Research on the Dry Port Location of Tianjin Port Based on Analytic Network Process
Chun-hui Wang, Jin-yu Wei

Flashsearch: Document Searching in Small Mobile Device
Zhao Cao, Shibin Zhou, Kan Li, Yushu Liu

A Stability Module of Path Compression Techniques for On-Demand Ad-hoc Routing Protocols
Jia Xu, Yong-li Wang, Qian-mu Li, Feng-yu Liu

Research on the Intelligent Online Trading Platform Based on J2EE
Yan Zhao, Ming Du, Jiajin Le, Yongming Guo

From Manufacturer-Driven to Carrier-Driven: Towards China's TD-SCDMA Commercialization Strategies
Wenfu Zheng, Yuanyuan Ma, Kalle Lyytinen

SESSION 3: CONTROL AND INDUSTRY MANAGEMENT

The System Guarantee Mechanism for the Reliability of Fair Value: Based on Game Theory
Zhiliang Wang, Xiwen Li

Two-Dimensional Flow-Pollutant Model and Its Application to Shallow Lake in Suzhou City
Jingjing Cao, Peng Hou

An Empirical Study of the Retail Format Development in Inner Mongolia
Peihong Sun, Xuejie Yu, Xiaoqiu Gao

Motivation Research of Earning Management in Chinese Listed Companies with Controlling Rights Transferred
Fei Tian, Yaolin Qin, Jinxin Zhang

An Empirical Study on the Interactive Development between Producer Services and Manufacturing Industry in China
Renfa Yang, Qiong Huang

A Study on the Definition of Industrial International Competitiveness
Chuang Li

Research on Annual Electric Power Consumption Forecasting Based on Partial Least-Squares Regression
Ming Meng, Wei Shang

On Competition+Cooperation Relationship among Enterprises within an Industrial Cluster and Its Coordination
X. F. Zhang

Problems Existed in Agricultural Production Means Market of China and the Causal Analysis
JunPing Zhou

From Competition to Cooperation: On Specialized Market in Cluster Marketing
Yachen Hu

Learning, Innovation and Dynamic Capability: An Empirical Research about South China Enterprises
Ping Zeng, Xiang Cai, Honglong Ning
The Performance Evaluation of Strategic Restructure in Telecommunication Industry of China
Chenkui Wang ................................................................. 132

A Research on the Green Technology Innovation of the Cemetery Industry
Yanjian Wu, Chengfang Sun ............................................135

Research on Blending Optimized Algorithm of WSICO Industrial Port Based on Logistics Equilibrium
Zhou Cheng, Zhumong Zhang, Peilin Zhang ................139

Tactics on the Third Party Reverse Logistics Automobile Enterprises
Bo Yan, Wan Yu .............................................................142

Asymmetric Competition Analysis Based on Consumer Choice Set: Case of Chinese Automobile Industry
Yan Wang, Gao Wang, Pin Zhao, Hao Li .........................146

SESSION 4: E-COMMERCE AND MOBILE COMMERCE
APPLICATIONS

Optimization of the Teaching in Electronic Commerce
Baining Gao ................................................................ 150

Information Distribution of Electronic Commerce Activities
Delin Hou, Huosong Xia .................................................154

Implementation of the Computer Aided Business Process Reengineering System Based on UML and J2EE Technology
Yongchun Wu, Na Han, Haizi Wang .............................158

Research on the Niche Construction and Evolutionary Dynamics Model of the E-Commerce Enterprise in the Cyber-society
Xiaolan Guan, Zhenji Zhang ............................................162

The Design of the Integrated E-Business System Based on CPC
Wei-ping Ying, Chao-Sheng Luo, Yun Zhao ................167

Research on E-Commerce Security Issues
Yuanqiao Wen, Chuanhui Zhou, Juan Ma, Kezhong Liu 171

Construction of Innovation-Oriented Small and Medium Business
Chengfang Sun, Yanjian Wu .........................................175

An Automated Mechanism for Negotiations in E-Commerce Systems
T. Kijitaweesinpoon, P. L. Zhou ..................................179

