American Medical Informatics Association Annual Symposium 2008

Biomedical and Health Informatics: From Foundations to Applications to Policy

Washington, DC, USA
8-12 November 2008

Volume 1 of 2

Editors:

Jaap Suermondt R. Scott Evans
Lucila Ohno-Machado

ISBN: 978-1-61567-435-0
# TABLE OF CONTENTS

## VOLUME 1

### PAPERS

- A State Profile of IT Sophistication in Nursing Homes  
  Gregory Alexander  
  
- Probabilistic Asthma Case Finding: A Noisy OR Reformulation  
  Vibha Anand  
  
- SNOMED CT Coding Variation and Grouping for "other findings" in a Longitudinal Study on Urea Cycle Disorders  
  James Andrews  
  
- An Integrated Computerized Triage System in the Emergency Department  
  Dominik Aronsky  
  
- Methodology for Creating UMLS Content Views Appropriate for Biomedical Natural Language Processing  
  Alan Aronson  
  
- A Rapid Assessment Process for Clinical Informatics Interventions  
  Joan Ash  
  
- Discovering Synergistic Qualities of Published Authors to Enhance Translational Research  
  Nathan Bahr  
  
- Negative CPOE Attitudes Correlate with Diminished Power in the Workplace  
  Christa Bartos  
  
- A Scientific Collaboration Tool Built on the Facebook Platform  
  Steven Bedrick  
  
- Evaluating the Technical Adequacy of Electronic Prescribing Standards: Results of an Expert Panel Process  
  Douglas Bell  
  
- Issues in Mapping LOINC Laboratory Tests to SNOMED CT  
  Olivier Bodenreider  
  
- Development of a Reference Information Model and Knowledgebase for Electronic Bloodstream Infection Detection  
  Tara Borlawsky  
  
- Semantic Categories and Relations for Modelling Adverse Drug Reactions Towards a Categorial Structure for Pharmacovigilance  
  Cédric Bousquet  
  
- Identification of Inactive Medications in Narrative Medical Text  
  Eugene Breydo  
  
- eQuality for All: Extending Automated Quality Measurement of Free Text Clinical Narratives  
  Steven Brown  
  
- Predicting Outbreak Detection in Public Health Surveillance: Quantitative Analysis to Enable Evidence-Based Method Selection  
  David Buckeridge  
  
- Using Regular Expressions to Extract Information on Pacemaker Implantation Procedures from Clinical Reports  
  Anita Burgun  
  
- Medication and Indication Linkage: A Practical Therapy for the Problem List?  
  Matthew Burton  
  
- Variable-length Positional Modeling for Biological Sequence Classification  
  Andigoni Malousi  
  
- Automatically Extracting Information Needs from Ad Hoc Clinical Questions  
  Yong-gang Cao  
  
- Selecting Data Elements to Build a Patient-centric Electronic Health Record That Will Support Adherence to Therapeutic Lifestyle Change  
  Connie Chan  
  
- Early Experiences in Evolving an Enterprise-Wide Information Model for Laboratory and Clinical Observations  
  Elizabeth Chen
Alert Override Reasons: A Failure to Communicate ............................................. 111
Amy Chused

Leading a Horse to Water: Using Automated Reminders to Increase Use of Online Decision Support ...... 116
James Cimino

Optimizing Feature Representation for Automated Systematic Review Work Prioritization ............................ 121
Aaron Cohen

Exploring MEDLINE Space with Random Indexing and Pathfinder Networks ........................................... 126
Trevor Cohen

Identifying Logical Clinical Context Clusters in Nursing Orders for the Purpose of Information Retrieval ................................................................. 131
Sarah Collins

Bridging Biological Ontologies and Biosimulation: The Ontology of Physics for Biology ........................... 136
Daniel Cook

Automated Information Extraction of Key Trial Design Elements from Clinical Trial Publications ........ 141
Berry de Bruijn

Paraphrase Acquisition from Comparable Medical Corpora of Specialized and Lay Texts ........................................ 146
Louise Deléger

A Prototype System to Support Evidence-based Practice ................................................................. 151
Dina Demner-Fushman

Development and Evaluation of a Clinical Note Section Header Terminology ............................................. 156
Joshua Denny

Regular Paths in SparQL: Querying the NCI Thesaurus ............................................................................ 161
Landon Detwiler

The CHICA Smoking Cessation System ................................................................................................. 166
Stephen Downs

Learning Detectors of Events in Multivariate Time Series (Abstract Only) .................................................... 171
Artur Dubrawski

NLP-based Identification of Pneumonia Cases from Free-Text Radiological Reports .................................. 172
Peter Elkin

Word Sense Disambiguation via Semantic Type Classification ............................................................... 177
Jung-Wei Fan

