</table>
Using an Artificial Neural Network to Predict Necrotizing Enterocolitis in Premature Infants................................................................................................................398
Martina Mueller, Sarah N. Taylor, Carol L. Wagner, Jonas S. Almeida

A Fast Mean-field Method for Large-scale High-dimensional data and its Application in Colonic Polyp Detection at CT Colonography ..................................................................................402
Shijun Wang, Ronald M. Summers, Changshui Zhang

Fast Parzen Window Density Estimator..................................................................................................................410
Xiaoxia Wang, Peter Tino, Mark A. Fardal, Somak Raychaudhury, Arif Babul

Cognitive Simulation of Academic Science......................................................................................................418
Ron Sun, Isaac Naveh

Functional Link Artificial Neural Network-based Disease Gene Prediction...............................................................425
Jiabao Sun, Jagdish C. Patra, Yongjin Li

Chaotic Complex-Valued Bidirectional Associative Memory....................................................................................433
Yuichi Yano, Yuko Osana

Similarity-based Image Retrieval considering Artifacts by Self-Organizing Map with Refractoriness..................................................................................................................439
Daichi Hanagaki, Yuko Osana

Identification of Artifacts in Scenery Images using Color and Line Information by RBF Network...............................................................445
Ryo Kosaka, Yuko Osana

Stability Analysis Of Takagi-Sugeno Fuzzy Hopfield Neural Networks With Discrete And Distributed Time Varying Delays..................................................................................................451
M. Syed Ali, P. Balasubramaniam

Local Properties of RBF-SVM During Training for Incremental Learning................................................................457
Wael Emara, Mehmed Kantardzic

An Intelligent Multi-feature Statistical Approach for Discrimination of Driving Conditions of Hybrid Electric Vehicle........................................................................................................465
Xi Huang, Ying Tan, Xingui He

Cortical Mechanisms of Memory Formation and Readout......................................................................................473
Walter J. Freeman

Supervised Self-taught Learning: Actively Transferring Knowledge from Unlabeled Data ..................................481
Kaizhu Huang, Zenglin Xu, Irwin King, Michael R. Lyu, Colin Campbell

New CNN Based Algorithms for the Full Penetration Hole Extraction in Laser Welding Processes: Experimental Results.........................................................................................................487
Leonardo Nicolosi, Ronald Tetzlaff, Felix Abt, Andreas Blug, Daniel Carl, Heinrich Höfler

Climatic Variation of the Structure of Maximum Daily Temperatures in Spain: A Combined Statistical and Computational Intelligence Approach.................................................................495
Julio J. Valdes, Antonio Pou

SVM+ Regression and Multi-Task Learning ..............................................................................................................503
Feng Cai, Vladimir Cherkassky

Concentration Based Feature Construction Approach for Spam Detection..........................................................510
Ying Tan, Chao Deng, Guangchen Ruan

Neural Sliding Mode Control with Finite Time Convergence ................................................................................516
Wen Yu, Xiaou Li

Scalable Statistical Learning: A Modular Bayesian/Markov Network Approach..........................................................523
Antonino Freno, Edmondo Trentin, Marco Gori
Aida A. Ferreira, Teresa B. Ludermir

Peyman Adibi, Reza Safabakhsh

David Norton, Dan Ventura

John Kassab, Santosh Nagaraj

Hasan Al-Marzouqi

Xiaohong Ma, Yan Qin, Hualou Liang

Ming-Guang Shi, Min Wu, De-Shuang Huang, Xue-Ling Li

Shesharao M. Wanjerkhede, Raju S. Bapi

Min Han, Jianchao Fan, Bing Han

Luis Alberto Paz Suárez, Petia Georgieva, Sebastião Feyo De Azevedo

Susumu Nagatoishi, Osamu Araki

X. Xu, Y. C. Liang

Nistor Grozavu, Youn`es Bennani, Mustapha Lebbah

Stefano Melacci, Marco Maggini, Lorenzo Sarti

Si-Yao Fu, Guo-Sheng Yang, Zeng-Guang Hou

Min Han, Yanan Wang

Yu-Chiang Frank Wang, David Casasent

Juan Jose Cordova, Wen Yu

Jindong Liu, David Perez-Gonzalez, Adrian Rees, Harry Erwin, Stefan Wermter
Visualization Tool for a Self-Splitting Modular Neural Network

