# TABLE OF CONTENTS

## VOLUME 1

### Plenary Lecture Papers

The Application of Electrochemical and Other Techniques to Our Aging Built Infrastructure for the Repair and Conservation of Buildings, Bridges and Structures of Historic and Architectural Importance

*J.P. Broomfield*

Corrosion Control Hits Home: The Profound Implications of Premise Plumbing Corrosion

*Marc Edwards*

Corrosion Prevention the Key to the Use of Renewable Energy

*Koji Hashimoto, Zenta Kato, Naokazu Kumagai, Koichi Izumiya*

### Papers (Listed in Numerical Order)

SCC Behavior of Sensitized Austenitic Stainless Steels in Boiling Saturated Magnesium Chloride Solutions

*Osama M. Alyousif, Rokuro Nishimura*

Sacrificial Anode Cathodic Protection of Steel Tubular Pilings of a Harbor Wharf-design and Protection Effects from 11 Year’s Operation

*Xi-chang Zhu, Yan Ge, Y. Li*

Polarization Measurements Under Atmospheric Conditions Using a Kelvin Probe As a Reference Electrode

*A. De Rooij*

Creating New Corrosion Inhibitors on the Base of Waste Material of Oil Industry

*V.M. Abbasov, L.I. Aliyeva, E.H. Abdullayeva*

Opportunities and Challenges in Processing Heavy Sour Crude Oils

*B. S. Negi*

Effect of the Environment on the Metal Release and Corrosion Behaviour of Different Copper-based Alloys: Field Exposures at 5 Different Test Sites in Europe

*S. Goidanich, I. Odnevall Wallinder, M.A. Arenas, J. De Damborenea, M. Ormellese, J.M Sanchez Amaya, F.J. Botana, N. Le Bozec*

Modeling the Crack Propagation Rate for Corrosion Fatigue at High Frequency of Applied Stress

*G.R. Engelhardt, D.D. Macdonald*

On the Tenuous Nature of Passivity

*D.D. Macdonald*

Critical Issues in Understanding Corrosion Phenomena in Super Critical Aqueous Media

*D.D. Macdonald*

Localized Corrosion and Stress Corrosion Cracking of Carbon Steel Tanks at Hanford

*C.S. Brossia, F. Gui, C.S. Scott, J.A. Beavers, G.L. Edgemon, Kayle Boomer, H. Berman*

Naphthenic Acids Combat Naphthenic Acid Corrosion

*Alec Groysman, Joseph Penner, Naphtali Brodsky, Svetlana Skorodinsky*

Corrosion of Carbon Steel in Ethanolamine

*F. Gui, N. Sridhar, R. Thodla, C.S. Brossia*

Unexpected Corrosion in Sour Water Withdrawal Line

*Gyoung Taek Kim, Dong Keun Park, Byong Mu Kim*

Application of Ni-plating to Prevent Steam Generator Tubing from SCC in Nuclear Power Plants

*Jaong Soo Kim, Myung Jin Kim, Dong Jin Kim, Hong Pyo Kim*

Failure of Thin Films: Optical Shearography Versus Electrochemical Impedance Spectroscopy

*K. Habib*

Successful Treatment with Octadecylamine for Lay-up Protection

*Qiang-Qiang Liao, H.H. Ge, Guo-Ding Zhou*

High-temperature Oxidation Behavior of Al<sub>2</sub>O<sub>3</sub>- and Cr<sub>2</sub>O<sub>3</sub>-forming Heat-resisting Alloys with Small Amounts of Reactive and Noble Elements

