2009 International Conference on Distributed Computing Systems Workshops

(ICDCS Workshops)

Montreal, Quebec, Canada
22 – 26 June 2009
Message from the General Chair
Message from the Program Chair
Welcome from the Workshop Co-Chairs
Committee Lists
Message from the WCPS 2009 Workshop Chair
WCPS 2009 Committees
Message from the WWASN 2009 Workshop Chairs
WWASN 2009 Committees
Message from the NGNA 2009 Workshop Chair
NGNA 2009 Committees
Message from ADSN 2009 Workshop Co-Chairs
ADSN 2009 Committees
Message from the MNSA 2009 Workshop Chair
MNSA 2009 Committees
Message from the SAHNS 2009 Workshop Chair
SAHNS 2009 Committees
Message from the WiMAN 2009 Workshop Chair
WiMAN 2009 Committees

The Second International Workshop on Cyber-Physical Systems (WCPS 2009)
WCPS 2009 Session 1

Joint Sleep Scheduling and Mode Assignment in Wireless Cyber-Physical Systems .................................................................1
Chun Jason Xue, Guoliang Xing, Zhaohui Yuan, Zili Shao, and Edwin Sha

PNet: A Grid Type Sensor Network of Reconfigurable Nodes ...................................................................................................7
Varun Subramanian and Alex Doboli

A Cluster-Based Protocol to Enforce Integrity and Preserve Privacy in Data Aggregation ............................................................14
Wenbo He, Xue Liu, Hoang Nguyen, and Klara Nahrstedt

Adaptive Data Replication for Load Sharing in a Sensor Data Center ...........................................................................................20
Kyoung-Don Kang and Can Basaran

WCPS 2009 Session 2

Comparison of FieldBus Systems CAN, TTCAN, FlexRay and LIN in Passenger Vehicles ........................................................................................................................................................8
Steve C. Talbot and Shangping Ren

Automatic Mobile Vehicle for Adaptive Real-Time Communication Relay ......................................................................................32
Hai Hu, Furong Wang, Fan Zhang, Weijia Jia, and Ge Tang

Embedded Virtual Machines for Robust Wireless Control Systems ................................................................................................38
Rahul Mangharam and Miroslav Pajic

Spatio-Temporal Event Model for Cyber-Physical Systems ..............................................................................................................44
Ying Tan, Mehmet C. Vuran, and Steve Goddard

WCPS 2009 Session 3

A Dynamic Battery Model for Co-design in Cyber-Physical Systems ...............................................................................................51
Fumin Zhang, Zhenwu Shi, and Wayne Wolf

The Case for Timing-Centric Distributed Software—Invited Paper .................................................................................................57
Edward A. Lee, Slobodan Matic, Sanjit A. Seshia, and Jia Zou

Challenges Towards Elastic Power Management in Internet Data Centers ....................................................................................65
Jie Liu, Feng Zhao, Xue Liu, and Wenbo He

An Approach to Middleware Specialization for Cyber Physical Systems ........................................................................................73
Akshay Dabholkar and Aniruddha Gokhale

The Sixth International Workshop on Wireless Ad Hoc and Sensor Networking (WWASN 2009)

Session I: Position and Localization

Time-Synchronization Free Localization in Large Scale Underwater Acoustic Sensor Networks ..........................................................80
Wei Cheng, Andrew Thaeler, Xiuzhen Cheng, Fang Liu, Xicheng Lu, and Zexin Lu
Actor Positioning in Wireless Sensor and Actor Networks Using Matching Theory ............................................................... 88
  Ismail Guneydas, Kemal Akkaya, and Ali Bicak

Energy-Optimal Grid-Based Clustering in Wireless Microsensor Networks ............................................................ 96
  Yanyan Zhuang, Jianping Pan, and Guoxing Wu

**Session II: Routing**

A Straightforward Path Routing in Wireless Ad Hoc Sensor Networks ............................................................. 103
  Zhen Jiang, Junchao Ma, Wei Lou, and Jie Wu

A Geometric Routing Protocol in Disruption Tolerant Network ................................................................. 109
  Jingzhe Du, Evangelos Kranakis, and Amiya Nayak

Relay-Based Multicast Routing in Multirate-Aware MANETs ................................................................. 117
  Qingshan Wang, Yinlong Xu, Qi Wang, and Cheng Zhan

Multiobjective Routing for Simultaneously Optimizing System Lifetime and Source-to-Sink Delay in Wireless Sensor Networks .......................................................... 123
  Mahmood R. Minhas, Sathish Gopalakrishnan, and Victor C.M. Leung

