NASTT/ISTT International No-Dig Conference & Show 2009

Including the Annual Technical Conference of the North American Society for Trenchless Technology

Toronto, Canada
29 March - 3 April 2009

Volume 1 of 2

# TABLE OF CONTENTS

**Volume 1**

## TRACK 1 – PIPE BURSTING

City of Atlanta, Georgia Utilizes Ductile Iron Product Pipe on Large-Scale Static Pipe Bursting Project A-1-01 .................................................................................................................. 1

*Eddie Ward*

Pipe Bursting - A Fast Track Partner for Success A-1-02 .................................................................................................. 9

*Terry Moy*

Design-Build Innovations: Pipe Bursting Potable Water Mains with Pre-Chlorinated Pipe on Robins AFBA-1-03 ......................................................................................................................................... 13

*Eric Nicholson, Jonathan Raymer, Marshall Wall*

Static Pipe Bursting Using Vitrified Clay Jacking Pipe in Phoenix Soils A-1-04 ........................................................................... 21

*Collins Orton, Jeff Boschert, Blaine Robinson, Robert Webb*

The Practical Study on the Pipe Bursting Technology by Expandit in Japan A-1-05 ........................................................................ 31

*Toru Sato, R. Yamaoka, H. Shimada, T. Sasaoka, K. Matsui, M. Harai*

## TRACK 2 – MICROTUNNELING

The Longest Drive - Portland’s CSO Microtunnels A-2-01 ............................................................................................. 40

*Christa Overby, Matt Roberts, Craig Kolell*

Intake Construction of Lake Nacimiento, California A-2-02 .............................................................................................. 50

*John R. Hollenbeck, Thomas C. Trott, Brett Campbell, Bob Lewis*

27,500 Feet of Microtunneling Solves Complex Puzzle in Sacramento A-2-03 ........................................................................ 60

*Mathew Wallin, Mark Bruce, Kathryn Wallin, David Bennett*

Geotechnical Baseline Reports - Applying the Guidelines to Microtunneling A-2-04 .................................................................. 74

*Kimberlie Staheli, Leon Madday*

A Microtunnel Crossing of a Highly Environmental Impact Area (Italy) A-2-05 ........................................................................ 82

*Nicola Battilana, Ugo Lazzarini, Antonio Guerini, Umberto Stefanel*

## TRACK 3 – LATERALS REHABILITATION

Lateral Rehabilitation - Next Steps for the City of Hamilton, Ontario A-3-01 ........................................................................... 92

*Erika Waite, Harry Krinas*

Minimizing Inflow and Infiltration Through Trenchless Lateral Replacement - A Municipal Perspective A-3-02 ........................................................................................................ 101

*Alan Goodman, Andy Chennault, Bill Watson*

## TRACK 3 – LATERALS REHABILITATION (CONT’D)

Service Connection Relining Pilot Program A-3-03 .............................................................................................................. 109

*Owen Kristel, Albert Kwan, Dave Krywiak*

Examination of Lateral Replacement Program - A Municipal Perspective A-3-04 .................................................................. 117

*Collins Orton*

Understanding ASTM F2561-06 A-3-05 .......................................................................................................................... 123

*Larry Kiest*

## TRACK 4 – INSPECTION & LOCATING

Economical Multi-Sensor Inspection of Collection Systems A-4-01 .................................................................................. 133

*Scott Thayer, Adam Slifko, Ryan Johnson, Veolia Water*

Single Pass Multiple-Sensor Inspection of Large Sewers in the City of Toronto, Ontario A-4-02 ........................................................................ 140

*Kamran Sarrami, Ian Doherty*
Determining the Effectiveness of Using a Multiple-Sensor Inspection Robot for Large Diameter Sewer Inspections A-4-03 ................................................................. 150
David Crowder, Gerald Bauer, Donald Young
CCTV inspection Companies _ Why and How to Accredit Them (France) A-4-04 ................................................................. 159
René-Claude Fouilloux, Marie Ivanoff, Jean-Francois Maregiano
Potholing Without Potholes: A Core Strategy for Utility Cut Repairs A-4-05 ................................................................. 165
E. Marshall Pollock