V. Scott Gordon, Michael Daniels, James Boheman II, Marcus Watstein, Derek Goering, Brandon Urban

A Binary Classification and Online Vision

Hassab Elgawi Osman

Compression and Stylometry for Author Identification

D. Pavelec, L. S. Oliveira, E. Justino, F. D. Nobre Neto, L. V. Batista

Partitioning Strategies for Modular Neural Networks

Timothy Bender, V. Scott Gordon, Michael Daniels

Self-Enhancement Learning: Self-Supervised and Target-Creating Learning

Ryotaro Kamimura

Selective Enhancement Learning in Competitive Learning

Ryotaro Kamimura

Inference of Genetic Networks using Linear Programming Machines: Application of A Priori Knowledge

S. Kimura, Y. Shiraishi, M. Hatakeyama

Realizing General MLP Networks with Minimal FPGA Resources

Carl Latino, Marco A. Moreno-Armendáriz, Martin Hagan

Adaptive Dynamic Programming for Discrete-time Systems with Infinite Horizon and ε-Error Bound in the Performance Cost

Derong Liu, Ning Jin

Using the GTSOM Network for Mobile Robot Navigation with Reinforcement Learning

Mauricio Menegaz, Paulo M. Engel

Orientational Features with the SNT-Grid

Alejandro Foullon-Perez, Simon M. Lucas

The Multi-Phase Method in Fast Learning Algorithms

Chi-Chung Cheung, Sin-Chun Ng

Improving Rule Extraction from Neural Networks by Modifying Hidden Layer Representations

Thuan Q. Huynh, James A. Reggia

Sequential Hierarchical Recruitment Learning in a Network of Spiking Neurons

Derek James, Anthony S. Maida

Improving the Performance of ANN Training with an Unsupervised Filtering Method

Sekou Remy, Chung Hyuk Park, Ayanna M. Howard

Using Parallel GPU Architecture for Simulation of Planar I/F Networks

Jan-Phillip Tiesel, Anthony S. Maida

A Motor Learning Neural Model based on Bayesian Network and Reinforcement Learning

Haruo Hosoya

Comparison of an Efficient Direct Storage BAM Model with Traditional Neural Bidirectional Memories

A. Aziz Bhatti

Flood Forecasting Technology with Radar-Derived Rainfall Data Using Genetic Programming

Naoki Watanabe, Kazuhiko Fukami, Hitoki Imamura, Katsuki Sonoda, Soichiro Yamane

Matrix-based Kernel Principal Component Analysis for Large-scale Data Set

Weiya Shi, Yue-Fei Guo, Xiangyang Xue
Estimation of Classification Complexity ................................................................. 1039
    David A. Elizondo, Ralph Birkenhead, Matias Gamez, Noelia Garcia, Esteban Alfaro

Learning the Neuron Functions within a Neural Network via Genetic Programming:
Applications to Geophysics and Hydrogeology .................................................... 1046
    Alan J. Barton, Julio J. Valdes, Robert Orchard

Help-Training semi-supervised LS-SVM ................................................................. 1054
    Mathias M. Adankon, Mohamed Cheriet

Morphological Auto-Associative Memories applied to True-Color Image Patterns ....... 1062
    Roberto A. Vazquez, Humberto Sossa

Switching and Leakage Power Modeling for Multiple-supply Dynamic Gate with Delay
Constraining Based on Wavelet Neural Networks ............................................... 1070

Relational Reinforcement Learning applied to Shared Attention ............................ 1074
    Renato R. Da Silva, Claudio A. Policastro, Roseli A. F. Romero

Decentralized Control of Large Scale Interconnected Systems Using Adaptive Neural
Network-based Dynamic Surface Control ............................................................. 1081
    Shahab Mehraeen, S. Jagannathan, Mariesa L. Crow

Discrete-Time Decentralized Neural Block Controller for a Five DOF Robot Manipulator .......................................................... 1088
    R. Garcia-Hernandez, E. N. Sanchez, M. Saad, E. Bayro-Corrochano

Optimization based on Dialectics ........................................................................... 1095
    Wellington P. Dos Santos, Francisco M. De Assis