The Mode Change of Chinese Mobile Marketing
Shao Kang .....................................................................184

Study on Model about Competitive Intelligence System of Enterprise Based on Data Mining under Electronic Commerce Environment
Ting Chen, Kaihua Hou, Kaichao Yu ..............................188

Influence from the Serious Games on Mobile Game Developers’ Commercial Strategies
Chen Xin .....................................................................192

E-Government Information Security in the Web Environment Based on Role Based Access Control Technology
Zhongping Zeng, Tao Chen, Yi Zhang .........................195
Research on Free-Riding Behavior of a Dual-Channel Supply Chain in E-Commerce ........................................199
Lei Cao, Zigang Zhang, Zilin Chen

Commercial Strategies for SME Developers of Mobile Phone Serious Games in Chinese Market .........................................................203
Chen Xin

A Strategy for Knowledge Management in E-Government .................................................................207
Ping Zhou

Building Web Based Collaborative E-Commerce Platform in an Incremental Integrated Model .........................................................211
Bin Xu

Trust Evaluation Model of E-Commerce Based on WOT ........................................................................216
Shi-tao Yan, Yue-sheng Gu, Fang Miao

Research on .NET-Based Post-Enterprise E-Contract Management System ...........................................219
Xiangchi Yang, Pengfei Li

The Research of Value Chain Operation Model in E-commerce ............................................................223
Shouping Gui, Zhishen Ye

A Framework for Investigating the Impact of IT Infrastructure and E-Commerce Capability on Firm Performance ..................................................227
Zhijun Kuang

SESSION 5: INNOVATIVE COMPUTING AND APPLICATIONS

Evolutionary Game Analysis on the Phenomenon of National Student Loan Default ........................................231
Fangyuan Lu, Min Lu

Application of EF Model to Quantitative Assessment of Sustainable Development in Hubei Province ............................................................235
Jia Luo

Technology-Based Relationship between Innovation and Growth ..........................................................239
Lisi Song, Xiangdong Chen

First-Line and Middle Manager IT Usage Intention: A Test of TAM ...........................................................242
Man-Hui Huang, Kang Xie

A Personalized Recommender Integrating Item-Based and User-Based Collaborative Filtering ................246
XiaoYan Shi, Hong Wu Ye, SongJie Gong

Research on Attribute Reduction Using Rough Neighborhood Model ..................................................250
Ming He, Yong-ping Du

A Short-Term Prediction Method of Shanghai Composite Index Based on Back Propagation Neural Network and Inheritance Algorithm ........................................253
Shen Wei, Yin Lu, Wang Yongli

Data Mining to Improve Human Resource in Construction Company .....................................................257
Chang Youzheng, Guan Ming

L-Fuzzy Co-Alexandrov Topological Spaces .........................................................................................261
Jie Zhang, Zhi Chang, Bo Liu, Zhenyu Xiu

Using Data Mining to Accelerate Cross-Selling ...............................................................................265
Hewen Tang, Zengfang Yang, Pingzhen Zhang, Honglin Yan

Mapping Rules Based Data Mining for Effective Decision Support Application ........................................................................................................ 485
Jianhong Luo, Dezhaof Chen

An Evaluation Method for Enterprise Knowledge Management Performance Based on Linguistic Variable ........................................................................ 489
Rong Chen, Peide Liu, Shukan Tang

Research on Purchasing Supply Chain Coordination Mechanism for Multiple Suppliers with Incomplete Information ........................................ 493
Ai-Ying Gao, Kai Liu
Study of Evaluation and Selection on Third Party Reverse Logistics Providers .................................................. 497
Xiangru Meng

Digestion-Based Software Formal Transformation ................................................................................................. 501
Xiaojuan Cai, Yonggen Gu

Probabilistic Applied Pi Calculus and Zero Knowledge ........................................................................................... 505
Han Zhu, Xiaoohong Wu, Yonggen Gu

Study of Traffic Flow Prediction Model at Intersection Based on R-FNN ................................................................. 510
Zhenguo Zhou, Kun Huang

