Table Of Contents

Keynote Address

The Psychology of Aviation Surprise: An 8 Year Update Regarding the Noticing of Black Swans.......................1
Christopher D. Wickens

Symposium: Stanley N. Roscoe: A Reflection

Simulator Motion…It Rocks! (Or Maybe Not)..........................................................................................................7
Jacobs

Stan and the Moon Illusion........................................................................................................................................14
Acosta

Aviation Maintenance Challenges

Human Factors in the Ground Support of Small Unmanned Aircraft Systems.........................................................20
Hobbs, Herwitz, & Gallaway

The Technological, Financial, and Social Realities That Are Defining the Aircraft Mechanic of Tomorrow......26
Gallaway

Cognitive Engineering and Ecological Support

Designing Work-Centered Support for Dynamic Multi-Mission Synchronization.....................................................32
Roth, Scott, Whitaker, Kazmierczak, Truxler, Ostwald, & Wampler

Towards a Meaningful Presentation of FMS Trajectory Information for Tactical Self-Separation....................38
Van Dam, Mulder, & van Paassen

An Interface for Inbound Traffic Route Planning....................................................................................................44
Van Dijk, Van Paassen, Mulder, & Roerdink

Testing a Multidimensional Nonveridical Aircraft Collision Avoidance System: Experiments 3 and 4.........50
Knecht

Selection

How Effective is Item Bank Testing of Pilot Training Applicants in Reducing Test Preparation Effects?.........57
Zierke

Vigilant Warrior™: A Selection Tool for Vigilance Performance...........................................................................63
Weldon & Shingledecker

Panel: Selection for Aviation Related Careers: Air Traffic Control in the Air Force and the FAA

Selection for Aviation Related Careers: Air Traffic Control in the Air Force and the FAA............................69
Bleckley, Crutchfield, King, Manning, & Carretta

The Role of Common Methods in Personnel Selection.........................................................................................76
Carretta
Airport and Runway Safety

Runway Incursion Prevention Using an Audio Intervention ................................................................. 82
Maertens, DeSalvo, Chin, & Moon

Simulation Results for Highlighting Runway Safety Critical Information on Cockpit Displays of Traffic Information ......................................................................................................................... 86
Moertl, McGarry, & Nickum

Near-Term NextGen and Class 2 EFBs .................................................................................................. 94
Seamster & Kanki

Analysis of Ramp Damage Incidents and Implications for Future Composite Aircraft Structure .......... 100
Kanki & Brasil

Work Analysis for Future Aviation

A Methodology and Tools for the Prospective Identification of NextGen Human Factors Issues .............. 106
Funk

Aviator 2030--Ability Requirements in Future ATM Systems .................................................................. 112
Eißfeldt

Determining Job Requirements for the Next Aviator Generation .......................................................... 118
Hoermann, Schulze-Kissing, & Zierke

Modeling Pilot Cognitive Behavior for Predicting Performance and Workload Effects of Cockpit Automation ................................................................................................................................. 124
Gil, Kaber, Kim, Kaufmann, & Veil

Aiding the General Aviation Pilot

Usage Data from Users of Two Synthetic Visions Systems ..................................................................... 130
Beringer

The Effect of Video Weather Training Products on General Aviation Flight Behavior ............................. 136
Knecht, Ball, & Lenz

Accident Analysis and Operational Errors

Constructing Accurate and Precise Timelines for Major Aviation Accident Investigations ...................... 142
Dietz, O’Callaghan, Coury, & Kolly

Logistic Regression Analysis of Operational Errors and Routine Operations ............................................. 148
Pfleiderer, Scroggins, & Manning

Professionalism in Airline Operations?...And Accident Investigation? ...................................................... 154
Smith & Lofaro

Cognitive Engineering: Visualization

A Human-Machine Interface for Replanning of 4D Trajectories ................................................................ 160
van Marwijk, Mulder, Mulder, van Paassen, & Borst

Performance Visualization Method of Air Traffic Control Tasks for Educational Purpose with Utilizing Cognitive System Simulation ............................................................................................................ 166
Karikawa, Aoyama, Takahashi, & Furuta
Solution Space-Based Complexity Analysis of the ATC Aircraft Merging Tasks .........................................................172
Hermes, Mulder, van Paassen, Huisman, & Boering

