# TABLE OF CONTENTS

## MQOS: MULTIMEDIA AND QOS

- A Scheduling Strategy to Avoid Playout Interruptions in Video Streaming Systems ..............................................
  G. Boggia, P. Camarda, R. Fortuna, L. A. Greco ................................. 1
- A New Lossless FMO Removal Scheme for H.264 Videos ................................................................. 7
  Camille Mazzataud, Benny Bing
- On the Optimality of Layered Video Streaming Rate in a P2P Mesh Network .............................................. 13
  Tareq Hossain, Yi Cui, Yuan Xue
- An Adaptive End-to-End Delay Assurance Algorithm with DiffServ Architecture in IEEE 802.11e/IEEE 802.16 Hybrid Mesh/Relay Networks .......................................................... 19
  Myounghwan Lee, John A. Copeland

## ISSA 1: INTERNET SERVICES, SYSTEMS AND APPLICATIONS 1

- Some Traffic Management Practices Are Unreasonable ......................................................... 25
  Scott Jordan
- Source Routing Made Practical in Embedded Networks ................................................................. 31
  Arijit Ghosh, Tony Givargis
- Balanced Peer Lists: Towards a Collusion-Resistant BGP ............................................................. 37
  Yan Li, Mohamed G. Gouda
- HVR: History-Based Vector Routing for Delay Tolerant Networks .................................................. 43
  Hyunwoo Kang, Donghyun Kim

## EWTP: EMERGING WIRELESS TECHNOLOGIES AND PLATFORMS

- ETX Could Result in Lower Throughput ................................................................. 49
  Zainab Zaidi, Tien Y. Tan, Yunlei Cheng
- Principles of IEEE 802.15.3c: Multi-Gigabit Millimeter-Wave Wireless PAN ................................................ 55
  Harkirat Singh, Su-Khiong Yong, Jiung Oh, Chiu Ngo
- Pervasive Internet Access by Vehicles through Satellite Receive-Only Terminals .......................... 61
  Baber Aslam, Ping Wang, Clifff C. Zou
- On Achievable Throughput Region of Prioritized Transmissions Via Network Coding .................. 67
  Tuan Tran, Thinh Nguyen, Raviv Raich

## ON 1: OPTICAL NETWORKING 1

- A New Hierarchical Waveband Assignment Algorithm for Multi-Granular Optical Networks .......................... 73
  Yang Wang, Xiaojun Cao
- Connectivity Aware Protected Working Lightpath Envelope .......................................................... 79
  Rong He, Kee Chiang Chua, Guruasamy Mohan
- Dynamic Multicast Routing and Wavelength Assignment with Minimal Conversions in Delay-Constrained WDM Networks .......................................................... 85
  Keen-Mun Yong, Tee-Huang Cheng, Gee-Swee Poo
- Re-Configurable Parallel Match Evaluators Applied to Scheduling Schemes for Input-Queued Packet Switches ................................................................. 91
  Spiridon F. Beldianu, Roberto Rojas-Cessa, Eiji Oki, Sotirios G. Ziavras

## ISSA 2: INTERNET SERVICES, SYSTEMS AND APPLICATIONS 2

- The Case for Service Overlays ................................................................. 97
  J. Brassil, R. McGeer, P. Sharma, P. Yuлагандула, N. L. Mark, Z. Zhang, R. Schwab
- CoSAC: Coordinated Session-Based Admission Control for Multi-Tier Internet Applications ............ 103
  Sireesha Muppula, Xiaobo Zhou
### Insight into the P2P-VoD System: Performance Modeling and Analysis
Kai Wang, Chuang Lin