Mobile Robot Vision-Based Navigation Using Self-Organizing and Incremental Neural
Networks .................................................................................................................... 1103
    Sirinart Tangruamsub, Manabu Tsuboyama, Aram Kawewong, Osamu Hasegawa

Automated Classification of Dopaminergic Neurons in the Rodent Brain .................. 1111
    Azadeh Alavi, Brenton Cavanagh, Gervase Tuxworth, Adrian Meedeniya, Alan Mackay-Sim, Michael
    Blumenstein

Model Reduction of Neural Network Trees Based on Dimensionality Reduction ......... 1119
    Hirotomo Hayashi, Qiangfu Zhao

Sparse Support Vector Regressors Based on Forward Basis Selection .......................... 1125
    Shigenori Muraoka, Shigeo Abe

Spatial Pyramids and Two-layer Stacking SVM Classifiers for Image Categorization: A
Comparative Study .................................................................................................... 1130
    Azizi Abdullah, Remco C. Veltkamp, Marco A. Wiering

Bayesian PCA for Reconstruction of Historical Sea Surface Temperatures ............... 1138
    Alexander Ilin, Alexey Kaplan

Using Continuous Action Spaces to Solve Discrete Problems ................................... 1144
    Hado Van Hasselt, Marco A. Wiering

An Optimization Approach to Understanding Structure-function Relationships in the
Visual Cortex ............................................................................................................ 1152
    A. Ravishankar Rao, Guillermo A. Cecchi

Fast and Accurate Retinal Vasculature Tracing and Kernel-Isomap-based Feature
Selection ................................................................................................................... 1160
    Donghyeop Han, Heeyoul Choi, Choongseog Park, Yoonsuck Choe

Affective Computation on EEG Correlates of Emotion from Musical and Vocal Stimuli .......................................................... 1168
    Reza Khosrowabadi, Abdul Wahab, Kai Keng Ang, Mohammad. H Baniasad

Yuan Yuan, Chenhui Yang, Jennie Si

Data Classification with a Generalized Gaussian Components based Density Estimation Algorithm
Chih-Hung Hsieh, Darby Tien-Hao Chang, Yen-Jen Oyang

A Binary Self-Organizing Map and its FPGA Implementation
Kofi Appiah, Andrew Hunter, Hongying Meng, Shigang Yue, Mervyn Hobden, Nigel Priestley, Peter Hobden, Cy Pettit

An MLP-Based Face Authentication Technique Robust to Orientation
Goutam Chakraborty, Basabi Chakraborty, Jagdish C. Patra, Chotipat Pornavalai

Design of Experiments for MR Damper Modelling
Jorge Lozoya-Santos, Ruben Morales-Menendez, Ricardo Ramirez-Mendoza

Improving Management of Anemia in End Stage Renal Disease using Reinforcement Learning
Adam E. Gaweda

Application of Bhattacharyya Kernel-based Centroid Neural Network to the Classification of Audio Signals
Jae-Young Kim, Dong-Chul Park

Overhead Conductor Thermal Dynamics Identification by using Echo State Networks
Yi Yang, Ronald G. Harley, Deepak Divan, Thomas G. Habetler

Fuzzy ARTMAP Rule Extraction in Computational Chemistry
Razvan Andonie, Levente Fabry-Asztalos, Bogdan Crivat, Sarah Abdul-Wahid, Badi Abdul-Wahid

Using Diversity to Handle Concept Drift in On-line Learning
Fernanda L. Minku, Xin Yao

Dimensionality Reduction by Self Organizing Maps that Preserve Distances in Output Space
Pascual Campoy

Unsupervised Nonparametric Density Estimation: A Neural Network Approach
Edmondo Trentin, Antonino Freno

Centroid Neural Network for Face Recognition
Vu Thi Lan Huong, Dong-Chul Park, Yunsik Lee
Class Specific Redundancies in Natural Images: A Theory of Extrastriate Visual Processing ........................................2997
Mohsen Malmir, Saeed Shiry

A Cellular Neural Network as a Principal Component Analyzer ..........................................................3004
Chao-Hui Haung, Wee-Kheng Leow, Daniel Racoceanu

Singing Voice Recognition based on Matching of Spectrogram Pattern ....................................................3012
Peerapol Khunarsal, Chidchanok Lursinsap, Thanapant Raicharoen

