Sustainable Biorefineries

Topical Conference at the 2008 AIChE Annual Meeting

Philadelphia, Pennsylvania
16 - 21 November 2008

ISBN: 978-1-61567-201-1
# TABLE OF CONTENTS

Bioenergy Conversion and Science – Challenges in Making Cellulosic Fuels .................................................. 1  
Brian H. Davison

An Investor Perspective on Biofuels Commercialization and the Developing Bioeconomy ......................... NA  
Douglas C. Cameron

Biofuels: Unlocking the Potential .................................................................................................................. 3  
Joseph Kocal, Jennifer Holmgren

Poet's Vision for the Future of Biorefining ...................................................................................................... 4  
Jason Kwiatkowski, David Carlson

Process Engineering of Renewable Resources for Ethanol Production ......................................................... 5  
Michael Ladisch

Defining Enzyme Inhibitors for Cellulose Hydrolysis .................................................................................. 6  
Eduardo Ximenes, Youngmi Kim, Nathan S. Mosier, Michael R. Ladisch

Production of Biofuels by Simultaneous Utilization of Mixed Sugars............................................................ 7  
Hideaki Yukawa

Enzymatic Hydrolysis of Afex Treated Corn Stover by Cellulolytic and Hemicellulolytic  
Synergistic Enzyme Cocktails .................................................................................................................... 8  
Shishir Chundawat, Dahai Gao, K. Chandraraj, John Poland, Justin Stege, Mary Lipton, Venkatesh  
Balan, Bruce E. Dale

Evaluation of Cellulose Reactivity with Purified Enzyme Components during Hydrolysis ....................... 9  
Jian Shi, Bin Yang, Edmund Larenas, Colin Mitchinson, Charles E. Wyman

Understanding and Harnessing the Microbial Fermentation of Glycerol. A New Path for  
the Production of Biochemicals ................................................................................................................... 10  
Ramon Gonzalez

Improve Hydrolysis Rate by Displaying Multi-Complex of Cellulolytic Enzymes and  
Produce Ethanol In One-Step Process ......................................................................................................... 11  
Seunghyun Ryu, M. Nazmul Karim

Sustainable Biofuel Production: a DOE Perspective ...................................................................................... 12  
Alison M. Goss Eng

Sustainable Strategies for Biofuel Production ................................................................................................. 19  
Tom L. Richard, Gustavo Camargo, Rob Anex, Ed Van Ouwerkerk

Biological Pretreatment of Lignocellulosic Biomass during Wet Storage and Its Impact on  
Downstream Biorefinery Processes ................................................................................................................ 20  
Megan Marshall, Tom L. Richard, Qin ChEn, Irene Durku, Lynn Petzke, Corey Radke, Allison Ray,  
Farzaneh Rezaei, Deepthi Tanjore

Biomass Feedstock Removal and Transport Optimization ............................................................................. 21  
Remegio B. Confesor Jr., Gerald Whittaker, Rolf Färe, Shawna Grosskopf

Providing a Sustained Biomass Supply: Implications of Feedstock Variation ............................................. 29  
Timothy Rials

Development of Feedstock Quality Specifications for Optimizing Biofuels Conversion  
Processes ...................................................................................................................................................... 30  
Judy K. Partin, Garold L. Gresham, Peter A. Pryfogle

Development of Enzyme Magnetic Nanoparticle Complexes for Cellulose Hydrolysis ................................................. 56
    Hee Joon Park, Patrick A. Johnson

Effect of Mixing on Enzymatic Hydrolysis of Cellulosic Biomass ................................................................. 57
    Yongming Zhu, Brandon Emme, Mads Torry-Smith

Sporl for Robust Enzymatic Hydrolysis of Woody Biomass ........................................................................ 58
    J.Y. Zhu

Novel Cell Surface Display on Lactic Acid Bacteria and Its Application to Lactic Acid
Production from Starchy Materials ...................................................................................................................... 59
    Kenji Okano, Qiao Zhang, Tsutomu Tanaka, Hideki Fukuda, Akihiko Kondo

Bioethanol Production from Barley Hull Using Saa (Soaking in Aqueous Ammonia) Pretreatment .......................... 60
    Tae Hyun Kim, Frank Taylor, Kevin B. Hicks

A Preliminary Investigation into the Relative Amount of Enzyme Deactivation from
Enzyme-Substrate Interactions and Non-Specific Deactivation ........................................................................... 61
    Zhuoliang Ye, R. Eric Berson

