2009 ACM/IEEE/SCS
23rd Workshop on Principles of Advanced and Distributed Simulation

(PADS)

Lake Placid, New York, USA
22 – 25 June 2009
PADS 2009-Paper Session

An Approach for Validation of Semantic Composability in Simulation Models .............................................3
  Claudia Szabo and Yong Meng Teo

Symbiotic Simulation Model Validation for Radiation Detection Applications .............................................11
  Heiko Aydt, Stephen John Turner, Wentong Cai, Malcolm Yoke Hean Low,
  and Rassul Ayani

Causal Program Slicing ..............................................................................................................................19
  Ross Gore and Paul F. Reynolds Jr.

A Performance Evaluation of the Lightweight Time Warp Protocol in Optimistic Parallel Simulation of DEVS-Based Environmental Models .................................................................27
  Qi Liu and Gabriel Wainer

Scalable Time Warp on Blue Gene Supercomputers ....................................................................................35
  David W. Bauer Jr., Christopher D. Carothers, and Akintayo Holder

Di-DyMeLoR: Logging only Dirty Chunks for Efficient Management of Dynamic Memory Based Optimistic Simulation Objects ............................................................................................45
  Alessandro Pellegrini, Roberto Vitali, and Francesco Quaglia

Real-Time Security Exercises on a Realistic Interdomain Routing Experiment Platform ................................54
  Yue Li, Michael Liljenstam, and Jason Liu

Modeling and Evaluation of Rescue Operations Using Mobile Communication Devices .................................64
  Keisuke Nakata, Kumiko Maeda, Takaaki Umedu, Akihito Hiromori,
  Hirozumi Yamaguchi, and Teruo Higashino

Modeling the Internet Routing Topology – In Less than 24h ....................................................................72
  Rolf Winter
Parallelizing SystemC Kernel for Fast Hardware Simulation on SMP Machines .................................................80
  Ezudheen P, Priya Chandran, Joy Chandra, Biju Puthur Simon, and Deepak Ravi

Hardware Supported Time Synchronization in Multi-core Architectures ...............................................................88
  Elizabeth Whitaker Lynch and George F. Riley

GPU-based Real-Time Execution of Vehicular Mobility Models in Large-Scale Road Network Scenarios ........................................................95
  Kalyan S. Perumalla, Brandon G. Aaby, Srikanth B. Yoginath, and Sudip K. Seal

An Efficient and Adaptive Mechanism for Parallel Simulation Replication ..........................................................104
  Roland Ewald, Stefan Leye, and Adelinde M. Uhrmacher

Using REST Web-Services Architecture for Distributed Simulation ........................................................................114
  Khaldoon Al-Zoubi and Gabriel Wainer

On Determining How Many Computers to Use in Parallel VLSI Simulation ......................................................122
  Qing Xu and Carl Tropper

Communication-Efficient Support for Spatial Filtering of State Updates in Distributed Virtual Environments ........129
  Xueyan Tang and Wentong Cai

Efficient Zone Mapping Algorithms for Distributed Virtual Environments ..........................................................137
  Duong Nguyen Binh Ta, Suiping Zhou, Wentong Cai, Xueyan Tang, and Rassul Ayani

Efficient Master/Worker Parallel Discrete Event Simulation ..................................................................................145
  Alfred Park and Richard M. Fujimoto

Author Index