### Self-Learning Peer-to-Peer Traffic Classifier
Ram Keralapura, Antonio Nucci, Chen-Nee Chuah

### WCSP 1: WIRELESS COMMUNICATION AND SIGNAL PROCESSING 1

**Design and Analysis of Cross-Layer Contention Resolution Algorithms for Multi-Packet Reception**

Jun-Bae Seo, Victor C. M. Leung

**Cross-Layer Scheduling for Multiuser Downlink Transmissions with Opportunistic Relaying**

Hai Zhou, Pingyi Fan, Hong-Chuan Yang

**Optimal Relay Assignment for Proportional Fairness in Wireless Cooperative Networks**

H. Xu, L. Huang, G. Wang

**Energy Efficiency of Cooperative SIMO Schemes -Amplify Forward and Decode Forward**

Narayanan Krishnan, Balasubramaniam Natarajan

### PCGN: PERVERSIVE COMPUTING AND GRID NETWORKING

**HYBUD: An Energy-Efficient Architecture for Hybrid Parallel Disk Systems**

Mais Nijim, Adam Manzanares, Xiaojun Ruan, Xiao Qin

**Combining Efficiency, Fidelity and Flexibility in Grid Information Services**

Haiying Shen

**Optimizing Deadline-Driven Bulk Data Transfers in Overlay Networks**

Andrei Agapit, Sebastien Soudan, Marcelo Pasin, Pascale Vicat-Blanc Primev, Thilo Kielmann

**Establishing Trust for Computation Offloading**

Karthik Kumar, Yamini Nimmagadda, Yang-Hsiang Lu

### ON 2: OPTICAL NETWORKING 2

**Real-Time Data Allocation Scheme Based on Dynamic Replacement in Burst Photonic Networks**

Nattapon Kitsuwan, Eiji Oki, Naoto Kishi, Tetsuya Miki

**Performance Analysis of OBS Edge Nodes for Video Streaming**

Felix Espina, Mikel Izal, Daniel Morató, Eduardo Magaña

**Routing and Scheduling for Time-Shift Advance Reservation**

Ankitkumar N. Patel, Yi Zhu, Qingya She, Jason P. Jue

**Is Light-Tree Structure Optimal for Multicast Routing in Sparse Light Splitting WDM Networks?**

Fen Zhou, Miklós Molnár, Bernard Cousin

### ISSA 3: INTERNET SERVICES, SYSTEMS AND APPLICATIONS 3

**How’s My Network? A Java Approach to Home Network Measurement**

Alan Ritacco, Craig Wills, Mark Claypool

**Improving TCP Goodput over Wireless Networks Using Kernel-Level Data Compression**

Moo-Yeol Lee, Hyun-Wook Jin, Ikhwon Kim, Taehyun Kim

**Challenges for High-Speed Protocol-Independent Redundancy Eliminating Systems**

Maxim Martynov

**On Reducing the Inter-AS Traffic of Box-Powered CDN**

Yiping Chen, Jimmy Leblet, Gwendal Simon

### WCSP 2: WIRELESS COMMUNICATION AND SIGNAL PROCESSING 2

**Fast Optimal Discrete Bit-Loading Algorithms for OFDM-Based Systems**

Hyeonmok Ko, Kiseok Lee, Seoungyoul Oh, Cheeha Kim

**Peak-to-Average Power Ratio Reduction in MIMO-OFDM with Trellis Exploration Algorithm**

Dalin Zhu, Balasubramaniam Natarajan, Justin S. Dyer

**Estimation of MIMO Channel Using Suboptimal Particle Filtering**

Hai H. Hoang, Bing W. Kwan
On Selfishness, Local Information, and Network Optimality: A Topology Control Example .......................................................... 342
Ramakant S. Komali, Allen B. MacKenzie, Petri Mähönen
Optimal Wireless Network Restoration under Jamming Attack ........................................................................... 349
Shanshan Jiang, Yuan Xue

P2PN 1: PEER-TO-PEER NETWORKING 1

Team Incentives in BitTorrent Systems .......................................................... 355
Rafit Izhak-Ratzin, Nikitas Liogkas, Rupak Majumdar
Swarming Overlay Construction Strategies ........................................... 363
Anwar Al-Hamra, Nikitas Liogkas, Arnaud Legout, Chadi Barakat
Reducing Source Load in BitTorrent ......................................................... 369
Brian Sanderson, Daniel Zappala
Fine Tuning of a Distributed VoD System .............................................. 375
Yacine Boufkhad, Fabien Mathieu, Fabien de Montgolfier, Diego Perino, Laurent Viennot