The Heterogeneous Catalyst System for the Conversion of Free Fatty Acid In Used Vegetable Oils for the Conventional Production of Biodiesel ................................................................. 62
    Young-Moo Park, Kwan-Young Lee, Joon-Yeob Lee, Jin-Suck Lee, Deog-Keun Kim

The Enzymatic Conversion of Glycerol to Glycerol Carbonate ............................................................................ 63
    Kerri A. Cushing, Archana Trivedi, Steven Peretti

Two-Phase Flow Behaviors In Microtube Reactors during Biodiesel Production ................................................ 64
    Katsuki Kusakabe, Guoqing Guan, Marion Teshima, Nozomi Sakurai

Stochastic Modeling of the Biodiesel Production Process .................................................................................. 65
    Sheraz Abbasi, Urmila Diwekar

Synthesis and Analysis of a Flexible Multi-Feedstock Biodiesel Production Process ............................................. 66
    Grace Nworie, René D. Elms, Mahmoud El-Halwagi

Kinetics of Uncatalyzed Ethyl Esterification of Oleic Acid ................................................................................... 67
    Tanawan Pinnarat, Phillip E. Savage

Viscosity Measuring Techniques for Biomass Solids Slurries Using Experimental and Computational Methods .................................................................................................................. 69
    Rajesh K. Dasari, R. Eric Berson

A Simplified Approach to Aspen-Plus© Mass and Energy Balances for Preliminary Process Analysis and Economic Feasibility of Pyrolysis of Switchgrass to Bio-Oil .................................................. 70
    Frank Taylor, Charles Mullen, Andrew McAloon, Akwasi A. Boateng

Process Optimization for Maximum Ethanol Production Using Different Ethanologens from Afx Treated Rice Straw .................................................................................................................. 71
    ChEng Zhong, Chandraraj Krishnan, Ming-Woei Lau, Venkatesh Balan, Bruce Dale, Ying-jin Yuan

Optimal Allocation of Carbon Resources In An Integrated Biorefinery ............................................................... 72
    Norman E. Sammons Jr., Wei Yuan, Susilpa Bommareddy, Mario R. Eden, Burak Aksoy, Harry T. Cullinan

Life Cycle Assessment of Bio-Oil Production by Pyrolysis of Wood ..................................................................... 73
    Heather S. Thomas, Mark Bricka

Cellulase Production from Treated Lignocellulosic Agricultural Residues Supplemented
with Paper Sludge .............................................................................................................................................. 74
    Li Kang, Wei Wang, Y.Y. Lee
Sustainable Fuel for the Brazilian Transportation Sector .................................................................75
Renan P. Oliveira, Navneet R. Singh, Fabio Ribeiro, W. Nicholas Delgass, Rakesh Agrawal

Biorefinery Product Allocation Using a Flexible Optimization Framework ........................................76
Norman E. Sammons Jr., Wei Yuan, Susilpa Bommareddy, Mario R. Eden, Burak Aksoy, Harry T. Cullinan

Biomass to Syngas Catalysis-Renewable Process for Fischer-Tropsch Liquid Fuels .............................77
Savvas Vasileiadis, Zoe Ziaka

Investigating Adsorbate Structures of Cyclic C4 Oxygenates from Biomass on Catalytic Metal Surfaces Using Spectroscopic Techniques ............................................................80
Clay M. Horiuchi, Stephen T. Marshall, Andrea S. Loh, J. Will Medlin

Aqueous-Phase Hydrogenation of Acetic Acid on Monometallic Catalysts. A Combined Experimental and Theoretical Study .........................................................................................81
Ye Xu, Hakan O. Olcay, George W. Huber

Millisecond Autothermal Steam Reforming of Cellulose by Reactive Flash Volatilization ....................82
Joshua L. Colby, Paul J. Dauenhauer, Lanny D. Schmidt

Characterization of Ni-Based Catalysts Used for Steam Reforming of Simulated Biomass Gasification Vapors ..............................................................................................................83
Matthew M. Yung, Whitney Jablonski, Kimberly A. Magrini-Bair

Techno-Economic Study of the Production of Mixed Alcohols from Lignocellulosic Biomass Using Direct Gasification ...........................................................................................................84
Abhijit Dutta

Partial Oxidation of Ethanol Over Supported Ni Catalysts: Effect of Support ........................................85
Sitthiphong Pengpanich, Vissanu Meeyoo, Thirasak Rirksomboon

Process Modeling Results of Various Leading Pretreatment Technologies for Corn Stover and Hybrid Poplar ......................................................................................................................89
Tim Eggeman, Richard Elander

Short-Term Lime Pretreatment: Woody Vs Herbaceous Biomass ..........................................................90
Rocio Sierra, Mark Holtzapple

