</tbody>
</table>
A Decision Making Model of Chinese Coal-Electricity Market Based on Game Theory
Zhu-fang Wang, Jiu-feng Xiong

Multi-agent Decision Making Based on Evidence Reasoning
Bo Fan, Jiexin Pu, Gang Liu

SESSION 2: CONSTRAINTS, SATISFIABILITY, AND SEARCH

Construction and Congestion Control in Computer Components Based on CTT and EESA
Zhiming Qu

Application and Research of Smalltalk Harnessing Based on Game-Theoretic Symmetries
Zhiming Qu, Wenyao Li

Application of Compact Algorithms and Permutable Theory in Evaluating Computer Data Transmission
Zhiming Qu, Rongmin Tang

A Clone Node Protocol for Reducing Maintenance Cost of Structured P2P System
Yu Zhang, Yuanda Cao, Baodong Cheng

A Novel View Multi-view Synthesis Approach for Free Viewpoint Video
Yuhua Zhu

Optimal Superpeer Selection Based on Load Balance for P2P File-sharing System
Lu Gao, Peng Min

An Approach to Optimal Web Service Composition Based on QoS and User Preferences
Zhiyong Chen, Haiyang Wang, Peng Pan

The Application of Game Theory in Enterprise’ Transaction of Purchasing
Jiang Hua

SESSION 3: KNOWLEDGE REPRESENTATION, REASONING, AND LOGIC

Spatial Clustering Algorithms and Quality Assessment
Jingke Xi

One Knowledge Discovery Approach for Product Conceptual Design
Zhen Peng, Bingru Yang, Wu Qu

Research on KDD Process Model and an Improved Algorithm
Zhen Peng, Bingru Yang, Wu Qu

A Novel Algorithm for Association Rule Mining without Candidate
Huanyin Zhou, Jinsheng Liu

Laws on Support Counts of Apriori Algorithm Candidates
Huanyin Zhou, Jinsheng Liu

Using Multimodal Analysis for Story Segmentation of News Video
Hua-Yong Liu, Tingting He

Integrating Multiple Feature Fusion for Semantic Event Detection in Soccer Video
Hua-Yong Liu, Tingting He

Application of Recursive Predict Error Neural Networks in Mechanical Property Forecasting
Wu Wang, Yuan-min Zhang
A Proposal for Stable Semantic Metrics Based on Evolving Ontologies .................................................. 134
Yinglong Ma, Xinyu Ma, Shaohua Liu, Beihong Jin

The Pressure Control on Non-negative Pressure Water Supply Based on the Fuzzy PID Control ............................................................................................................................... 138
Ding-lei Wang, Ai-min Wang

Establishment and Application of GIS Database in Neighborhood Renewal ........................................ 142
Rui Li, Bing He

Adaptive PID Controller Based on BP Neural Network ..................................................................... 146
Beitao Guo, Hongyi Liu, Zhong Luo, Fei Wang

A Framework for Ontology Based Management of Heterogeneous Resources .......................... 149
Xia Li, Bei Wu

Application of Artificial Neural Network in the Prediction of Output in Oilfield .............................. 153
Changjun Zhu, Xiujuan Zhao

Changjun Zhu, Zhenchun Hao

Research on the Core Competence Evaluation Model of Construction Enterprise Based on Knowledge Capital Theory .............................................................. 161
Li-gen Yao, Yu Zhang

An Adaptive UKF-Based Particle Filter for Mobile Robot SLAM .............................................. 165
Xianzhong Chen

Verifying the Consistency between Business Process Model and Data Model .............................. 169
Lei Wang, Hongyan Li, Qiang Qu, Huaqiang Zhang, Bin Zhou

A Dynamic Description Logic for UML ....................................................................................... 173
Ming Li, Fengkui Zang

Realistic Emulation on Retina Photoreceptor Layer ....................................................................... 177
XuDong Guan, Hui Wei

On Hierarchical Knowledge Acquisition and Application ............................................................ 183
Xixu Fu, Hui Wei

Collaborative Knowledge Management System (CKMS) and Strategic Management ................. 188
Xiaojian Wu, Yu Gu