NAPE 1: NETWORK ALGORITHMS AND PERFORMANCE EVALUATION 1

Covert Channel for One-Way Delay Measurements ............................................... 382
Mario Cola, Giorgio De Lucia, Daria Mazza, Maurizio Patrignani, Massimo Rimondini
Efficient and Scalable Network Emulation Using Adaptive Virtual Time ................. 388
Andreas Grau, Klaus Herrmann, Kurt Rothermel
On the Impact of Filters on Analyzing Prefix Reachability in the Internet .................. 394
Ravish Khosla, Sonia Fahmy, Y. Charlie Hu

WASN 3: WIRELESS AD-HOC AND SENSOR NETWORKS 3

Utilizing Automatic Underwater Vehicles to Prolong the Lifetime of Underwater Sensor Networks .......... 402
Andong Zhan, Guihai Chen, Wei Wang
Underwater Sensor Barriers with Auction Algorithms ........................................ 408
Stanley Barr, Benyuan Liu, Jie Wang
Sensor Deployment as an Optimal Control Problem ........................................... 414
Ahmad Ababnah, Balasubramaniam Natraj
Exploring Redundancy in Sensor Deployment to Prolong Network Lifetime ............... N/A
W. Shen, Q. Wu, Y. Lin

NSP 1: NETWORK SECURITY AND PRIVACY 1

Mixing Ring-Based Source-Location Privacy in Wireless Sensor Networks .............. 419
Yun Li, Jian Ren
SHALON: Lightweight Anonymization Based on Open Standards .......................... 425
Andriy Panchenko, Benedikt Westermann, Lexi Pimenidis, Christer Andersson
Privacy-Preserving Querying in Sensor Networks .............................................. 432
Emiliano De Cristofaro, Xuhua Ding, Gene Tsudik
Enhanced Feature Selection and Generation for 802.11 User Identification .............. 438
Dingbang Xu, Yu Wang, Xinghua Shi

P2PN 2: PEER-TO-PEER NETWORKING 2

Adaptive Update Propagation for Low-Latency Massively Multi-User Virtual Environments ......................................................... 444
Richard Sueselbeck, Gregor Schiele, Sebastian Setz, Christian Becker
NATCracker: NAT Combinations Matter ..................................................... 450
Roberto Rovero, Sameh El-Ansary, Seif Haridi
Certified Internet Coordinates ................................................................. 457
Mohamed Ali Kaafar, Laurent Mathy, Chadi Barakat, Kavé Salamati, Thierry Turletti, Walid Dabbous
Search Co-Ordination by Semantic Routed Network
Amitava Biswas, Sunil Mohan, Rabi Mahapatra

NAPE 2: NETWORK ALGORITHMS AND PERFORMANCE EVALUATION 2

Modeling the Effects of Variable Bandwidth on TCP Throughput
Jia Zhou, Fengyuan Ren, Chuang Lin

CLI-based TCP: an End-to-End Proactive Approach
J. Koo

Identification of Different TCP Versions Based on Cluster Analysis
Junpei Oshio, Shingo Ata, Ikuo Oka

On Transport Protocol Performance Measurement over 10Gbps High Speed Optical Networks
Yixin Wu, Suman Kumar, Seung-Jong Park

WASN 4: WIRELESS AD-HOC AND SENSOR NETWORKS 4

Energy Aware Distributed Clustering in Two-Tiered Sensor Networks
Ataul Bari, Ritu Chaturvedi, Arunita Jaekel, Subir Bandyopadhyay

A Clustering Method for Wireless Sensor Networks with Heterogeneous Node Types
Sampath Priyanaka, Kazuhiko Kinoshita, Hideki Tode, Koso Murakami

Class-Based Data Reporting Scheme in Heterogeneous Wireless Sensor Networks
Hyun Jung Choe, Preetam Ghosh, Kalyan Basu, Sajal K. Das

Efficient Multicast Routing in MANETs Using Prefix Labels
J. J. Garcia-Luna-Aceves, Dhananjay Sampath