*Tadaaki Amano*
The Role of Hydrogen in SCC of a Pipeline Steel in Soil
J.X. Li, B.W. Pan, W.Y. Chu, L.J. Quo ................................................................. 263
Long - Term Atmospheric Corrosion of Carbon Steel and Zinc
J.M. Costa, E. Brillas, M. Vilarrasa ................................................................. 270
Uses of the Rotating Cylinder Geometry to Predict the Damage Corrosion During the Oil
Transportation
Maria de Lourdes Elizalde, Jesus Daniel Robles Salas ....................................... 282
High Temperature Sulfidation Corrosion in Refining
E.H. Nicolls, J.M. Stankiewicz, J.E. McLaughlin, K. Yamamoto ......................... 292
Significant Issues with CO₂ Corrosion Models for Specific Applications
Bruce Craig .......................................................................................................... 312
Monitoring and Analyzing Galvanic Corrosion in Multiple Electrode System
Farqad F. Saeed .................................................................................................... 319
The Influence of Aerial Oxygen on the Interaction of Polycrystalline Silver Surfaces with SO₂
R. Wiesinger, Ch. Kleber, U. Hilfrich, M. Schreiner ........................................... 334
Crude Piping Corrosion Failure at Wet Crude Handling Facilities (Case Study)
Mohammed S. Al-Qalaf, Hasan A. Raheen ......................................................... 340
Critical Evaluation of International Cathodic Disbondment Test Methods
Benjamin T.A. Chang, Ole Øystein Knudsen, Dennis Wong, Jiri Holub, Amal Al-Borno, J. Alan Kehr
Electrochemical Investigation of the Role of Cl⁻ on Localized CO₂ Corrosion of Mild Steel
Xiu Jiang, Srdjan Nestic ........................................................................................ 366
Wavelet Diagnosis of Electrochemical Current Noise for Real-time Indication of Localized Corrosion
Boris Motko, Guenter Schmitt ............................................................................. 387
Research on the Effectiveness of Protective Coatings Used by Structure Samples
Xiao-Yun Zhang, Feng Li, Zhi-Hui Tang, Bo Yu .................................................... 400
Recent Advances in Green Chemistry Research & Development As Sources for New Eco-friendly
Materials Protection Agents ................................................................................. 408
A Palladium Film on Stainless Steels by Brush Plating and Its Excellent Corrosion Resistance in
Reducing Mediums .............................................................................................. 416
Y. Zuo, J.L. Tang, Y.M. Tang, J.P. Xiong ................................................................ 422
Influence of Microstructure on the Corrosion Performance of Dual Phase Steels
D. Farias, J.M.C. Mol, J.H.W. de Wit, H. Teryn, F. Hannour .................................. 429
Characterization of the Passive Film on Mild Steel in CO₂ Environments
Jiabin Han, David Young, Srdjan Nestic, Akhilesh Tripathi ................................. 429
Initial Steps on Microbial Colonization and Corrosion on Drinking Water Networks
Blanca Rosales, Manuela Pajol, Elena Rastelli ..................................................... 442
Study of Wet-dry Cycles on Accelerated Metal Corrosion Under Coating in Seawater Using EIS
Jia Wang, Wei Zhang ............................................................................................. 455
Initiation and Propagation of Damage During Drop Evaporation Test
M. Blahetova, R. Blaheta, V. Cihal, E. Kalabisova, Z. Krhutova, S. Lasek ............. 463
Effect of Flow on Erosion-Corrosion at Extreme Gas Flow Rate and the Performance of Corrosion
Inhibitor
Cheolho Kang, Parimal P. More, Alvaro Augusto, Oliveira Magalhaes, Ricardo Marcondes Guisso
Corrosion and Music ............................................................................................ 489
Alec Groysman, Olga Groysman
Passivity and Passive Layer Breakdown on Some Implant Biomaterials in Extreme Functional
Conditions ........................................................................................................... 495
M.V. Popa, E. Vasilescu, P. Drob, C. Vasilescu, D. Raducanu, I. Cinca
An Insight into the High Corrosion Resistance of Secondary Passivated Stainless Steel
Jingrun Wang, C. Lin, Y. Li, R. Hu ...................................................................... 504
Effects of pH and Potential on Stress Corrosion Cracking Behaviors of Pipeline Steels
Wu Yang, Guangfu Li, Guoliang Zhang, Chunbo Huang, Hao Guo, Jianjiang Zhou, Zhenhua Sun, Dafeng Yan,
Jiahua Fang ......................................................................................................... 511
Effects of Applied Potential and Sensitization on Stress Corrosion Cracking of Nitrogen-containing
Stainless Steel 316LN in High Temperature Water ............................................. 520
Wu Yang, Guangfu Li, Chunbo Huang, Jianjiang Zhou, Zhanpeng Lu
In Situ Measurement of Chloride Concentration and pH in the Micro Area during the Crevice
Corrosion of Copper Electronic Board
Min Zhang, Xiang-dong Zhao, C. Lin .................................................................... 528
A Correlative Study on Corrosion of Rebar and Chemical Environment in Concrete ................................................................. 534
C. Lin, S.G. Dong, R. Xu, R.G. Du

