<tr>
<td>Guofeng Zhang, Zushu Li</td>
<td></td>
</tr>
<tr>
<td>The Road Safety Prediction Model Based on the Fuzzy Linear Regression</td>
<td>17</td>
</tr>
<tr>
<td>Chen Bin, Luo Yong</td>
<td></td>
</tr>
<tr>
<td>An AdaBoost Algorithm with SVM Based on Nonlinear Decision Function</td>
<td>20</td>
</tr>
<tr>
<td>Wei Wu, Zhang Yanan, Wu Linlin</td>
<td></td>
</tr>
<tr>
<td>The Mobile Robot GPS Position Based on Neural Network Adaptive Kalman Filter</td>
<td>24</td>
</tr>
<tr>
<td>Wei Wu, Wei Min</td>
<td></td>
</tr>
<tr>
<td>A New Training Algorithm for Diagonal Recurrent Neural Network Based on Particle Filter</td>
<td>28</td>
</tr>
<tr>
<td>Deng Xiaolong, Zhou Pingfang</td>
<td></td>
</tr>
<tr>
<td>Summarization for Internet News Based on Clustering Algorithm</td>
<td>32</td>
</tr>
<tr>
<td>Hui Yu</td>
<td></td>
</tr>
<tr>
<td>A Novel Artificial Immune Algorithm for Job Shop Scheduling</td>
<td>36</td>
</tr>
<tr>
<td>Lu Hong</td>
<td></td>
</tr>
<tr>
<td>On the Influence of Region Mismatch at Training and Testing in Region-Related Concept Detection</td>
<td>40</td>
</tr>
<tr>
<td>Zan Gao, Zhicheng Zhao, Tao Liu, Xiaoming Nan, Anni Cai</td>
<td></td>
</tr>
<tr>
<td>The Understanding between Two Agent Crawlers based on Domain Ontology</td>
<td>45</td>
</tr>
<tr>
<td>Yunguo Wang, Yajun Du, Shaoming Chen</td>
<td></td>
</tr>
<tr>
<td>Research on Multi-Relational Classification Approaches</td>
<td>49</td>
</tr>
<tr>
<td>Peng Zhen, Lifeng Wu, Xiaoju Wang</td>
<td></td>
</tr>
<tr>
<td>Selection of Security Elliptic Curve Based on Evolution Algorithm</td>
<td>53</td>
</tr>
<tr>
<td>Maocai Wang, Guangming Dai, Hanping Hu, Lei Pen</td>
<td></td>
</tr>
<tr>
<td>Back Propagation Neural Network for Short-term Electricity Load Forecasting with Weather Features</td>
<td>56</td>
</tr>
<tr>
<td>Yong Wang, Dawu Gu, Jianping Xu, Jing Li</td>
<td></td>
</tr>
<tr>
<td>Application of Synthetic Neural Network for Fault Diagnosis of Steam Turbine Flow Passage</td>
<td>60</td>
</tr>
<tr>
<td>Lihua Cao, Yunlong Zhou, Wei Xu, Yong Li</td>
<td></td>
</tr>
<tr>
<td>An Efficient Algorithm for Fingerprint Matching Based on Convex Hulls</td>
<td>64</td>
</tr>
<tr>
<td>Chengming Wen, Tiande Guo</td>
<td></td>
</tr>
<tr>
<td>An Adaptive Algorithm for Smoothing Fingerprint Orientation Fields</td>
<td>68</td>
</tr>
<tr>
<td>Xiang Can, You Lin</td>
<td></td>
</tr>
<tr>
<td>The Improved Training Algorithm of Back Propagation Neural Network with Self-adaptive Learning Rate</td>
<td>71</td>
</tr>
<tr>
<td>Yong Li, Yang Fu, Hui Li, Si-Wen Zhang</td>
<td></td>
</tr>
<tr>
<td>Nutritional Diet Decision Using Multi-objective Difference Evolutionary Algorithm</td>
<td>75</td>
</tr>
<tr>
<td>Zhenkui Pei, Zhen Liu</td>
<td></td>
</tr>
<tr>
<td>The Back Analysis of Mechanics Parameters Based on DEPSO Algorithm and Parallel FEM</td>
<td>79</td>
</tr>
<tr>
<td>He Huang, Zhihua Wei, Zuoqiu Li, Wenbi Rao</td>
<td></td>
</tr>
<tr>
<td>Gradient-Based Optimization of Kernel Polarization for RBF Kernels</td>
<td>83</td>
</tr>
<tr>
<td>Jianfeng Xu, Lan Liu</td>
<td></td>
</tr>
<tr>
<td>An Algorithm for Estimating Fundamental Matrix Based on Removing the Exceptional Points</td>
<td>86</td>
</tr>
<tr>
<td>Liu Rui, Wang Feng</td>
<td></td>
</tr>
<tr>
<td>An Information Fashion Algorithm Based on Extremal Optimization</td>
<td>89</td>
</tr>
<tr>
<td>XiaoGiang Pu, Anshou Yu</td>
<td></td>
</tr>
<tr>
<td>Efficient Improvement for Adaboost Based Object Detection</td>
<td>93</td>
</tr>
<tr>
<td>Luo Sheng, Ye Xin-quan</td>
<td></td>
</tr>
<tr>
<td>Genetic Algorithm Rule Definition for Denial of Services Network Intrusion Detection</td>
<td>97</td>
</tr>
<tr>
<td>Yong Wang, Dawu Gu, Xiaocia Tian, Jing Li</td>
<td></td>
</tr>
</tbody>
</table>
Equivalence of Modified Mann and Multi-step Noor Iteration Methods with Errors ......................................................... 101
Ren-Xing Ni