Design and Evaluation of a Cognitively Engineered Systems Monitoring Display......................................................178
Findler, Narayanan, Collier, & Marshak

**Air Traffic Control**

Assisting Air Traffic Control in Planning and Monitoring Continuous Descent Approach Procedures ..............184
van der Eijk, Mulder, van Paassen, & in t Veld

Maneuver Stereotypes in Airborne Conflict Resolutions ..........................................................................................190
Rantanen, Wickens, & Keller

Conflict Alerts and False Alerts in En-Route Air Traffic Control: An Empirical Study of Causes and Consequences .................................................................196
Wickens, Rice, Keller, Hughes, & Hutchins

**Posters**

Predicting the Unpredictable: Estimating Human Performance Parameters for Off-Nominal Events ...............202
Hooey, Wickens, Hutchins, Salud, Sebok, Salud, & Gore

NextGen Flight Deck Human Factors Issues .........................................................................................................208
Funk, Mauro, & Barshi

Risk Assessment in Aviation ......................................................................................................................................214
Mauro & Barshi

Flight Deck Display Technologies for 4-DT and Surface Equivalent Visual Operations ........................................220
Prinzel, Jones, Shelton, Arthur, Bailey, Allamondola, Foyle, & Hooey

The Coming Paradigm-Shift in Maintenance: From Metals to Composites .............................................................226
Hobbs, Brasil, & Kanki

The Effect of Human Factors in Aviation Maintenance Safety ................................................................................232
Georgiou

A Network Collaborative Design Construct for the Dissemination of Aviation Safety Research ..........................238
Bowen, Block, & Patankar

Transfer of Skills from Microsoft Flight Simulator X to an Aircraft ......................................................................244
Callendar, Dornan, Beckman, Craig, & Gossett

Countermeasures to Mitigate Effects of Fatigue Among Flight Attendants: To Improve Transportation Safety and Productivity ........................................................................................................250
Brown & Niehaus

Simulator Sickness in the Flight School XXI TH-67 Flight Motion Simulators .........................................................256
Webb, Bass, Johnson, Kelley, Martin, & Wildzunas

Fractal Time Series Analysis of Human Heartbeat Intervals in a Change Blindness Task ......................................262
Russell, Knott, & Knott

Situational Awareness Assessment in Flight Simulator Experiment ........................................................................268
van Dijk, van de Merwe, & Zon
Providing Evidence of a Multiple-Process Model of Trust in Automation ................................................................. 274
Rice & Hunt

Implementation Issues UAV Camera View Transition Display Aid................................................................................. 281
Wright, Ruff, Mullins, Ayala, Calhoun, & Draper

Vigilant Spirit Control Station: A Research Testbed for Multi-UAS Supervisory Control Interfaces .................. 287
Rowe & Davis

Robot Operator Specifications Derived from the Occupational Information Network .................................................. 293
Coovert & Elliot

Plenary Practitioners’ Panel: Operational Issues in Today’s Aviation System

Aviation Automation Design and Implementation - the Need for Human Factors Considerations .................. 299
Fennell, Pruchnicki, McKenny, Reidemar, & Comstock

Symposium: UAV Interface Design for Supervisory Control

Multi-UAV Supervisory Control Interface Technology ......................................................................................... 305
Patzek, Zimmer, Feitshans, Draper, Hughes, & Flach

Cognitive Task Analysis of Distributed Network-Centric Information for the Promotion of Shared Situation Awareness within Collaborative UAS Operations ................................................................. 311
Getzlafl, Rowe, & Carretta

Manual and Cooperative Control Mission Management Methods for Wide Area Search Munitions ............ 317
Carretta, Warfield, & Patzek

Training Interventions to Reduce Air Force Predator Mishaps .................................................................................. 323
Nullmeyer, Herz, & Montijo

CRM

Air Traffic Control Crew Resource Management: To Find Truth and Facilitate Change ........................................... 329
Grieser

Development of Method for CRM Skills Assessment ............................................................................................... 336
Tsuda, Iijima, Noda, & Funabiki

A PC Based Methodology for CRM Practice Training ............................................................................................. 342
Cabral, Ribeiro, Landau, & Gerson

Cockpit Displays

Proposing Attitude Indicator Modifications to Aid in Unusual Attitude Recovery ...................................................... 349
Maertens