Research on Fixture Design Automation Based on the Prototype of General–Assembling 192
Pei-gang Li, Shu-chun Zhao, Xian-ying Feng, Ke-zheng Huang

L-Bifuzzy Scott Co-topology and its Characterizations ............................................................... 197
Jie Zhang, Huixian Duan, Bo Liu

Stability Analysis of Swarm with Gaussian Attractant/Repellent Profiles ..................................... 201
Bo Liu, Yan Yu, Jie Zhang

An Improved Density-based Spatial Clustering Algorithm Based on Key Factors of Object’s Distribution .................................................................................... 205
Ming Huang, Fuling Bian

An Applicable Approach to Ontology Mapping Based on Knowledge Base .................................. 209
Liang Zhang, Song Ding, Shengqun Tang

Applying SLEUTH for Simulating and Assessing Urban Growth Scenarios on a Case Study of Beijing .............................................................. 213
Wang Yi
Research on Workflow QoS ................................................................. Tao Lv ................................................................. 217
Knowledge Management in Enterprise ........................................... Tao Lv ................................................................. 220
Monitoring System of Foundation Excavation Based on Virtual Instruments ................................................................. Fei Xue, Ying Yu, Bao-fu Xu ................................................................. 223
The Effects of Some Knowledge Characteristics on the Evolution of Innovation Network ................................................................. Hai-yan Shan, Wen-ping Wang ................................................................. 227
Recognition of Rainstorm Field in Flood Discharge of High Dam Based on Neural Network ................................................................. Liu Fang, Huang Caiyuan ................................................................. 231
Research Challenges and Solutions for the Knowledge Overload with Data Mining ................................................................. Xingsen Li, Lingjing Zhang, Zhengxiang Zhu, Yong Shi ................................................................. 235

SESSION 4: MACHINE LEARNING

Study on Fuzzy Artificial Neural Networks in Tourism Crisis Evaluation ................................................................. Su Hui ................................................................. 239
A New Association Rule for Causes and Effects Analysis ................................................................. Zhefu Yu, Huibiao Lu, Chuanying Jia ................................................................. 243
Two-stage Optimization Support Vector Machine for the Construction of Investment Strategy Model ................................................................. Chih-Hung Wen, Wen-Tsao Pan ................................................................. 246
Construct for Investment Strategy Model through Genetic Programming Planning ................................................................. Chih-Hung Wen, Wen-Tsao Pan ................................................................. 250
Evolutionary Design of Random Number Generator ................................................................. Yuhua Wang, HongYong Wang, Aihong Guan, Huanguo Zhang ................................................................. 254
Study and Application of Stock Robot Kaburobo Based on Artificial Intelligence ................................................................. Jianliang Wang, Linshan Fang, Xiang Zhuang ................................................................. 258
Fuzzy Particle Swarm Optimization Algorithm ................................................................. Dong-ping Tian, Nai-qian Li ................................................................. 261
Selection of Suppliers Based on BP Neutral Networks and Grey Correlation Analysis ................................................................. Ke Chen, Zhongliang Xuan, Xianlian Shang ................................................................. 266
A Study and Application on Machine Learning of Artificial Intelligence ................................................................. Ming Xue, Changjun Zhu ................................................................. 270
Applied Research on Data Mining Algorithm in Network Intrusion Detection ................................................................. Ming Xue, Changjun Zhu ................................................................. 273
The Sliding Mode Direct Torque Control for ALA+PM Combined Rotor Synchronous Motor ................................................................. Xuezhen Chen ................................................................. 276
Extraction of Shell Texture Feature of Coscinodiscus for Classification Based on Wavelet and PCA ................................................................. Lina Song, Guangrong Ji, Jing Chen ................................................................. 280
Effective Large-scale Sample Reduction Strategy Based on Support Vector Machine ................................................................. Jing Chen, Guangrong Ji, Yangfan Wang ................................................................. 284
Image Based Forest Fire Detection Using Dynamic Characteristics with Artificial Neural Networks .......................................................... 288
   Dengyi Zhang, Shizhong Han, Jianhui Zhao, Zhong Zhang, Chengzhang Qu, Youwang Ke, Xiang Chen