Sensor Integration in KIV Brain Model For Decision Making .................................................................3017
Roman Ilin, Robert Kozma

An Unsupervised Learning Method for Representing Simple Sentences ..................................................3024
Derek Monner, James A. Reggia

A Receptive Field Based Approach For Face Detection ..............................................................................3032
Bruno J. T. Fernandes, George D. C. Cavalcanti, Tsang I. Ren

A Constrained Backpropagation Approach to Solving Partial Differential Equations in Non-stationary Environments ..........................................................3040
Gianluca Di Muro, Silvia Ferrari

Image Retrieval Based on Intrinsic Spectral Histogram Representation ..................................................3045
Yuhua Zhu, Xiuwen Liu, Washington Mio

Optimal Dimension Reduction for Image Retrieval with Correlation Metrics .........................................3051
Yuhua Zhu, Washington Mio, Xiuwen Liu

Tree Structures with Attentive Objects for Image Classification Using a Neural Network .....................3057
Hong Fu, Shuya Zhang, Zheru Chi, David Dagan Feng, Xiaoyu Zhao

A Kernel-based Feature Weighting for Text Classification ........................................................................3062
Peter Wittek, Chew Lim Tan

A Modified Neural Network Model for Lobula Giant Movement Detector with Additional Depth Movement Feature ........................................................................................................3069
Hongying Meng, Shigang Yue, Andrew Hunter, Kofi Appiah, Mervyn Hobden, Nigel Priestley, Peter Hobden, Cy Pettit

Reducing the Run-Time Complexity of Support Vector Data Descriptions ..............................................3075
Yi-Hung Liu, Yan-Chen Liu

Facial Expression Recognition based on Liquid State Machines built of Alternative Neuron Models .................................................................................................................................3083
Beata J. Grzyb, Eris Chinellato, Grzegorz M. Wojcik, Wieslaw A. Kaminski

Effects of Widely Separated Clusters on Lotto-Type Competitive Learning with Particle Swarm Features .........................................................................................................................................3090
Andrew Luk, Sandra Lien

Hermite Neural Network-based Intelligent Sensors for Harsh Environments .............................................3098
Jagdish C. Patra, Cedric Bornand, Goutam Chakraborty

A Compact Network with Improved Generalization Using Wavelet Basis Function Network for Static Non-linear Functions ..........................................................3104
Mullur Pushpalatha, Niranjana Nalini

Assessment of Musical Training Induced Neuroplasticity by Auditory Event Related Potentials and Neural Networks .......................................................................................................3109
Sheng-Fu Liang, Chi-Sheng Liu, Wan-Lin Chang, Yu-Hsiang Tsao, Li-Wei Ko, Chin-Teng Lin

Coarse Image Region Segmentation Using Regionand Boundary-based Coupled MRF Models and Their PWM VLSI Implementation .................................................................3114
Yusuke Kawashima, Daisuke Atuti, Kazuki Nakada, Masato Okada, Takashi Morie
Combined Multi-Layer Perceptron Neural Network and Sliding Mode Technique for Parallel Robots Control: An Adaptive Approach .......................................................... 3121
B. Achili, B. Daachi, A. Ali-Cherif, Y. Amirat

Video Steganalysis using Motion Estimation .......................................................................................................................... 3129
K. Kancherla, S. Mukkamala

Performance of SLTFL Model from the PSO, Time Series and Regression Perspectives .............................................................. 3135
S. Hassnain, A. Asar, F. Mahmood

Comparison of Feedforward and Feedback Neural Network Architectures for Short Term Wind Speed Prediction ................................................................................................................. 3141
Richard L. Welch, Stephen M. Ruffing, Ganesh K. Venayagamoorthy

Efficient Neural Network Pruning during Neuro-Evolution .............................................................................................................. 3147
Nils T. Siebel, Jonas Botel, Gerald Sommer

Predictive Learning with Sparse Heterogeneous Data .......................................................................................................................... 3153
Vladimir Cherkassky, Feng Cai, Lichen Liang

A Robust Nonlinear Projection Method Using the Neural Gas Network .......................................................................................... 3163
Pablo A. Estevez, Andres M. Chong

Searching for microRNA Prostate Cancer Target Genes .......................................................................................................................... 3171
Francesco Masulli, Alessandro Parini, Stefano Rovetta, Giuseppe Russo