**Session III: Latency**

Efficient Monitoring Mechanisms for Cooperative Storage in Mobile Ad-Hoc Networks: Detection Time and Accuracy Tradeoffs ................................................................. 130
  Mustapha Reda Senouci, Abdelouahid Derhab, and Nadjib Badache

Overhearing-Aided Data Caching in Wireless Ad Hoc Networks ................................................................. 137
  Weigang Wu, Jiannong Cao, and Xiaopeng Fan

Transmission Time Minimization Algorithms in Multihop Wireless Networks with Multiple Channels ........................................................................................................ 145
  Keqin Li

**Session IV: Broadcast and Security**

An Adapting Random Walk for Ad Hoc and Sensor Networks ........................................................................ 153
  Adnan Noor Mian, Roberto Baldoni, and Roberto Beraldi

Performance Tradeoffs Among Percolation-Based Broadcast Protocols in Wireless Sensor Networks ........................................................................................................ 158
  Vijay Raman and Indranil Gupta

Fast, Seamless Rekeying in Wireless Sensor Networks ...................................................................................... 166
  Subir Biswas, Md Mahbubul Haque, Saeed Rashwand, and Jelena Misic

**Poster Session**

How Mobility Models Affect the Design of Network Coding Schemes for Disruption Tolerant Networks ........................................................................................................ 172
  M. Chuah, P. Yang, and Y. Xi
Energy Efficient Search in Sensor Networks Using Simple Random Walks with Level Biased Steps
Kiran K. Rachuri and C. Siva Ram Murthy

Saeed Rashwand, Jelena Misic, Vojislav Misic, Subir Biswas, and Md Mahbubul Haque

Message Sending Method Using Patients’ Priority for Medical Sensor Network
Hiromitsu Tomozawa, Kiyoshi Oguchi, Hiroshi Shigeno, and Kenichi Okada

On the Eavesdrop Vulnerability of Random Network Coding over Wireless Networks
A. Roger Hammons Jr., Qingqing Zhang, and Brian Haberman

The International Workshop on Next Generation Network Architecture (NGNA 2009)

Session 1: Network Architecture, Principles, and Mechanism

Domain Specific Languages (DSLs) for Network Protocols (Position Paper)
Saleem Bhatti, Edwin Brady, Kevin Hammond, and James McKinna

HAWK: Real-World Implementation of High-Performance Heterogeneous Wireless Network for Internet Access
Jiannong Cao, Kun Xie, Weigang Wu, Chuda Liu, Gang Yao, Wei Feng, Yang Zou, Jigang Wen, Chisheng Zhang, Xin Xiao, Xuan Liu, and Ye Yan

NCPP: A Network Control Programmable Platform of Trustworthy Controllable Network
Peng Wang, Junzhou Luo, Wei Li, and Yansheng Qu

Achieving Energy Conservation, Coverage and Connectivity Requirements in Wireless Sensor Networks
Li Liu, Bin Hu, Huijiang Miao, Hao Li, Lian Li, and Qinglin Zhao

Session 2: Network Management and Network Security

An Attack-Resilient Sampling Mechanism for Integrated IP Flow Monitors
John McGlone, Alan Marshall, and Roger Woods

P2P Accelerated Mass Data Distribution over Booming Internet: Effectiveness and Bottlenecks
Zhijia Chen, Yang Zhao, Chuang Lin, Xin Miao, and Qingbo Wang

Automated Service Composition in Next-Generation Networks
Shashank Shanbhag, Xin Huang, Santosh Proddatoori, and Tilman Wolf

A Novel Hybrid Trust Management Framework for MANETs
Ruidong Li, Jie Li, Peng Liu, and Jien Kato
The Eighth International Workshop on Assurance in Distributed Systems and Networks (ADSN 2009)

Invited Talk
Autonomous Decentralized Root Certification Authority System ................................................................. 257
   Luis Carlos Coronado-García, Carlos Hernández-López, and Carlos Pérez-Leguízamo

Session 1: Dependable Computing
Autonomous Decentralized VoD System Architecture and Fault-Tolerant Technology to Assure Continuous Service .................................................................................. 263
   Xiaodong Lu and Kinji Mori
A Robust Detection of the Sybil Attack in Urban VANETs ........................................................................... 270
   Chen Chen, Xin Wang, Weili Han, and Binyu Zang

