31st Annual Meeting of the Cognitive Science Society 2009
(CogSci 2009)

Amsterdam, Netherlands
29 July – 1 August 2009

Volume 1 of 5

Editors:

Niels Taatgen          Hedderik van Rijn

Table of Contents

Volume 1

Introduction
Organizing and Program Committee
Awards
Sponsors
Table of Contents

Invited Talk: Randall O’Reilly ................................................................. 1
Rumelhart Lecture: Susan Carey ..................................................... 2
Invited Talk: Nicola Clayton ............................................................. 3
Heineken Lecture: Stanislas Dehaene ........................................... 4
Invited Talk: Joshua Tenenbaum ...................................................... 5
Rumelhart Symposium ................................................................. 7
Tutorial: Quantum Information Processing Theory ................................ 9
Tutorial: Dynamic Field Theory ..................................................... 11
EPAM/CHREST Tutorial: Fifty Years of Simulating Human Learning .......... 13
Tutorial: CogSketch Tutorial ....................................................... 15
Workshop: ACT-R Workshop ....................................................... 17
Workshop: Large-Scale Cognitive Modeling using Model Integrated Computing ...... 19
Workshop: Production of Referring Expressions .................................... 22
Workshop: Intuitive Pedagogical Reasoning ........................................ 24
Workshop: Swarm Cognition ......................................................... 26
Workshop: Psychocomputational Models of Human Language Acquisition ........... 28
Workshop: Constructing a successful grant proposal ..................................... 30
Workshop: Distributional Semantics beyond Concrete Concepts ..................... 31

Symposium

Argument quality: An interdisciplinary perspective ........................................ 33
Ulrike Hahn, John Woods, Frans van Eemeren, John Fox, Mike Oaksford
Symposium

Theoretical perspectives on impairments in spoken language processing .......................... 35
Daniel Mirman, Audrey Kittredge, Randi Martin, Dorothy Bishop, Inge-Marie Eigsti

Symposium

The interface between language and thought: Current directions. ................................. 37
Debi Roberson, Asifa Majid, Robert Goldstone, Elizabet Spaepen, Jules Davidoff, Lera
Boroditsky, Mutsumi Imai, Gary Lupyan

Symposium

Psychological and computational perspectives on recognition of moving faces ............... 39
Nicholas Costen, Darren Cosker, Alan Johnston, Karen Lander, Paul Rosin, Hui Fang, Harry
Griffin, Natalie Butcher, David Marshall, Eva Krumhuber

Symposium

Music Cognition: Learning and Processing .................................................................. 41
Martin Rohrmeier, Patrick Rebuschat, Psyche Loui, Geraint Wiggins, Marcus T. Pearce,
Daniel Muellensiefen, Henkjan Honing

Symposium

Models and Analogies in Conceptual Restructuring ................................................... 43
Dedre Gentner, Theodore Arabatzis, Nancy Nersessian, Stella Vosniadou, John Clement

Symposium

Rational Process Models .............................................................................................. 45
Edward Vul, Joshua Tenenbaum, Thomas Griffiths, Roger Levy, Mark Steyvers, Craig R.M.
McKenzie

Symposium

Cognitive and Neural Foundations of Concepts .......................................................... 47
Markus Kiefer, Lawrence Barsalou, Karalyn Patterson, Christian Gerlach

Symmetry & Vividness in Vision

Vividness and Behavioral Specificity in Visual Imagery: Not what youd expect ............... 49
Amedeo D’Angiulli

Similarity as Tractable Transformation ................................................................. 50
Moritz Mueller, Iris van Rooij, Todd Wareham

Prediction of Human Eye Fixations using Symmetry .................................................. 56
Gert Kootstra, Lambert R.B. Schomaker

Language production

Producing Less Preferred Structures: More Gestures, Less Fluency ............................... 62
Susan Wagner Cook, T. Florian Jaeger, Michael Tanenhaus

Toward a Language-General Account of Word Production: The Proximate Units Principle ...... 68
Padraig O’Seaghdha, Jenn-Yeu Chen
Grammaticized concepts and event conceptualization in language production ............................ 74
   Mary Carroll, Monique Flecken, Christiane von Stutterheim

Development and Reasoning

Heuristics and biases in autism: Less biased but not more logical .................................................... 75
   Kinga Morsanyi, Simon Handley, Jonathan Evans

The Block Makes It Go: Causal Language Helps Toddlers Integrate Prediction, Action, and Expectations about Contact Relations ................................................................. 81
   Elizabeth Baraff Bonawitz, Alexandra Horowitz, Darlene Ferranti, Laura Schulz

Preschoolers’ Understanding of Freedom of Choice ................................................................. 87
   Tamar Kushnir, Henry Wellman, Nadia Chernyak

Methodology

Better data with fewer participants and trials: Improving experiment efficiency with adaptive design optimization .................................................................................................................. 93
   Daniel Cavagnaro, Yun Tang, Jay I. Myung, Mark A. Pitt

Enhancing Methodological Rigor for Computational Cognitive Science: Complexity Analysis ...... 99
   Jacob Beal, Jennifer Roberts

Acquisition of Cognitive Skill: Do We Already Have a Theory? .................................................. 105
   Stellan Ohlsson

Development and Representation

When Objects Disintegrate: Young Children Do Not Bind Features in Visual Working Memory . 106
   Vanessa Simmering, Jeffrey Johnson, Chelsey Patterson, John Spencer

Childrens thoughts on unborn babies, Representational redescription in preconceptions of children on fetal development .......................................................... 112
   Sara E. van Es, Tessa J.P. van Schijndel, Roos Franse, Maartje Raijmakers

Toddlers’ Problem Solving: The Importance of Spatial Integration .............................................. 118
   Lori Gresham, Heidi Kloos

Concepts and Categories

Similarity and Categorization: The Reversed Association Test .................................................... 124
   Takashi Yamauchi

Category Generation .................................................................................................................. 130
   Alan Jern, Charles Kemp

Learning to learn categories .................................................................................................. 136
   Amy Perfors, Joshua Tenenbaum