NSP 2: NETWORK SECURITY AND PRIVACY 2

Location-Release Signature for Vehicular Communications
Xiaodong Lin, Rongxing Lu, Xemin Shen

Impact of Selective Dropping Attacks on Network Coding Performance in DTNs and a Potential Mitigation Scheme
M. Chuah, P. Yang

A Power-Efficient Scheme for Securing Multicast in Hierarchical Sensor Networks
Jie Tian, Guiling Wang, Tan Yan, Wensheng Zhang

Data Protection on RFID-Based Distributed Storage
Rakesh Saini, Bo Zhu, Amin Hammad

NAPE 3: NETWORK ALGORITHMS AND PERFORMANCE EVALUATION 3

Fine Two-Phase Routing with Traffic Matrix
Eiji Oki, Ayako Iwaki

Statistical Geolocation of Internet Hosts
Inja Youn, Brian L. Mark, Dana Richards

Reducing Buffer Requirements in Core Routers Using Dynamic Buffering
B. C. Girish, R. Govindarajan

On Maximizing IP Multicast Throughput in Multi-Source Applications
M. R. Rahimi, N. Sarshar

WASN 5: WIRELESS AD-HOC AND SENSOR NETWORKS 5

Path-Centric On-Demand Rate Adaptation for Mobile Ad Hoc Networks
Saehoon Kang, Chansu Yu, Chita R. Das, Guohong Cao

Distributed Indexing and Data Dissemination in Large Scale Wireless Sensor Networks
Yiwei Wu, Yingchao Li

Cooperative Cache Invalidation Strategies for Internet-Based Vehicular Ad Hoc Networks
Sunho Lim, Chansu Yu, Chita R. Das
Evaluation of the Performance of Spontaneously Deployed, Independent Networks .................................................. 692
Ivan Gudymenko, Waltenegus Dargie, Alexander Schill

Validation of a Traffic-Based CAC Method under General Channel Holding Time .................................................. 698
Natalia Fassileva, Francisco Barcelo-Arroyo

Admission Control in Networks with Prioritized Advance Reservation ................................................................. 705
Chongyang Xie, Nasir Ghani

SESSION II: SIGNALING AND STORAGE

Criticisms of Modelling Packet Traffic Using Long-Range Dependence ................................................................. 711
Richard G. Clegg, Raul Landa, Miguel Rio

Reliability Analysis of IMS Signaling Networks ........................................................................................................ N/A
M. Guida, M. Longo, F. Postiglione

Exploring Gate-Limited Analytical Models for High Performance Network Storage Servers ................................. 716
Glenford Mapp, Dhawal Thakker, Orhan Gemikonakli

A Quantization Based Approach to Energy Aware Routing in Mobile Ad hoc Network with Load Balancing ................................................................. N/A
T. Johri

Stochastic Timing Analysis of the AES Cipher Algorithm over a Correlated Fading Channel ............................................. 721
Kyungtae Kang, Dong Kun Noh

SESSION III: WIRELESS SENSOR NETWORKS

Analysis of Time and Frequency Domain Features of Accelerometer Measurements .................................................. 727
Walteneugus Dargie

A Localization Algorithm for Nonuniform Propagation Environments in Sensor Networks ......................................... 733
Noriaki Kitakoga, Tomaoki Ohtsuki

A Novel Routing Algorithm Based on Ant Colony System for Wireless Sensor Networks ............................................ 738
Xin Guan, L. Guan, X. G. Wang, Tomaoki Ohtsuki

A Practical Flow Control Scheme Considering Optimal Energy Allocation in Solar-Powered WSNs .......................... 743
Dong Kun Noh, Kyungtae Kang

Refining Elusive User Registration Patterns for Empirical Mobility Models ................................................................. 749
Jinpyo Hong, Hwangnam Kim

INTERNATIONAL WORKSHOP ON SENSOR NETWORKS (SN’2009)

SESSION-I: SECURITY AND APPLICATIONS

Practical Identity-Based Key Agreement For Secure Communication in Sensor Networks ............................................. 755
Piotr Szczeciowski, Martin Collier