Elemental Sulfur Corrosion of Mild Steel at High Concentrations of Sodium Chloride .............................................................. 540
Haitao Fang, David Young, Srdjan Nesic

Effect of Compressive Loads on the Oxide-scale Morphology Formed on Ni-12Cr Alloy at 1173k ............................................................... 556
C.H. Zhou, H.T. Ma, L. Wang

Investigation of Marine Atmospheric Corrosion of a New Developed Low Carbon Bainitic Steel .............................................................. 562
S. Wang, K. Gao, S. Yang, X. He

Economic Analysis for Implementation of Corrosion Control Strategies for Water and Wastewater Infrastructure .................................................. 572
Ronald L. Bianchetti

Study of Stress Corrosion Cracking of X70 Pipeline Steel in Near Neutral pH Solution ................................................................. 589
Jianqiu Wang, Enhao Han, Wei Ke, Maocheng Yan, Bingyan Fang

Study on Cathodic Oxygen Reduction in 3.5% NaCl Solution by Electrochemical Impedance Spectroscopy .................................................. 595
Dan Zhang, Yongjuan Li, Fei Kuang, Rong Sun

Consideration of Methods Evaluating the Growing Process of Stress Corrosion Cracking of the Sensitized 18-8 Austenitic Stainless Steel in High Temperature Water Based on Electric Circuit Theory: Effects of Oxide Film .................................................. 602
Y. Tsukae

Atmospheric Corrosion of Copper in an Indoor Environment with a High H₂S Concentration ............................................................... 619
M. Watanabe, H. Hirotu, T. Handa, N. Kowaki, J. Sakai

Bronze Corrosion and Runoff Metal Dissolution in an Urban Environment .................................................................................. 627
S. Jouen, M.T. Songrati, B. Hannoyer

Study on Property of Electroless Plating Ni-W-P Coating ........................................................................................................ 636
Yan-bin Huang, Gao-wei Song, Deng-gang Liu, Zhao-fu Meng

Application of SVET/SIET Techniques to Study Healing Processes in Corroding Micro-confined Defects .............................................................................. 641
Mikhail L. Zheludekevich, Alexandre C. Bastos, Kiryl A. Yasakau, Olga V. Karavai, Sviatlana V. Lamaka, Mario G.S. Ferreira

A Free Open Source Mechanistic Model for Prediction of Mild Steel Corrosion .................................................................................. 649
Srdjan Nesic, Hui Li, Dusan Sormaz, Jing Huang

VOLUME 2

Influence of Gas Stirring on Properties of nano Al₂O₃/Ni-P Electroless .............................................................................................. 667
Kan Wang, Li Sun, Gao-wei Song, Yan-bin Huang

Effect of Corrosion Inhibitor on Water Wetting & CO₂ Corrosion in an Oil-water Two Phase System .............................................................. 673
Chong Li, Sonja Richter, Srdjan Nesic

Development of New Electrodeposition Process for Plating of Low Carbon Steel with Zn-Ni Alloys ............................................................... 693
Mohammed A.M.H. Al-Rabea, Farqad F. Saeed, Abd-Wahid K. Rajih, Fadhel M. Hussoun

Atmospheric Corrosion Effects of Air Pollution on Materials and Cultural Property in Asia and Africa .............................................................. 703
Johan Tidblad, Vladimir Kucera, Kevin Hicks, Johan Kaylenstierna, Zhao Dawei, Kai Wing, D. Saha, Surendra N. Das, Mawood Zandi, Rosita Galang, Abdul Muhsin Ramiz, Bidya Bannali Pradhan, Warnika Ranawaka Aruchchi, Wirach Chandra

Galvanic Model for Localized CO₂ Corrosion .................................................................................................................................. 717
Jiahin Han, Srdjan Nesic, Bruce Brown

Development of Crack Resistant Epoxy Coatings for Immersion Service .................................................................................. 732
K.K. Baek, E.H. Song

Localized Corrosion in an H₂S / Ni-P Electroless ........................................................................................................ 758
Bruce Brown, David Young, Srdjan Nesic

AC Corrosion Mechanism: Effects on Overpotentials of Anodic and Cathodic Processes ............................................................... 782
Fabio Bolzoni, S. Goidanich, Luciano Lazzari, M. Ormellese