Extensions to Bayesian Modeling

One-Shot Learning with Bayesian Networks .................................................................................. 142
   Andrew L. Maas, Charles Kemp

One and Done? Optimal Decisions from Very Few Samples ....................................................... 148
   Edward Vul, Noah Goodman, Thomas Griffiths, Joshua Tenenbaum
Learning Semantic Representations with Hidden Markov Topics Models .................................. 154
Mark Andrews, Gabriella Vigliocco

Sign Language

The hands and mouth do not always slip together in British Sign Language: Dissociating articulatory channels in the lexicon .......................................................... 160
David Vinson, Robin Thompson, Robert Skinner, Neil Fox, Gabriella Vigliocco

When Meaning Permeates Form: Effects of Iconicity for Phonological Decisions in British Sign Language .......................................................... 165
Robin Thompson, David Vinson, Gabriella Vigliocco

Relating neurophysiology and drift diffusion models ....................................................... 171
Braden Purcell, Jeffrey Schall, Thomas Palmeri

Statistical learning in Language

Statistical Learning of Nonadjacencies Predicts On-line Processing of Long-Distance
Dependencies in Natural Language .......................................................... 177
Jennifer B. Misyak, Morten H. Christiansen, J. Bruce Tomlin

The role of Gestalt principles in the acquisition of non-adjacent dependencies in linguistic and non-linguistic sequences ........................................ 183
Jennifer A. Sturm, Kenny Smith

Novel Insights into Statistical Learning .......................................................... 189
Ian Simpson, Joanne Arciuli

Reasoning

Is Causation Probabilistic? .......................................................... 195
Caren Frosch, Phil Johnson-Laird

A subliminal premise can automatically trigger an elementary deductive inference ........... 201
Carlo Reverberi, Michele Burigo, Paolo Cherubini

When Should We Expect Indirect Effects in Human Contingency Learning? .............. 206
Daniel Sternberg, James McClelland

Neuroscience

Virtual Brain Reading: A Connectionist Approach to Understanding fMRI .................. 212
Rosemary Cowell, David Huber, Garrison Cottrell

Imaging Brain Regions with Susceptibility-induced Signal Losses using Gradient and Spin Echo Techniques .......................................................... 218
Krishna Miyapuram, Philippe Tobler, Wolfram Schultz, Robert Osterbauer, Christian Schwarzbauer

Hyperlearning: A Connectionist Model of Psychosis in Schizophrenia ....................... 224
Uli Grasemann, Risto Miikkulainen, Ralph Hoffman

Concepts, Categories and Metacognition

Knowledge Effect and Selective Attention in Category Learning: An Eyetracking Study .... 230
ShinWoo Kim, Bob Rehder
Non-categorical approaches to property induction with uncertain categories .................................. 236
  Christopher Papadopoulos, Brett Hayes, Ben Newell

A meta-cognitive account for the impact of implausible suggestions on estimations .................. 242
  Giovanna Egidi, Uri Hasson

Philosophy and Bayes

On a General Bayesian Pattern Logic of Frequency-Based Logical Inclusion Fallacies .......... 248
  Momme von Sydow

Explaining the Conjunction Fallacy: Probability vs. Confirmation ............................................. 254
  Katya Tentori, Vincenzo Crupi

A taxonomy of inductive problems ......................................................................................... 255
  Charles Kemp, Alan Jern

Development and Language

The Time Course of Lexical Competition in Young and Older Adults ................................. 261
  Kathleen Pirog Revill, Daniel Spieler

Inhibition and Facilitation in Auditory Comprehension Across the Lifespan ......................... 267
  Henrike K. Blumenfeld, Scott R. Schroeder, Zahra R. Ali, Viorica Marian

Learning Words from Context: A Powerful Associative Mechanism of Early Word Learning .... 273
  Vladimir Sloutsky, Xin Yao

Interaction between Vision and Language

The Impact of Visual Information on Reference Assignment in Sentence Production .......... 274
  Moreno Coco, Frank Keller

The Use of Categorical Features in Adult Spatial Reorientation ............................................. 280
  Daniel Grodner, Carey Pietsch, Frank Durgin

Abstract language, global perception: How language shapes what we see .............................. 286
  Emiel Krahmer, Diederik Stapel

Reasoning

"Damned by Faint Praise": A Bayesian account ........................................................................ 292
  Adam Harris, Adam Corner, Ulrike Hahn

On the provenance of judgments of conditional probability ..................................................... 298
  Jiaying Zhao, Anuj Shah, Daniel Osherson

The modifier effect: Default inheritance in complex noun phrases. ...................................... 303
  James A. Hampton, Martin Jonsson, Alessia Passanisi

Individual Differences

Individual Differences in the Processing of Complex Sentences .......................................... 309
  Wibke Hachmann, Lars Konieczny, Daniel Müller

Finding a Better k: A psychophysical investigation of clustering ............................................ 315
  Joshua M. Lewis

Dynamical cognitive models and the study of individual differences. ..................................... 321
  Han L.J. van der Maas, Kees Jan Kan
**Education and Representation**

*Symmetry in the Semantic Representation of Integers* ........................................ 323  
Jessica M. Tsang, Daniel L. Schwartz

*Children's Understanding of Approximate Addition Depends on Problem Format* ............ 329  
M. Claire Keultjes, Matthew H. Gibson, Nicole M. McNeil

*The effect of concreteness on children's ability to detect common proportion* .............. 335  
Jennifer Kaminski, Vladimir Sloutsky

**Cognitive Control**

*Modeling Triple-Tasking without Customized Cognitive Control* ................................ 341  
Jelmer Borst, Niels Taatgen, Hedderik van Rijn

*Components of Working Memory Updating* ................................................................. 347  
Ullrich Ecker, Stephan Lewandowsky, Klaus Oberauer

*Adding Distractors Improves Performance by Boosting Top-Down Control* .................. 353  
Ion Juvina, Niels Taatgen