TRACK 5 – WATER MAIN ASSET MANAGEMENT

A Comprehensive Overview of Policies and Practices A-5-01 ........................................................................................................ 176
Kevin Bainbridge, Hesham Osman
Establishing a Pathway for Achieving Water Utility Infrastructure Management Excellence A-5-02 ................................................................. 187
Tom Iseley, Olga Lucia Vargas-Lamanna
Scheduling Model for Water Main Rehabilitation A-5-03 ........................................................................................................ 197
Alaa Salman, Tarek Zayed, Osama Moselhi
The Use and Development of Geophysical Techniques to Monitor and Assess Existing Infrastructure During a Challenging Horizontal Directional Drilling Bore A-5-04 ........................................................................................................ 207
Craig R. Johnson, George L. McKenzie, Harry R. Price, Fritz J. Klingler

TRACK 1 – HDD & DESIGN CHALLENGES

Comparison of Predicted and Observed HDD Installation Loads for Various Calculation Methods B-1-01 ........................................................................................................ 215
Glenn Duyvestyn, Hatch Mott MacDonald
Small-Scale Hydraulic Fracture Experiments in a Frictional-Cohesive Material B-1-02 ........................................................................................................ 230
David Elwood, Ian D. Moore, Hongwei Xia
Trenchless Solution in the Oil Sands of Alberta - Saving Water and Reducing the Cost of Oil Extraction B-1-03 ........................................................................................................ 240
George Taylor, Marty Sangster

TRACK 1 – HDD & DESIGN CHALLENGES (CONT’D)
The ORFEUS Project: Design of a Bore-Head GPR for HDD Equipment (Italy) B-1-04 ........................................................................................................ 247
Guido Manacorda, Elmar Koch, Howard Scott, Dave Pinchbeck

TRACK 2 – MICROTUNNELING

Rock Microtunneling - An Industry Review B-2-01 ........................................................................................................ 256
Steven Hunt, Don Del Nero
Microtunneling a RCP Sewer with Crossings B-2-02 ........................................................................................................ 267
Zhenqui Cai, Hatch Mott MacDonald
Direct Pipe® Method - Latest Developments in Pipeline Construction (Germany) B-2-03 ........................................................................................................ 278
Diana Pfieff
Real-Time Automated Solution to Positioning and Guidance of Microtunnel Boring Machines (P. R. China) B-2-04 ........................................................................................................ 286
Xuesong Shen, Ming Lu, Wu Chen, Wing Chan

TRACK 3 – GROUTING

Filling the Information Void on Annular Space Grouting B-3-01 ........................................................................................................ 296
Stephen McKelvie
Restoration of a Trunk Sewer Through Historic Kingston, Ontario B-3-02 ........................................................................................................ 305
Chris Phippen, Randy Kowal, Tim Ruttan, Tom Hickey
Pipe Line Grouting - What Engineers and Contractors Need to Know to Make it Work B-3-03 ........................................................................................................ 313
Jim Shelton, Malcolm Pirnie, Rob Lee
Restoration Method of Pipeline Position (Japan) B-3-04 .............................................................. 325
 Koichi Araki, Masashi Komura, Hideki Shimada, Koji Sasaoka

TRACK 4 – I&I AND LEAK DETECTION

Nashville Project Shows Long-Term Effectiveness of Sewer Rehabilitation for Infiltration Reduction B-4-01 ........................................................................................................................................... 333
 Gregory Ballard, Leanne Scott
A GIS-Based Decision Support System for Evaluating Costs and Benefits of Sewer Renewal Technologies B-4-02 ............................................................................................................................................... 343
 Mahmoud Halfawy, Samar Baker
Rehab Effectiveness - Why Holistic Rehab is Required for Significant I&I Reductions B-4-03 ........................................................................................................................................... 354
 Jim Shelton, Paul Batman
Transmission Main Leak Detection in Sub-Saharan Africa (Africa) B-4-04 .................................................................................................................................................. 364
 Mark Webb, Brian Mergelas, Kevin Laven

TRACK 5 – CONDITION ASSESSMENT

Condition Assessment of Large Diameter Outfall Sewers B-5-01 ........................................................................................................................................... 374
 Travis Wagner, Wazir Qadri, Adam Stifho, Phil Braswell

TRACK 5 – CONDITION ASSESSMENT (CONT’D)