Energy Landscape Paving Algorithm for Solving Circles Packing Problem ................................................................. 105
Jingfa Liu, Danhua Xu, Yonglei Yao, Yu Zheng

Real-time Multimedia Quality Assessment Based on Media Delay Index and Support Vector Machine .................. 109
Wenbi Rao, Yingzhu Li

SESSION 2: WEB INTELLIGENCE

A Novel Supervised Clustering Based on the Feature Classification Weight ................................................................. 113
Qi Zhao, Haitao Qu

The Construction of Transactions for Web Usage Mining ................................................................................................. 117
Yan Li, Bo-qin Feng

Link Analysis Application in Personalized E-learning Environment .................................................................................. 121
Lianhong Ding, Qi Tao, Peng Shi

A Hybrid Music Recommendation System by M-LSA ........................................................................................................ 125
Bin Hu, Meng Guo, Hongbin Zhang

Application of Domain Ontology-Based on Semantic Web Technology ........................................................................ 129
ChunNian Liu, JunYing He

The Application of Improved Algorithm for Fuzzy Comprehensive Evaluation on the QoS of Web Service .......... 133
Qi Zhao, Yanliuao Tan

SESSION 3: INFORMATION PROCESSING

A Method Using Nonparametric Hidden Markov Trees for Image Denoising ................................................................. 137
Wang Song, Wang Weihong

A Novel Wavelet Transform Algorithm for Feature Extraction of Hyperspectral Remote Sensing Image .................. 141
Feng Jing, Shu Ning

A Scalable Content-based Image Retrieval Scheme Using Locality-sensitive Hashing ...................................................... 145
Wang Weihong, Wang Song

A Novel Spectrum Allocation Mechanism Based on Graph Coloring and Bidding Theory ........................................ 149
Yutao Liu, Guisen Xu, Xuezhii Tan

Application Research of Image Matching Based on Morphology Description Matrix and Genetic algorithm .......................................................... 153
Yang Wenli, Zeng Zhiyuan

Triangular Fuzzy Number Method for Fuzzy Multi-sensor Information Fusion ............................................................. 156
Jiaying Dong

Feature Point Detection for Early Processing of Freehand Sketch Recognition .......................................................... 160
Jingwei Ye, Yongxin Zhu, Zhijun Li

A Model for CEO Strategic Leadership Evaluation Based on Information Entropy and Unascertained Measure ...... 164
Xing Gang, Ren Rongrong

Unsupervised Segmentation Method for Color Image Based on MRF ........................................................................ 168
Yimin Hou, Xiangmin Lun, Wei Meng, Tao Liu, Xiaoli Sun

Nude Image Detection Based on SVM .......................................................................................................................... 172
Wang Xin-Lu, Li Xiao-juan, Liu Xiao-bo