**Concepts and Categories**

*You Only Had to Ask Me Once: Long-term Retention Requires Direct Queries During Learning*. 359  
Yasuaki Sakamoto, Bradley Love

*The Persistence of Procedural Memory for Content-Specific Prior Memory Operations* ........ 365  
Christopher Was

*A New Theory of Classification and Feature Inference Learning: An Exemplar Fragment Model*. 371  
Robert Colner, Bob Rehder

**Poster Session 1**

*Enhancing Methodological Rigor for Computational Cognitive Science: Core Tenets and Ad Hoc Residuals* ................................................................. 377  
Jennifer Roberts, Jacob Beal

*An EEG/ERP study of efficient versus inefficient visual search* ................................. 383  
Steven Phillips, Yuji Takeda

*Belief Propagation and Locally Bayesian Learning* ..................................................... 389  
Adam Sanborn, Ricardo Silva

*Learning and failing to learn in immediate memory* ................................................... 395  
Philip Beaman, Jan Roeer

*Mechanisms underlying incubation in problem-solving: Evidence for unconscious cue assimilation* 401  
Ut Na Sio, Thomas Ormerod

*Causal Asymmetry in Inductive Judgments* ............................................................... 407  
Philip Fernbach, Adam Darlow

*Good Enough Language Processing: A Satisficing Approach* ....................................... 413  
Fernanda Ferreira, Paul E. Engelhardt, Manon W. Jones

*Learning Time-Varying Categories* .............................................................................. 419  
Daniel Navarro, Amy Perfors
Implicit Learning of Word Order ......................................................... Patrick Rebuschat, John Williams

The effect of robot gaze on processing robot utterances ...................................... Maria Staudte, Matthew W. Crocker

A mathematical insight into the size of infant vocabularies ................................... Julien Mayor, Kim Plunkett

Generics, prevalence, and default inferences .................................................. Sangeet Khemlani, Sarah-Jane Leslie, Sam Glucksberg

Within-subject Preference Reversals in Description- and Experience-based Choice ........... Adrian R. Camilleri, Ben Newell

Arbitrary Imitation, Pattern Completion and the Origin and Evolution of Human Communication ................................................................. Monica Tamariz

A Single Layer Network Model of Sentential Recursive Patterns ........................... Lei Ding, Simon Dennis, Dennis Mehay

Finding Your Way in Chronoland: Visual Metaphors for Orientation of Temporal Data Explorers ................................. Michael Smuc, Eva Mayr, Hanna Risku, Florian Windhager

Learning to adapt evidence thresholds in decision making .................................. Ben Newell, Michael Lee

Conceptual and linguistic distinctions between singular and plural generics .................... Sarah-Jane Leslie, Sangeet Khemlani, Sandeep Prasada, Sam Glucksberg

Error and expectation in language learning: An inquiry into the many curious incidents of "mouses" in adult speech ......................................................... Michael Ramscar, Melody Dye

Semantic Context Effects on Color Categorization ............................................ Rony Kubat, Daniel Mirman, Deb Roy

Words and meaning: How the lexical encoding of technical concepts contributes to their mental representation ...................................................... Elisabeth Paus, Regina Jucks

The Influence of Attention on the Detection of the List Length Effect in Recognition Memory ... Angela Kinnell, Simon Dennis

A PDP Simulation of the Effects of Transcranial Magnetic Stimulation on Semantic Cognition .......................................................... Mark Drakesmith, Gorana Pobric, Stephen Welbourne

Comparing MOSAIC and the Variational Learning Model of the Optional Infinitive Stage in Early Child Language .................................................. Daniel Freudenthal, Julian Pine, Fernand Gobet

Subitizing, Finger Gnosis, and the Representation of Number ............................ Marcie Penner-Wilger, Lisa Fast, Jo-Anne LeFevre, Brenda Smith-Chant, Sheri-Lynn Skwarchuk, Deepthi Kamawar, Jeffrey Bisanz
Prior experience and communication media in establishing common ground during collaboration . 526
Yugo Hayashi, Kazuhisa Miwa

How strong emotions influence reasoning: effects of spider phobia on a conditional inference task 532
Christina Wranke, Luzie Jung, Kai Hamburger

A functional brain imaging study on the neural correlates of altruism in social decision-making . 538
Markus Knauff, Thomas Fangmeier, Markus Raabe, Mark Greenlee

What is Special about Children’s Deontic Reasoning? 544
Monica Bucciarelli

Severe Outcomes and their Influence on Judgments of Causation 550
Clare Walsh, Ulrike Hahn, Lisa DeGregerio

Statistical Word Learning and Object Categorization: A Cross-Linguistic Study in English and Mandarin 555
Chi-hsin Chen, Chen Yu, Chih-Yi Wu, Hintat Cheung

Terrence Stewart, Robert West, Christian Lebiere

Comparison, Categorization, and Metaphor Comprehension 567
Bahriye Selin Gokcesu

Re-Categorization: Restructuring In Categorization 573
David Cosejo, Justin Oesterreich, Stellan Ohlsson

Shape constancy, not size constancy: A (partial) explanation for the Müller-Lyer illusion 579
Bence Nanay

Action, Detection, and Perception: A Computational Model of the Relation Between Movement and Orientation Selectivity in the Cerebral Cortex 585
Anthony Morse, Tom Ziemke

Co-speech gestures do not originate from speech production processes: Evidence from the relationship between co-thought and co-speech gestures 591
Mingyuan Chu, Sotaro Kita

Convergence and Divergence in Representational Systems: Emergent Place Learning and Language in Toddlers 596
Frances Balcomb, Nora Newcombe, Katrina Ferrara

Creativity Evaluation through Latent Semantic Analysis 602
Eve Forster, Kevin Dunbar

Examining Sources of Individual Variation in Sustained Attention 608
Glenn Gunzelmann, L. Richard Moore, Jr., Kevin A. Gluck, Hans P. A. Van Dongen, David F. Dinges