Evaluating the AMIA-OHSU 10x10 Program to Train Healthcare Professionals in Medical Informatics ....... 182
Sue Feldman

Semantic Processing to Support Clinical Guideline Development ......................................................... 187
Marcelo Fiszman

The One Laptop per Child (OLPC) Computer for Health Clinics in Developing Countries .......................... 192
Paul Fontelo

cabIG™ Compatibility Review System: Software to Support the Evaluation of Applications Using Defined Interoperability Criteria ......................................................... 197
Robert Freimuth

Somatic Mutation Signatures of Cancer ............................................................................................. 202
Lewis Frey

Using Natural Language Processing to Improve Accuracy of Automated Notifiable Disease Reporting .... 207
Jeff Friedlin

A Regional Health Information Exchange: Architecture and Implementation ......................................... 212
Mark Frisse

How the Social Web Supports Patient Experimentation with a New Therapy: The demand for patient-centered medical informatics ................................................................. 217
Jeana Frost

Models for Predicting and Explaining Citation Count of Biomedical Articles ........................................... 222
Lawrence Fu

RxTerms — An Interface Drug Terminology Derived from Rxnorm .......................................................... 227
Kin Wah Fung

Clinician Use and Acceptance of Population-Based Data about Respiratory Pathogens: Implications for Enhancing Population-Based Clinical Practice ........................................... 232
Per Gesteland

Extracting Structured Medication Event Information from Narrative Clinical Notes .................................. 237
Sigfried Gold

Analysis of Data Errors in Clinical Research Databases ........................................................................... 242
Saveli Goldberg
Identification and Extraction of Family History Information from Clinical Reports................................................................. 247
Sergey Goryachev

Combination of Endogenous Clues for Profiling Inferred Semantic Relations: Experiments with Gene Ontology ................................................................. 252
Natalia Grabar

How Usability of a Web-Based Clinical Decision Support System has the Potential to Contribute to Adverse Medical Events ................................................................. 257
Timothy Graham

Multi-Factor De-Identification of Facial Images (Abstract Only)................................................................................................. 262
Ralph Gross

Field Evaluation of Commercial Computerized Provider Order Entry Systems in Community Hospitals ................................................................. 263
Kenneth Guappone

Generating Nurse Profiles from Computerized Labor and Delivery Documentation ......................................................................................... 268
Eric Hall

Auditing Complex Concepts in Overlapping Subsets of SNOMED ................................................................................................. 273
Michael Halper

Assessing the Performance Characteristics of Signals Used by a Clinical Event Monitor to Detect Adverse Drug Reactions in the Nursing Home ......................................................................................... 278
Steven Handler

The Impact Of Web-Based Diabetes Risk Calculators On Information Processing and Risk Perceptions ................................................................................................. 283
Christopher Harle

Towards a Collaborative Filtering Approach to Medication Reconciliation ................................................................................................. 288
Sharique Hasan

Biological Entity Recognition with Conditional Random Fields ................................................................................................. 293
Ying He

An Interactive Tool for Visualizing Design Heterogeneity in Clinical Trials ......................................................................................... 298
Maria-Elena Hernandez

What Workforce is Needed to Implement the Health Information Technology Agenda? An Analysis from the HIMSS Analytics™ Database ................................................................................................. 303
William Hersh

Characterization of Patients who Suffer Asthma Exacerbations using Data Extracted from Electronic Medical Records ................................................................................................. 308
Bianca Himes

Gene-L’EXPO: a Tool for Knowledge Discovery from Transcriptome That Assists Finding 'Literature-sparse' Relationships Between the Genes and the Tissues ................................................................................................. 313
Teruyoshi Hishiki

Automatic Pre-Hospital Vital Signs Waveform and Trend Data Capture Fills Quality Management, Triage and Outcome Prediction Gaps ................................................................................................. 318
Peter Hu

Summarising Complex ICU Data in Natural Language ................................................................................................. 323
Jim Hunter

TN-TIES: A System for Extracting Temporal Information from Emergency Department Triage Notes ................................................................................................. 328
Ann Irvine

The MidSouth eHealth Alliance: Use and Impact In the First Year ................................................................................................. 333
Kevin Johnson

An Agent Based Simulation Tool for Scheduling Emergency Department Physicians ................................................................................................. 338
Spencer Jones

The Value of Personal Health Record (PHR) Systems ................................................................................................. 343
David Kaelber

Jayashree Kalpathy-Cramer

Creating a Gold Standard for the Readability Measurement of Health Texts ................................................................................................. 353
Sasikiran Kandula

A Fast Document Classification Algorithm for Gene Symbol Disambiguation in the BITOLA Literature-Based Discovery Support System ................................................................................................. 358
Andrej Kastrin

Re-engineering Opportunities in Clinical Research using Workflow Analysis in Community Practice Settings ................................................................................................. 363
Sharib Khan