Cost-sensitive Decision Tree with Missing Values and Multiple Cost Scales .......................................................... 292
   Xingyi Liu

A Small Power Switching Mode Power Supply Based on TOP Switch .......................................................... 296
   Yang Li, Chen Ying, Xiao Qianhua

Application of Group Method of Data Handling to Stream-Way Transition .......................................................... 299
   Shih-Wei Ma, Chang-Huan Kou, Li Chen, An-Pei Wang

A Peer-to-Peer Based Distributed Collaborative Filtering Architecture .......................................................... 303
   Songjie Gong, Hongwu Ye, Ping Su

An Item Based Collaborative Filtering Recommendation Algorithm Using Rough Set Prediction .......................................................... 306
   Ping Su, Hongwu Ye

Grain Quality Evaluation Method Based on Combination of BP Neural Networks with D-S Evidence Theory .......................................................... 310
   Tong Zhen, Zhi Ma, Yuhua Zhu, Qiuwen Zhang

Online Nearest Point Algorithm for L2-SVM .......................................................... 314
   Guosheng Wang

Alarm Association Algorithms Based on Spectral Graph Theory .......................................................... 318
   Qianfang Xu, Jun Guo

A Data Fusion Approach Based on Parallel Support Vector Machine .......................................................... 322
   Yun Luo, Yuanzhi Wang, Min Sun

An Information Hiding Algorithm Based on Blocks and Scrambling .......................................................... 325
   Hong Peng, Yanbin Lin, Yuanzhi Wang

Data Fusion and its Application in Object Recognition in Stereo Sequences .......................................................... 328
   Yi Wei, Chunyan Tan, Wei Wang

Study on Fault Diagnosis of Rolling Bearing Based on K-L Transformation and Lagrange Support Vector Regression .......................................................... 331
   Yangwen Xu

A Simple Graph-structure Network Tomography Topology Identification Method .......................................................... 335
   Qi Duan, WanDong Cai, Guangli Tian

Exploring Logical Rules Based on Causal Semantics Analysis of Relational Data .......................................................... 339
   Yaofu Cao, Limin Wang, Xin Zuo

Applying Multi-temporal Satellite Imagery to Estimate Chlorophyll-a Concentration in Feitsui Reservoir Using ANNs .......................................................... 343
   Hsun-Hsin Hsu, Li Chen, Chang-Huan Kou, Hui-Chung Yeh, Tai-Sheng Wang

A New Channel Estimation Method Based on Pilot-aided and Local Adaptive Least Squares Support Vector Regression in Software Radio OFDM System .......................................................... 347
   Dongxue Wu, Wenping Fan

Research on Credit Card Fraud Detection Model Based on Distance Sum .......................................................... 351
   Wen-Fang Yu, Na Wang
SESSION 5: MULTIDISCIPLINARY TOPICS AND APPLICATIONS

Increasing Overall Network Security by Integrating Signature-Based NIDS with Packet Filtering Firewall .................................................................355
Hamed Salehi, Hossein Shirazi, Reza Askari Moghadam

Study on the Model of Mens Upper Body Pressure and Comfort Sense—Based on the Seamless Underwear's Upper Parts ..............................................361
Zimin Jin, Xiaojue Luo, Jiajia Shen, Yuxiu Yan, Minzhi Chen

A Precontract-based Transaction Handling Method in Workflow ..................................................365
Shaofei Wu

A New Method of Selecting Supplier ..........................................................................................368
Shaofei Wu

A Data Exchange Model of Virtual Enterprise .............................................................................371
Shaofei Wu

Applying PSD Analysis in Ring-Structured-Light 3D Measurement ....................................374
Huiwen Leng, Chenguang Xu, Zhongwei Feng, Dingguo Xiao

A Method of Phase Tracking Based on Neural Network .............................................................379
Youhui Xie, Wenjin Dai, Yongtao Dai

Evaluation of Outsourcing Service Providers Based on Fuzzy Grey Relational Analysis ..........383
Shuyan Wu, Lei Xu