Session 2: Systems and Applications
TCP/IP Socket I/O Multiplexing Using a Hybrid Polling Event System ........................................................... 277
   Jianli Sun
Assurance Technology for Autonomous Decentralized Train Control System ........................................... 285
   Tsuyoshi Suzuki, Takashi Kawano, Masayuki Matsumoto, and Yoshihide Nagatsugu
Design and Performance Evaluation of a Service-Oriented Robotics Application ........................................... 292
   Yinong Chen, Ashutosh Sabnis, and Marcos Garcia-Acosta

Session 3: Architecture
A Proposal of Flexible Railway Signalling System Utilizing Autonomous Decentralized Technology ......................... 300
   Takashi Kunifuji, Kinji Mori, Tadao Miura, and Jun Nishiyama
Design of a Contract-Based Web Services QoS Management System ................................................................. 306
   Gwyduk Yeom, Wei-Tek Tsai, Xiaoying Bai, and Dugki Min
An Adaptive Transmission Power Control for Hierarchical Routing in Mobile Ad Hoc Networks ......................... 312
   Ryotaro Oda, Tomoyuki Ohta, and Yoshiaki Kakuda

Session 4: Clustering
An Index Clustering and Mapping Algorithm for Large Scale Astronomical Data Searching ................................... 318
   Xiaokang Liu, Zhihui Du, Yinong Chen, and Meie Dai
Rapid Provisioning of Cloud Infrastructure Leveraging Peer-to-Peer Networks ................................................. 324
   Zhijia Chen, Yang Zhao, Xin Miao, Ying Chen, and Qingbo Wang
An Adaptive Inter-cluster Data Forwarding Configuration Mechanism for Hierarchical Multicast Routing Protocol in Mobile Ad Hoc Networks ......................................................... 330
   Izumi Yamamoto, Tomoyuki Ohta, and Yoshiaki Kakuda
The Eleventh International Workshop on Multimedia Network Systems and Applications (MNSA 2009)

Session 1: P2P Systems

Recoverable Cut Based Coordination Protocol for Peer Processes .................................................................338
  Ailixier Aikebaier, Tomoya Enokido, and Makoto Takizawa

Trustworthy Cooperation among Peers ..................................................................................................................346
  Ailixier Aikebaier, Valbona Barolli, Tomoya Enokido, and Makoto Takizawa

Enriching Viewer Options in P2P Media Streaming Applications .................................................................354
  Jian Wang, Ruimin Shen, Heng Luo, Changyong Niu, and Liping Shen

Session 2: Distributed Systems and Applications

A Purpose Marking and Releasing Protocol for Information Flow Control ...................................................360
  Tomoya Enokido and Makoto Takizawa

Design and Implementation of Cafe: A Programming Language for Beginners .............................................368
  Minoru Uehara

Implementation and Performance Evaluation of a New Teleconference System by GigaEther Based Omni-directional Video Cameras .................................................................374
  Hirokazu Ookuzu and Yoshitaka Shibata

Session 3: Wireless Networks

A Fuzzy-Based Call Admission Control Scheme for Wireless Cellular Networks Considering Priority of On-going Connections ..................................................................................................................380
  Gjergji Mino, Leonard Barolli, Arjan Durresi, Fatos Xhafa, and Akio Koyama

Mobility over Heterogeneous Multi Domain Networks .....................................................................................388
  Ping Zhang, Arjan Durresi, Mimoza Durresi, and Leonard Barolli

A Combination of Different Wireless LANs to Realize Disaster Communication Network .................................................................395
  Goshi Sato, Daisuke Asahizawa, Kazuo Takahata, and Yoshitaka Shibata

Ad Hoc and Neighborhood Search Methods for Placement of Mesh Routers in Wireless Mesh Networks ..................................................................................................................400
  Fatos Xhafa, Christian Sánchez, and Leonard Barolli

The Second International Workshop on Specialized Ad Hoc Networks and Systems (SAHNS 2009)

Session 1: Specialized Solutions for MANETs

A Broadcasting Method considering Battery Lifetime and Distance between Nodes in MANET .......................406
  Daisuke Kasamatsu, Norihiko Shinomiya, and Tadashi Ohta
A MANET Based Emergency Communication and Information System for Catastrophic Natural Disasters .................................................................412
Yao-Nan Lien, Hung-Chin Jang, and Tzu-Chieh Tsai

Information Sharing in Mobile Ad-Hoc Networks: Evaluation of the MIDAS Data Space Prototype .................................................................418
Matija Puzar, Katrine Stemland Skjelsvik, Thomas Plagemann, and Ellen Munthe-Kaas

Keynote Address
Wireless Mesh Networks for Meteorological Monitoring ..................................................425
Torsten Braun

