2009 IEEE International Symposium on Policies for Distributed Systems and Networks

(POLICY 2009)

London, United Kingdom
20-22 July 2009
# POLICY 2009

## Table of Contents

**Preface**

**Organising Committee**

### Session 1: Privacy and Security Management

Abductive Authorization Credential Gathering ................................................................. 1  
  Moritz Y. Becker, Jason F. Mackay, and Blair Dillaway

Towards Session-Aware RBAC Administration and Enforcement with XACML .............................................. 9  
  Min Xu, Duminda Wijesekera, Xinwen Zhang, and Deshan Cooray

Using Modelling and Simulation for Policy Decision Support in Identity Management ............................ 17  
  Adrian Baldwin, Marco Casassa Mont, and Simon Shiu

### Short Paper Session 1

Visualization for Access Control Policy Analysis Results Using Multi-level Grids ................................. 25  
  Prathima Rao, Gabriel Ghinita, Elisa Bertino, and Jorge Lobo

Policies for Self Tuning Home Networks  .............................................................................. 29  
  Dimosthenis Pediaditakis, Leonardo Mostarda, Changyu Dong, and Naranker Dulay

Strong and Weak Policy Relations ......................................................................................... 33  
  Michael J. May, Carl A. Gunter, Insup Lee, and Steve Zdancewic

Verification of Policy-Based Self-Managed Cell Interactions Using Alloy ............................................ 37  
  Alberto Schaeffer-Filho, Emil Lupu, Morris Sloman, and Susan Eisenbach

An Entropy-Based Countermeasure against Intelligent DoS Attacks Targeting ................................. 41  
  F. Al-Haidari, M. Sqalli, K. Salah, and J. Hamodi

### Session 2: Applications

Apply Measurable Risk to Strengthen Security of a Role-Based Delegation Supporting Workflow System  ................................................................. 45  
  Weili Han, Qun Ni, and Hong Chen

Policy-Based Real-Time Decision-Making for Personalized Service Delivery ............................................. 53  
  Jochen Bauknecht, Johannes Häussler, Daniel Kraft, Marcus Q. Kuhnen,  
  Mario Lischka, and Anett Schülke
Model Checking Firewall Policy Configurations .................................................................60
   Alan Jeffrey and Taghrid Samak

Session 3: Policy Refinement

ChangeRefinery: Assisted Refinement of High-Level IT Change Requests ........................................68
   David Trastour, Robert Fink, and Fen Liu
Realizing the CDL Cross-Domain Language in the Ponder2 Policy Framework:
Experiences and Research Directions ......................................................................................76
   Roshan K. Thomas, Giovanni Russello, and Simon Tsang
Delegation Assistance .................................................................................................................84
   Achim D. Brucker, Helmut Petritsch, and Andreas Schaad

Poster and Demo Session

ProActive Caching - A Framework for Performance Optimized Access Control
Evaluations ..................................................................................................................................92
   Mathias Kohler and Robert Fies
A Policy-Based Sensor Selection System with Goal Oriented Singular Value
Decomposition Technique .........................................................................................................95
   Hoi Chan and Thomas Kwok

Short Paper Session 2

XACML Policy Profile for Multidomain Network Resource Provisioning
and Supporting Authorisation Infrastructure ............................................................................98
   Yuri Demchenko, Mihai Cristea, and Cees de Laat
Enabling Distributed Management for Dynamic Airborne Networks ........................................102
   Cho-Yu J. Chiang, Gary Levin, Shihwei Li, Constantin Serban, Michelle Wolberg,
   Ritu Chadha, Gregory Hadynski, and Lee LaBarre
A Digital Rights Management Model for Healthcare ................................................................106
   Nicholas Paul Sheppard, Reihaneh Safavi-Naini, and Mohammad Jafari
POLIPO: Policies & Ontologies for Interoperability, Portability, and autOnomy ..........................110
   Daniel Trivellato, Fred Spiessens, Nicola Zannone, and Sandro Etalle
Security Policy Implementation Strategies for Common Carrier Monitoring Service
Providers ..........................................................................................................................................114
   Carl A. Gunter

Session 4: Systems and Tools

Statistics & Clustering Based Framework for Efficient XACML Policy Evaluation ........................118
   Said Marouf, Mohamed Shehab, Anna Squicciarini, and Smitha Sundareswaran
Policy Processing: Don't Take it for Granted .............................................................................126
   Joseane Fidalgo, Carlos Kamienski, Ramide Dantas, Djamel Sadok, and Börje Ohlman
In Vivo Evolution of Policies that Govern a Distributed System ................................................134
   Constantin Serban and Naftaly Minsky
Session 5: Formal Semantics of Policies

A Temporal Description Logic Based Access Control Model for Expressing History
Constrained Policies in Semantic Web .......................................................................................................................... 142

Fathieh Faghih, Morteza Amini, and Rasool Jalili

Access Control Policies for Semantic Networks ........................................................................................................ 150

Tatyana Ryutov, Tatiana Kichkaylo, and Robert Neches

Formalization and Management of Group Obligations .............................................................................................. 158

Yehia El Rakaiby, Frédéric Cuppens, and Nora Cuppens-Boulahia

Short Paper Session 3

An XACML Extension for Business Process-Centric Access Control Policies .............................................................. 166

Christian Wolter, Christian Weiss, and Christoph Meinel

Towards Consistency of Policy States in Decentralized Autonomic Network
Management .................................................................................................................................................................. 170

Jéferson Campos Nobre and Lisandro Zambenedetti Granville

The Zodiac Policy Subsystem: A Policy-Based Management System for a High-Security MANET .................................................. 174

Yuu-Heng Cheng, Mariana Raykova, Alex Poylisher, Scott Alexander, Martin Eiger, and Steve M. Bellovin

xDUCON: Cross Domain Usage Control through Shared Data Spaces ........................................................................ 178

Giovanni Russello and Naranker Dulay

Detecting Conflicts in ABAC Policies with Rule-Reduction and Binary-Search Techniques .................................................. 182

Cheng-chun Shu, Erica Y. Yang, and Alvaro E. Arenas

Mapping Policies to Management Systems ............................................................................................................. 186

Abdelnasser Hassan Ouda, Hanan Lutfiyya, and Michael Bauer

Author Index