Generic Abstraction in Design Creativity 614
Fehmi Dogan, Nancy Nersesjian

Optimal Foraging in Semantic Memory 620
Thomas Hills, Peter Todd, Mike Jones
Japanese sound symbolism facilitates verb learning in English speaking children
Katerina Kantartzis, Sotaro Kita, Mutsumi Imai

Imagery as Compensation for an Imperfect Abstract Problem Representation
Samuel Winternute, John E. Laird

Culture in the Mirror of Language: A Latent Semantic Analysis Approach to Culture
Eyal Sagi, Stefan Kaufmann, Brady Clark

Increased Practice with Set Problems Hinders Performance on the Water Jar Task
Noelle M. Crooks, Nicole M. McNeil

Volume 2

Process of explanation and representation in a counterintuitive problem of probabilities
Jordi Majà

Unconscious Analogical Mapping?
Penka Hristova

Experimental Examination of Feature Emergence in Metaphor Understanding with Consideration for Individual Differences
Asuka Terai, Masanori Nakagawa

Is the scope of phonological planning constrained by the syntactical role of the utterance constituents?
Nicolas Dumay, Markus F. Damian, Hans Stadthagen-Gonzalez, Miguel A. Perez

The Effect of Objecthood on Processing Efficiency
Luiza Shahbazyan, Boicho Kokinov

Individual Variation in Students Mind-body Ontologies, An Explorative Study
Otto Lappi, Anna-Mari Rusanen, Tero Hakala

State-Trace Analysis of the Face Inversion Effect
Melissa Prince, Andrew Heathcote

Causal Schema-based Inductive Reasoning
Oren Griffiths, Ralf Mayrhofer, Jonas Nagel, Michael R. Waldmann

Iterated learning in populations of Bayesian agents
Kenny Smith

Extending Trust: Coupled Systems, Trust and the Extended Mind.
Neal Leblanc

Modelling the Category-Order Effect with an Oscillator-Based Connectionist Network
Jordan Schoenherr, Robert Thomson

Active vs Passive Training for Educational Software
Ruth Wylie, Benjamin Shih

Interaction of Taxonomic and Contextual Knowledge in Categorization of Cross-Classified Instances
Nadya Vasilyeva, John Coley, Tara Muratore

A Cognitive Model of Discovering Commutativity
Markus Guhe, Alison Pease, Alan Smaill
Expertise Effects on Immediate, Deliberate and Unconscious Thought in Complex Decision Making .............................................................. 733
Margje van de Wiel, Henny Boshuizen, Eva Meeuwesen, Reinout Wiers

Gaze and arrow induce different effects on attentional orienting as a function of target context ... 739
Andrea Marotta, Maria Casagrande, Antonino Raffone, Diana Martella, Mara Sebastiani, Lisa Maccari

Can Actions Represent Relations? .................................................. 744
Milena Mutafchieva, Boicho Kokinov

Fatigue of Cognitive Control in the Stroop-Task ........................................ 750
Wolfgang Rauch, Kathrin Schmitt

Bugs and Biases: Diagnosing Misconceptions in the Understanding of Diagrams ................. 756
James E. Corter, Yun Jin Rho, Doris Zahner, Jeffrey Nickerson, Barbara Tversky

Hard to put your finger on it: Haptic modality disadvantage in conceptual processing .......... 762
Louise Connell, Dermot Lynott

Investment Decision-Making and Hindsight Bias ........................................ 768
Marco Monti, Paolo Legrenzi

Alerting, Orienting and Executive Control: The effects of sleep deprivation .................... 773
Diana Martella, Maria Casagrande, Andrea Marotta, Mara Sebastiani, Lisa Maccari

Predicting when words may appear: A Connectionist Model of Sentence Processing ........ 779
Simon Dennis, Dennis Mehay, Srikar Yekollu

The Interactional Geometry of a Three-way Conversation ....................................... 785
Patrick G.T. Healey, Stuart A. Battersby

An ART Neural Network Model of Discrimination Shift Learning .............................. 791
Maartje Raijmakers, Emily Coffey, Claire Stevenson, Jasper Winkel, Arjan Berkeljon

Compatibility of Motion Facilitates Visuomotor Synchronization .............................. 797
Michael Hove, Michael Spivey, Carol Krumhansl

A Transitivity Heuristic of Probabilistic Causal Reasoning .................................... 803
Momme von Sydow, Björn Meder, York Hagemayer

When a bad metaphor may not be a victimless crime: The role of metaphor in social policy ..... 809
Paul Thibodeau, James McClelland, Lera Boroditsky

Similarity and Structural Priming ......................................................................... 815
Neal Snider

SARL: A Computational Reinforcement Learning Model with Selective Attention ............ 821
Maurice Grinberg, Evgenia Hristova

Connectionist Modeling of Situated Language Processing: Language and Meaning Acquisition from an Embodiment Perspective ................................................... 827
Helmut Weldle, Lars Konieczny, Daniel Müller, Sascha Wolfer, Peter Baumann

Preventative Scope in Causation ........................................................................... 833
Christopher Carroll, Patricia Cheng

A First-Person Perspective on a Parent-Child Social Interaction During Object Play ........ 839
Alfredo F. Pereira, Chen Yu, Linda Smith, Hongwei Shen
Talker information is not normalized in fluent speech: Evidence from on-line processing of spoken words ................................................................. 845
Sarah Creel, Melanie Tumlin

Evidence for Efficient Language Production in Chinese ................................................................. 851
Ting Qian, T. Florian Jaeger

Grammar-based object representations in a scene parsing task: ................................................. 857
Virginia Savova, Frank Jaekel, Joshua Tenenbaum

Modeling Cued Recall and Memory Illusions as a Result of Structure Mapping .................. 863
Georgi Petkov, Boicho Kokinov

Abstract knowledge guides search and prediction in novel situations ........................................ 869
Russell E. Warner, Patrick Shafto, Chris Baker, Joshua Tenenbaum

Body-specific representations of action verbs: Evidence from fMRI in right- and left-handers ...... 875
Daniel Casasanto, Roel Willems, Peter Hagoort