Coordinated Policy in Multi-suppliers and One-Manufacturer System under Partially Symmetric Information ............................................................................................................................... 514
Guo Li, Shihua Ma

SESSION 1: INTELLIGENT COMPUTING

Application of Grey Relational Clustering and Data Mining in Information Extraction ............................................. 519
Zhiming Qu, Xiaoli Wang

CE-Based Analysis of High Assurance Data Transmission ......................................................................................... 523
Zhiming Qu, Xiaoli Wang

Mining Maximal Hyperclique Pattern: A Hyperclique Pattern Growth Strategy .................................................... 527
Bo Xiao, Liang Zhang, Qianfang Xu, Jun Guo

Principal Component Analysis and Cluster Analysis in Multi-regional Logistics Planning-- Taking Zhejiang Province for Example .................................................................................................................. 531
Zi-xia Chen, Qing-yong Meng

Evaluation of Desulfuration Projects Decision Based on Attribute Importance Degree of Rough Set and TOPSIS ................................................................................................................................. 535
Wei Li, Yumin Shang, Chunfeng Nie

A New Quantum Clone Evolutionary Algorithm for Multi-objective Optimization ..................................................... 539
Hongjian Qu, Dawei Zhao, Fangzhao Zhao

Solving the Rectangular Packing Problem of the Discrete Particle Swarm Algorithm ................................................. 542
Chen Zhao, Liu Lin, Cheng Hao, Liu Xinbao

A Novel Kind of Decision of Weight of Multi-attribute Decision-Making Model Based on Bayesian Networks ............................................................................................................................................. 546
Sun Xuan

Film Affective Content Recognition Based on Fuzzy Inference .................................................................................. 550
Xinqi Lin, Xiangming Wen, Zhaoming Lu, Yong Sun

Mine Ore Blending Planning and Management Based on the Fuzzy Multi-objective Optimization Algorithm ..................................................................................................................................................... 554
T. J. Xu, P. Yang, Z. Q. Liu

Maintenance Management System Based on Bayesian Networks .............................................................................. 558
Zhiqiang Cai, Shudong Sun, Shubin Si, Bernard Yannou

The Study of Cluster Predication Method on Sales Forecast Based on Residual Error Modified GM (1, 1) ...................................................................................................................................................... 562
Qingwen Sun, Xiaohui Luan

A Generalized KKM Theorem and Its Application to the Existence of Pareto Equilibria for Multi-objective Games ............................................................................................................................................. 566
Haishu Lu
Combining Lexical Resources with Fuzzy Set Theory for Recognizing Textual Entailment

Jin Feng, Yiming Zhou, Trevor Martin

A Collaborative Recommender Combining Item Rating Similarity and Item Attribute Similarity

SongJie Gong, HongWu Ye, XiaoYan Shi

SESSION 2: WEB APPLICATIONS

Design of a Web-Based Building Management System Using Ajax and Web Services

Jianbo Bai, Hong Xiao, Tianyu Zhu, Wei Liu, Aizhou Sun

Application of Fuzzy ANP in Assessing Knowledge Management Performance

Chun-ling Sun, Ran Bi

Strengthening Consumers Loyalty to a Retail Web Site: An Attachment Theory Perspective

Yan Jian, Da-hai Dong

An Empirical Research of Knowledge Characteristics’ Effect on Knowledge Transfer Efficiency

Su Hui

Research on Retailer-Driven Revenue-Sharing Contracts Model under Manufacturers Competition

Xiaoming Zhou, Yunlong Zhu, Haifeng Guo

Analysis on the Boundary Decision of Chinese Telecom Operator—A Study Based on the Research of Transaction Cost

Ying Peng, Xing Cao, Guiyue Song, Fucheng Ming

Web Mining in Technology Management

Chengjian Gu, Lucheng Huang

Study on Establishing Tourism Warning System Based on DSS

Jiang Hua, Zhenxing Cui

Fuzzy Evaluating Method for Channel Research in E-Supply Chain

Ye Yong, You-hua Zhang

Ontology-Oriented WSMO Application Approach

Xiaoping Yang, Xiangbing Zhou

A New Method to Solve the Rigid Problem in Concurrent Development of Complex Product

