John J. Galleher Jr.

TRACK VI: ASSET MANAGEMENT

Establishing a Pathway for Achieving Water Utility Infrastructure Management Excellence
Dr. Tom Iseley, Olga Lamanna

Knowledge Shapes Tight Networks - E-Learning Shapes Knowledge
Robert Stein

Analysis of the Long-Term Effects of Maintenance and Investment Strategies
Robert Stein

Underground Pipeline Asset Management Sanitary Sewers Task Committee - Status Report
Tom Iseley, George Ruchti, Dennis Doherty

TRACK VII: CIPP: MYTHS & REALITIES OF STYRENE

Ed Kampbell

NASSCO’s Guideline for Safe Use and Handling of Styrenated Resins in CIPP *
Lynn Osborn, Ed Kampbell

Interim Report: Study of Styrene Concentrations in CIPP Process Water
Ed Kampbell

TRACK VIII: LASER/SONAR PROFILING TECHNOLOGY FOR WASTEWATER

Virtual Mandrel: A Case Study Using 3-D Lidar to Verify New Construction in Georgetown, TX
Scott Thayer, Wayne Brown

Laser Profiling Life Cycle: Theoretical Background, Inspection Process, and Reporting Analysis
Joe Vann, Dick Schantz

Benefits of Pipeline Laser Measurement Profiling *
Doc Bennett

TRACK IX-A: HORIZONTAL DIRECTIONAL DRILLING: OPERATIONS & SUMMITS

Progression in Correcting/Preventing Crossbores
Samuel Ariaratnam, Kevin Miller, Dan Weaklend, Walt Kelly

Understanding Magnetic Steering Tools: When, What and How Much? *
John English

Evaluating the Used Rig Market
Bob Martin

Ten Myths About HDD
Grady Bell

TRACK X: UNDERGROUND UTILITIES
Potholing Without Potholes: A Core Strategy for Utility Cut Repairs * .......................................................... 1231
E. Marshall Pollock

Pipe Ramming for HDD, Oil & Gas Pipeline Applications * .......................................................... 1282
Bryan Bachmann

Small Boring Unit (SBU) – Ground-Breaking Alternative to Hand-Dig Installations in Hard, Rocky Soil Conditions * .......................................................... 1375
Arvid Veidmark III

Can Wireless Technology Help Reduce Your Fleet’s Idling Problem? * .................................................. 1393
John Hinds
Fiber-to-the-Home Council North America .......................................................................................... 1403
Mike Render

Oklahoma Corporation Commission's Inquiry Into Undergrounding Electric Facilities In The State Of Oklahoma .................................................................................. 1445
Jim Jones

VOLUME 3

TRACK XI-A: TRENCHLESS TECHNICAL SYMPOSIUM

Prediction of Pulling Loads for Fusible PVC Pipe Installed by HDD * .................................................. 1458
Dr. Samuel Ariaratnam, Richard Botteicher, Siggi Finnsson

Proposed Revision of WRc Sewer Rehabilitation Design Method * .................................................. 1495
George McAlpine

Private Property Virtual Library – Where We’ve Been and Where We’re Going * .................................. 1505
Bruce Cohen

Correlation of Geological Mapping for Trenchless Suitability with Risk and Consequence in the Geotechnical Baseline Report: Removing Geologic Uncertainty From Bore Planning and Bidding * .................................. 1514
George Davis

Minimum Wall Thickness: A Constructability Controlled Design Method for Pipeliners * .......................... 1521
Grant Whittle, Wei Zhao

TRACK II-B: SEWER CONSTRUCTION & REHABILITATION: NEW TECHNOLOGY

Gravity Installations Using Horizontal Directional Drilling (HDD) .................................................. 1541
Richard Levings

GIPL - The 3S Segmental Panel Rehabilitation System ........................................................................... 1562
Ed Kampbell

Vacuum Microtunneling ......................................................................................................................... 1563
Stuart Harrison

CIPP for Potable Water .............................................................................................................................. 1564
Kevan Taylor

TRACK II-C: SEWER CONSTRUCTION/REHABILITATION

Exploring Pipe Options With Limited Budget, High Needs * .............................................................. 1565
David Harris, Steven Gross

Rehabilitation of an Existing 120-Inch Corrugated Metal Storm Sewer Trunkline ..................................... 1633
Riazul Mia, Temple Williamson, Russ Ford

TRACK V-B: WATERWORKS CONFERENCE

Use of Plastic (HDPE) Pipe for Water Main Projects ........................................................................... 1639
Bruce Kuffer

New Technology – Krah Pipe .................................................................................................................. 1640
Rim Boltong
Explosive Growth of Trenchless Water Rehab Options * ................................................................. 1641
  Gerhard Muenchmeyer

TRACK IX-B: HDD OPERATIONS: TECHNOLOGY

Impactor Technology: Expanding Drill Capabilities ........................................................................ 1651
  Eric Nicholson

Highly Accurate Gyroscopic Navigation For Horizontal Directional Drilling .................................. 1652
  Jim Cloud, Hans deBruin, Edgar Von Hinüber

You Cannot Manage What is Not Being Measured ....................................................................... 1666
  Danny Crumpton, Jim Agnew, James Mills

TRACK XII: GREEN CONSTRUCTION

Emission Calculators Document Benefits of Underground Technologies * ..................................... 1667
  David O'Sullivan, Ed Savage, Samuel Ariaratnam

Trenchless Technology: Environmentally Friendly Green Construction * ......................................... 1692
  Collins Orton

TRACK XI-B: TRENCHLESS TECHNICAL SYMPOSIUM

Better Asset Management Using Lessons From Improved Condition Assessment Tools and Transporters * ............................................................. 1747
  Jey Jeyapalan

Performance of Water and Gas Pipes in Past Earthquake and Hurricane Events * .......................... 1760
  Camille George Rubeiz

TRACK I-B: TUTORIAL: EFFECTIVE USE OF MUD MIXING/RECYCLING SYSTEMS

Tutorial: Effective Use of Mud Mixing/Recycling Systems ............................................................... 1799
  Tom Tibor

TRACK I-C: TUTORIAL: INTRODUCTION TO SEWER REHABILITATION TECHNOLOGIES

Sliplining ........................................................................................................................................ 1800
  Bijan Khamanian

Sectional Point Repairs ................................................................................................................... 1801
  Travis Bohm

Cured-In-Place-Pipe * ....................................................................................................................... 1802
  Lynn Osborn

Pipe Bursting: Static, Hydraulic, Splitting & Laterals * ................................................................. 1828
  Dave Holcomb

TRACK II-D: SEWER/WATER: ENGINEERING ETHICS

Ethics for Engineers "Basics & Case Studies" .................................................................................. 1952
  C. Vipulanandan

TRACK II-E: SEWER & REHABILITATION

Deep in the Heart of Texas – Large, Deep Diameter CIPP Using Only Air & Steam ......................... 1976
  Kevan Taylor