Anomaly Detection with Sensor Data for Distributed Security .................................................................................... 761
Brian Quanz, Hongliang Fei, Jian Huan, Joseph Evans, Victor Frost, Gary Minden, Daniel Deavers, Leon Searl, Daniel DePardo, Martin Kuehnhausen, Daniel Fokum, Matt Zeets, Angela Oguna

A Spectral Clustering Approach to Validating Sensors via Their Peers in Distributed Sensor Networks .......................... 767
H. T. Kang, Dario Vlah

Surveillance and Tracking System with Collaboration of Robots, Sensor Nodes, and RFID Tags ................................. 774
Yang Xiao, Yanping Zhang

Interconnecting WSNs with Fast Moving Nodes: Experiments in Real-World Scenarios ............................................ 780
Pedro Melo, Luis D. Pedrosa, Rui M. Rocha

Pastry Based Sensor Data Sharing ............................................................................................................................. 786
Wang-Cheol Song, Sung-Su Kim, Seung-Joon Seok, Deokjai Choi

SESSION-II: TOPOLOGY, ROUTING, AND ENERGY EFFICIENCY

Optimal Relay Node Placement in Hierarchical Sensor Networks with Mobile Data Collector ........................................ 792
Ataul Bari, Da Teng, Arunita Jaukel

SESSION-III: INDUSTRY TOPICS AND APPLICATIONS

MAC Protocol Adaptation in Cognitive Radio Networks: An Experimental Study
Kuo-Chun Huang, Xiangpeng Jing, Dipankar Raychaudhuri

Bayesian Wideband Spectrum Segmentation for Cognitive Radios
Selçuk Tascioglu, Oktay Ureten

Cooperative Spectrum Sensing for IEEE 802.22 WRAN System
Sunmin Lim, Hoiyoon Jung, Myung Sun Song

A Generalized Scheme for the Creation of Shared Secret Keys through Uncorrelated Reciprocal Channels in Multiple Domains
Michael A. Forman, Derek Young

A Trade-Off Analysis of Energy Detectors and Partitioned Search for Primary Detection
Birsen Sirkeci-Mergen, Vishal Sawant, Robert H. Morelos-Zaragoza

INTERNATIONAL WORKSHOP ON MULTIMEDIA COMPUTING AND COMMUNICATIONS (MCC)

Complexity-Rate-Distortion Optimization for Real-Time H.264/AVC Encoding
Y. H. Tan, W. S. Lee, J. Y. Tham, S. Rahardja

An Efficient Algorithm for Overlay Multicast Routing in Videoconferencing Applications
S. Nari, H. R. Rabiee, A. Abedi, M. Ghanbari

Error Resilience Using Leaky Source Channel Prediction Scheme
Ramdas Satyan, Sunday Nyamweno, Fabrice Labeau

A Study on the Correlation between QoE of 4K Super High Definition Video Streamings and QoS of Network
Masahiko Kitamura, Takahiro Murokoa, Mitsuhiko Teshima, Hisaya Hadama, Atsushi Takahara, Tetsuro Fujii

Adaptive Downsampling in Oversampled Filter Banks in the Presence of Quantization Noise
Mohsen Akbari, Fabrice Labeau

Automatic Temporal Formatting of Multimedia Presentations Using Dynamic Petri Nets
Susan Elias, Lisa Mathew, K. S. Easwarakumar, Richard Chbeir

Is High Definition a Natural DRM?
Andrew Blaich, Aaron Striegel

INTERNATIONAL WORKSHOP ON PRIVACY AND TRUST OF COMPUTER AND CYBER-PHYSICAL NETWORKS (SECURECPN)

SESSION-I: NETWORK SECURITY PROTOCOLS

The Case for End-to-End Solutions to Secure Routing in MANETs
Stephen Dabideen, Bradley R. Smith, J. J. Garcia-Luna-Aceves

Robust Sybil Detection for MANETs
Athichart Tangpong, George Kesidis, Hung-yuan Hsu, Ali Hurson

