43rd Loss Prevention Symposium
2009

Topical Conference at the 2009 AIChE Spring National Meeting

Tampa, Florida
26 – 30 April 2009

ISBN: 978-1-61567-253-0
# TABLE OF CONTENTS

Approach for the Development of a More Efficient and Safer Process in the Pharmaceutical Industry ................................................................. 1  
  Lina R. Saenz, William J. Rogers, M. Sam Mannan, Maria Papadaki

Predicting Explosibility Properties of Chemicals from Quantitative Structure-Property Relationships ............................................................. 15  
  Guillaume Fayet, Patricia Rotureau, Laurent Joubert, Carlo Adamo

Minimum Ignition Energy of Dust Cloud: The Effect of the Amount of Inert Dust ................................................................. 34  
  Luca Marmo

Development of Algorithms for Predicting Ignition Probabilities and Explosion Frequencies ................................................................. 35  
  Mike Moosemiller

On the Use of Consequence Models for Accident Investigations ........................................................................................................ 49  
  Prankul Middha, Kees Van Wingerden

A Versatile Approach to Explosion Vent Design for Enclosures Handling Flammable Vapors ................................................................. 70  
  David Herrmann

Consequence Modeling Lack of Accuracy and Its Effects on Quantitative Risk Analysis Results ................................................................. 84  
  Mohammed Ayyoubi

Advanced CFD Modeling On Vapor Dispersion and VCE ......................................................................................................................... 98  
  Anna Qiao, Aamund Langelid

NASFM Project on LNG Vapor Dispersion and Source Term Modeling .................................................................................................. 109  
  David A. Moore

Oversights and Omissions in Process Hazard Analyses: Lessons Learned from CSB Investigations ......................................................................... 117  
  Mark Kaszniaak

Optimizing Qualitative Hazard Evaluation ........................................................................................................................................ 133  
  Bill Bridges

LOPA as Practiced at Pfizer’s Global Manufacturing API Facility in Kalamazoo, Michigan ........................................................................................................ 157  
  Gerald N. Evenson, Scott E. Befus, Martin D. Dolfi, Adam J. Muir, David. T. Pinho

The Buncefield (U.K.) Fire and Explosion: Improving Layer of Protection Analysis Practise to Determine the Required Degree of Protection to Meet Regulator Requirements ............................................................ 170  
  Richard Gowland

The New Approach of Risk Analysis in France for High-Risk Facilities .................................................................................................. 177  
  Jérôme Taveau

Initiating Events and Independent Protection Layers for LOPA, A New CCPS Guideline Book ........................................................................................................ 202  
  John Murphy, Wayne Chastain, Bill Bridges

Preventing Combustible Dust Explosions in the Food and Consumer Products Industries ................................................................. 219  
  John Bresland
From the Top Down - Hazard Identification and Risk Evaluation in Food Processing -
Toxic Releases, Dust Explosions and Flammable Excursions .................................................. 221
Catherine Kollhoff, Colin S. Howat

Nothing to Sneeze at - Combustible Dust Hazard Process Safety ........................................... 233
Guy Colonna

The Expanded Use of Ammonia As a Refrigerant As a Replacement for Synthetic
Refrigerants ................................................................................................................................... 247
A. Bruce Badger

Process Hazards in the Distilled Spirits Industry ...................................................................... 253
John Birkmire

Replacement of HCFC-22 Refrigerants with Ammonia: A Challenge for Hockey Arenas in
Quebec........................................................................................................................................ 269
Jean Paul Lacoursiere, Claude Dumas

Lifetime Expectancy of (slow) Autocatalytic Decomposing Materials .................................... 279
Vincent Van den Hoogenband, Wim A. Mak, Nico H.A. Versloot

Process Safety Metrics and Culture............................................................................................ 286
Robert Hutchison

Lessons Learned from the Buncefield Fuel Depot Explosion ...................................................... 287
Timothy J. Myers, H. Kytomaa, Nicolas Ponchaut, Alfonso Ibarreta

Validation of Spring Operated Pressure Relief Valve Time-to-Failure and the Importance
of Statistically Supported Maintenance Intervals ........................................................................ 288
Robert E. Gross, Stephen P. Harris