USEPA Evaluates Controlled Condition Testing for Buried Pipeline Assessment and Rehabilitation B-5-02 ........................................................................................................................................... 383
 Robert A. Pennington, Simone R. Christie, Michael D. Royer, Richard Marinshaw
Systematic Approach to Comprehensive Industrial Sewer Upgrades B-5-03 ........................................................................................................................................... 393
 Sean P. Murphy, Thomas C. O’Connor, Victor P. Dauksha
Development of Standard Water and Wastewater Pipe Condition Index B-5-04 ........................................................................................................................................... 403
 Richard Thomasson, Malcom Pirnie, Sunil Sinha

TRACK 1 – AUGER BORING & PILOT TUBE MICROTUNNELING

Auger Boring Challenges in the Virgin Islands C-1-01 ........................................................................................................................................... 414
 Arvid Veidmark
Small Boring Unit – A Ground-Breaking Alternative to Hand-Dig Installations in Hard Soil Conditions C-1-02 ........................................................................................................................................... 418
 Arvid Veidmark
Field Challenges and Successes with Pilot Tube Microtunneling C-1-03 ........................................................................................................................................... 425
 Michelle L. Ramos
The First Major Pilot Tube Microtunneling Project in the St. Louis Metropolitan Area C-1-04 ........................................................................................................................................... 433
 Ed Sewing, Jeff Boschert, Mike Luth
Use of an Optically Guided Downhole Hammer to Complete Trenchless Installation of Electric Cable C-1-05 ........................................................................................................................................... 443
 Nick Strater

TRACK 2 – TUNNELING DESIGN & CONSTRUCTION CHALLENGES

Tunnel Construction Issues with San Francisco’s New 44-in. Water Main C-2-01 ........................................................................................................................................... 451
 Thinh Nguyen, Glenn Boyce, Eugene Shu, Kevin Barry
Tunneling the A-Line C-2-02 ........................................................................................................................................... 461
 Dru Nielson, David Mathy, Thom Kalkman, David Bennett
Design Constraints and Construction of Colorado Avenue and Ocean Avenue Trunk Sewer C-2-03 ........................................................................................................................................... 471
 Eugenia Charid
PVC Liner for Corrosion Protection in Large Diameter Segmental Sewer Tunnel C-2-04 ........................................................................................................................................... 480
 Patrick Doig, Hatch Mott MacDonald
Application of a Rectangular Pipe Jacking machine for Box Culvert Pipeline Construction (Japan) C-2-05
Tomo Morita, Hideki Shimada, Kikuo Matsui, Fuminoko Matsumoto

TRACK 3 – WATER REHABILITATION & CIPP LINING

1-MN-320 Emergency Sliplining Project C-3-01
Charles Lewis, Tom Noerenberg, Scott Dentz, Fred Chase

Brooks Bridge Waterline Rehabilitation C-3-02
Jeff Littrell, Moosa Damerchie, Joe Klaus, Jaan Oolup

City of Hamilton’s 3-Year CIPP Water Rehabilitation Program C-3-03
Michael Zantingh

Low-Impact Water Main Rehabilitation in Kelowna, British Columbia C-3-04
George Bontus, Wayen Nadaste, Ken Foster

Folded PE Liner Pipes - A New Frontier for Trunk Water Mains (United Kingdom) C-3-05
Norman Howell, John De Rosa

TRACK 4 – INSPECTION & LOCATING

Coastal Noise - An Acoustical Evaluation of a Pre-Stressed Concrete Cylinder Pipe Force Main C-4-01
Neal D. Stubblefield, Cameron White, Richard Verduin, Robert Morrison

The Emerging Use of Plastic (HDPE) Pipe in Dynamic Municipal Water Systems and Trenchless Technologies for Improved Infrastructure Performance C-4-02
Bruce Kuffer

Live PCCP Inspection Using a Free-Swimming Tool C-4-03
Xiangjie Kong, Xinlu Tang, Brian Mergelas

Reliability Assessment of Water Distribution Networks C-4-04
Alaa Salman, Tarek Zayed, Osama Moselhi

The Revival of a PCCP Pipeline In Taiwan (Taiwan) C-4-05
Allison Psutka, Jake Regala, Xiangjie Kong