Edge Detection Algorithm for Uneven Lighting Image Based on Vision Theory ......................................................... 176
Zhou Lei, Hua Gang, Xu Dongmei, Wu Haitao

Shape Representation and Recognition in High Dimensional Feature Space ............................................................ 180
Hong Gu, Guangzhou Zhao, Hongbo Wang

Feature Extraction, Feature Selection and Classification from Electrocardiography to Emotions .............................. 184
Chang-wei Ma, Guang-yuan Liu

Ensemble Methods of Face Recognition Based on Bit-plane Decomposition ............................................................... 188
Kai Li, Lingxiao Wang

The Preprocess Research on Chinese Handwriting Identification .................................................................................... 192
Wei Li, Zhen Peng Pang, Fei Sui

A Method of Emotion Recognition Based on ECG Signal .............................................................................................. 196
Ya Xu, Guang-Yuan Liu
SESSION 4: BUSINESS INTELLIGENCE

A Strategy for Resource Allocation and Pricing in Grid Environment Based on Economic Model
Bin Lu, Jianjing Ma............................................................... 212

A Self-Cognitive Algorithm Applied in Product Conceptual Design
Peng Zhen, Lifeng Wu, Xingjing Du.......................................... 216

Edge Based Chinese Wine Classification Using FCM and Kernel Principal Component Analysis
Rong Gao, Xingbo Sun, Yi Wan.................................................. 219

The Study on Construction of E-government Platform Based on SOA and Efficiency Comparison of Serving Model
Chunnian Liu, Hua Xiao........................................................... 224

Application of Grey Relational Clustering and Data Mining in Data Flow of E-Commerce
Qu Zhiming, Liang Xiaoying..................................................... 228

Application of Grey Relation Clustering and CGNN in Gas Concentration Prediction in Top Corner of Coal Mine
Qu Zhiming, Liang Xiaoying..................................................... 232

An Application Customization and Service Composition Method Based on Max Application Template
Jiang Jing, Pan Zhen-Kuan, Yin Xian-Zhen, Xia Bai-Qiang.............. 236

Application of BP Neural Network Approach for Cost Estimation of Wastewater Treatment Plants: A Case Study of Taiwan Region
Ru Jiang, Huayue Zhu, Yuhua Chang......................................... 241

Dynamic Control Model of Engineering Costs Forecasting in Implementation Stage for Construction Enterprises
Liu Jianbing, Ren Hong, Li Zhiming........................................... 245

Research on Distributed Data Mining in E-commerce Environment Based on Web Services and Mobile Agent
............................................................... 250

Return Intervals Analysis of the Hong Kong Stock Market
Hong Zhang, Nianpeng Wang, Keqiang Dong................................ 253

The Application of Macro-Economic Prediction Based on Improved Gene Expression Programming
Yan Jingfeng, Li Guoqing.......................................................... 257

Pivoting Algorithm for Optimization Model of Portfolio Rebalancing with Transaction Costs
Yanwu Liu, Zhongzhen Zhang.................................................. 260

The Comparative Empirical Analysis of China and India's Use of FDI and the Implications for China
Liu Ting, Chen Chong-xian....................................................... 264

SESSION 5: WIRELESS COMPUTING AND NETWORK

An Algorithm of Service Selection Based on QoS Preference in Network Computing Environment
Quan Liang, Yuanzhao Wang.................................................... 267

A Cooperative Semantic Caching Scheme for Super-Peer Networks
Yunsong Tan, Yuntao Wu.......................................................... 271

Evolving Complex Network for Classification Problems
Peng Wu, Yuehui Chen, Tao Xu, Haokui Tang................................ 275

Comparative Analysis of Motifs in Giant Strong Component of Metabolic Networks
Wei Liu, Dewu Ding................................................................. 279

SESSION 6: INTELLIGENT SYSTEM

Distributed Fusion Estimation Based on Pseudo-measurement for Multi-sensor System
Jin Xue-bo, Du Jing-jing, Wang Lei-lei......................................... 282
Tracking in Distributed Multisensor System Update with Out-of-Sequence Information ................................................................. 286
Jin Xue-bo, Wang Lei-lei

Experimental Study on Different Ignition System Matching Different Spark Plug Gap ................................................................. 290
Gu Yufeng, Fang Zongde

