# TABLE OF CONTENTS

## Volume 1

- **A Computational Study of Outwash for a Helicopter Operating Near a Vertical Face with Comparison to Experimental Data**
  
  S. Polsky, C. Wilkinson
  
  - Page 1

- **Modeling of Wake Vortex Effects for Unmanned Air Vehicle Simulations**
  
  D. Saban, J. Whidborne
  
  - Page 15

- **TECS/THCS Based Flight Control System for General Aviation**
  
  P. Chudy, P. Rzucidlo
  
  - Page 35

- **Handling Assist System Using Dynamic Inversion**
  
  T. Yamazaki, M. Miyada, H. Takano, Y. Baba
  
  - Page 48

- **Aerodynamic Hinge Moment Coefficient Estimation Using Automatic Fly-by-Wire Control Inputs**
  
  B. Lubbers, P. Zaai, M. Mulder, M. Van Paassen, J. Mulder
  
  - Page 63

- **A Simulation Environment for Individual Blade Control Helicopters**
  
  S. Tamayo, M. Perhiuschi
  
  - Page 87

- **Handling Assist System Using Dynamic Inversion**
  
  T. Yamazaki, M. Miyada, H. Takano, Y. Baba
  
  - Page 114

- **Task Scheduling Through a Hybrid Genetic Algorithm**
  
  D. Seibel, E. Mehiel
  
  - Page 124

- **Derivation of Regularized Euler Equations from Basic Principles**
  
  K. Mohseni
  
  - Page 137

- **The Draper Simulation Framework: Enabling Simulation from Concept Development Through Real-Time Hardware-in-the-Loop**
  
  M. Silvestro, B. Cook, D. Keating, J. Vican
  
  - Page 196

- **Ballistic Flight Phase Simulation with euces Tool for ESC-A Upper Stage**
  
  A. Isselhorst, K. Bergemann
  
  - Page 219

- **Control and Simulation of an Autonomous Lunar Lander**
  
  C. Ippolito, J. Frank
  
  - Page 233

- **Design and Modeling of an Active Attitude Control System for CubeSat Class Satellites**
  
  K. Vega, D. Auslander, D. Pankow
  
  - Page 246

- **A Satellite Simulator and Model Based Operations in Quasi-Zenith Satellite System**
  
  N. Inabu, H. Hase, H. Miyamoto, Y. Ishijima, S. Kawaiita
  
  - Page 264

- **Near Real-Time Closed-Loop Optimal Control Feedback for Spacecraft Attitude Maneuvers**
  
  C. McFarland, E. Swenson, J. Black, R. Cobb
  
  - Page 280

- **Experimental Verification of Chaotic Librational Motion of Tethered Satellite System in Elliptic Orbit**
  
  H. Kojima, Y. Furukawa
  
  - Page 299

- **The Upgraded Pinsker Model for Airplane Height Loss During Piloted Missed Approach**
  
  D. Stapleton
  
  - Page 309

- **Development of a Pilot Model for the Manual Balked Landing Maneuver**
  
  R. Hosman, P. Van Der Geest, J. Van Der Zee
  
  - Page 323

- **Development of a Procedural Pilot Model for the Manual Balked Landing Maneuver**
  
  P. Van Der Geest, L. Fucke
  
  - Page 335

- **A Discrete Event Controller as a Model of Pilot Control Behaviour**
  
  A. Belyavin, C. Ryder, C. Raabe
  
  - Page 348

- **Lessons Learnt from Experimental Test Plan Definition and Variability Analysis**
  
  R. Hosman, L. Fucke
  
  - Page 356

- **Analysis Plan of the Risk of a B747-8 Hand-Flown Balked Landing Penetrating the FAA Category I, Code E Obstacle-Free Zone**
  