TRACK 5 – CONDITION ASSESSMENT

USEPA Research on Condition Assessment of Wastewater Collection Systems C-5-01
Fu-hsiung Lai, Christopher S. Feeney, Katherine D. Martel, Samantha M. Hogan, Aaron Sylvia

The Need for and Benefits of a Minimum Wall Thickness Requirement for Pipeliners (United Kingdom) C-5-02
L. Grant Whittle, Wei Zhao

The New Mandrel Testing – Laser Profiling and Its Use In Rehabilitation and Construction C-5-03
Robert K. Lee

Aqualiner – A New Process for the Lining of Water and Sewer Pipes C-5-04
Gerry Boyce, Kevin Lindsey, Julian Britton, Simon Baylis

Aptos Transmission Main Relocation Project in the Santa Cruz County Sanitation District C-5-05
Cindy Preuss, Rachel Lather, Marc Gelinas

TRACK 1 – PIPE RAMMING

Trenchless Rehabilitation of a Trenchless Installation D-1-01
Laura Wetter

Pipe Ramming a 60-in. Casing Under BART D-1-02
Saed Toloui, Glenn Boyce, Kevin Barteaux

Pipe Ramming and the Oil Pipeline Industry D-1-03
Alan Goodman, Alan Cluett
On-Grade Large Diameter Pipe Ramming Installations D-1-04 .......................................................................................... 657
John Currey, Gene Woodbridge, Eric Nicholson

TRACK 2 – MICROTUNNELING

Contingency Planning for Microtunneling and Trenchless Projects D-2-01 .............................................................. 665
Craig Camp

Prism – An Automatic Measuring Technology for Non-Man Entry, Long and Curved Microtunneling
(Japan) D-2-02 ....................................................................................................................................................... 670
Fukuo Murakoshi, Hidenori Hino

Modeling the Behavior of Microtunneling Due to Steering Corrections (The Netherlands) D-2-03 .................. 680
Wout Broere, Jelke Dijkstra

Microtunneling in Marginal Grounds - Design and Construction Risks Issues D-2-04 ........................................... 690
James Kwong

TRACK 3 – LINING MATERIALS, METHODS & INSTALLATION

Designing Liners for Fully Deteriorated Sewers (Germany) D-3-01 .......................................................... 700
Bernhard Falter, Sonja Hildebrandt, Martin Wolters

Loadings Due to Traffic Considered in Design of Trenchless Rehabilitation of Sewage Pipes (Poland) D-3-02 ................................................................................................................................... 711
Andrzej Kuliczowski, Emilia Kuliczkowska, Anna Parka

Quality Assurance of Close-Fit Liners (The Netherlands) D-3-03 .......................................................... 721
Wim Elzink, Frans Alferink

Testing the Influence of Longitudinal and Transversal Cracks on Load Capacity of Trolining Liners
(Poland) D-3-04 .................................................................................................................................................. 732
Tomasz Abel, Cezary Madryas

TRACK 4 – ENVIRONMENTAL & SUSTAINABILITY

Methodology for Calculating the Carbon Footprint of Underground Utility Projects D-4-01............................... 744
Samuel T. Ariaratnam, Shaik S. Sihabuddin, Ed Savage

How to Take Advantage of Green Thinking to Get More Funding for Infrastructure D-4-02 ....................... 754
Isabel Tardif

EPA Support of Technology Development for Rehabilitation D-4-03 .............................................................. 763
Ray Sterling, A. Selvakumar, L. Wang, R. Morrison

Service Connections Upgrade on a Structurally Rehabilitated Water Main D-4-04 ........................................... 773
Kamran Sarrami

TRACK 5 – SUBSURFACE UTILITY ENGINEERING (SUE) & UNDERGROUND IMAGING

Utilizing XYZ Mapping to Ensure a Successful Sluiping Project D-5-01 .............................................................. 778
Peter Monday, Linda M. Ward

Effective Use of SUE on Trenchless Technology Infrastructure Projects D-5-02 ................................................. 784
Lawrence Arcand

Underground Mapping - Adding Value to Trenchless Technology Projects D-5-03 ............................................. 792
John Scaife

Mapping Underground Assets with Fully Innovative GPR Hardware and Software Tools (Italy) D-5-04 ............ 800
Alessandro Simi, Mario Miniati