Neural Network Model for Integration and Visualization of Introgressed Genome and Metabolite Data .......................................................... 3177
Georgina Stegmayer, Diego Milone, Laura Kamenzetzk, Mariana Lopez, Fernando Carrari

Classification of Startle Eyeblink Metrics using Neural Networks .............................................................................................................. 3184
Christopher T. Lovelace, Reza Derakhshani, Sriram Pavan Kumar Tankasala, Diane L. Filion

Neural Network Disturbance Observer Based Controller of an Electrically Driven Stewart Platform Using Backstepping for Active Vibration Isolation ........................................................................................................ 3191
Jia Ma, Tao Yang, Zeng-Guang Hou, Min Tan

Clustering Online Game Communities Through SOM .......................................................................................................................... 3197
Lia C. Rodrigues, Cloadoaldo A. M. Lima, Pollyana N. Mustaro

Efficient Simulation of Large-Scale Spiking Neural Networks Using CUDA Graphics Processors .......................................................................................................................... 3201
Jayram Moorkanikara Nageswaran, Nikhil Dutt, Jeffrey L. Krichmar, Alex Nicolau, Alex Veidenbaum

Nonlinear Predictive Control for Oxygen Supply of a Fuel Cell System .......................................................................................... 3209
Qihong Chen, Shuhai Quan, Changjun Xie

A Neural Network Pruning Approach based on Compressive Sampling .......................................................................................... 3213
Jie Yang, Abdesselam Bouzerdoum, Son Lam Phung

Input-variable Specification for Neural Networks - An Analysis of Forecasting Low and High Time Series Frequency .......................................................................................................................... 3221
Sven F. Crone, Nikolaos Kourentzes

Level-Set Segmentation with Contour based Object Representation .......................................................................................................................... 3229
Daniel Weiler, Florian Roehler, Julian Eggert

Vision Based Injector Spray Pattern Testing System .......................................................................................................................... 3237
Priyanka Desai, Sreeba Sasi, Manoj Kumar Prabhakaran

Quantum-Inspired Feature and Parameter Optimisation of Evolving Spiking Neural Networks with a Case Study from Ecological Modeling .......................................................................................................................... 3243
Stefan Schliebs, Michael Defoin Plate, Sue Worner, Nikola Kasabov
From an Artificial Neural Network to a Stock Market Day-Trading System: A Case Study on the BM&F BOVESPA
Leonardo C. Martinez, Diego N. Da Hora, Joao R. De M. Palotti, Wagner Meira Jr., Gisele L. Pappa

Protection Ellipsoids for Stability Analysis of Feedforward Neural-Net Controllers
Abraham K. Ishihara, Shahar Ben-Menahem, Nhan Nguyen

Applying Neural Fields to the Stability Problem of an Inverted Pendulum as a Simple Biped Walking Model
Juan Figueredo, Jonatan Gomez

An Intelligent Hybrid Controller for Speed Control and Stabilization of Synchronous Generator
Sukumar Kamalasadan, Gerald D. Swann

Adaptive Fuzzy Priors for Bayesian Inference
Osonde Osoba, Sanya Mitaim, Bart Kosko

Improved Propensity Matching for Heart Failure Using Neural Gas and Self-Organizing Maps
Leif E. Peterson, Sameer Ather, Vijay Divakaran, Anita Deswal, Biykem Bozkurt, Douglas L. Mann

Neural Networks versus Linear and Sequential Programming for Gas Lift Optimization in a Two Oil Wells System
R. Salazar-Mendoza, G. Jimenez De La C, Jose A. Ruiz-Hernandez

Online Identification of Generator Dynamics in a Multimachine Power System with a Spiking Neural Network
Cameron Johnson, Ganesh K. Venayagamoorthy, Pinaki Mitra

Neural Signal-Detection Noise Benefits Based on Error Probability
Ashok Patel, Bart Kosko

Automatic Recognition of Epileptic Seizure in EEG Via Support Vector Machine and Dimension Fractal
Mauro Schneider, Pollyana N. Mustaro, Clodoaldo A. M. Lima

Learning Nonlinear Functions with MLPs and SRNs
Ryan Cleaver, Ganesh Kumar Venayagamoorthy