A Compatibility Analysis of Attitude Display Formats .............................................................................................. 355
Yamaguchi & Proctor

Modeling the Effects of HUD Visual Properties and Configurations on a Multi-Dimensional Measure of Clutter ................................................................................................................................. 361
Kim, Kaber, Kaufmann, Veil, Alexander, Stelzer, & Prinzel

Design of an Ecological Vertical Separation Assistance Cockpit Display .................................................................... 367
Heylen, van Dam, Mulder, & van Paassen
Training and Simulation

Effects of Visual, Seat, and Platform Motion During Flight Simulator Air Transport Pilot Training and Evaluation ............................................................................................................................ 373
Burki-Cohen, Sparko, & Jin Jo

Psychological Fidelity of Simulator Human Performance Limitation Training .......................................................................................................................................................... 379
Kallus

Knowledge and Skill-Based Evaluation of Simulated and Live Training – From Evaluation Framework to Field Application ...................................................................................................................................................... 386
Borgvall, Castor, & Bennett Jr.

Safety Reporting

Development of Proactive Safety Management System for Industrial Fields Based on the Framework of Aviation Safety Reporting System .............................................................................................................................................. 392
Ishibashi, Karikawa, Wakabayashi, Takahashi, & Kitamura

Team Errors in Air Traffic Control: Analysis Based on Voluntary Reports .......................................................................................................................... 398
Lu, Zhou, & Zhou

Review of Safety Reports Involving Electronic Flight Bags .................................................................................................................................................................................................................... 407
Chandra & Kendra

Task Load Effects

NT-SEEV: A Model of Attention Capture and Noticing on the Flight Deck .......................................................................................................................... 413
Wickens, Sebok, Bzostek, Steelman-Allen, McCarley, & Sarter

Contribution of High-Frequency EEG Features to Physiologically-Based Operator Workload Estimation .............................................................................................................................................. 419
Monnin & Estepp

Team Workload: A Construct Worth Pursuing? .......................................................................................................................................................................................................................... 425
Funke, Knott, Galster, & Brown

Control-Force Inputs Obtained From Pilots and Non-Pilots (flight attendants): Comparison with Established Handbook Distributions of Performance .......................................................................................................................................................................................................................................................... 431
Beringer

Representation in Different Perceptual Modalities

Speech Synthesis for DATA LINK: A Study of Overall Quality and Comprehension Effort .......................................................................................................................... 437
Godfroy, Begault, & Wenzel

Integrated Multimodal Communications Management for Airborne Command and Control .......................................................................................................................................................................................................................................................... 443
Popik, Finomore, & Brungart

Conceptualizing Spatial Relations in Flight Training .......................................................................................................................................................................................................................... 449
Hutchins, Newsome, & Middleton
# University Aviation Degree Programs

*Are We Getting the Message Across? Human Factors and System Safety Education—What Impact Has It Had?*  
Burdekin .........................................................................................................................455

*Results from the First FAA Industry Training Standards (FITS) Commercial Pilot Training Course—A Student’s Perspective*  
Craig, Beckman, Callender, Gossett, & Dorman ....................................................................461

*Family Factors Influencing Female Aerospace Student’s Choice of Major*  
Zlotky & Beckman ..............................................................................................................467

*Comparing the Accuracy of Performing Digital and Paper Checklists Using a Feedback Intervention Package During Normal Workload Conditions in Simulated Flight*  
Rantz & Hilton ....................................................................................................................473

## Aerospace Automation

*Examples of Work Domain Analysis Applied to Total Energy Control System*  
Amelink, van Paassen, & Mulder ..........................................................................................479

*On Adaptive Automation as a Solution to the GLOC Conundrum*  
Tripp, Warm, Matthews, Chiu, & Bracken .........................................................................485

*Assessing Novel Adaptive Displays Impact on Pilot Performance*  
Guarino, Harper, Liu, Bartosiewicz, Roth, & Vincenzi ..........................................................491

## Flight-Path Displays

*Comparing Tunnel-In-The-Sky Display on HDD and HUD from Task Occupation Point of View*  
Funabiki, Iijima, & Tsuda ...................................................................................................497

*Ecological Synthetic Vision Display to Support Pilot Terrain Awareness*  
Borst, Mulder, & van Paassen .............................................................................................503