TRACK 1 – HDD ON-GRADE & ALIGNMENT ISSUES

Advances in Gravity Sewer Installations Using HDD E-1-01 .................................................................................. 810
Floyd Gunsaulus, Richard Levings, Dean Martens

Does the HDD Reaming Pass Remove Extreme Alignment Dog-Legs? E-1-02 ...................................................... 820
Jim Murphy, Glen Fyfe, Trevor Giesbrecht, Wes Dyck
On-Grade Large Diameter Directional Drilling E-1-03  
John Currey, Gene Woodbridge, Glen Duyvestyn, Hatch Mott MacDonald

An HDD Project with a Considerable Entry and Exit Elevation Difference E-1-04  
David Ward, Christopher Kesey, Thomas Keown, David Stanley

Installation of a New Sewer Line Up a Steep Hill Using HDD E-1-05  
Michelle Ramos, Matt Stephl

TRACK 2 – TUNNELING & PIPE JACKING

Selecting the Right Construction Method for a River Crossing E-2-01  
Janaka Y. Ruwanpura, Jason Lueke, Rob Townsgeo, Alan Miller

Failure and Repair of Mather Drain Tunnel, SRCSD Bradshaw Interceptor Section 7B Mather in California E-2-02  
Lysa Voight, Kyle Frazier, Scott Mueller, Ken Sorensen

The No Business Creek Tunnel - A Ground-Breaking Approach to Wastewater Collection E-2-03  
Michael Wooten, Manoj Bhimani, Roy Cook, William McMenimen

Building a Large Diameter Deep Sewer Pipeline Under Urban Constraints E-2-04  
Xiangquan Li, Bill Chavez

The Frictional Property of Lubricants and Its Impact on Soil-Pipe Interaction of Pipe Jacking (Taiwan) E-2-05  
K. Shou, J. Yen, M. Liu

TRACK 3 – CIPP

Hot Sewers - Experimental Evaluation of CIP Lining Systems for High Temperature Applications in Sewers E-3-01  
Erez Allouche, Shaurav Alam, Ilan Juran

72-in. Interceptor Lining in the City of Saskatoon, Saskatchewan E-3-02  
Keith Kingsbury, Simon Angus, Don Zaborski

Butterfield Storm Sewer CIPP E-3-03  
Dan Willems, Adam Crutchfield, Phil Dixon, Dave Krywiak

Pressure Pipe CIPP for Potable Water Systems E-3-04  
Weiping Wang

Recent International Developments in Testing of CIPP (United Kingdom) E-3-05  
John Gumbel

TRACK 4 – LEAK DETECTION & MONITORING

Evaluating In-Service Force Mains with Air Pocket and Leak Detection Technology E-4-01  
Chris Carroll, Michael S. Higgins, Don Murray

Palos Hills: Case Study in Asset Management and Project Planning for Large-Scale CIPP Rehabilitation E-4-02  
Kevin Coburn

Innovative Free-Swimming Acoustic Method for Pipeline Leak Detection E-4-03  
Richard Fletcher, Samuel T. Ariaratnam, Muthu Chandrasekaran

Integrated Project Delivery Method for Trenchless Projects E-4-04  
Sanjiv Gokhale

TRACK 5 – SUBSURFACE UTILITY ENGINEERING (SUE) & UNDERGROUND IMAGING

Advances in Underground Imaging E-5-01  
Mark R. Wallbom, Gary Young

A Real World Evaluation of Acoustic Inspection of Wastewater Force Mains E-5-02  
Henry R. Derr, Jackson Nxiainga, Phillip Hubbard

Big Pipe and Big Challenges - Proven Effective Technologies E-5-03  
Casey M Smith

The Mapping The Underworld Project (United Kingdom) E-5-04  
D. N. Chapman, C.D.F. Rogers, N. Metje, A.C. Royal, A.M Thomas
An Innovative Rehabilitation Technique for Pipes Containing Cables (Japan) E-5-05.................................1020
Toru Korekuni

TRACK 1 – HDD & CHALLENGING CONDITIONS

Design-Build Contract Minimizes Cost and Schedule for HDD Installation F-1-01.................................1029
Mary Asperger, Kathryn Wallin, David Bennett

The St. John’s Water Co. Water System Improvement Project Using PVC in Difficult HDD Projects F-1-02.................................................................................................................................1040
Richard Botteicher, Colleen Schild, Frank Iwanicki

