2009 International Conference on Advances in Social Networks Analysis and Mining

(ASONAM 2009)

Athens, Greece
20 – 22 July 2009
2009 Advances in Social Network Analysis and Mining

ASONAM 2009
Table of Contents

Full Papers

Applications of Social Networks

A Journey to the Core of the Blogosphere .................................................................1
Darko Obradović and Stephan Baumann

Structural Hole and Personal Innovativeness in a Bureau of Health ..............................7
Hsieh-Hua Yang, Hung-Jen Yang, Fen Fen Huang, and Ke-Wu Yao

Exploratory Study of Intra-Organizational Learning from Social Network
Perspective within a Spanish Knowledge Intensive Company ................................13
Jesús David Sánchez de Pablo González del Campo, Miha Škerlavaj,
Fátima Guadamillas Gómez, and Vlado Dimovski

Privacy and Meta Aspects

A Trustable Reputation Scheme Based on Private Relationships ...............................19
Shin-Yan Chiou, Shih-Ying Chang, Ghita Mezzour, Adrian Perrig, and Hung-Min Sun

The Economic Benefits of Web Mining ...................................................................25
David Kinzel, Micah Klettke, Paul Uppal, Naheed Visram, Keivan Kianmehr,
Reda Alhajj, and Jon Rokne

Social Aspects

Getting Online but Still Living Offline: The Complex Relationship
of Technology Adoption and In-person Social Networks .........................................33
Cynthia Putnam and Beth Kolko

An Analytical Way to Find Influencers on Social Networks and Validate
their Effects in Disseminating Social Games ..........................................................41
Erica Suyeon Kim and Steve Sangki Han

Impact of Using Semantic Social Networks on Organizations .................................47
Ali Fatalian, Zahra Amin Nayeri, and Mohammad Azadnia
Trade-offs between Agility and Reliability of Predictions in Dynamic Social Networks Used to Model Risk of Microbial Contamination of Food .......................................................... 125

Artur Dubrawski, Purnamrita Sarkar, and Lujie Chen

Predicting Links in Social Networks Using Text Mining and SNA .......................................................... 131

Alon Bartal, Elan Sasson, and Gilad Ravid

Automatic Mapping of Social Networks of Actors from Text Corpora: Time Series Analysis .......................................................... 137

James A. Danowski and Noah T. Cepela

From Social Networks to Behavioral Networks in Recommender Systems .......................................................... 143

Ilham Esslimani, Armelle Brun, and Anne Boyer

Predicting the Nexus between Post-Secondary Education Affordability and Student Success: An Application of Network-Based Approaches .......................................................... 149

Ashwin Arulselvan, Pilar Mendoza, Vladimir Boginski, and Panos Pardalos

Models for Social Networks

A Matrix Alignment Approach for Collective Classification .......................................................... 155

Jerry Scripps, Pang-Ning Tan, Feilong Chen, and Abdol-Hossein Esfahanian

Possible Occurrence of Scale-Free Topology in Highly Statistically Associated Polymorphic Positions in Two Potyviral Proteins .......................................................... 160

Ioannis N. Manoussopoulos and Ioanna Zevelekari

Modeling a Store's Product Space as a Social Network .......................................................... 164

Troy Raeder and Nitesh V. Chawla

Social Network Model Based on Keyword Categorization .......................................................... 170

Prantik Bhattacharyya, Ankush Garg, and S. Felix Wu

Waiting Time Sensitivities of Social and Random Graph Models .......................................................... 176

Dominik Dahlem and William Harrison

Defining a Universal Actor Content-Element Model for Exploring Social and Information Networks Considering the Temporal Dynamic .......................................................... 182

Claudia Muller, Benedikt Meuthrath, and Sabina Jeschke

Definition and Measures of an Opinion Model for Mining Forums .......................................................... 188

Anna Stavrianou, Julien Velcin, and Jean-Hugues Chauchat

Models of Communication Dynamics for Simulation of Information Diffusion .......................................................... 194

Konstantin Mertsalov, Malik Magdon-Ismail, and Mark Goldberg

Social Network Analysis

Networks Evolving Step by Step: Statistical Analysis of Dyadic Event Data .......................................................... 200

Ulrik Brandes, Jürgen Lerner, and Tom A.B. Snijders

Developing Compelling Social-Enabled Applications with Context-Based Social Interaction Analysis .......................................................... 206

Ryan Skraba, Mathieu Beauvais, Johann Stan, Abderrahmane Maaradji, and Johann Daigremont
Automatic Mapping of Social Networks of Political Actors from Large Collections of News Stories .......................................................... 212
   Noah T. Cepela and James A. Danowski
Exploring Emergent Semantic Communities from DBLP Bibliography Database .................................................................................. 219
   Zhixing Huang, Yan Yan, Yuhui Qiu, and Shuqiong Qiao
A Fuzzy Approach to Social Network Analysis .......................................................................................................................... 225
   Matteo Brunelli and Michele Fedrizzi
Combining Social Network Analysis and Sentiment Analysis to Explore the Potential for Online Radicalisation .................................... 231
   Adam Bermingham, Maura Conway, Lisa McInerney, Neil O’Hare, and Alan F. Smeaton

Data Mining and Identification

Local Community Identification in Social Networks .......................................................................................................................... 237
   Jiyang Chen, Osmar Zaïane, and Randy Goebel
Mining the Dynamics of Music Preferences from a Social Networking Site ......................................................................................... 243
   Nico Schlitter and Tanja Falkowski
Prying Data out of a Social Network ................................................................................................................................................. 249
   Joseph Bonneau, Jonathan Anderson, and George Danezis