  R. Greenhaw

Design of Forcing Functions for Identification of Human Control Behaviour ................................................................. 759
G. Beerens, H. Dumveld, M. Mulder, M. Van Paussan
Multimodal Pilot Control Behavior in Combined Target-Following and Disturbance-Rejection Tasks .......................... 784
P. Zaal, D. Pool, M. Mulder, M. Van Paussan
Multimodal Pilot Model Identification in Real Flight ........................................................................................................... 802
P. Zaal, D. Pool, M. Mulder, M. Van Paussan, J. Malder
Identification of Roll Attitude Control Behavior During Turn Maneuvers ............................................................................. 822
D. Pool, P. Zaal, M. Mulder, M. Van Paussan
Investigation of Pilot Perception and Control During Decrab Maneuvers in Simulated Flight .................................................. 841
H. Beukers, M. Mulder, R. Van Paussan, O. Sroouma, D. Pool
Modeling of Human Pilot Landing Approach Control Using Stochastic Switched ARX .......................................................... 870
R. Mori, S. Suekii
Evaluating Effectiveness of Modeling Motion System Feedback in the Enhanced Hess Structural Model of the Human Operator ......................................................................................................................... 877
K. Zaychik, F. Cardullo, G. George, L. Kelly
Discriminating Between Individuals Based on the Parameters of the Enhanced Model of the Human Operator ............... 891
K. Zaychik, F. Cardullo
Evaluation of IEEE 802.11g and 802.16 for Lunar Surface Exploration Missions Using MACHETE Simulations ............... 912
E. Jennings, J. Segui, H. Vuas
Space Communications and Navigation (SCaN) Network Simulation Tool Development and Its Use Cases ...................... 922
E. Jennings, R. Borgen, S. Nguyen, J. Segui, T. Stoinescu, S. Wang, S. Woo
A System Engineering Tool for the Design of Satellite Subsystems ..................................................................................... 933
G. Ridolfi, E. Mooy, S. Corpino
Finite Element Model Tuning of FalconSAT-5 with Varying Experimental Data Density ......................................................... 948
C. Doupe, E. Swenson, L. George
Modeling of Free-Surface Fuel Slosh in Microgravity for Off-Axis Spacecraft Propellant Tanks ........................................... 960
D. Sances, J. Gibson, S. Neumann, B. Thompson, S. Gangadharan, T. Smith
Model of Spacecraft Fuel Slosh with Diaphragms in Microgravity ...................................................................................... 968
N. Silverna, D. Sances, S. Gangadharan, J. Suederman
Multidisciplinary System Analysis and Design with Cielo ....................................................................................................... 979
M. Chanyk, C. Hoff, G. Moore
Building a Real-Time Flight Deck/ATM Simulation Platform for Research and Development ................................................. 990
J. Scharl, P. Snow, A. Neff
Testing and Validation of NextGen Simulators ..................................................................................................................... 1001
G. Hunter
Fleet Substitution Algorithm and Fleet Evolution Process Comparison Using Future Demand Scenarios ......................... 1016
A. Huang, M. Graham
Evaluation of Separation Management Algorithms in Class G Airspace ............................................................................ 1027
R. Baumeister, R. Eskowski, G. Spence
Simulation of an Automated Separation Management Communication Architecture for Uncontrolled Airspace ............. 1041
G. Spence, D. Allerton
A Language for Describing Agent Behavior as Hybrid Models ............................................................................................... 1049
S. Kannan, S. Lee, S. Kim, C. Christmann, E. Johnson
The Advanced Guided Weapon Testbed (AGWT) at the Air Force Research Laboratory Munitions Directorate .................. 1058
C. Ewing
Real-Time Hardware-in-the-Loop Simulation of Ares I Launch Vehicle ............................................................................. 1071
P. Tobbe, A. Matras, D. Walker, H. Wilson, C. Fulton, N. Alday, K. Betts, R. Hughes, M. Turbe
Hardware in the Loop Simulation of FBW Components ....................................................................................................... 1083
Z. Hanzalek, P. Hospodar, M. Hromcik, L. Wasznikowski, J. Doubrava
Modeling and Simulation of Saab Gripen’s Vehicle Systems ................................................................................................ 1100
S. Steinelli, M. Andersson, H. Gavel, P. Krus
Three-Dimensional Finite Element Modeling of Surface Crack on Titanium Tubes ............................................................. 1115
K. Ni, P. Hu
An UAV Model Parameter Identification Method .................................................................................................................... 1122
K. Hatamleh, P. Xie, G. Martinez, J. McAvoy, O. Ma
Simulation and Flight Control of a Tilt Duct UAV
O. Tekinalp, T. Unlu, I. Yavrucuk

Effects-Level Models for UAV Simulation
M. Duquette

Comprehensive Aerodynamic Modeling of a Small Autonomous Helicopter Rotor at All Flight Regimes.
S. Pourrezaei Khaligh, F. Fahimi, M. Saffarian

Nonlinear Analysis of Lateral Loading During Ground Maneuvers
J. Rankin, B. Krauskopf, M. Lowenberg, E. Coetzee

Application of Bifurcation Methods for the Prediction of Low-Speed Aircraft Ground Performance
E. Coetzee, B. Krauskopf, M. Lowenberg

Innovative Piloting Technique for a Semi-Autonomous UAV Lighter-Than-Air Platform Simulator
M. Battipede, M. Vazzola, D. Tancredi

Nonlinear Analysis of the Influence of Tire Inflation Pressure on Nose Landing Gear Shimmy
P. Thota, B. Krauskopf, M. Lowenberg, E. Coetzee

Model-Based Design for DO-178B with Qualified Tools
T. Erkkinen, B. Potter

Design and Performance Optimization of Finocyl Grain
A. Kamran, L. Gouzhu, J. Godil, Z. Siddique

Trajectory-Based Accurate Linearization of the 155mm Spin-Stabilized Projectile Dynamics
S. Theodoulis, P. Wernert, Y. Morel

Aircraft Conceptual Design Optimization with Uncertain Contributing Analyses
D. Neufeld, J. Chung, K. Behdinan

Support Vector Regression-Driven Multidisciplinary Design Optimization of a Multistage Ground Based Interceptor
Q. Zeeshan, D. Yunfeng, S. Ghumman, A. Rafique, A. Kamran

Generic Dynamic Flexural Model for Slender Bodied Aircraft
R. Davis, K. Hoffler

Modeling and Simulation to Study Flight Dynamics of a Morphable Wing Aircraft
B. Obradovic, K. Subbarao

Effects of Heave Washout Settings in Aircraft Pitch Disturbance Rejection
D. Pool, P. Zaal, M. Mulder, M. Van Paassen

Perception Coherence Zones in Flight Simulation
A. Valente Pais, M. Mulder, M. Van Paassen, M. Wentink

Identification of Motion Perception Thresholds in Active Control Tasks
A. De Vroome, A. Valente Pais, D. Pool, M. Van Paassen, M. Mulder

Does Jerk Have to be Considered in Linear Motion Simulation?

Motion Cueing Algorithm Modification for Improved Turbulence Simulation
A. Ercole, F. Cardullo, K. Zaychik, T. Kelly

Frequency Dependence of Allowable Differences in Visual and Vestibular Motion Cues in a Simulator
M. Wentink, B. Correia, W. Bles

Complementary Moving Base and Dynamic Motion Seat Cueing for Rotorcraft Simulation
D. Miller, E. Kocher, R. Grugan, J. Bender, D. Hughes, J. Taylor