Ming Qi, Nan Jia

Design and Implementation of WebGIS & Web Service-Based Logistic Information System

Pei Zhang, Feng Wang, Peiguang Lin

An Efficient Document Categorization Algorithm Based on LDA and SFL

Xia Sun, Ziqiang Wang

An Architecture for Agent-Based Distributed Component Repository

Ruzhi Xu, Dongsheng Chu, Zhikun Zhao, Kang-Kang Zhang, Peiguang Lin

Categorization and Monitoring of Internet Public Opinion Based on Latent Semantic Analysis

Yuan Wan, Hengqing Tong

Clustering Method Based on Fuzzy Multisets for Web Pages and Customer Segments

Suozhu Wang, Chunjie Xu, Rui Wu
Incentive of Tacit Knowledge Transfer in Outsourcing ................................................................. Jing Tu, Zhonghua Yang

Organizational Change: A Case Study on Anhui Telecom Company ........................................ Yong Zhao, Yezheng Liu

Design and Research of Grid Resource Collaboration Model Based on Facilitator Role .......... Wenjie Liu, Shengjun Xue, Tinghuai Ma

Cross-Fund Subsidization Behavior in Mutual Fund Families ..................................................... Hai-lan Zhang, Zhi-xin Liu

Internet-Assisted Construction Project Evaluation System Based on XML Tender and the Hierarchy Fuzzy Comprehensive Evaluation Model ..................................................... Lun Xie, Lili Bian, Zheng Yang, Zhiliang Wang

DEA Model for Logistics Cost Evaluation Based on Activity Analysis ....................................... Yang Touping

Health Information Management for Inducting Part-Time Engineers: Activating the Information-Oriented Projects in Healthcare Enterprise ................................................................. Po-Hsun Cheng, Ying-Wei Chen, Ysan-Nan Chien, Feipei Lai

Acquiring Knowledge from Group Discussion Process Based on Graph Analysis ...................... Long-Ting Wu, Xia Cui

The Rental-Type Application System Based on Web Service ...................................................... Jian-fei Tu, Zhi-mei Fang, Fei-fan Ye

Rough Set Rules Fusion in a Multi-agent Architecture ................................................................. HongXiang Gong, Guo Sen, Wang Ping, Zhao An

The Research of Web Application Framework Based on SSH .................................................... Fang Liu, Hongxia Guo, Bo Fu

An Online User Authentication Scheme for Web-Based services ............................................. Yu Sheng, Zhu Lu

Personalized Recommendation Algorithm Research Based on Multi-agent .............................. Hai Zhu, Xiaoli Song, Shiju Zhang, Yan Gao, Panke Zhang

SESSION 3: INTELLIGENT SYSTEMS

The Research on Adjustment Ability of Logistics System .......................................................... Xiu-qing Liu, Liang Sun

The Hydraulic Pump Performance Test System Based on LabVIEW .......................................... Bingsheng Wu, Chaozhi Cai

BSC-Based Indicators Public Projects Executive Performance Evaluation System Research .... Yi Wei, Yan Yanmei

Long-Term Outstanding Item Checking of Bank-Campus Multi-function Card System .......... Dong Hua

Effectiveness Evaluation on Informationalization of Aviation Equipment Maintenance Support ................................................................. Ying Wang, Laishun Zhang, Xinmin Hu

Synthesizing IPv6 and Information Retrieval Systems with Raw ............................................ Xiao Chen
A Benefits-centric Multi-participant Trust Architecture for DRM-Enabling Digital Contents Value Chain Ecosystem ............................................................... 719
Zhiyong Zhang, Qingqi Pei, Jianfeng Ma, Lin Yang

Modeling and Capability Assessment of Maintenance System Based on Agent .......................................................... 723
Jin-chao Zhao, Huan Qi, Yong-ming Zhang