Inhibitor-doped Hybrid Sol-gel Films As Pre-treatments for Aluminium Alloys .................................................................................. 798
Kiryl A. Yasakau, Mikhail L. Zheludekevich, Sviatlana V. Lamaka, Mario G.S. Ferreira

Novel Poly(Phthalazinone Ether Nitrile Ketone) Heat Resistant Coating .............................................................................................. 808
Qingling Yan, Peng Luo, Feng Zhang, Hongyuan Chen
Environmentally Friendly Protective Cycles for Aluminium Components for Marine Applications.......................... 1104
F. Deflorian, S. Rossi, M. Fedel

Modeling of Reinforcement Corrosion - Geometrical Effects on Macrocell Corrosion................................................. 1114
Juergen Warkus, M. Raupach

Corrosion Fatigue Crack Growth Behavior of Austenitic Stainless Steels Under Simulated LWR Conditions ................................................................. 1132
S. Ritter, H.P. Seifert

Research on Water Stabilizers for Stainless Steel Condenser......................................................................................... 1145
H.H. Ge, R. Liu, Y.P. Wu, G.D. Zhou, R.F. Guo, Y. Guo

Thin Film Wireless Sensors for Corrosion Management in Infrastructures................................................................. 1152
B. Bavarian, L. Reiner

Monitoring of CUI (Corrosion Under Insulation) by ACM (Atmospheric Corrosion Monitor) Sensor .................... 1162
T. Shinohara, Koji Kawano, Shigeo Tsujikawa

Characteristics of Intergranular Corrosion of Stainless Steel in the Simulation Test for Nuclear Fuel Reprocessing Plant .................................................................................................. 1170
Masahiro Yamamoto, Fumiyoshi Ueno, Chiaki Kato, Takaumi Motooka

The Effect of Heat Treatment on CO$_2$ Corrosion of API X-60 Pipeline Material......................................................... 1179
A. A. Elbasir, E.M. Agial

A Multi-Stress Screen for Corrosion-Susceptible Chip Resisters................................................................................... 1190
M. Reid, E. Dalton, J. Punch, G. Derkix Jr., W.D. Reents Jr., D. Fleming, J.P. Franey, C. Xu

Estimating the Size of the Active Electrode Area Undergoing Faradaic Reactions Using Local Electrochemical Impedance Spectroscopy .............................................................. 1201
Pavan K. Shukla, Biswajit Dasgupta, Todd S. Mintz

Tailoring of Anodically Deposited Mn-mo-o Electrodes by Direct and Pulse Current As Novel Anode

Materials for Clean Energy Production by Seawater Electrolysis ................................................................................. 1212
N. Abdel Ghanry, N.M. Deiab, A.A. El-Moneim

Development of Nanostructured, Field Effect Transistor Sensors for Environmental Conditions Leading to Corrosion........................................................................................................ 1221
K.T. Chiang, B. Lanning

Corrosion Protection of Oil Storage Tank Tops .................................................................................................................. 1235
E. Lysubinski, Y. Vaks, G. Ramdas, R. Singh

Proposed Algorithm for Life Time Prediction for Small Diameter Low Carbon Steel Pipelines Under Different Scaling-flow Simulation Conditions ........................................................................... 1248
H. Castaneda, B.N. Leis, J.L. Alamilla

Galvanic Corrosion of Carbon Steel in Carbon Dioxide Caused by Magnetite .............................................................. 1263
E. Chan, D. John, S. Bailey, B. Kinsella

Corrosion Behavior of Plasma Immersion Nitrogen Ion Implanted MN Containing Austenitic Stainless Steel .................................................................................................................. 1275
P. Saravanan, V.S. Raja

Are Sulfate Reducing Bacteria Important to the Corrosion of Stainless Steels? .......................................................... 1285
J.S. Lee, R.I. Ray, B.J. Little

Study of Wettability of Different Mild Steel Surfaces .................................................................................................. 1298
Xuanping Tang, Sonja Richter, Srdjan Nesic

Electrochemical Impedance Studies of the Growth of Sulfide Films on Copper ......................................................... 1316
J.M. Smith, Z. Qin, D.W. Shoesmith

VOLUME 3

Corrosion Protection of Oil Storage Tanks Bottoms Internal Surface ................................................................. 1325
E. Lysubinski