A Low-Cost Anonymous Routing Protocol in MANETs
Lianyu Zhao, Haiying Shen

Mass Purging of Stale TCP Flows in Per-Flow Monitoring Systems
Gunwoo Nam, Pushkar Patankar, George Kesidis, Chita R. Das, Cetin Seren

Delay-Tolerant Botnets
Zesheng Chen, Chao Chen, Qian Wang

SESSION-II: SYSTEM AND THEORETICAL ASPECTS OF NETWORK SECURITY

Optimizing Authentication in Media Independent Handovers Using IEEE 802.21
Antonio Esquierdo, Nada Golmie, Richard Rouil

A Game Theoretic Investigation of Deception in Network Security
Thomas E. Carroll, Daniel Grosu

Analyzing Response Time of Batch Signing
Turgay Korkmaz

Proxy-Based Security Audit System for Remote Desktop Access
Shi-hai Huang, Chuang Lin, An’an Luo, Zhen Chen, Xin Jiang, Kai Wang, Hui Zhang, Xue-hai Peng
An Interoperable Internet Scale Solution for RFID Network Security.......................................................... 1026
Tingting Mao, John R. Williams, Abel Sanchez

INTERNATIONAL WORKSHOP ON GRID AND P2P SYSTEMS AND APPLICATIONS
(GRIDPEER)

SESSION-I: STREAMING, SEARCH, AND SHARING

Smart Peer-to-Peer Video Streaming: Comparing Adaptation Under Heterogeneous Conditions.............. 1032
Sachin Agarwal
A P2P Video Delivery Network (P2P-VDN) .................................................................................................. 1038
Kien Nguyen, Thinh Nguyen, Yevgeniy Kovchegov
A Social Network Based File Sharing System in Mobile Peer-to-Peer Networks ....................................... 1045
Haibo Zhang, Haiying Shen
High Coverage Search in Multi-Tree Based P2P Overlay Network ......................................................... 1051
Cuihua Zuo, Ruixuan Li, Haiying Shen, Zhengding Lu

SESSION-II: MODELING, MEASUREMENT, QOS AND SECURITY

A Parsimonious Statistical Protocol for Generating Power-Law Networks ............................................. 1057
Shilpa Ghadge, Timothy Killingback, Bala Sundaram, Duc A. Tran
Providing Grid Schedulers with Passive Network Measurements .......................................................... 1063
Yehia El-khatib, Christopher Edwards, Michael Mackay, Gareth Tyson
ODON: An On-Demand Security Overlay for Mission-Critical Applications ......................................... 1069
Jinu Kurian, Ajay Kulkarni, Hai Trong Vu, Kamil Sarac
MNEMONIC: A Network Environment for Automatic Optimization and Tuning of Data Movement over Advanced Networks .............................................................................................................. 1075
Patrick McClory, Ezra Kissel, Martin Swany, Michela Taufer
Service Provisioning Framework for a Self-Organized Grid ..................................................................... 1082
Amos Brocco, Beat Hirsbrunner
A Design of Generalized Peer-to-Peer Based IPTV System Using Multiple Chain Architecture ............... 1088
Jihoon Kim, Younghan Kim

INTERNATIONAL WORKSHOP ON NANO, MOLECULAR, AND QUANTUM
COMMUNICATIONS (NANOCOM)

Defect Mapping and Adaptive Configuration of Nanoelectronic Circuits Based on a CNT Crossbar
Nano-Architecture ........................................................................................................................................ 1093
Bao Liu
Broadcast Routing in Quantum Ad hoc Networks .................................................................................. N/A
O. Akan, B. Gulbahar
Quantum Transmission Integrity Mechanism for Indirect Communication ............................................ 1099
Tien-Sheng Lin, I-Ming Tsai, Sy-Yen Kuo
A Framework to Study the Molecular Communication System ........................................................... 1105
Sachin Kadloor, Raviraj Adve
Nano-Scale On-Chip Irregular Network Analysis ....................................................................................... 1111
Yang Liu, Alvin R. Lebeck
Carbon Nanotube Sensor Networks ........................................................................................................ N/A
O. Akan, B. Atakan
Author Index