Software Architecture Design and Implementation of Document Filter System ............................................................................ 294
Guanghui Zhao, Dan Liu, Huazhu Song, Chengming Zou

The Study of Teaching Reform Project Pool Management System in Applied College ................................................................. 298
Chao Wang, Xin Fang, Sa Yang, Biao Huang

The Paradigms for the Inquiry in Decision Support System (DSS) and a Design Framework of Cognitive DSS ................................................................. 301
Yinghong Zhong, Yingchun Zhong

Synchronization of Discrete-Time Chaotic Systems Based on Takagi-Sugeno Fuzzy Model ................................................................. 305
Yong-ai Zheng, Yi-bei Nian, Fei Sun

The Research of Emotional Cognition Model which Based On Bayesian Network within Intelligent Tutoring System ................................................................. 309
Liu Jiang Hua, Wang Wan Sen

Constructing Customer’s Value Analysis Model Based on Expert System for Leisure Farms ................................................................. 313
Feng Qian, Linwen Xu

The Lack of Effectiveness in the Prompt Interactive Response System (IRS) on the Class and its Measures ................................................................. 317
Wang Dujuan, Liu Jing

Shot Type Classification in Sports Video Based on Visual Attention ................................................................................................. 321
Congyan Lang, De Xu, Yiwei Jiang

SESSION 7: INTELLIGENT CONTROL

Research and Design of Coal Seam Water Infusion Control System ................................................................................................. 325
Shi Wei, Liu Jian-hui

Research on Control Problem of PenduBot Based on PSO Algorithm ................................................................................................. 328
Shaoqiang Yuan, Dong Wang, Xingshan Li

Fuzzy Control of Air-Suction Seeding Device Based on SPCE061A ................................................................................................. 332
Guo Lin, Wang Nai-kang, Li Wen-bin, Zhang Jun-mei

Fuzzy Control System for Intelligent Car ......................................................................................................................................... 336
Xiao-feng Wan, Yi-xi Xing, Li-xiang Cai

Electric Wheelchair Controller Based on Parameter Self-Adjusting Fuzzy PID ............................................................................ 340
Zhihong Tian, Wenhai Xu

Knowledge-increasable Neural Network Group and its Control Application ............................................................................ 344
Jin Li, Hai-wei Fan, Xiang-mo Zhao

Research on the Genetic Neural Network for the Computation of Ship Resistance ........................................................................ 348
Chen Ai-guo, Ye Jia-wei

Fuzzy Logic Control of Integrated Hydraulic Actuator Unit Using High Speed Switch Valves ........................................................................ 352
Liu Jianxin, Tan Ping

Iterative Discrete Particle Swarm Optimization Algorithm and Its Application to Batch Process Optimization ........................................................................ 356
Ganping Li, Qingnian Wang

Credibilistic Risk Optimization Models and Algorithms ............................................................................................................. 360
Dong Wen, Jin Peng

SESSION 8: INDUSTRY APPLICATION

On-Line Diagnosis of the Motor Circuit Based on RBF-CMGA ........................................................................................................... 364
Hu Mingjiang, Qi Lijiao

Bionic Self-learning of Two-wheeled Robot Based on Skinner’s Operant Conditioning ........................................................................... 368
Hong-ge Ren, Xiao-gang Ruan

Forecast of Poyang Lake’s Water Level by Wavelet-ANFIS Model ........................................................................................................... 372
Rijun Zhang, Zengchuan Dong, Huijiang Guo

High-order Variation of Active Contours and Its Application ........................................................................................................... 375
Guohua Chen, Guoqiang Han

The Design of MC9S12DG128 Embedded Intelligent Car .................................................................................................................... 380
Xiao-feng Wan, Li-xiang Cai, Yi-xi Xing

</table>
SESSION 1: INTELLIGENT COMPUTING

Global Exponential Stability Analysis for Uncertain Neural Networks with Discrete and Distributed Delay-Varying Delays
  Wei Guan, Yiming Chen, Hongxia Sun, Zenghai Xu

Neural Network Algorithm for Solving System of Linear Equations
  Zhigang Zhou, Lihong Chen, Li Wan

Fingerprint Segmentation Using Cellular Neural Network
  Jiayin Kang, Wenjuan Zhang

Research on Courses Relationship Model Based on Bayesian Networks
  Jianming Huang, Jiaoli Fang