What is the cause of left hemisphere lateralization of English visual word recognition?
Pre-existing language lateralization, or task characteristics? ..................................................... 881
Janet Hsiao, Gary Cottrell

Language Differences in Bilingual Parent Number Speech to Preschool-Aged Children .......... 887
Alicia Chang, Catherine Sandhofer

Predictive Arm Placement in the Statistical Learning of Position Sequences ...................... 893
Nicholas Duran, Rick Dale

Implicit Learning Deficits in Autism: A Neurocomputational Account ...................................... 899
Trent Kriete, David Noelle

Extraordinary Natural Ability: Anagram Solution as an Extension of Normal Reading Ability .... 905
Jonathan Henin, Emma Accorsi, Pyeong Whan Cho, Whitney Tabor

A Biologically-Plausible Cognitive Model (BPCM) of Positive and Negative Congruency Effects in Masked Priming ......................................................... 911
Ahmad Sohrabi, Robert West

So many options: The roles of neural inhibition and abstract representations in selection ........ 917
Hannah Snyder, Natalie Hutchison, Erika Nyhus, Tim Curran, Yuko Munakata

Unconsciously deciphering your doctor’s handwriting: Subliminal invariance for handwritten
words in the visual word form area ................................................................................................. 918
Emilie Qiao, Fabien Vinckier, Marcin Szwed, Lionel Naccache, Romain Valabregue, Stanislas Dehaene, Laurent Cohen

Causal Parsimony in Learning Science ........................................................................................ 919
Hima Khamar, Michelle Ellefson, Christian Schunn

My hands can’t move like that: Mental rotation of body parts in cerebral palsy subjects .......... 920
Isabel Catarina Martins, Armando Mônica de Oliveira, Michel-Ange Amorim

The Efficiency of Visual Artwork: Relating Cognitive and Perceptual Processing to Nonlinear Image Statistics ........................................................................ 921
Daniel Graham, Jay Friedenberg, Daniel Rockmore
Computational and Neural Mechanisms for Visual Suppression                     922
Charles Q. Wu

On the falsifiability of prototype and exemplar models.                       923
Wolf Vanpaemel

Electrophysiological evidence of the semantic and the number of characters encoding in Chinese production                        924
Yi-Shiuan Chiu, On I Lou

Divergent developmental trends in semantic false memories for lists and stories          925
Ellen Swannell, Stephen Dewhurst

Saccadic eye movements as a measure of perceptual decision-making            926
Eugene McSorley, Rachel McCloy, Alice Cruickshank, Laura Inman

Reducing false memory by using domain-specific knowledge                        927
Michael C. W. Yip

Role of Philosophy and Qualitative Education as a Fact of the Capable of Removing Social Tension on a World Scale          928
Victoria Pavlenko

Happier Faces Shift Attention Rightward: The Cognitive Consequences of Magnitude Processing 929
Kevin J. Holmes, Stella F. Lourenco

The Effects of Bilingualism on Context Sensitivity                              930
Viridiana Benitez, Linda Smith

Semantic-level multimodal integration of video and speech data streams          931
Olga Vybornova, Hildeberto Mendonça, Benoit Macq

Disjunctions with Moving Targets                                        932
Magda Dumitru

Spatial Representations of Number and Size                                     933
Justin W. Bonny, Stella F. Lourenco

The distance effect of head-complement dependency in sentence acceptability    934
Kei Takahashi, Satoru Yokoyama, Toshimune Kambara, Kei Yoshimoto, Ryuta Kawashima

The role of worked-examples in schema acquisition: Implications and preliminary findings    935
Siti Soraya Abdul Rahman, Benedict du Boulay

Thinking for action: The role of obligatory and prohibitory traffic sign information in driving performance                    936
Javier Roca, Mercedes Bueno, Sergio Moreno-Ríos, Cándida Castro

Decision making strategies and preferences for intuition and deliberation        937
Dustin Calvillo

To be or to become: An evolutionary model of learning and development          938
Willem E. Frankenhuisc, Karthik Panchanathan

Contribution of the Bilateral Middle Temporal Gyri to the Processing of Lexical Categories        939
Toshimune Kambara, Satoru Yokoyama, Kei Takahashi, Naoki Miura, Tadao Miyamoto,
Daiko Takahashi, Shigeru Sato, Ryuta Kawashima
How can Euler diagrams improve syllogistic reasoning? Yuri Sato, Koji Mineshima, Ryo Takemura, Mitsuhiro Okada .......................... 940

Virtual characters can have plausible episodic and spatial memory Cyril Brom, Jiří Lukavský .......................... 941

How Tacit Knowledge guides Action Ya’akov Gal, Whitman Richards, Rajesh Kastuririangan, Avi Pfeffer .......................... 942

Dual-Task Strategy Adaptation: How Task Structure is Actively Reconfigured for Improved Performance Christian P. Janssen, Duncan P. Brumby .......................... 943

Eye-tracking studies of animate vs. inanimate objects: task driven animacy effects Vanja Kovic, Kim Plunkett, Gert Westermann .......................... 944

Implicit vs. Explicit learning of the German Noun Plural Vanja Kovic, Gert Westermann, Kim Plunkett .......................... 945

Learning a Song: an ACT-R Model Belkacem Chikhaoui, Hélène Pigot, Mathieu Beaudoin, Guillaume Pratte, Philippe Bellefeuille, Fernando Laudas .......................... 946

Human and Optimal Exploration and Exploitation in Bandit Problems Shuman Zhang, Michael Lee, Miles Munro .......................... 947

Categorization system of language speakers by utilizing fMRI data during language comprehension Satoru Yokoyama, Kei Takahashi, Kei Yoshimoto, Ryuta Kawashima .......................... 948

Promoting students ability to draw collaborative inferences from distributed information in group problem-solving: a training experiment Anne Meier, Hans Spada .......................... 949

Exploring worked examples in tutored problem solving Ron Salden, Vincent Aleven, Rolf Schwonke, Alexander Renkl .......................... 950

Facial Perception as a Configural Process Devin Burns, Lei Pei, Joseph Houpt, James Townsend .......................... 952