Bayesian Visual Inference and Attention ......................................................................................388
Jieyu Zhao, Jian You

SESSION 6: NATURAL-LANGUAGE PROCESSING

A Comparison between HTK and SPHINX on Chinese Mandarin .................................................392
Guangguang Ma, Wenli Zhou, Jing Zheng, Xiaomei You, Weiping Ye

SAR and Infrared Image Fusion Using Nonsubsampled Contourlet Transform ..........................396
Ying Zhang, Yanjun Li, Ke Zhang, Hongmei Wang, Meili Li

Experimental Phonetics Based Analysis of Semivowels in Uyghur Language .........................400
Askar Hamdulla, Hankiz Yilahun, Dilmurat Tursun

An Acoustic Parametric Database for Uyghur Language ...............................................................403
Askar Hamdulla, Dilmurat Tursun

SESSION 7: PLANNING AND SCHEDULING

A Production Management System for Clothing Enterprises .......................................................407
Chuang Li

Study on the System Optimization of Inventory Management of SME .....................................411
Li-ping Wang

Research on Forecast and Early-warning Model of Energy-Economy-Environment System ........415
Hui-zhao Wang, Ke Liu, Xiao-liu Shen, Zhong-fu Tan

Probabilistic Planning for Creating or Destroying Objects ..........................................................419
Wen-xiang Gu, Chang-fang Shao, Ming-iao Yin, Jin-li Li, Bing Li
SESSION 8: ROBOTICS AND VISION

An Improved Color Image Representation Method by Using Direct Non-symmetry and Anti-packing Model with Triangles and Rectangles .............................................................. 438
Shaohong Fang, Chuangbo Chen, Yunping Zheng

Vehicle Type Recognition Based on Radial Basis Function Neural Networks ................................................................. 442
Weihua Wang

Reach on Sobel Operator for Vehicle Recognition ...................................................................................................................... 446
Weihua Wang

A Study on Contour Feature Algorithm for Vehicle Type Recognition ............................................................................................................. 450
Weihua Wang

Distance Measurement System Based on Binocular Stereo Vision .......................................................................................................... 454
Zhengzhen Liu, Tianding Chen

Line Segment Based Man-Made Object Recognition Using Invariance ........................................................................................................ 458
Zhenyu Qiu, Hui Wei

Using a Robust Active Appearance Model for Face Processing ................................................................. 463
Shaojun Zhu, Jieyu Zhao

Medical Image Registration Based on More Features and Artificial Immune Algorithm ................................................................. 467
Hua Li, Cui Wang, Anna Wang

A Robust Feature Normalization Algorithm for Automatic Speech Recognition ................................................................. 471
Jianjun Lei, Zhen Yang, Jian Wang

A Novel Gray Image Representation Method by Using Direct Non-symmetry and Anti-packing Model with K-lines ................................................................. 474
Wenming Yi, Renthin Xiao, Yunping Zheng

Medical Image Fusion Based on Wavelet Transform and Independent Component Analysis ................................................................. 478
Zhiming Cui, Guangming Zhang, Jian Wu

Control of Mobile Robot Using Prediction-based FNN ....................................................................................................................... 482
Sui-ping Qi, Yi Cao, Shou-zhi Yu, Fu-chun Sun

Study of Texture Images Classification Method Based on Fractal Dimension Calculation ................................................................. 486
Changjiang Shi, Guangrong Ji, Yangfan Wang
SESSION 9: UNCERTAINTY IN AI

Dynamic Group Decision Making Consistence Convergence Rate Analysis Based on Inertia Particle Swarm Optimization Algorithm ................................................................. 490
  Lei Yang, Mingyue Jiang

The Grey Comprehensive Evaluation Model of a Third-party Reverse Logistics Provider Selection .................................................................................................................. 495
  Zhi-hong Yin, Qiang Lu

Fuzzy Logical on Boolean Networks as Model of Gene Regulatory Networks .......................................................... 499
  Honglin Xu, Shitong Wang

Bifuzzy Chance-constrained Portfolio Selection ........................................................................................................ 504
  Li-mei Yan

