and Mechanical Properties of
Continuous Copper Fiber ................................................................................................. 477
WEI Xiaoling, PAN Minqiang, Zeng Dehuai, WANG Qinghui, TANG Yong, ZHOU Wei

A Method for Personal Query Based on Role Preference Ontology ......................... 481
Weiliang Jiang, Jianzhuo Yan and Liying Fang

Application of Core-pulling Mechanism in Injection Mould Design ......................... 484
Huang Guijian, Li Xuemei, Wu Xiaoyu, Li Jibin

The PCB Defect Inspection System Design Based on Lab Windows/CVI ................. 487
Wang Fen, Li Xuemei, Xu Gang

Study of Cost-sensitive Ant Colony Data mining Algorithm ....................................... 490
Dingli Song
