2009 International Conference on Electronic Commerce and Business Intelligence

(ECBI 2009)

Beijing, China
6 – 7 June 2009
# Table of Contents

**Message from General Chair**  
**Message from Program Chair**  
**Organizing Committee**  
**Reviewers**

## Electronic Commerce and Information

- **Trust, Guanxi and Supplier Search in China: A Conceptual Guide for the Supplier**  
  Tao Liu and Yanyan Deng  
  Page 3

- **The Manufacturing Enterprise Supplier Performance Evaluation Indicator Selection under E-procurement**  
  Mingyan Wang and Wu Zhong  
  Page 7

- **The Feature Model of General ERP System for Discrete Manufacturing Industry**  
  Lili Zhai and Shuchen Zhang  
  Page 12

- **The Digital Signature Technology in E-commerce Systems**  
  Zhu Junxuan and Wu Zhong  
  Page 16

- **The Analysis of Fairness of the E-commerce Protocol Based on Dynamic Game Theory**  
  Fuquan Liu, Yuan Chen, Xiuli-Cao, and Yunfeng Song  
  Page 20

- **The Analysis of E-government on the Basis of Marginal Theory in Economy**  
  Yan Dan  
  Page 24

- **Study on the Security of Time-Stamping Service Architecture**  
  Wei Guo, Yu Hua, and Ke xin Song  
  Page 28

- **Study of Ensemble Model for Knowledge Management**  
  Cao Yonghui  
  Page 33
An Improved Security Protocol Formal Analysis with BAN Logic .................................................................102
   Li Tingyuan, Liu Xiaodong, Qin Zhiguang, and Zhang Xuanfang

An Empirical Research on Users’ Acceptance of Smart Phone Online Application Software ..........................................................106
   Weiwei Shi

An Adaptive Fairness Control Model in Wireless Sensor Networks ........................................................................111
   Kuang Zhufang and Yang Guogui

A Systematic Information Collection Method for Business Intelligence .............................................................116
   Xingsen Li, Hongliang Qu, Zhengxiang Zhu, and Yongsheng Han

A Study about the WOM Influence on Tourism Destination Choice ........................................................................120
   Min Zhu and Sheng-qiang Lai

A Software for S-box Performance Analysis and Test .....................................................................................................125
   Yong Wang, Qing Xie, Yuntao Wu, and Bing Du

Engineering Management

Using Citation-KNN for Automatic Keyword Assignment ......................................................................................131
   Chengzhi Zhang and Hongjiao Xu

Using a Fuzzy-Petri-Net-Based Approach for the Offshore Weather Prediction .....................................................135
   Yan Chenghua and Chen Qixiang

Urban Road Congestion Pricing Based on Game Theory .....................................................................................139
   Qing-yu Luo, Zhi-cai Juan, and Lin-jie Gao

The Improved ECN Congestion Control in Ad Hoc Network and Simulation Test ......................................................143
   Weirong Liu, Min Wu, Jun Peng, and Guojun Wang

Supply Chain Integrated Planning Modeling and Solution Based on HGA ..........................................................147
   Ji Xiao-li and Guo Cai-fen

Study on the Value of Information-Sharing in Two-Echelon Supply Chain under an Uncertainty Market Demand ..................................................................................................................152
   Shen Chenglin and Zhang Xinxin

Study on Inventory Control Model of Reverse Logistics for Products in Declining Period ........................................156
   Baoling Peng, Yu Pan, and Fang Pan

Study on Effect of Manufacturing Process Flexibility in Supply Chain Risk ......................................................160
   Jing-jing Zhou and Xian-liang Shi

Simulation of Queuing Systems with Different Queuing Disciplines Based on Anylogic ..............................................164
   Ni Zhiwei, Lu Xiaochun, and Liu Dongyuan

Simulation Analysis of Traffic Accidents Reconstruction Based on Reverse-Reasoning Method ................................168
   Lili Zheng, Tongqiang Ding, Jianfeng Xi, and Haiyan Fan
Scheduling Flexible Assembly Systems with Taboo Search Algorithm .............................................. 172
   Liang-hui Zhao and Sheng-fa Wang

Study on the Support Vector Machine (SVM) Model of Aircraft Economic Classification with Application in China .......................................................... 177
   Xiao-jin Li and Shu-long Zhao

Research on Availability Model and Algorithm of Complex Storage Bin Belt Transportation System .................................................................................. 180
   Xiaoqing Bai and Jingjing Mu