A Query Optimization Strategy Based on Domain Ontology ......................................................................................... 508
  Jian-liang Xu, Jing Xiong, Yong Liu

Application of Improved BP Algorithm in Vehicle License Plate Recognition ......................................................... 512
  Yuemei Xu, Hong Zhang

SESSION 10: WEB AND KNOWLEDGE-BASED INFORMATION SYSTEMS

Research on System of Economic Evaluation for Safety Resources in Traffic Enterprises Based on Accounting Information Extraction .......................................................... 516
  Enzhu Li

A Framework of Web Image Search Engine ......................................................................................................................... 520
  Weiguang Xu, Yafei Zhang, Jianjiang Lu, Ran Li, Zhenghui Xie

Study on Application Strategies of Blog in Information-based Teaching .................................................................................. 524
  Shiyi Qiao, Xiaohong Chu, Shuwei Wang

Discussion on Construction of Virtual Learning Community Based on VRML ................................................................. 527
  Chengxin Liu, Shiyi Qiao, Yan Sheng

A Study on Management Model of Grid Community Based on Education Resource .................................................. 530
  Yan Ma, Juhua Zhang, Qin Yang, Yuhui Qiu

A Novel Method to Extract Informative Blocks from Web Pages ................................................................................ 534
  Yuancheng Li, Jie Yang

Research on WWW Information Domain Based on WIS ................................................................................................. 538
  Xiaotai Niu, Ling Lu

A Web Page De-duplication Algorithm Based on Data Clearing ..................................................................................... 542
  Jian-ming Lin, Dong-sheng Liu, Shi-wen Gao, Wei Chen

On the Periodicity Problem of Automatic Information Retrieval .................................................................................. 546
  Jiemin Zhao

On the Periodicity Problem of Information Systems ........................................................................................................ 549
  Jiemin Zhao

E-Alarm: An Anomaly Detection System on Large Network .......................................................................................... 553
  Min Sun, Yuanzhi Wang, Yun Luo

Research of Web Classification Mining Based on Wavelet Neural Network ............................................................. 557
  Jingwen Tian, Meijuan Gao
Research on Data Exchange Push Technology Based on Message-driven ................................................. 561
   Xiwei Feng, Feng Xue, Tongwei Zhang

Transferring Markov Network for Information Retrieval ................................................................. 565
   Meihua Yu, Mingwen Wang, Jiali Zuo, Xiaofang Zou

A Novel Video Annotation Framework Based on Video Object ................................................................. 570
   Yang Li, Jianjiang Lu, Yafei Zhang, Ran Li, Bo Zhou

A Framework of Large-Scale and Real-Time Image Annotation System ..................................................... 574
   Ran Li, Jianjiang Lu, Yafei Zhang, Zining Lu, Weiguang Xu

Shannon Information Model in E-commerce Information Analysis ............................................................ 578
   Chen Gang

A Cooperation Mechanism Among Seller Agents ...................................................................................... 582
   Yu Wang, Xiao-Min Zhang, Dong-Mei Chen

Research on Personalized User Model Based on Semantic Mining from Educational Resources Searching Process ............................................................................................... 587
   Xiaojian Li, Shihong Chen

The Information Retrieval Method Based on the Specificity ........................................................................ 593
   Yu-Xi Gong, Min-Xia Zhang, Rong Luo

Research on Application of VRML in Virtual City Construction .............................................................. 596
   Wenping Fan, Yishao Shi, Zhihong Peng, Shaotang Liu

Measurement System of Diameters of Ultrafine Particles Based on Virtual Instrument ............................. 600
   Zhenmei Li, Wenge Li, Boxue Tan, Jin Shen

SESSION 11: INTELLIGENT INFORMATION TECHNOLOGIES AND APPLICATIONS

Application of Data Mining on Water Supply Management ......................................................................... 604
   Jinxu Guo, Hao Ding

Guiding Enterprise Informatization with System Theory .............................................................................. 607
   Jinxu Guo, Zhipeng Wei

A Robust Adaptive Beamforming Approach .............................................................................................. 611
   Bangjie Ji, Jianping Qian