HDD Ram Assist Methods – Planning Ahead for HDD Success F-1-03.......................................................1051
Kent Westendorf, Ed Savage

Rig Data Display and Transmission System F-1-04..........................................................................................1060
Julian Finch, John Teer, Thomas Teer

One Project, Six HDDs – The Nacimiento Water Project F-1-05.................................................................1070
John R. Hollenbeck, Tom Trott, Chuck Parker, Craig Camp

TRACK 2 – PIPE JACKING

Back-Loading Cutterheads - Improving Safety and Efficiency on Long Utility Crossings F-2-01..................1079
Tom Fuerst, James Elliott, Tony Mellegers

Study of the Construction of Rainwater Reservoir Facilities by the Unmanned Pneumatic Caisson Method (Japan) F-2-02........................................................................................................1089
Minoru Nakada

A Fundamental Study on the Reduction of Friction During Sewer Pipe Jacking (Japan) F-2-03.................1099
Yasumichi Kawai, Konichi Shinada, Kimiaki Takano, Tadashi Kawain

Property of Flyash Surfactant Injection into Over-Cutting Area as Lubricant for Slurry Pipe Jacking (Japan) F-2-04...............................................................................................................1110
Hideki Shimada, Yasuhiro Yoshida, Takashi Sasaoka, Kikuo Matsui

Pipe Ramming Under Three Active Mainlines in Difficult Soil Conditions F-2-05........................................1121
Joe Schrank, Mark Havekost, Stephen Njoloma

TRACK 3 – CIPP

CIPP Rehabilitation of Failing Twin 72-in. Corrugated Metal Pipes F-3-01...................................................1131
Greg McGrath, Brian Hagerich, John Schroeder, Patrick R. Victor, Chuck Iley

Challenges and Lessons Learned Using Air Inversion and Stream Cure for CIPP Sewer Rehabilitation F-3-02......................................................................................................................1141
Marc A. Lehmann, John P. Schroeder, Charles M. Saunders

Styrene Removal Adds to the Challenges of Rehabilitating Sewer Pipeline in Reno, Nevada F-3-03..............1148
Thayne Loendorf, Dustin Waters

Adopting UV Fiberglass CIPP in Sewer and Stormwater Rehabilitation Bid Specifications F-3-04..............1156
Douglas Sain

UV-Light Curing of CIPP with LEDs (Germany) F-3-05...........................................................................1162
Michael Roeling

TRACK 4 – CURRENT TRENCHLESS RESEARCH & DEVELOPMENT

City of Calgary, Alberta River Crossing Project Uses Flexible Tender Approach F-4-01..............................1170
Gregory Kochushaver, Duane Strayer

Pre-Qualifying Trenchless Rehabilitation F-4-02...........................................................................................1178
Tony Dill, Jim Shelton

Stability of Deteriorated Metal Culverts Including the Effect of Soil Erosion F-4-03...............................1186
Mohamed El-Tahar, Jan Moore

Practical Prescriptions on Environmental Stress Cracking Resistance of Polyethylene F-4-04.................1196
Joy Cheng, Alexander Penlidis, Maria Anna Polak

Partnering in No-Dig Projects and Reducing the Impact of Risks and Uncertainties (Denmark) F-4-05........1206
Per Hallager, Gerda Hald
TRACK 5 – ASSET MANAGEMENT

Standard Pipe Infrastructure Data Model for Comprehensive Asset Management F-5-01 ........................................ 1215
  Alison St. Clair, Thiti Angkasuvansiri, Sunil Sinha
Opening up a VISTA of Buried Assets (United Kingdom) F-5-02 .......................................................... 1226
  Jo Parker
Advances in Pipeline Asset Management using Digital Side Scanning Evaluation Technology F-5-03 ........ 1235
  Mark Knight
Innovative Trenchless Practices – The City of Edmonton, Alberta’s Perspective F-5-04 .......................... 1245
  Dina Philip Alex, Siri Fernando
Rehab or Be Had with Renewal Methods 23 ............................................................................. 1255
  Gary L. Lienberger, Jamie Lynn Quick
Factors Affecting the Quality of Flexural Properties from CIPP Field Samples 107 .................. 1258
  Tony Araujo, Sujany Sabeshan, Bruce Yao

Author Index
