# 2009 21st Euromicro Conference on Real-Time Systems

## ECRTS 2009

### Table of Contents

- **Message from the Program Chair**
- **Program Committee**
- **Reviewers**

### Networks and Distributed Systems 1

Real-Time Communication Analysis with a Priority Share Policy in On-Chip Networks

Zheng Shi and Alan Burns

End-to-End Delay Analysis of Distributed Systems with Cycles in the Task Graph

Praveen Jayachandran and Tarek Abdelzaher

### Programming Languages

Refactoring Asynchronous Event Handling in the Real-Time Specification for Java

MinSeong Kim and Andy Wellings

Combining Worst-Case Timing Models, Loop Unrolling, and Static Loop Analysis for WCET Minimization

Paul Lokuciejewski and Peter Marwedel

Deriving the Worst-Case Execution Time Input Values

Andreas Ermedahl, Johan Fredriksson, Jan Gustafsson, and Peter Altenbernd

### Uniprocessor Scheduling

Profinet IO IRT Message Scheduling

Zdeněk Hanzálek, Pavel Burget, and Přemysl Šůcha

Hierarchical Utilization Control for Real-Time and Resilient Power Grid

Ming Chen, Clinton Nolan, Xiaorui Wang, Sarina Adhikari, Fangxing Li, and Hairong Qi

Improvement to Quick Processor-Demand Analysis for EDF-Scheduled Real-Time Systems

Fengxiang Zhang and Alan Burns

Approximate Bandwidth Allocation for Compositional Real-Time Systems

Nathan Fisher and Farhana Dewan

On-Line Scheduling Algorithm for the Gravitational Task Model

Raphael Guerrra and Gerhard Fohler
Timing Analysis
A New Notion of Useful Cache Block to Improve the Bounds of Cache-Related Preemption Delay ................................................................. 109
Sebastian Altmeyer and Claire Burguière
Precise Worst-Case Execution Time Analysis for Processors with Timing Anomalies ............................................................. 119
Raimund Kirner, Albrecht Kadlec, and Peter Puschner
Using Randomized Caches in Probabilistic Real-Time Systems .................................................................................................. 129
Eduardo Quiñones, Emery D. Berger, Guillem Bernat, and Francisco J. Cazorla

Multiprocessor Scheduling 1
Sustainable Multiprocessor Scheduling of Sporadic Task Systems ................................................................................................. 141
Theodore P. Baker and Sanjoy K. Baruah
Two Protocols for Scheduling Multi-mode Real-Time Systems upon Identical Multiprocessor Platforms .................................................. 151
Vincent Nelis, Joël Goossens, and Björn Andersson
A Norm Approach for the Partitioned EDF Scheduling of Sporadic Task Systems ................................................................. 161
Laurent George and Jean-François Hermant

Implementation Models
Predictable Runtime Monitoring ........................................................................................................................................... 173
Haitao Zhu, Matthew B. Dwyer, and Steve Goddard
Reader-Writer Synchronization for Shared-Memory Multiprocessor Real-Time Systems ........................................................................ 184
Björn B. Brandenburg and James H. Anderson
On the Design and Implementation of a Cache-Aware Multicore Real-Time Scheduler ............................................................. 194
John M. Calandrino and James H. Anderson

Energy and Temperature Constrained Systems
Leakage Aware Feasibility Analysis for Temperature-Constrained Hard Real-Time Periodic Tasks ........................................................................ 207
Gang Quan and Yan Zhang
Competitive Analysis of Energy-Constrained Real-Time Scheduling .................................................................................................. 217
Vinay Devadas, Fei Li, and Hakan Aydin
Generalized Tardiness Quantile Metric: Distributed DVS for Soft Real-Time Web Clusters ........................................................................ 227
Luciano Bertini, Julius C.B. Leite, and Daniel Mossé

Multiprocessor Scheduling 2
Partitioned Fixed-Priority Preemptive Scheduling for Multi-core Processors .............................................................................. 239
Karthik Lakshmanan, Ragunathan Rajkumar, and John Lehoczky
Semi-partitioned Scheduling of Sporadic Task Systems on Multiprocessors .................................................................................. 249
Shinpei Kato, Nobuyuki Yamasaki, and Yutaka Ishikawa
Implementation of a Speedup-Optimal Global EDF Schedulability Test ................................................................. 259
Sanjoy Baruah, Vincenzo Bonifaci, Alberto Marchetti-Spaccamela, and Sebastian Stiller
Supporting Pipelines in Soft Real-Time Multiprocessor Systems .................................................................................. 269
Cong Liu and James H. Anderson