*The 787 Vertical Situation Display Human Factors Evaluation—Enhancements to Flight Path Awareness*  
Hammack, Fox, & Crane ....................................................................................................509

## Training

*The Mystery of Distributed Learning*  
Lintern ..................................................................................................................................515

*Stress Training Efficacy in an Aviation Context*  
McClemont ..........................................................................................................................521

*Applied Threat and Error Management: Toward Crew-Centered Solutions*  
Geiselman ...........................................................................................................................527

*Multidimensional Evaluation of Pilot’s Threat and Error Management Performance During Complex Flight Maneuvers*  
Koglbauer, Kallus, Braunstingl, & Boucsein ......................................................................533

## Posters

*The Use of Intraocular Lenses with Advance Aviation Displays*  
Protheroe & Haynes ...........................................................................................................539
How Differences in Spatial Ability Influence Inexperienced Users in a Visual Perceptual Aviation Task ..........545
Curtis, Jentsch, & Maraj

What Can a Multidimensional Measure of Stress Tell Us About Team Collaborative Tools? ..551
Funke, Russell, Knott, & Miller

Human-Assisted Logistics Optimization (HALO): Support for Timely Logistics Decision-Making ..........557
Weldon

The Effects of Success Related Pressure on Information Processing Strategies and Plan
Continuation Error .............................................................................................................................................563
Bourgeon, Valot, Fauconnet, Loyau, & Navarro

Decision Factors Influencing Stimulant Use Among Fighter Aircrew During Combat Operations ........569
Gore & Hermes

Towards a Four-Dimensional Separation Assistance Cockpit Display .................................................575
Ellerbroek, Visser, van Dam, Mulder, & van Paassen

Utility and Recognition of Lines and Linear Patterns on Electronic Displays Depicting Aeronautical
Charting Information .......................................................................................................................................581
Chandra

Programs in Commercial Aviation .....................................................................................................................587
Block, Sabin, & Patankar

Adaptation of CRM Training for the Railway Industry: Operational Safety Benefits ............................593
Tsang & Hoermann

The Management of Verbal Communications in Complex Aeronautical Systems ................................599
Loyau, Rivenez, & Quiblier

Using Multiple Imperfect Diagnostic Automation ..........................................................................................605
Keller & Rice

Automation Dependency Under Time Pressure ...............................................................................................611
Rice, Keller, Hunt, & Trafimow

Air Traffic Challenges

Preparing for the Future of Collaborative Air Traffic Management .................................................................617
Smith & Billings

Airport Departure Flow Management (DFM): Findings From Field Trial Testing ........................................623
Spencer, Carniol, Pepper, & Smith

High-Fidelity Simulation to Compare the Tower Operations Digital Data System to Paper
Flight Progress Strips .......................................................................................................................................629
Truitt

Factors Affecting Cabin Crew Performance

Identifying Psychosocial Factors Associated with Work-Related Musculoskeletal Disorders
in Flight Attendants in a Taiwanese Commercial Airline ..............................................................................635
Lee & Kao

Fatigue and its Effect on Cabin Crew Performance ..........................................................................................642
Hide
Post-Traumatic Stress in Flight Attendant's Labor .............................................................. 648
Filipieva

Air and Space Displays

Modeling Cockpit Interface Usage During Lunar Landing Redesignation............................... 654
Chua, Major, & Feigh

Synthetic and Enhanced Vision System for Altair Lunar Lander............................................ 660
Prinzel, Kramer, Norman, Arthur, Williams, Shelton, & Bailey

Attitudes Toward Automation and Information Requirements of Experienced Predator Operations ........ 666
Marshak, Hudson, Collier, & Findler

Aeronautical Decision Making

Determinants of Conflict and Resolution Judgments in Air Traffic Control ......................... 672
Stankovic, Rantanen, Ponomarenko, & Loft

Effects of Time Pressure on the Use of an Automated Decision Support System for Strike Planning ........ 678
Boussemart, Donmez, Cummings, & Fargeas

Cue-Based Training Effects on Visual Scanpaths During Weather-Related Decision Making ........ 684
Sawyer & Shappell

Using Microsoft Flight Simulator X to Develop Aeronautical Decision-Making Skills in the Classroom ...... 690
Beckman, Callender, Craig, Gossett, & Dornan