Dynamics of speech sound categorization for continua defined by spectral vs. duration contrast Ran Liu, Jason Zevin .......................... 953

Cost of Information Acquisition and Evolving Strategies Bella Z. Veksler, Wayne D. Gray, Michael J. Schoelles .......................... 954

Exploring GPA as a Tool in Measuring Pauses of Writers Language Competency Putri Afzan Maria Zulkifli, Peter Cheng .......................... 955

Different brain activity during non-speech sound processing between good and poor L2 learners of pronunciation: an fMRI study Kaori Hoshi, Satoru Yokoyama, Hiroshi Hashizume, Hyeonjeong Jeong, Kei Takahashi, Toshimune Kambara, Takeshi Ogawa, Ryuta Kawashima .......................... 956
Autonomous Systems Interaction Design (ASID) based on NDHB-Model/RT .......................... 957
Muneo Kitajima, Makoto Toyota

Dynamics of consciousness-emotion interaction: an explanation by NDHB-Model/RT .......... 958
Makoto Toyota, Muneo Kitajima

Omission bias and intention in Japanese people ......................................................... 959
Hajimu Hayashi

Models of similarity in intertemporal choice ......................................................... 960
Jeffrey Stevens

Retrieving episodic memories when recognizing familiar faces and names. .............. 961
Catherine Barsics, Serge Brédart

Effects of Incongruity between Prior Knowledge and New Information on the Acquisition of Knowledge ................................................................. 962
Johannes Moskaliuk, Joachim Kimmerle, Ulrike Cress

Structure and Strength in Simple Causal Learning Task ........................................ 963
Motoyuki Saito, Tsuneo Shimazaki

The Role of Metacognition in the Composing Processes of 8th Graders Who Are Gifted and 8th Graders with Learning Disabilities ............................................. 964
Delayne Connor

Is the Typicality Effect in Category-based Induction Really About Typicality? .......... 965
Jonathan Rein, Arthur Markman, Micah Goldwater

7 month-old infants use chunking to increase working memory capacity .................. 966
Arin S. Tuerk, Mariko Yamaguchi, Lisa Feigenson

Hemispheric Asymmetries in Categorical Perception of Orientation ........................ 967
Anna Franklin, Dianne Catherwood, James Alvarez, Emma Axelsson

The Relationship between Harmonic Priming and Stroop Interference: A Study of Individual Differences ................................................................. 968
Nart Bedin Atalay, Mine Misirlisoy

Moral Reasoning Given a Strong Argument and Time .......................................... 969
Joseph Paxton, Leo Ungar, Joshua Greene

How much logical structure is helpful in content-based argumentation software for legal case solving? ................................................................. 970
Stijn Colen, Fokie Cnosen, Bart Verheij

Learning absence exceptions to general rules ....................................................... 971
Anne Hsu, Nick Chater

Developmental Evidence for a Canonical Syntax-Semantics Mapping for Verbs of Psychological States ................................................................. 972
Amanda Pogue, Joshua K. Hartshorne, Jesse Snedeker

The effect of reversal on reproduction of observed temporal sequences .................... 973
John Hyland, Denis O'Hora, Julian Leslie, Sinead Smyth

Multi-Level Cellular Automata: a platform for understanding perceptual and social dynamics .... 974
Jan Koenderink, Whitman Richards
Phonological and episodic buffer contribution to short-term memory in deaf signers ................................. 975
Elizabeth Hirshorn, Nina Fernandez, Daphne Bavelier

Embodied anticipation for swift re-adaptation in neurocomputational cognitive architectures for robotic agents ................................................................................................................. 3082
Alberto Montebelli, Robert Lowe, Tom Ziemke

Metacognitive Awareness versus Linguistic Politeness: Expressions of Confusion in Tutorial Dialogues ........................................................................................................................................ 3088
Gwendolyn Campbell, Natalie Steinhauser, Myroslava Dzikovska, Johanna Moore, Charles Callaway, Elaine Fallow

Incremental Modeling of Language Understanding Using Speech Act Frames .............................. 3093
Wende Frost, Magdalena Bugajska, Greg Trafton

The Sparsity of Simple Recurrent Networks in Musical Structure Learning ................................. 3099
Kat R. Agres, Jordan E. DeLong, Michael Spivey

Joint or Conditional Probability in Statistical Word Learning: Why decide? ............................... 3105
Krystal Klein, Chen Yu

Group Identity Salience in Sacred Value Based Cultural Conflict: An Examination of the Hindu-Muslim Identities in the Kashmir and Babri Mosque Issues ............................................ 3111
Sonya Sachdeva, Douglas Medin

Analogical Scaffolding in Collaborative Learning ........................................................................ 3115
Soniya Gadgil, Timothy Nokes

Tutored Problem Solving vs. Pure Worked Examples ....................................................................... 3121
Ryung Kim, Rob Weitz, Neil Heffernan, Nathan Krach

The Impact of Category Type and Working Memory Span on Attentional Learning in Categorization .................................................................................................................................. 3127
Mark Blair, Lihan Chen, Kimberly Meier, Michael Wood, Marcus Watson, Ulric Wong

The Development of Analogy:Executive Resources in Relational Learning and Mapping .............. 3133
Leonidas Doumas, Robert Morrison, Lindsey Richland
Head pose and gaze direction estimation for joint attention modeling in embodied agents ...... 3139
Zeynep Yucel, Albert Ali Salah

Active Learning Strategies in a Spatial Concept Learning Game ................................. 3145
Todd Gureckis, Doug Markant

How Tall Is Tall? Compositionality, Statistics, and Gradable Adjectives ........................ 3151
Lauren Schmidt, Noah Goodman, David Barner, Joshua Tenenbaum

Persistence of Naïve Statistical Reasoning Concerning Analysis of Variance .................. 3157
David Trumpower, Krystal Hachey, Steven Mewaldt

The Feature-Label-Order Effect In Symbolic Learning ............................................. 3163
Michael Ramscar, Daniel Yarlett, Melody Dye, Nal Kalchbrenner