Quality Function Deployment Method and Its Application in Engineering Project Performance Evaluation .................................................................................. 184
   Yun He and Zhongchun Mi

Optimization for Parameters of Highway Cross Section Design in Snow Drift Area Based on Simulation ........................................................................... 188
   Lili Zheng, Tongqiang Ding, Jianfeng Xi, and Dongbo Liu

Improvement of Discounted Cash Flow Theory in Mergers and Acquisitions Based on Games ......................................................................................... 192
   Hongjiu Liu and Yanrong Hu

Evaluation Model for Alliance Supplier Selection Based on Knowledge Harmony .................................................................................................................. 196
   Chunyu Zhao

Economic Analysis on Ports-Hinterland Supply Chain System Warehousing Financing ........................................................................................................ 202
   Yang Wang and Xing-rui Ma

Economic Analysis of Logistics Financial Management of Supply Chain System in Ports-Hinterland .............................................................................. 207
   Yang Wang and Wenwen Huang

Designing Three-Stage Reverse Logistics Network with Incentive ................................................................................................................................. 213
   X.Q. Ge, Z.Y. Tian, and J. Zhang

Design for an Early Warning Index System of the Risk in Logistics Operation .............................................................................................................. 217
   Guohua Zhang and Hairong Dou

Coordination of Supply Chain after Production Cost and Demand Disruptions ................................................................................................................. 221
   Ji Shouwen, Wang Chuantao, Shen Jinsheng, and Han Xiangyu

China Railways Restructuring: Review and Evaluation ........................................................................ 225
   Sun Min and Zhang Qiusheng

Bound Duration Theorem and DCPM Network Reduction ...................................................................... 230
   L.H. Zhang, Xiaoli Liu, and Gang Zhong

Study on Engineering Project Management Based on Neural Network ...................................................... 234
   Jinhu Liu, Jing Xu, Xu Xu, and Yan Cao

Application of Visual Simulation to Optimize Tunnel Schedule Engineering ........................................ 238
   Wei Zhong and Yang Song
Research of the Selection Approach for Transport Supplier Problem ................................................................. 242
   Lin Qiang, Shi Hui, and Sun Wencong
An Improvement on DEA Model for Many Efficient DMUs ..................................................................................... 246
   Zheng Bing-yun
Algorithm of Optimization for Global Supply Chain Layout under Random Conditions ........................................ 250
   He Jun Feng and Xiao Wei
A Study on Automated Valuation Model in Mass Appraisal System for Real Property Tax ....................................... 254
   Rui Zhang and Weihua Chen

Evaluation and Decision

The Research of the Credit Evaluation Based on Projection Pursuit-Fuzzy Clustering System Model .............................. 261
   Zhang Hongxiang and Mao Zhizhong
The Optimization Hedging Model Based on the Combination Forecast Method ...................................................... 265
   Hongyan Zhi and Zhongyuan Yang
The Improved SVM Method for Forecasting the Fluctuation of International Crude Oil Price .................................. 269
   Ya-Li Qi and Wei-jun Zhang
Internal Credit Risk Measurement Method Research of the Commercial Banks in China ....................................... 272
   Hong Li, Qin Yang, and Huizhen Xue
The Commercial Banks' Integral Credit Risk Measurement Method Research in China ......................................... 276
   Xiaoyong Lu, Huizhen Xue, and Hong Li
Study on the Supplier Evaluation in Green Supply Chain Based on Rough Sets Theory and Analytic Hierarchy Process ................................................................. 280
   Cao Qingkui and Ruan Junhu
Study on the Demand Forecasting of Hospital Stocks Based on Data Mining and BP Neural Networks ..................... 284
   Cao Qingkui and Ruan Junhu
Study on the Characteristic of Different Trade Protective Measures on Chinese Textiles ....................................... 290
   Wang Li-ping
Study on Ecological Management Mode of Finishing Technology of Wood Multi-layer Floor in China ..................... 294
   Peng Wan-xi, Zhang Xu, Deng He-ping, Li Kai-ju, Fan Zhi-cai, and Peng Wen-li
Study on a Transport Problem Appearing in the Purchasing Process of a Supermarket ........................................... 298
   Lihua Zhang and Lei Liu
Strategic Capabilities: Antecedents to Mass Customization ................................................................. 302
Bai Tao

Stock Returns Prediction Using Manifold Wavelet Kernel ................................................................. 306
Ling-Bing Tang, Huan-Ye Sheng, and Ling-Xiao Tang