Representation, Visualization, and Interaction

Egocentric Information Abstraction for Heterogeneous Social Networks .............................................................................................. 255
   Cheng-Te Li and Shou-De Lin
Integrated Representation and Visualisation of the Dynamics in Computer-mediated Social Networks .................................................. 261
   Andreas Harrer, Sam Zeini, and Sabrina Ziebarth
Harnessing Wisdom of the Crowds Dynamics for Time-Dependent Reputation and Ranking .............................................................. 267
   Elizabeth M. Daly
Transformation of Online Representation through Time ......................................................................................................................... 273
   Roya Feizy, Ian Wakeman, and Dan Chalmers

Short Papers

Applications of Social Networks

Social Network Analysis as Knowledge Discovery Process: A Case Study on Digital Bibliography ......................................................... 279
   Michele Coscia, Fosca Giannotti, and Ruggero Pensa
An Integrated Workflow Management Solution for Heritage Information Mashups ....................................................................................... 284
Dynamics and Evolution Patterns of Business Networks

Brigitte Gay and Eloïse Loubier

Online Police Station, A State-of-Art Italian Semantic Technology against Cybercrime

Federico Neri, Paolo Geraci, Gianluca Sanna, and Liviana Lotti

Privacy and Meta Aspects

A Retrospective Review of Social Networks

Petros Xanthopoulos, Ashwin Arulselvan, Vladimir Boginski, and Panos Pardalos

Twins (1): Extending SQL to Support Corporation Privacy Policies in Social Networks

Sampson Pun, Amir H. Chinaei, and Ken Barker

Can Friends Be Trusted? Exploring Privacy in Online Social Networks

Frank Nagle and Lisa Singh

Clustering

Content-Based Clustering for Tag Cloud Visualization

Arkaitz Zubiaga, Alberto P. Garcia-Plaza, Victor Fresno, and Raquel Martínez

Search Results Clustering Using Nonnegative Matrix Factorization (NMF)

Hussam Dahwa Abdulla, Martin Polovincak, and Vaclav Snasel

Recommendation and Prediction

Predicting User Behaviour to Facilitate Efficient Provision of Health Applications

Mohamad El-Hajj and Robert S. Hayward

Intelligent Advertising for User Generated Content through Sentiment Analysis

Guang Qiu, Jiajun Bu, Chun Chen, and Feng Zhang

A Method for Identifying Malicious Activity in Collaborative Systems with Maps

Vasco Furtado, Thiago Assunção, Marcos de Oliveira, Mairon Belchior, and Jonathan D’Orleans

Models and Data Mining

A Visual Data Mining Approach to Find Overlapping Communities in Networks

Jiyang Chen, Osmar Zaïane, and Randy Goebel

Dynamic and Static Influence Models on Starbucks Networks

Minkyoung Kim, Byoung-Tak Zhang, and June-Sup Lee

Reducing Social Network Dimensions Using Matrix Factorization Methods

Václav Snášel, Zdeněk Horák, Jana Kočíbová, and Ajith Abraham
Visualization, Interaction, and Social Aspects

Browsing Unbounded Social, Linked Data Instances with User Perspectives .................................................. 352

Hyun Namgoong, Sungkwon Yang, Mina Song, and Hong-Gee Kim

Dynamics of Inter-Meeting Time in Human Contact Networks ................................................................. 356

Eiko Yoneki, Dan Greenfield, and Jon Crowcroft

Posters

Identify Implicit Social Network by RST/FL Framework ................................................................................. 362

Hong Feng Lai

History-Based Email Prioritization .................................................................................................................. 364

Ronald Nussbaum, Abdol-Hossein Esfahanian, and Pang-Ning Tan

An Application of Multicriteria Weighted Graph Similarity Method to Social Networks Analyzing .................. 366

Zbigniew Tarapata and Rafal Kasprzyk

SQL Privacy Model for Social Networks ...................................................................................................... 369

Maryam Majedi, Kambiz Ghazinour, Amir H. Chinalae, and Ken Barker

A New Community Detection Algorithm Based on Markov-Chains and a Team ........................................ 371

Patrick J. McSweeney, Kishan Mehrotra, and Jae C. Oh

Knowledge-reuse Networks of an On-line PBL Framework ...................................................................... 373

The Social Network Induced by the Common Knowledge of Proverbs .......................................................... 375

Matthias Funk and Armando Mendes

Graph Mining Framework for Finding and Visualizing Substructures Using Graph Database .................... 379

Swapnil Shrivastava and Supriya N. Pal

Workshop on Mining Social Networks for Decision Support

Mining Proximal Social Network Intelligence for Quality Decision Support ................................................ 381

Yuan-Chu Hwang

Ranking Learning on the Web by Integrating Network-Based Features ....................................................... 387

Yingzi Jin, Yutaka Matsuo, and Mitsuru Ishizuka

The Use of Social Network Analysis in Knowledge Diffusion Research from Patent Data ............................. 393

Chao-Chih Hsueh and Chun-Chieh Wang

Mining Target-oriented Fuzzy Correlation Rules in Telecom Database .................................................... 399

Hao-En Cheueh, Nancy P. Lin, and Nien-Yi Jan

Text Document Classification and Pattern Recognition ................................................................................. 405

Qin Wu, Eddie Fuller, and Cun-Quan Zhang

Mining Organizational Networks for Layoff Prediction Model Construction ............................................. 411

Huo-Tsan Chang, Hui-Ju Wu, and I-Hsien Ting
Investigation of Network Structure in Taiwan Automobile Industry .................................................................417
  Chang-Jan Yu and Ting-Lin Lee

Author Index