Two routes to cognitive flexibility: Learning and response conflict resolution in the dimensional change card sort task ................................................................. 3169
Michael Ramscar, Melody Dye, Jessica Witten, Joseph Klein

No Representation without Taxation: The Costs and Benefits of Learning to Conceptualize the Environment ................................................................. 3175
Melody Dye, Michael Ramscar

Overhearing Computer-Mediated Monologues and Dialogues .................................... 3181
Roxanne Benoit Raine

The biophysics of TMS-induced state-dependent phosphenes: A molecular mechanism for the visual buffer? ................................................................. 3182
Istvan Bokkon, Amedeo D’Angiulli

Learning flexible skills in anesthesiology: comparing list and context learning in a human patient simulator .................................................................................................. 3183
Fokie Cnossen, Martin Grapengeter, Laurens Feenstra, Stefan Wierda

Real-Time Attention in a Cross-Situational Learning Task: An Eye Tracking Analysis ...... 3184
Daniel Yurovsky, Chen Yu

The Origin of Object Knowledge: Perceptual Completion at Birth ............................... 3185
Hermann Bulf, Eloisa Valenza

The Believability of Anthropomorphic Explanations of Natural Phenomena .................. 3186
Jordan Schoenherr, Heather Burch, Jim Davies, Robert Thomson

Explicit References in Chat-Based CSCL: Do They Facilitate Global Text Processing? .......... 3187
Michael Oehl, Hans-Rüdiger Pfister

Computational Cognition of Spatial Objects ............................................................... 3188
Angela Schwering

Do we inhibit responses to stop them? Assessing the role of inhibition in motor stopping tasks 3189
Chelan Weaver, Michael Anderson

On the role of metacognition in bootstrapped learning ............................................. 3190
Alexei V. Samsonovich, Anastasia Kitsantas

"Bob thinks this but Emily thinks that": Contrastive beliefs improve kindergartners’ scientific reasoning ................................................................. 3191
Claire Cook, Laura Schulz
Gopala Krishna Koduri

Numerical and Spatial Abilities in a Language-Deprived Adolescent
Daniel Hyde, Sang-Ah Lee, Nathan Winkler-Rhoades, Elizabeth Spelke, Veronique Izard, Kevin Shapiro

Musicat: A model of music perception and expectation
Eric Nichols, Douglas Hofstadter

Believing is Seeing: Children’s Causal Beliefs Affect Visual Exploration and Prediction
Elizabeth Baraff Bonawitz, Stephanie Brennan, Laura Schulz

Avoiding Logical Omniscience by Default - An Investigation into Autoepistemic Logic (Levesque, 1990)
Matthias Unterhuber

That’s How it Goes with Fictive Motion
Michelle Greenwood, Teenie Matlock

Outsourcing the Inference Evaluation in Causal Analogies
Julie Colhoun, Dedre Gentner

Hierarchical Clustering of Abstract and Concrete Nouns
Christine Wilson, Stefan Th. Gries, Joy Lynn Brasfield, Lawrence Barsalou

Pattern Discovery and Compression in Finite State Transducers
Giancarlo Schrementi, Michael Gasser

Semisupervised category learning: the impact of feedback investigated in the perceptual representation system
Katleen Vandist, Maarten De Schryver, Yves Rosseel

Learners Processing of Novel Words while Reading: Eye Movements and Learning Gains
Aline Godfroid, Frank Boers, Alex Housen

Interaction of episodic and semantic memory in cued recall
Cynthia M. Henderson, James McClelland

Activity states framework for the analysis of cross-domain collaboration on the Web
Nik Nailah Binti Abdullah, Shinichi Honiden

Acting on Objects: Integrating Visual and Motor Processes 18-24 months
Sandra Street, Linda Smith

Inducing Amnesia through Cognitive Control: The Hippocampal Modulation (H.M.) Paradigm
Justin Hulbert, Michael Anderson

An Inchoative-Resultative Bias in Event Representation: A Comparative Study between Arabs and Spaniards
Antonio Román, Julio Santiago, Marc Ouellet, Sally Rice

Nonlinear Epigenetic Variance: Review and Simulations
Kees Jan Kan, Han L.J. van der Maas

Can Expertise Modulate Representational Momentum?
Colin Blattler, Vincent Ferrari, Evelyne Marmèche
Do Executive Functions Predict Performance in All Switching Tasks? ................................. 3210
Andrea Molzhon, Michelle Ellefson, Elisabeth Blagrove, Nick Chater

Graphical Representations of Science: Decoding Accuracy and Preference Ratings ................. 3211
Jordan Schoenherr, Davies Jim, Bell Jolie

Online processing of speech prosody in children with autism spectrum disorders: An eye-tracking study .............................................................................................................................................. 3212
Yui Miura, Tomoko Matsui, Yoshikuni Tojo, Hiroo Osanai

Sustained Attention: Exogenous or Endogenous control? Evidence by a Continuous Attentional Orienting Task (CAOT) ................................................................. 3213
Mara Sebastiani, Maria Casagrande, Antonino Raffone, Diana Martella, Andrea Marotta, Lisa Maccari

A novel paradigm for exploring the neural mechanisms of visual memory suppression .......... 3214
Ean Huddleston, Michael Anderson

Discrimination of the conscious and not conscious perception of famous and unknown faces from EEG oscillatory activity: Application of Support Vector Machine classifiers. ........... 3215
Aurélie Campagne, Jacques Martinerie, Jean Lorenceau, Bernard Renault

The Effects of Verbal and Graphical Recall Strategies on Text Retention and Text Comprehension ...................................................................................................................... 3216
Liesbeth Kester

Does the K-12 practice of mixing pictures and graphs contribute to students’ ‘graph-as-picture’ misconceptions? .......................................................................................... 3217
Grecia Garcia Garcia, Richard Cox

The TRIPLE Cognitive Architecture: Implementation of Embodied Agents Based on a Cognitive Model ..................................................................................................................... 3218
Maurice Grinberg, Vladimir Haltakov, Hristo Laftchiev, Stefan Kostadinov, Kiril Kyriazov