Resource Portfolio Structuring and Venture Performance: An Empirical Study
of New Ventures ............................................................................................................................. 310
Baoshan Ge and Guanqun Chang

Research on the Transforming of the Scientific and Technical Achievements:
A Game Visual Angle ..................................................................................................................... 314
Jinwang Li and Peilan Guan

Research on the Process Model of Open Innovation Based on Enterprise
Sustainable Growth .......................................................................................................................... 318
Jinlin Zhang and Yinghua Zhang

Research on the Intergrated Innovation Model of Science & Technology
Programme Management under the Industrial Cluster Environment ............................................ 323
Zhanfan Liang, Yunhe Li, and Zepei Yuan

Research on Development Model and Countermeasure of Bamboo Industry
in China on International Economic Crisis ..................................................................................... 328
Wan-xi Peng, Xu Zhang, Zhong-feng Zhang, Yi-qiang Wu, He-ping Deng,
and Hong-chen Qi

Research on Credit Risk Recognizing Model in Enterprises of Credit-Sale ....................................... 332
Hong Mei

Research of M&A Performance of Listed Companies in China Based on EVA ......................................... 337
Xiang Xiao and Liyang Tan

Research of Competitive Advantage in Family Firms on Organizational
Flexibility ........................................................................................................................................... 341
Jun Xie and Zhongwen Tang

Research for Evaluation of Regional Strategy Industry and Selection
of Development Strategy Based on Rough Theory and BCG Matrix ............................................. 345
Yonghua Zhu, Yanyan Wang, and Houchun Ding

Private Placement Stock Pricing in Chinese Stock Market .................................................................. 353
Xu Zhaoyu and An Shi

Prediction of the Number of International Tourists in China Based on Gray
Model (1,1) ......................................................................................................................................... 357
Yang Lingbin, Zhang Xia, and Wu Jin

Performance Evaluation on Human Resource Management of Commercial
Banks Based on Analytic Hierarchical Model .................................................................................. 361
Zhang Hong-lei, Yuan Wen-shan, and Yang Jin-lei

Multistage Tracking Model: Solutions and Analysis ........................................................................... 366
Jianfeng Liang
Multi-agent Assessment on Marketing Risk Based on Evidence Theory .......................................................... 370
Qiwan Wang

Logistics Service Supplier Assessment Base on the ER Approach ................................................................. 374
Xiuzhi Zhang and Xia Zhou

Loan Pricing Model of Commercial Bank Based on DEA ............................................................................... 378
Cong Sui and Guo-tai Chi

Job Stability versus Employment Flexibility: An Ordered Probit Analysis of Contract Choices under the New Labor Contract Law .......................................................... 382
Hui Wang, Hsiang-tai Chen, and Jibao Gu

Influence and Countermeasure of Green Barrier to Chinese Economy ...................................................... 386

Improved Approach to Algebraic-Geometric Codes ......................................................................................... 390
Wanbao Hu

Grey Relational Analysis Model with Harmony Factor Using in CEO Strategic Leadership Evaluation .......................................................... 394
Xing Gang and Ren Rong Rong

Game Analysis on Purchasing for Suppliers and Purchasers under Supply Chain Environment .......................................................... 398
Zhao Hong-mei, Liu Ying, and Fu Ya-nan

Game Analysis of Multiple Equilibrium for Financial Crisis .............................................................................. 403
Weihua Chen and Rui Zhang

Evolutionary Game Analysis of Enterprise's Cooperation Strategy in Industrial Clusters .......................................................... 408
Shen Qiuying and Wang Wenping

Evaluation of Real Estate Venture Capital Based on Entropy Double Base Points Method .......................................................... 412
Shujing Zhou, Fei Wang, and Zhongda Zhang

Empirical Analysis on the Substitution Effects of Electronic Currency .............................................................................. 416
Minghong Zhang, Shan Zou, Honghui You, and Deyu Yuan

Empirical Analysis on Project Investment Decision Based on the Binary Tree Model .......................................................... 420
Xiaoyu Li and Kai Zhang

Empirical Analysis of Commuter Stop-Making Behavior Based on Ordered Porbit Model .......................................................... 423
Luan Kun, Juan Zhicai, and Tang Jie

Effect of Change in Required Reserve Ratio on Shanghai Composite Index .......................................................... 427
Dehong Liu, Jiajia Zhang, Shuai Wang, and Zhihai Tie

Dynamic Bayesian Network Model for the Enterprise Financial Risk Warning .......................................................... 431
Wang Shuangcheng, Shao Ruiqing, and Leng Cuiping