A Two-step Feature Selection Algorithm Adapting to Intrusion Detection .................................................. 616
   Lizhong Xiao, Yunxiang Liu

Analyzing Service Composition Patterns in BPEL ..................................................................................... 621
   Yu Huang, Jieying Li, Haiqiang Dun, Hanpin Wang

A Study on Affect in Image Template Based on Color ................................................................................ 626
   Bo Liu, Jijun Wang

Design of a Discrete-time Repetitive Controller for Periodic Disturbances ................................................ 630
   Fu Zhao, Xiu-ming Yao, Yu Liu, Bao-ku Su

Robust Repetitive Control Design for a Class of Linear Systems with Time-varying Uncertainties .............. 635
   Fu Zhao, Xiu-ming Yao, Yu Liu, Bao-ku Su

Semantic-oriented 3D Model Retrieval Using Visual Vocabulary Labelling ............................................... 640
   Yachun Fan, Mingquan Zhou, Guohua Geng
Optimized Design of Injection Mould for Mobile Phone Front Shell Based on CAE Technology ................................................................. 646  
Guijian Huang, Xuemei Li, Xiaoyu Wu, Jibin Li

Optimized Design of Cavity Layout and Feed System of Multi-cavity Injection Mould ................................................................. 649  
Guijian Huang, Xuemei Li, Xiaoyu Wu, Jibin Li

Numerical Simulation of Temperature Field for Laser Rapid Prototyping ................................................................. 653  
Zeng Feng

Angle Domain Average and Autoregressive Spectrum Analysis Based Gear Faults Diagnosis ................................................................. 657  
Shufeng Ai, Hui Li, Lihui Fu

Fault Detection and Diagnosis of Gear Wear Based on Teager-Huang Transform ................................................................. 661  
Hui Li, Lihui Fu, Zhenfeng Li

SESSION 12: OTHER RELATED AI TOPICS

Performance and Risk Analysis of Constructing an Electronic Alliance Import Platform for Hi-tech Equipment in China ................................................................. 665  
Xiang Jing, Wang Shusheng, Liu Yan, Kong Zhaokun, Cao Yin

An Improved Tor Circuit-Building Protocol ................................................................. 669  
Xin Liu, Neng Wang

Analysis on DFIG Wind Power System Low-Voltage Ridethrough ................................................................. 674  
Yulong Wang, Jianlin Li, Shujie Hu, Honghua Xu

Design and Implementation of Server Monitoring System Based on SNMP ................................................................. 678  
Wenxian Zeng, Yue Wang

An Approach of Controlling Both Freeway On-ramp and Mainline ................................................................. 681  
Nan Jiang, Shoupeng Tang

Word of Mouth: The Effects of Marketing Efforts and Customer Satisfaction ................................................................. 685  
Xue-cheng Yang, Xiaohang Zhang, Feng Zuo

Controllable Arbitrary Integer Frequency Divider Based on VHDL ................................................................. 689  
Hongli Tian, Shuo Shi, Jun Zhang, Hongdong Zhao

The Influences of Liquidity Surplus on the Price of Fuel Oil Future in China ................................................................. 693  
Qizhi He

Empirical Research on the Relationship between the Liquidity Level and the Trading Volume of Rubber Futures ................................................................. 697  
Qizhi He

Chinese Synthesized Term Structure of Interest Rate ................................................................. 701  
Qizhi He

Radar-Infrared Sensor Track Correlation Algorithm Using Gray Correlative Analysis ................................................................. 705  
Youpeng Huang, Haibo Zhang, Lin Li, Yongfeng Zhou

Gray Intensity Images Processing for PD Pattern Recognition Based on Genetic Programming ................................................................. 709  
Xuesong Suo, Yuhong Zhou

A New Clustering Mechanism Based on LEACH Protocol ................................................................. 713  
Yuhua Liu, Yongfeng Zhao, Jingju Gao

Simulation of Mechanics Properties in Rolling Process for H-beam ................................................................. 717  
Xianzhang Feng, Junwei Cheng, Yanmei Cui, Cai Liu, Junhui Li