Alignment of Spatial Perspective ................................................................................................. 3219
Elena Andonova

Position-sensitive letter substitution and letter transposition effects on masked orthographic priming ......................................................................................................................... 3220
Patrick A. O’Connor, Laurie Beth Feldman

Are Tims hot and Toms not? Probing the effect of sound symbolism on perception of facial attractiveness ............................................................................................................ 3221
Franziska Hartung, Daniel Klenovsak, Luunya Santiago dos Santos, Carolin Strobl, Dietmar Zaefferer

Semantic principles are more important than syntactic ones for low proficient second language learners: Evidence from sentence processing ......................................................... 3222
Josje Verhagen

Joint perception across tasks ........................................................................................................ 3223
Daniel Richardson, Merrit Hoover, Arezou Ghane

Do Object Affordances affect Hand Identification? ................................................................. 3224
Alexia Toskos Dils, Stephen Flusberg, Lera Boroditsky

Perceiving Affordances for Joint Action ...................................................................................... 3225
Tehran Davis, Michael Riley, Kevin Shockley
Stride Length and Step Rate Influence Egocentric Distance Perception
Eliah White, Jonathan Shook, Kevin Shockley, Michael Riley

Counterfactual ‘if only’ conditionals
James Dixon, Robert Guttentag, Ruth M. J. Byrne

Learning to Lose Less
Erica C. Yu, David A. Lagnado, Nick Chater

Flexible Spatial Language Behaviors: Developing a New Dynamic Theoretical Framework
John Lipinski, Yulia Sandamirskaya, Gregor Schöner

Nonmonotonic function learning as similarity construction
Michael Kalish

A rational model of function learning
Christopher Lucas, Thomas Griffiths, Michael Kalish

The Effect of Causal Strength on the Use of Causal and Similarity-based Information in Feature Inference
Rachel Stephens, Daniel Navarro, John Dunn, Michael Lee

Can interaction with an artificial category reduce the salience of that category?
Aaron Loehrlein

Fractal Patterns in Complex Reading Tasks
Sebastian Wallot, Guy Van Orden

Treading a Slippery Slope: Slant Perception In Near and Far Space
Eric Chiu, Merrit Hoover, Joshua Quan, Bruce Bridgeman

A walk through face space: Affect classification using Markov chain Monte Carlo
Jason Martin, Thomas Griffiths, Adam Sanborn

Better associative learning when confusable shapes serve as cues rather than as associates.
Adam November, Nicolas Davidenko, Michael Ramscar

Intentional aspects of spatial perception: Stimulus control reverses implied-friction effects in representational momentum
Jerome Scott Jordan, Charles Coey, Kyriakos Tsiapputas

Neuroimaging Evidence on the Role of the Prefrontal Cortex in Dynamic Object Categorization for Goal-Achievement
Evangelia G. Chrysikou, Sharon L. Thompson-Schill

Tracking the course of algebra learning
Matthew Walsh, John Anderson

Shifts of Facial Attention Distribution in Trait Anxiety Participants
David Hendrickson, Emily Chaffin, Laura Thompson

Accounting for Pause Patterns in Writing: Integrating Strategies and Processing Requirements in a Cognitive Architecture
Rossano Barone, Peter Cheng

Is the OR-structure a Default Model in Inferring Causal Structure?
Kyung Soo Do, JaeHyuk Choi, Han Eol Choi
Neural Substrates of Posttraumatic Stress Disorder: Functional Magnetic Resonance Imaging
Study Using Negative Priming Task ................................................................. 3244
jeong ryu, Byeong-Taek Lee, Myeong-Ho Sohn, Dong Hoon Lee, Nam Hee Choi

Statistical mechanics of semantic cognitive maps ........................................ 3245
Alexei V. Samsonovich

Subattractor Dynamics in Real-Time Mental Processing ............................. 3246
Michael Wojnowicz, Gary Lupyan, Melissa Ferguson, Michael Spivey

Cognitive Barriers to Authentic Contractual Consent .................................. 3247
Jessica Choplin, Debra Pogrund Stark

Relationship between the Information Grouping Strategy and Idea Generation ......................................................... 3248
Sachiko Kiyokawa, Yuichi Washida, Kazuhiro Ueda, Eileen Peng

Are People with Very Different Parents More Creative? Some Preliminary Studies ................................................................. 3249
Liane Gabora, Stefan Leijnen, Brian O’Connor

Labeling and young childrens understanding of symbols ........................ 3250
Nathan Winkler-Rhoades, Susan Carey, Elizabeth Spelke

Simultaneous Noun and Category Learning via Cross-Situational Statistics ................................................................. 3251
George Kachergis, Tarun Gangwani, Chen Yu

Visual Similarity and Difference with Separable and Integral Dimensions ......................................................... 3252
Michael Romano

Saccades and Finger Movements Are Planned Using Visual Memory As Well As Current Retinal Information ................................................................. 3253
Laurel Issen, David Knill

Patterns of word learning .............................................................................. 3254
Emily Thom, Catherine Sandhofer

Competition Between Reinforcement and Similarity in Category Learning ................................................................. 3255
John McDonnell, Todd Gureckis

What our eyes can tell us about how an insight emerges? ........................ 3256
Tsunhin John Wong, Christian Schunn, Greg Siegle

An Exploration of Dialect-Driven Modulation of Spoken Word Recognition ................................................................. 3257
Jennifer Roche, Rick Dale, Thomas Farmer, Jason Zevin

A Dialogue Experimentation Toolkit ............................................................. 3258
Patrick G.T. Healey, Gregory J. Mills

Language context matters: An ERP study of transient and sustained control in bilingual language switching ................................................................. 3259
Ingrid Christoffels, Carien Caljouw, Guido Band, Niels Schiller, Lorenza Colzato

Core knowledge of social dominance ......................................................... 3260
Lotte Thomsen, Willem E. Frankenhuis, Susan Carey, Brittany Walker-Meade