Rules Extraction from ANN Based on Clustering
  Jie Ma, Dongwei Guo, Miaox Liu, Yu Ma, Sha Chen

Getting Mobile Beacon Node Path in WSN Based on Ant Colony Algorithm
  Hu Bing, Li Hongsheng, Liu Sumin

A Solution for TSP Based on Artificial Fish Algorithm
  Wang Jian-ping, Hu Meng-jie

A Possibility-Probability Based Model for Distribution System Reliability
  Jeeng-Min Ling

An Efficient Binding Algorithm for Forward-chaining HTN Planning Based on Object-oriented Knowledge
  Jingge Song, Jianzhong Cha, Yiping Lu

Shape and Structure Features Based Chinese Wine Classification
  Yi Wan, Xingbo Sun, Rong Guo

Feature Selection Based on SVM for Credit Scoring
  Ping Yao

Judgemental Minimal and Maximal Rules Learning and Its Application
  Guo-Fang Qiu

Approaches to Decision Inference Rules Based on Concept Lattices
  Ping Yao

An Improved PSO-Based Rule Extraction Algorithm for Intrusion Detection
  Zhao Chang, Wang Wei-ping

Severity Analyses of Single-Vehicle Crashes Based on Rough Set Theory
  Chaosheng Wu, Hu Lei, Ming Ma, Xingping Yan

Variable Precision Neighborhood Rough Set Based Feature Selection for Credit Scoring
  Ping Yao

Multi-target Tracking Algorithm Based on Rough and Precision Association Mixing FCM in WSN
  Mei Liu, Daoping Huang, Huanping Gao

A Collaborative Filtering Recommendation Algorithm Based on Item Genre and Rating Similarity
  Ye Zhang, Wei Song

Coorporative Parking Negotiation and Guidance Based on Intelligent Agents
  Wang Longfei, Chen Hong

An Index Creating Method Based on an Improved Clustering Algorithm
  Ze-biao Zhang, Jian-pei Zhang, Jing Yang, Ruo-yu Li

Gasoline Blending Scheduling Based on Uncertainty
  Xiaojingqiang Zhao, Ying Wang

Large Deviation on Random Sums for a Double Type-insurance Risk Model
  XiaoLiu Zhan, Li Yu

Ontology Component Development
  Shenghong Yang, Jia Yan
An Intelligent Algorithm Based on Grid Searching and Cross Validation and its Application in Population Analysis ................................................................. 601
Yangu Zhang, Saiping Chen, Yi Wan

Document Classification Algorithm Using Kernel LPP ................................................................. 605
Zuqiang Wang, Xu Qian

Core and Attribute Reduction Algorithms Based on Compatible Discernibility Matrix .................. 608
Chuanjian Yang, Hao Ge, Guangshun Yao, Lisheng Ma

An E-negotiation Model Based on Multi-agent and Ontology ....................................................... 612
Pu Qiu Mei, Zhang Hong, Cao Yong Cun, Pan Xiu Qin

Stretching Technique-Based Clonal Selection Algorithm for Flexible Job-shop Scheduling ........... 616
Lu Hong

Application of Genetic Algorithms in Ranking Method of Judgment Matrix ................................. 620
Ning Zhengang, Chi Jing, Gao Yanfen

A Liver Segmentation Algorithm Based on Wavelets and Machine Learning ............................... 627
Subhui Luo, Jesse S. Jin, Stephan K. Chalup, Guoyu Qian

The Design and Implementation of a Pseudo Random Number Generation Algorithm ................. 631
Zuooh Liu, Minghe Huang, Shaoyun Zhu

Application of RBF Algorithm in Prediction of Threshold Pressure Gradient ............................... 635
Changjian Zhu, Xiujuan Zhao, Weihua Yang

SMT Automatic Optical Inspection Path Planning Based on MDSPO Algorithm ........................... 639
Bin Ren, Liangjun Cheng

An Improved LSSVM Regression Algorithm .................................................................................. 643
Likun Hou, Qingxin Yang, Jinlong An

Measurement of Managerial Performance Based on Two-Stage Relative Efficiency Method .......... 646
Xu Yan-li, Feng Ying-jun