Online and Real-time Monitoring of Corrosion Rates of Stainless Steel, Low Carbon Steel and Copper in CO$_2$ Hydrate Slurry with Coupled Multielectrode Array Sensors ................................................................. 1336
Jin Hua, Osmann Sari, Frederic Brun, Eicher Sara, Jacques Forchelet, Jeremie Bettex, Paul Homisy

On the Role of Entropy-“Excited” Surface Layers in the Formation of High Temperature Corrosion Resistant Barrier Oxide Scale on Fe-Cr-Al-La Alloy ................................................................. 1353
O. Tsurtsumia, E.R. Katella, S.I. Bakhtiyarov

Electrochemical Behavior and Internal Current of the Most Anodic Electrode in a Coupled Multielectrode Array Sensor .................................................................................................................. 1362
Lietai Yang, K.T. Chiang

Allan Runstedtler, Sanjive Papavinasam, Eddy Chui

Detection of Hydrogen in Corrosion of Copper in Pure Water .................................................................................... 2378
G. Hulququist, P. Szakalos, M. J. Graham, G.I. Sproule, G. Wikmark

Corrosion and Protection of Metals by Iron-reducing Bacteria: A Review .............................................................. 2387
Sylvie Le Borgne, Hector A. Videla

Microbial Communities Inhabiting Manganese Deposits Formed on Stainless Steel Surfaces in Freshwater Systems ................................................................................................. 2397
Sylvie Le Borgne, Paul Linhardt

Cathodic Reduction Model of Copper Oxides Films Formed in Presence of Acetic Acid .................................................. 2407
H. Gil, A. Echavarria, F. Echeverria

Oxidation Behavior of Electroless Ni-P and NiP-Fe2O3 Coatings at 800°C Under Cyclic Oxidation Conditions .......... 2418

Corrosion on Drinking Water Distribution Systems and Its Influence in the Water Quality ...................................... 2428
J.A. Calderon, Felix Echeverria, John Fredy Rios, Elizabeth Ramirez

The Influence of Nitrate Salt Film Formation in Stainless Steel on Pit Stability .......................................................... 2440
R.S. Lillard, G. Vasquez Jr., D.F. Bahr

A Review of IGSCC Susceptibility of Precipitation Hardened Alloy X-750 In Boiling Water Reactor (BWR) Applications ........................................................................................................ 2448
Fred Hua, Ronald Horn, Martin Morra, Peter Andresen

Indoor Atmospheric Corrosion of Electronic Materials in Tropical Environments ......................................................... 2474
J.A. Calderon, H. Gil, C.E. Arroyave, C.P. Buitrago, R. Mira

Oil & Gas Well Casing Inspection in Four Dimensions ................................................................................................ 2486
Phil Tracadas, Tegwyn Perkins, Gary Frisch, Ron Stamm, Phil Fox

Employment of Linear Polarization Resistance Technique for Determination of Corrosion Rate "In-Situ" Wells Water .................................................................................................................. 2491
F. Almeraya-Calderon, Miriam Terrazas, Orozco Victor, Borunda Adan, Gaona Citlalli, Martinez Alberto

Corrosion Behavior of Alloy 718 in Molten Salts at High Temperature ................................................................. 2500

Comparative Study on the Electrochemical Corrosion Behavior of Sintered Zinc - Aluminum Coating with and Without Defect ............................................................................. 2511
Jun Wang, Jia Wang, Niu Li
Oxidation Performance at High Temperature of a FeAl Alumide Modified with Additions of Li (0, 1, 3 and 5 at.%)

Anode/Cathode Electrode Characteristics of Biofilm Battery In Natural Seawater
C. Murase, S. Motoda, T. Shinohara, N. Washizu ............................................................................................................................... 2527

Enhanced Oxidation Resistance of High Temperature Mo-Si-B Alloys
J.H. Perepezko, K. Hildal, F. Rioul, R. Sakidja ............................................................................................................................... 2537

Effect of Redox State of Conjugated Polymer on Corrosion Protection of Al Alloys
Effect of Organic Inhibitors on the Sour Service Carbon Steel Corrosion Rate
Cyclical Testing of Coatings for Steel and Aluminum Alloys
Coatings Used in conjunction with Cathodic Protection - Shielding vs Non-shielding Pipeline Coatings