Pretreatment of Switch Grass by Aqueous Ammonia ............................................................................91
Y. Y. Lee, V. Ramesh Pallapolu, Urvi D. Kothari

Effect of Upland Vs. Lowland Variety on Sugar Yields Following Ammonia Fiber Expansion (AFEX) Pretreatment and Enzymatic Hydrolysis of Shawnee and Alamo Switchgrass .................................................................92
Rebecca J. Garlock, Venkatesh Balan, Bruce E. Dale

Effect of Liquid Hot Water Pretreatment on Switchgrass Hydrolysis ..................................................93
Youngmi Kim, Nathan S. Mosier, Michael R. Ladisch

Sugar Yields from Switchgrass for the Coupled Operations of Dilute Acid and Sulfur Dioxide Pretreatment and Enzymatic Hydrolysis .................................................................................94
Jian Shi, Mirvat Ebrik, Bin Yang, Charles Wyman

High Yield Epoxidation of Fatty Acid Methyl Esters with Performic Acid Generated In-Situ ................95
Alejandrina Campanella, Miguel A. Baltanás

Product Distribution for Heterogeneous Catalytic Cracking of Acylglycerides on Commercial Catalysts ..............................................................................................................................96
Tracy J. Benson, Rafael Hernandez, William T French, Earl E Alley, William E. Holmes

Catalytic Oxidation of Glycerol to High-Value ChEmicals ..................................................................97
Wenbin Hu, Arvind Varma
Oxidation of Glycerol on Diamond Coated Electrodes
Peter Stehring, Susanne Lux, Thomas Hilber, Peter Letonja, Matthäus Siebenhofer

Conversion of Loblolly Pine Wood In Ionic Liquids
Carsten Sievers, Marielfel Valenzuela-Olarte, Teresita Marzialetti, Ildar Musin, Pradeep K. Agrawal, Christopher W. Jones

Enhancement of Enzymatic Digestibility of Microcrystalline Cellulose by Treatment in Subcritical Water
Sandeep Kumar, Rajesh Gupta, Y. Y. Lee, Ram B. Gupta

A Scraped Surface Bio-Reactor for Batch Enzymatic Saccharification of Pretreated Corn Stover Slurries
Rajesh K. Dasari, Kyle W. Dunaway, R. Eric Berson

Enzo-Rheology: Investigations of High-Solids Biomass Slurries for Bio-Refinery Applications
Jeffrey Knutsen, Matthew W. Liberatore

Size Reduction Fundamentals for Biomass Conversion
J.Y. Zhu

Conversion of Lignocellulosic Sugars to Triacylglycerols: A Renewable Diesel Feedstock
Guochang Zhang, Dr. William T. French, Rafael Hernandez, Earl G. Alley, Maria C. Paraschivescu

Demonstration of a Viable Hydrogenase Assay for Syngas Fermentation to Ethanol: Quantitative Accounting for Competing Reactions, Enzyme Inhibition, and Diffusion Limitations
Bradley E. Skidmore, Jason M. Bray, Douglas R. Tree, Randy S. Lewis

High Yield Biorefining Using Organosolv Processing
E. Kendall Pye, Alex Berlin, Stephan R. Winner, William B. Armiger

Mixtures Effects and Kinetic Characterization of Timber and Switchgrass Diluted Acid Hydrolysis
Jill R. Jensen, Juan Morinelly, Anwar Aglan, Adam Mix, David R. Shonnard

The Effects of Impregnation Techniques on Pretreatment Performance for High Dry Matter Dilute Sulfuric Acid Processes
Noah D. Weiss, Nicholas J. Nagle, Melvin P Tucker, Erik Kuhn, Richard T Elander

Integrated High Throughput Pretreatment and Enzymatic Hydrolysis In 96 Well Plates
Michael Studer, Jaclyn D. DeMartini, Heather L. McKenzie, Charles E. Wyman

Efficient Sugar Release from Common Reed Pretreated by Cellulose-Solvent-Based Lignocellulose Fractionation at Lower Cellulase Loadings
Noppadon Sathitsuksanoh, Zhiguang Zha, Y-H. Percival Zhang

Understanding Lignin Fractions of Biomass during Dilute Acid Pretreatment Using a Flow through Reactor
Yun Ji, Melvin Tucker, Rui Katahira, Nick Nagle, David Johnson, William Mitchener, Todd Vinzant

Novel Reactor Design for the Production of Biodiesel from Free Fatty Acids
Richard A. Cairncross, Cory Melick, Minhazuddin Mohammed