SESSION 2: INTELLIGENT CONTROL AND OPTIMIZATION

The Design of Controller Based on Tendency Surface .................................................................... 650
Yucheng Li, Hongxing Li, Maoshu Wang

Redundant Instruments Placement Using ACO ............................................................................... 654
Kechang Fu

A Software-Controlled Cache Coherence Optimization for Snoopy-Based SMP System ................. 658
Youhui Zhang, Zuqiang Qian, Weimin Zheng

Soft-sensor Modeling of Cement Raw Material Blending Process Based on Fuzzy Neural Networks with Particle Swarm Optimization ................................................. 661
Xinggang Wu, Mingzhe Yuan, Haihui Yu

Fuzzy Rule Based Traffic Signal Control System for Oversaturated Intersections ......................... 665
Syed Muhammad Sheraz, Syed Ali Abbas, Humera Noor

Research on Control Algorithm for DYC and Integrated Control with 4WS ................................. 669
Zhu Tianjun, Zong Changfu

Decoupling Control Using a PSO-Based Reinforcement Learning .................................................. 673
Wang Xin, Yang Chun-hua, Qin Bin

Accelerating Particle Swarm Optimization Algorithms Using Gaussian Process Machine Learning ................................................................. 677
Guoshao Su

High Dimensional Multi-objective Grey Optimization of Planetary Gears Type AA with Hybrid Discrete Variables .................................................................................. 681
Youxin Luo, Degang Liao

Design and Application of Support Vector Regression Algorithm Based on Ant Colony Optimization ................................................................. 685
Han Zhen-yu, Lian Ming, Fu Hong-ya

Nonlinear Systems Fault Diagnosis with Differential Elimination .................................................. 689
Zhang Jiafan

A Reconfigurable Manufacturing Execution System and its Component Reuse ............................... 693
Li Zhaochui, Chen Yan, Chen Xiaquan

Projective Synchronization in Coupled Integral and Fractional Order Hyper-chaotic Lorenz Systems .................................................................................. 697
Xing Lifen, Shang Gang, Liu Jie, Li Xinjie, Dong Pengzhen

Inexact Parallel Relaxed Multisplitting Algorithm for Linear Complementarity Problem ................. 701
Banxiang Duan, Xiaoping Zhu, Xiaoyu Wu
The Non-linear Analysis of Beams Strengthened by Steel Plate ................................................................. 705
Xianmin Li, Yajun Zhao

A Smoothing Quadratically Convergent Algorithm for Generalized Linear Complementarity Problem in Engineering Modeling ........................................................................................................... 709
Hongchun Sun

On the Consistency of Bayesian Variable Selection for High Dimensional Linear Models ............................... 714
Shuyun Wang, Yihui Luan

SESSION 3: WEB COMPUTING AND SYSTEMS

Independent Global Constraints Web Service Composition Optimization Based on Color Petri Net ................. 718
Liu Xiangwei, Xu Zhicai

Construction and Test of Web Service Solution for E-government ................................................................ 722
Wenli Dong

NGOSS Data Management Solution Based on Web Service ............................................................................. 726
Wenli Dong

Intelligent Web Map Service Aggregation ......................................................................................................... 730
Qiang Wang, Jiayao Wang

Distributed Data Mining Based on Semantic Web and Grid ................................................................................ 733
Huimin Wang, Guihua Nie, Kui Fu

The Designing and Implementing of Reverse Logistics Management Information System Based on E-business ................................................................................................................................. 736
Jia LiWei, Li Kun, Liu Fuxing

Examination System Based on Script Engine Technology .................................................................................. 740
Jialing Zhao, Weifeng Jiao, Wenwen Sheng

A Multi-objective Model of Information System Outsourcing Decision for Suppliers Selection ........................... 743
Cao Ping, Chen Fuji, Zhang Jian

Intelligence Analysis Based on Intervenient Optimum Learning Guide System ......................................................... 747
Zengtang Qu, Ping He

SESSION 4: INFORMATION PROCESSING

Secret Image Sharing with Reversible Steganography ......................................................................................... 751
Chin-Chen Chang, Pei-Yu Lin, Chi-Shiang Chan

Multi-Meanings Image Synthesis System ........................................................................................................ 755
Wenzhao Liu, Minyong Shi