Session 2: Specialized Solutions for Ad Hoc Systems
Design and Evaluation of a Notification System for Alarm Management in Distributed Vision Networks .................................................................426
Martin Hoffmann, Michael Wittke, and Jörg Hähner

A Multihop IEEE 802.11 MAC Protocol for Wireless Ad Hoc Networks ..........................................432
Habib-ur Rehman and Lars Wolf

EDLA Tradeoffs for Wireless Sensor Network Target Tracking ........................................440
Richard Tynan, G.M.P. O’Hare, M.J. O’Grady, and Conor Muldoon

Session 3 (Short Papers): Security and Implementation Problems in Ad Hoc Systems
Addressing Collaborative Attacks and Defense in Ad Hoc Wireless Networks ..................447
Bharat Bhargava, Ruy de Oliveira, Yu Zhang, and Nwokedi C. Idika

Intrusion Detection in Wireless Mesh Networks Using a Hybrid Approach .........................451
Ed’ Wilson Tavares Ferreira, Ruy de Oliveira, Gilberto Arantes Carrijo, and Bharat Bhargava

On the Implementation Problems of Mobile Peer-to-Peer Networks ....................................455
Iurii Voitenko

Panel
Panel: Benefits and Pitfalls of Specialized Ad Hoc Networks and Systems (SAHNS) .........................459
Bharat Bhargava, Leszek Lilien, and Torsten Braun
Session 4 (Short Papers): Routing and Communications in Specialized Ad Hoc Systems

A Static Multi-hop Underwater Wireless Sensor Network Using RF Electromagnetic Communications .......................................................... 460
   Xianhui Che, Ian Wells, Paul Kear, Gordon Dickers, Xiaochun Gong, and Mark Rhodes
Improving Route Stability and Overhead on AODV Routing Protocol and Make it Usable for VANET .................................................. 464
   Omid Abedi, Reza Berangi, and M. Abdollahi Azgomi
Analyzing the Device Discovery Phase of Bluetooth Scatternet Formation Algorithms ................................................................. 468
   Ahmed Jeddah, Nejib Zaguia, and Guy-Vincent Jourdan
DNAX-BCU: An Un-clonable Cost-conscious SoPC Implementation for Bus Coupling Units of the European Installation Bus .................. 472
   Armando Astarloa, Jesús Lázaro, Unai Bidarte, Aitzol Zuloaga, and Jaime Jiménez

The Third International Workshop on Wireless Mesh and Ad Hoc Networks (WiMAN 2009)

Session 1: Routing and Channel Assignment

Joint Channel Assignment and Multi-path Routing for Multi-radio Wireless Mesh Networks ......................................................................... 476
   Luciano Bononi, Marco Di Felice, Antonella Molinaro, and Sara Pizzi
A Contention-Based Routing Protocol for Vehicular Ad Hoc Networks in City Environments ................................................................. 482
   Tonghong Li, Yuanzhen Li, and Jianxin Liao
NOMAD—A Mobile Ad Hoc and Distruption Tolerant Routing Protocol for Tactical Military Networks .................................................. 488
   Peter Holliday
DT-DYMO: Delay-Tolerant Dynamic MANET On-demand Routing ........................................................................................................... 493
   Christian Kretschmer, Stefan Rührup, and Christian Schindelhauer

Session 2: MAC, PHY, and Cross-Layer Optimizations

ML Performance Analysis of the Decode-and-Forward Protocol in Multi-hop Networks ........................................................................ 499
   MinChul Ju and Il-Min Kim
Performance Analysis of WiMedia UWB MAC ................................................................................................................................. 504
   Rukhsana Ruby and Jianping Pan
Approximate BER Expressions of Distributed Alamouti’s Code in Two-Hop Systems ........................................................................ 511
   Zhihang Yi and Il-Min Kim
Predictive Scheduling in Rate-Adaptive Multi-user Relay Channels with Reconfiguration Delays .................................................................................................................................................................................................517
Gokhan Sahin

Session 3: Mobility and Security

Software Architecture for Scalable Multi-hop Mobility Emulation with Indoor Wireless Grids ...........................................................................................................................................................................................................523
Gautam D. Bhanage and Yanyong Zhang

Dynamic TCP Proxies: Coping with Disadvantaged Hosts in MANETs ..............................................................................................................................................................................................530
Tu Ouyang, Shudong Jin, and Michael Rabinovich

On the Implications of Adaptive Transmission Power for Assisting MANET Security ...........................................................................................................................................................................................................537
André König, Matthias Hollick, and Ralf Steinmetz

Author Index