Operating Companies' Roles in Preventing Contractors from Being Affected by Process
Chemicals during Plant Shutdowns ................................................................................................. 289
Yngve Malmen

Analyzing the Causative Factors for Crane Incidents during Process Plant Construction ........... 299
Krishna Nirmalya Sen, P.K. Singh

Auditing in Contra Costa County ................................................................................................ 304
Nicole Alaniz

Fifty Years of Investigating Fires and Explosions ........................................................................ 319
No Thing

Reaction Mechanism of CHP Decomposition and Its Application to Reactivity Hazards
Evaluation ....................................................................................................................................... 319
Yuan Lu, Ling Miao, Yingchun Zhang, Dr M. Sam Mannan

Scenario Identification and Evaluation for Layers of Protection Analysis ................................... 320
Ken First

Do We Really Learn from Loss Incidents? ..................................................................................... 321
Ram K. Goyal

Looking across Industries to Improve Human Reliability Data for QRAs .................................. 322
Roxy A. Schneider

Mutual Aid Response Group (MARG) - a Role Model in Transportation Safety ....................... 323
Paresh Trivedi

Pressure Vessels Burst Directional Blast Effects ......................................................................... 324
Jihai Geng

Accident Reporting and Consequences: Are We Learning as Much as We Should? .................. 325
Maureen Wood
Use and Limitations of Gas Detection ...............................................................326
Stephen A. Haines

When Is a RIK Not a RIK? ..........................................................327
Peter N. Lodal, H. David Miller

Develop and Design Inherently Safer Process Plants .....................................334
Victor H. Edwards

Evaluation of Equilibrium Toxicity Hazards Using "Infinite Points" ...............347
Richard Prugh

Auditing Your Process Safety Culture ......................................................361
David M. Heller, David A. Moore, Michael Hazzan

Preliminary Findings from OSHA's Refinery NEP .......................................362
Lisa Long, James Lay, Mike Marshall

Overview of the Chemical Facility Anti-Terrorism Standards ......................378
Dennis R. Deziel, Todd Klessman

Dust Explosion Prevention: Regulations, Standards, and Mitigation Techniques .................................................................394
Timothy J. Myers

Lessons Learned in Auditing Automated Systems for PSM Compliance ..........407
Angela Summers

A Practical Approach to Implementing a Process Safety Management System Upgrade in Response to An OSHA Refinery PSM NEP Audit ..................................................420
Robert Walter, Richard Foottit, Brian Nelson

Lessons Learned from the 2006 Facility Explosion in Danvers, MA ..............459
Scott G. Davis, Olav R. Hansen

Root Cause Analysis of a Cryogenic Refrigeration System Explosion ............484
Delmar "Trey" Morrison III, John D. Martens, Russell A. Ogle, Joel T. Cowells

Valero - McKee Refinery Propane Release and Fire .......................................497
Donald Holmstrom, James Lay, Johnnie Banks, Cheryl McKenzie, Vidisha Parasram

An Oven Explosion - Lessons Learned on PSM Applications (or "PSM: It's not just for breakfast anymore") .................................................................514
Michael D. Cazabon, Kirby Erickson

Polymerization Reactor Explosion at the XYZ Chemical Company ................533
Peter Paul Howell

Tank 15 - A Perfect Storm ........................................................................553
Jeffrey Oland

The Dynamics of Vented Gas Explosions .....................................................565
Christophe Proust, E. Leprette

Safe Thickness for Combustible Dust Layers ..............................................575
Erdem A. Ural PhD

Explosion Characteristics of Hydrogen-Air Mixtures in a Confined Space ........576
Daniel A. Crowl, Young-Do Jo

Prevention and Mitigation of Polyethylene and Hydrocarbon/Polyethylene Explosions .................................................................597
Paul R. Amyotte, Matthew Lindsay, Ruth Domaratzki, Neil Marchand, Almerinda Di Benedetto, Paola Russo

Silane Gas Venting/treatment Lessons Learned and Best Practices ..................613
James VanOmmeren
Process Safety Management Lessons Learned from a Petroleum Refinery Spent Caustic Tank Explosion................................................................................................................................................633

Kenneth P. Bloch, Dawn M. Wurst

Flammability Characteristics of Low GWP Refrigerant HFO-1234yf.................................................................645

Barbara Minor, David Herrmann, Bob Gravell