A Credit Record Driven QoS Assurance Mechanism for SOC System ................................................................. 728
Xian-Zhen Yin, Jing Jiang, Zhen-Kuan Pan, Bai-Qiang Xia

A New Method for CDR Processing in IP Multimedia Subsystem ................................................................. 733
Yuanping Zou, Bo Jia

Research on the Bidding Information Integrated System of Generation Group .......................................................... 737
Yongquan Chen, Xiangming Xiao, Yonghua Song

The Evaluation on the Agility of Reverse Logistics System Based on BP Neural Network ............................................. 741
Donghong Yang, Wenyan Duan, Qinghong Chang

The Design and Research of Standard Address Database System Based on WebGIS in Panyu, Guangzhou .......... 745
Liyan Chen, Yuan Fang

The Research of Oilfield Flood Precaution Decision Support System .......................................................... 748
Lun Xie, Zhiliang Wang, Lili Bian

Research on Virtual Expert System and Its Construction Based on Integration of Knowledge Ability .................. 752
Guangming Hou, Jianmin Fan

The Application of ADAMS in the Mechanical System Simulation Course .......................................................... 756
Liangqin Yu, Yingying Xue, Shunqi Mei

Optimization of Networked Manufacturing System Based on Bottleneck Resources ............................................. 760
Jinzhao An, Liangqing Feng

ILMOP Approach for Optimal Eco-campus Energy Sources System Structure ..................................................... 764
Xuehua Zhang, Hongwei Zhang, Tegang Deng, Hongbo Liu, Qingfei Guo

Design a Balanced Scorecard-Based Model for Human Resource Measurement System .................................. 767
Yan Peng

Study on Quality Improvement Systems of Electronic Component in Design and Manufacture Stage .............. 771
Enping Shen, Zuobing Fan

Web-Based Network Management System Revolving about Database .......................................................... 775
Yongjun Zhang, Dingfu Jiang

SESSION 4: INFORMATION PROCESSING AND INFORMATION SECURITY

A Kind Improved Model of Information Fusion .................................................................................................................. 779
Nantian Huang, Lin Lin

The Research and Design of the Intelligent Security Defendable Software’s Cooperative Framework .......................................................... 783
Jin-Dong Wang, Wei-Wei Cao, Kun Wang, Heng-Wei Zhang

Games of Incomplete Information to Logistics Outsourcing .......................................................................................... 787
Qingkui Cao, Xianxin Zhang
The Model Design of Educational Administration Safety--Based on Intrusion Detection Technology
Wei Wang, XiTao Liu ................................................................. 791

Study on the Risk of Small and Medium-Sized Enterprises Securitization Based on Unascertained Measure Model ................................................................. 795
Jibin Ma, Yi Cheng

SESSION 5: INFORMATION SYSTEMS AND MANAGEMENT

Study on Pre-control Management Mechanism for Innovative Organization's Human Resources ................................................................. 799
Wanxin Gao, Qiuying Yu, Xianglin Teng

Research of Customer Satisfaction Optimal Model Based on Business CRM .................................................. 803
Guozheng Wang

Empirical Studies of Influential Factors on Overseas Acquisition: From Home Country perspective ................................................................. 807
Qian Wang, Ying-chun Wang

Research on the Ecological Balance Model of the Virtual Enterprise Cluster and Its Symbiotic Mode ................................................................. 812
Dongpo Xiao, Xiaolan Guan, Zhenji Zhang

Signaling Game Analysis on Phenomena of Counterfeit Commodity ................................................................. 816
Fangyuan Lu, Bingxian Qiu

A Customer Driven Model for Integrated Supply Chain Management System ................................................................. 820
Shuwei Huang, Huiyan Liu

Study on Strategic Management of Green Marketing ................................................................. 824
Shi-Hua Li, De-Shan Tang

Research and Application of Fuzzy Multi Attribute Decision Method on Investing Enterprise ................................................................. 828
Hualong Zhao

Study on the Dual Optimization of Service Marketing and Customer Churn Management ................................................................. 832
Wang Qiwan, Zhou Min