The Enhancement for Foggy Traffic Image Based on EM Algorithm ................................................................. 759
Chen Xiangqiao, Wu Qing, Yan Xinping, Chu Xiuming

Research on Three-dimensional Cartilage Thickness Measurement of Femoral Head in Magnetic Resonance Images ......................................................................................................................... 763
Cao Yu, Zhao Jie, Cheng Yuanzhi

Textile Wrinkle Shaped from Image .................................................................................................................. 767
Beibei Li, Zhao Zhihong

Optimization of the bwgeom Function in the MATLAB Image Processing Toolbox for Binary Skeleton Computation ....................................................................................................................... 771
Meihua Bao, Siyu Guo, Qiu Tang, Fan Zhang

Research on Security for Personal Information and Privacy Under Network Environment ................................. 775
Yong Yu, Qin Wang, ZunPing Ke

An Effective Signal Processing Method to Musical Information Retrieval .......................................................... 778
Li Peng, Zhou Mingquan, Wang Xuesong, Li Nansha

Design of Incentive Mechanism for Independent Directors Based on Monitoring Mechanism under Asymmetric Information Condition ................................................................................................................. 782
Xu Yan-li

Ontology Based Information Integration of Heterogeneous Resources ............................................................... 786
Xia Li, Bei Wu

Deep Semantic Integration for Information System ............................................................................................... 790
Zhenxin Qu, Shengqun Tang

An Approach to Measuring Software Development Risk Based on Information Entropy .................................... 794
Jiang Rong, Liao Hongzhi, Yu Jiankun, Sun Yafei, Li Junlin, Chen Lihua
On Modeling Data Mining with Time Granularity .......................................................... 797
Zhong Luo, Wu Jun

A Data Embedding Scheme Based on a Magic Matrix and Wet Paper Codes .................. 801
Chin-Chen Chang, Yi-Hui Chen, Zhi-Hui Wang, Ming-Chu Li

Real-time Detection for Anomaly Data in Microseismic Monitoring System ................. 805
Liu Li-li, Ji Chang-peng

A Novel Data Fusion Algorithm Based on Wavelet Packet Analysis ............................. 809
Li Hong-lian, Zhang Wei-li, Yuan Hui-jian, Zhang Jun, Zhou Le-tao, Jiang Qiang

A Local Rarest-Random-Heuristic Data Scheduling for P2P VoD System .................... 813
Shaowei Su, Zhentan Feng, Jinlin Wang, Yifeng Lu, Jiali You

An Efficient Dynamic Load Balancing Scheme for Heterogenous Processing System .... 817
Xiaotian Tong, Wanneng Shu

A Clinical Decision Support System for Metabolism Synthesis ................................ 821
Qunyi Zhou

Distributed Loom Running Monitoring System Based on ZigBee Technology ............... 824
Dong Fang Wu, Jia Xiang Su

A Novel Watermarking Technology Based on Lorenz Chaotic Attractor ....................... 828
Yaqin Li, Cao Yuan, Yan Huang

Chinese Writer Identification Based on the Distribution of Character Skeleton ............. 831
Luo Wei, Zhang Dexian, Wang Feng, Gong Zhile, Zhu Min, Bao Na

A Strong Law of Large Numbers for Markov Chain Fields on a Special Non-homogeneous Tree ............................................................. 835
Jin Shaohua, Zhang Yanyan, Wan Yanping, Chen Xiaoyin

The Approximation to the Random Fields Indexed by a Non-homogeneous Tree ......... 839
Jin Shaohua, Jiang Hui-hui, Sun Shu-guang, Wan Yan-ping

A Feature Selection and Extraction Method for Uyghur Handwriting-Based Writer Identification ................................................................. 843
Karban Ubul, Dilmurat Tursun, Askar Hamdulla, Alim Aysa

Corner Detection of the Chinese Characters Based on First-Order Difference .......... 847
Liao Wenzhi, Pi Youguo

SESSION 5: MANAGEMENT ENGINEERING

Approximate Computation of Nash Equilibrium in Complex Simulated Economic System ............................................................. 851
Minghong Zhang, Bin Wang, Shan Zou

Deformation Analytic Computation of Throttle Slice of Shock Absorber ..................... 855
Changcheng Zhou, Canchang Liu, Lilei Zhao