Effect of Alloying Elements on the Growth of Anodic Film on Aluminium Alloys
Case Study of CP Effect on the Bottom Plate of Aboveground Storage Tank
Effect of Alloying Elements on the Growth of Anodic Film on Aluminium Alloys
Metallurgical Study on Low-temperature Aging Characteristics and SCC Behavior of Type 316L Welds
Numerical Modeling of Cathodic Protection Applied to Protect the Rear Reinforcement in RC-structures
Conventional Monitoring and Fundamental Electrochemical Methods for Establishing the Efficiency of an Alternative Cathodic Protection for Reinforced Concrete

Impact of Scaling on Corrosion of Stainless Steels in Carbonated and Chloride Containing Concrete

Chromate-free and Phosphate-free Surface Treatments for AL Alloy and Steel Substrates
Improving of the Erosion-corrosion Resistance of NI Electro-coatings by Incorporation of Nano-SICand Diamond Particles
Modeling of Corrosion of Steel in Concrete with Potential-dependent Chloride Threshold
The Effect of CU Content on Intergranular Corrosion of Model Almg5(CU) Alloys Studied with Potentiodynamic Polarization and TEM

Effectiveness of Using Pure Copper and Silver Coupon Corrosivity Monitoring (CCM) Metal Strips to Measure the Severity Levels of Air Pollutants in Indoor and Outdoor Atmospheres
Coatings Used in Conjunction with Cathodic Protection - Shielding vs Non-shielding Pipeline Coatings
Cyclical Testing of Coatings for Steel and Aluminum Alloys
Effect of Organic Inhibitors on the Sour Service Carbon Steel Corrosion Rate
Effect of Redox State of Conjugated Polymer on Corrosion Protection of Al Alloys
Fiber Optic Sensors for Corrosion Detection in Reinforced Concrete: A State of the Art Review .......................................................... 2752

H.G. Wheat, G. Liu

Carbon and Glass Surfacing Veils in Flue Gas Desulfurization Plants ......................................................................................... 2760
Christina Ruil

SCC of Unirradiated Stainless Steels and Nickel Alloys in Hot Water .................................................................................... 2768
Peter Anderssen, Gary S. Was

The Nature of SCC in Irradiated Stainless Steels and Nickel-base Alloys in LWRs ................................................................. 2791
Gary S. Was, Peter L. Anderssen

Corrosion of Epoxy-coated Rebar in Marine Bridges - A 30 Year Perspective ............................................................................. 2812
A.A. Sagues, Kingsley Lau, Rodney G. Powers, Richard J. Kessler

Environmental Conditions .................................................................................. 2829
Gerald M. Gordon, Kevin G. Mon, Fred Hua, Peter L. Anderssen

Performance of Galvanized Rebar After 9 Years: G-109 Specimens ........................................................................................... 2853
Francisco J. Presuel-Moreno, Douglas Rourke

The Effect of Heat Treatment on the Corrosion Resistance of "Electroless" Ni-P Coatings Containing Pure and Ce-Doped Hematites .......................................................... 2878
Jacqueline Corredor Acuna, Guillermo Enrique Acosta Gonzalez, Felix Echeverria, Facundo Ruiz

Characterization of General and Localized Corrosion Resistance of Several Titanium Alloys in High Temperature Brines. .................................................................................. 2888
Gerald M. Gordon, Kevin G. Mon, Young J. Kim

Impact of Residual Stress on the Susceptibility of Corrosion of Longitudinal Welds in API 5L X60 Microalloyed Steel Pipe .................................................................................. 2898
Victor M. Ventura, Arno Arturo, Dora I. Martinez, F. Almeraya-Calderon

Inherently Conducting Polymers on Aluminium Alloy 6001-T6 by Electropolymerization ......................................................... 2907
J.C.S. Fernandes, N.C.T. Martini, M.F. Montemor, T. Moura e Silva, Mario G.S. Ferreira

Service Life, Reliability and Repairability of Systems for Preventing Corrosion Under Insulation ............................................. 2918
Peter B. Bock, Michael F. McLamphy

A Risk Estimation for Chemical Plants considering Domino Effects based on Disaster Simulation ............................................. 2942
Tetsusei Kurashiki, Tohru Nomura, Masaru Zako, and Masatoshi Fumita

Application of Eqcm to the Study of CO2 Corrosion .................................................................................................................. 2955
Yang Yang, Bruce Brown, Srdjan Nesic

Dissolution of Platinum Catalyst in Polymer Electrolyte Fuel Cell .......................................................................................... 2977