Context Dependent Pattern Recognition - A Framework for Hybrid Architectures Bridging Chaotic Neural Networks Based on Recursive Processing Elements and Symbolic Information
Emilio Del-Moral-Hernandez, Humberto Sandmann, Gleison Araújo

Modeling High-order Human Intelligence With Intelligence of Swarm
Toshihiko Matsuka, Hidehito Honda, Sachiko Kiyokawa, Arieta Chouchourelou

Very Short-Term Electricity Load Demand Forecasting Using Support Vector Regression
Anthony Setiawan, Irena Koprinska, Vassilios G. Agelidis

Goal-Directed Feature Learning
Cornelius Weber, Jochen Triesch

Evolution of Recollection and Prediction in Neural Networks
Ji Ryang Chung, Jaerock Kwon, Yoonsuck Choe

Fast Structural Learning of Distance-Based Neural Networks
Naoki Tominga, Qiangfu Zhao

A Universal Abstract-Time Platform for Real-Time Neural Networks
Non-negative Matrix Factorization Vs. FastICA on Mismatch Negativity of Children .................................................. 3386
F. Cong, Z. Zhang, I. Kalyakin, T. Huttunen-Scott, H. Lyytinen, T. Ristaniemi

Synchronization of Coupled Pulse-Type Hardware Neuron Models for CPG Model .................................................. 3391
Ken Saito, Katsutoshi Saeki, Yoshifumi Sekine

Partial Synchronization of Neural Activity and Information Processing ................................................................. 3399
R. Borisuyk, D. Chik, Y. Kazanovich

Online Levenberg-Marquardt Algorithm for Neural Network Based Estimation and Control of Power Systems .......................................................... 3407
Jawad Arif, Nilanjan Ray Chaudhuri, Swakshar Roy, Balarko Chaudhuri

Unsupervised Cluster Analysis and Mortality Risk in the Digitalis Investigation Group (DIG) Trial of Heart Failure .......................................................... 3415
Sameer Ather, Leif E. Peterson, Vijay Divakaran, Anita Deswal, Biykem Bozkurt, Douglas L. Mann

A Recurrent Neural Model for Parameter Estimation of Mixed Emotions from Facial Expressions of the Subjects ................................................................. 3421
M. Ghosh, A. Chakraborty, A. Acharya, A. Komar, B. K. Panigrahi

Using Non-Oscillatory Dynamics to Disambiguate Simultaneous Patterns .............................................................................. 3429
Tsvi Achler

Neural Network Based Secure Media Access Control Protocol for Wireless Sensor Networks .......................................................... 3437
Raghavendra V. Kulkarni, Ganesh K. Venayagamoorthy

Model This! Seven Empirical Phenomena Missing in the Models of Cortical Oscillatory Dynamics .......................................................... 3445
Danko Nikolic

Patient Stratification with Competing Risks by Multivariate Fisher Distance .............................................................................. 3453
Davide Bacciu, Ian H. Jarman, Terence A. Etchells, Paulo J. G. Lisboa

A New Nonlinear Filter Design for the Detection of Phase Transitions in ECoG Data .......................................................... 3461
Rustu Murat Demirer, Robert Kozma, Mert Caglar, Yasar Polatoglu

Temporal Coding: Competition for Coherence and New Perspectives on Assembly Formation .......................................................... 3467
Thomas Burwick

Effects of Learning Rate on the Performance of the Population Based Incremental Learning Algorithm .......................................................... 3477
Komla A. Folly, Ganesh K. Venayagamoorthy

A Neural Networks Algorithm for Inferring Drug Gene Regulatory Networks from Microarray Time-Series with Missing Transcription Factors Information .......................................................... 3485
Alexandru George Floares

A PSO with Quantum Infusion Algorithm for Training Simultaneous Recurrent Neural Networks .......................................................... 3492
Bipul Luitel, Ganesh Kumar Venayagamoorthy

Seizure Prediction through Dynamic Synchronization Measures of Neural Populations .......................................................... 3500
Mark H. Myers, Robert Kozma

View-Invariant Object Category Learning, Attention, Recognition, Search, and Scene Understanding .......................................................... 3507
Stephen Grossberg

Brain fMRI Processing and Classification Based on Combination of PCA and SVM .......................................................... 3510
Song-Yun Xie, Rong Guo, Ning-Fei Li, Ge Wang, Hai-Tao Zhao