Optimization of the Synthesis of Biodiesel Via Ultrasound-Enhanced Homogeneous and Solid Acid Catalyzed Processes Using a Novel Reactor
Yusuf G. Adewuyi, Naresh N. Mahamunni

Renewable Petroleum™ Technology: Production of Fit for Purpose Renewable Fuels
Scott A. Frykman
Production of Green Diesel by Hydrocracking of Canola Oil on Ni-Mo/γ-Al2O3 and Pt-Zeolite Based Catalysts ................................................................. 129
Rogelio Sotelo-Boyás, Liu Yanyong, Tomoaki Minowa

Simultaneous Transesterification and Esterification to Biodiesel Using Zinc-Based Catalyst ………………… 138
Shuli Yan, Manhoe Kim, John Wilson, Steven O. Salley, K. Y. Simon Ng

Identification of Metals Found In Biofuel Lipids Using Inductively Coupled Plasma/mass Spectrometry …………………………………………………………… 139
Tracy J. Benson, Dr. Rafael Hernandez, Todd French, William E. Holmes, Ashli Brown

Sustainable Biomass Based Biorefinery ........................................................................................................ 140
Manoj Kumar

Enzymatic Hydrolysis and Ethanol Production from Afex Pretreated Bagasse at High Solid Loading Using Recombinant Ethanologens ........................................ 141
Chandraraj Krishnan, Venkatesh Balan, Bruce Dale

Biological Conversion of Municipal Solid Waste to Ethanol ………………………………………………… 142
Jian Shi, Bin Yang, Charles E. Wyman

Design of In Situ Product Recovery Devices Using Polymeric Resins .......................................................... 143
David R. Nielsen, Kristala L. Jones Prather

Quantifying Uncertainties In Biorefinery Options – Using Expert Opinions ........................................ 144
Farminder S. Anand, Matthew Realff, Kristiina Iisa

Small-Scale Biorefinery Process for Sustainable Local Biomass Utilization ............................................. 145
Kazuhiro Mochizuki, Akiyoshi Sakoda, Mistuhiro Takayama, Yasuo Igarashi

Hydrolysis of Microcrystalline Cellulose In Subcritical and Supercritical Water In a Continuous Flow Reactor ........................................................................ 146
Sandep Kumar, Ayhan Demirbas, Ram B. Gupta

Hydrothermal Pretreatment of Rubber Wood for Ethanol Production …………………………………………… 147
Yukihiko Matsumura, Takaya Yoshida, Minoru Nakashima, Phacharakamol Petchpradab, Tawatchai Charinpanitkul

Hydrothermal Biomass ChEministry: Protein-Carbohydrate Interactions ................................................ 148
Andrew A. Peterson, Jefferson W. Tester

A Kinetic Model for Supercritical Water Gasification of Biomass ......................................................... 149
Fernando L. P. Resende, Phillip E. Savage

Flash Carbonization of Sewage Sludge: Assessment of Sewage Sludge Charcoal Land Application …………… 150
Takaya Yoshida, Michael J. Antal Jr.

Effects of Volatile-Char Interaction on the Char Reactivity In the Biomass Gasification …………………… 151
Tomoko Wada, Chihiro Fushimi, Atsushi Tsutsuami

Tar Reforming Catalyst Development and Scale up for Use In a Biomass Gasification Pilot Plant ………… 152
Kimberley Magrim-Bair, Whitney Jablonski

Naphthalene Steam Reforming Over Ni/Ce0.75Zr0.25-XMnxO2 (x = 0, 0.10, 0.20 and 0.25) Mixed Oxide Catalysts .................................................................................. 153
Vissanu Meeyoo, Asawin Bampenrat, Boonyarach Kitiyanan, Pramoch Rangpanvigit, Thirasak Rirksonboom

Steam Gasification Reactivity of Char from Rapid Pyrolysis of Bio-Oil/char Slurry …………………… 157
Masakazu Sakaguchi, Naoko Ellis, A. Paul Watkinson

Hydrogenations of Biomass-Related Substrates In Supercritical Media ……………………………………… 158
Jackson W. Ford, Raghu Nath V. Chaudhari, Bala Subramaniam
Fast Pyrolysis of Guayule Residues

Charles A. Mullen, Akwasi A. Boateng, Neil Goldberg, Kevin B. Hicks, Colleen McMahan, Maureen Whalen

Production of Stable and up-Gradable Pyrolysis Liquid Transportation Fuel Intermediates from Lignin and Related Biomass

Akwasi A. Boateng, Charles A Mullen, Neil Goldberg, Kevin B. Hicks