The Application of Unascertained Measurement Model in Evaluation of Real Estate Investment Environment ...................................................... 858
Changlong Wang, Yanming Qi

A Study on CRM Technology Implementation and Application Practices .................. 863
ChunNian Liu, XiaoWen Zhu

Simulation of Market Mechanism in Promoting Demand Side Management by Open-agents Model ................................................................. 867
Kehu Zhang, Zhaojun Ji, Xiandong Tan

Modeling of Product Development Management in Virtual Enterprise Based on Unified Modeling Language ................................................................. 871
Rongjun Tu, Weidong Liu

Computer Analysis Algorithm for Stability of the Extended Dynamic Leontief Input-output Model ................................................................. 875
Xiumei Wu, Lei Jiang

Forecasting Stock Returns Based on Spline Wavelet Support Vector .......................... 879
LingBing Tang, HuanYe Sheng

SESSION 6: NETWORKS

The Research of Worms in P2P Networks .................................................................... 882
Xie Chunyan, Yin Zhiyu

Quality Evaluation of Universities Undergraduate Practice Teaching Work Based on Artificial Neural Network ................................................................. 886
Changlong Wang, Yanming Qi

Design of Collaborate Schedule for Object Detection in Wireless Sensor Networks .... 890
Shuo Xiao, Kaitcheng Li, Xueye Wei, Yu Wang
SESSION 7: INTELLIGENT INFORMATION TECHNOLOGY APPLICATIONS

Optimal Portfolio Selection under the Short-range Fractional Brownian Motion ............................................ 923
Jianwei Gao

Digital Workshop Layout Evaluation and Adjustment Based on the Fuzzy-AHP and Generic Algorithm ... 927
Chen Bing, Wang Shaowei, Li Shan, Wang Gang

Fault Diagnosis and Isolation Process of Gas Turbine Based on Fault Dependency ..................................... 931
Yongbao Liu, Liangli Ma, Shuhong Huang

A Kind of Endogenous Growth Model Considering the Restraints of Nonrenewable Resources and Environment Pollution ............................................................. 939
Jun He, Ting Liu, Huaping Chen, Xiao Ding

An Efficient Discussion for the Earthquake Searching Problem ...................................................................... 943
Wang Qi, Liu Xiaoshan, Cao Nantun

Grey-relation Based Approach to Uncertain Multiple Attribute Decision Making ....................................... 946
Quan Zhang, YanFeng Tian, Yang Liu

Vision Based Obstacle Recognition Approach of a Power Line Inspection Robot ........................................... 949
Qi Zuo, Zhi Xie, Zijian Guo

Assessing the Architectural Design Services by Using DEMATEL Approach ............................................. 953
Shouming Chen, Jie Li

Test Case Generation Method for BPEL-Based Testing .................................................................................... 957
Wenli Dong

Fault Diagnosis of Bearing Based on Empirical Mode Decomposition and Decision Directed Acyclic Graph Support Vector Machine .............................................................................................................. 961
Qiuchuan Hao, Wang Ziyong

Aspect-oriented Requirement and Reuse Aspect ................................................................................................. 965
Cai Hongli, Zhang Yang, Zhou Xianlin, Peng Jing, Wang Jianliang

A Self-adapting Algorithm for Identifying Rheology Model and Its Parameters of Rock Mass ................... 968
Bing-Rui Chen, Xia-Ting Feng, Chengxiang Yang

Stress Analytic Computation of Throttle Slice of Telescopic Shock Absorber ............................................. 972
Changcheng Zhou, Jie Meng, Yuanyi Liu

Visual Simulation of the Temperature Field in the Ceramic Roller Kiln ............................................................. 976
Zhihua Wei, Paipai Chang, Wenbi Rao, Zhen Li

Technology Research on Energy-Saving Transform of Existing Residential Buildings in Han Dan City ........ 980
Wang Chang-long, Li Yao

Study on Intelligence Computing Traffic Based on One Destination Evacuation ...................................... 985
Miao Wang, Yu Pan, Fang Pan

Multilayer Anchor Alignment in AC-E Parallel Corpora of Chinese Tea Classics ........................................... 988
Jiang Yi, Jiang Xin, Wang Dapeng

The Evaluation Model of College Students’ News Sensitivity Based on the Unascertained Measure ............. 992
Yanming Qi, Wang Chang-long
