
(COMPSAC 2009)

Seattle, Washington, USA
20 – 24 July 2009

Volume 1
Pages 1-673
# TABLE OF CONTENTS

## LOCATION BASED SERVICES I (PRIVACY PROTECTION IN LOCATION BASED SERVICES)

<table>
<thead>
<tr>
<th>Title</th>
<th>Page</th>
</tr>
</thead>
<tbody>
<tr>
<td>A Privacy Enhancing Approach for Identity Inference Protection in Location-Based Services</td>
<td>1</td>
</tr>
<tr>
<td>Chowdhury S. Hasan, Sheikh I. Ahamed, Mohammad Tanviruzzaman</td>
<td></td>
</tr>
<tr>
<td>ELALPS: A Framework to Eliminate Location Anonymizer from Location Privacy Systems</td>
<td>11</td>
</tr>
<tr>
<td>Mehrab Nonjur, Sheikh I. Ahamed, Chowdhury S. Hasan</td>
<td></td>
</tr>
<tr>
<td>Improvements for 802.11-Based Location Fingerprinting Systems</td>
<td>21</td>
</tr>
<tr>
<td>Hendrik Lemelson, Stephan Kopf, Thomas King, Wolfgang Effelsberg</td>
<td></td>
</tr>
</tbody>
</table>

## LOCATION BASED SERVICES II (PRIVACY PROTECTION IN LOCATION BASED SERVICES)

<table>
<thead>
<tr>
<th>Title</th>
<th>Page</th>
</tr>
</thead>
<tbody>
<tr>
<td>Enhancing the Scalability of IMS-Based Presence Service for LBS Applications</td>
<td>29</td>
</tr>
<tr>
<td>Paolo Bellavista, Antonio Corradi, Luca Foschini</td>
<td></td>
</tr>
<tr>
<td>Indoor Navigation on Distributed Stationary Display Systems</td>
<td>37</td>
</tr>
<tr>
<td>Peter Rappel, Florian Gschwandtner, Corina Kim Schindhelm, Claudia Linnhoff-Popien</td>
<td></td>
</tr>
</tbody>
</table>

## SOFTWARE EVOLUTION I (SOFTWARE ARCHITECTURE DEVELOPMENT AND EVALUATION)

<table>
<thead>
<tr>
<th>Title</th>
<th>Page</th>
</tr>
</thead>
<tbody>
<tr>
<td>Aspectual Separation of Feature Dependencies for Flexible Feature Composition</td>
<td>45</td>
</tr>
<tr>
<td>Kwanwoo Lee, Goetz Botterweck, Steffen Thiel</td>
<td></td>
</tr>
<tr>
<td>Initiating and Institutionalizing Software Product Line Engineering: From Bottom-Up Approach to Top-Down Practice</td>
<td>53</td>
</tr>
<tr>
<td>Dong Li, Carl K. Chang</td>
<td></td>
</tr>
<tr>
<td>Transforming a Software Product Company into a Service Business: Case Study at F-Secure</td>
<td>61</td>
</tr>
<tr>
<td>Marko Komssi, Marjo Kauppinen, Juho Heiskari, Matti Ropponen</td>
<td></td>
</tr>
<tr>
<td>Viewpoint-Oriented Variability Modeling</td>
<td>67</td>
</tr>
<tr>
<td>Mike Mannion, Juha Savolainen, Timo Asikainen</td>
<td></td>
</tr>
</tbody>
</table>

## TESTING I (CONTEXT-AWARE SOFTWARE ANALYSIS)

<table>
<thead>
<tr>
<th>Title</th>
<th>Page</th>
</tr>
</thead>
<tbody>
<tr>
<td>3D Support for Business Process Simulation</td>
<td>73</td>
</tr>
<tr>
<td>Daniel Eichhorn, Agnes Koschmider, Yu Li, Peter Stürzel, Andreas Oberweis, Ralf Trunko</td>
<td></td>
</tr>
<tr>
<td>An Empirical Study of the Use of Frankl-Weyuker Data Flow Testing Criteria to Test BPEL Web Services</td>
<td>81</td>
</tr>
<tr>
<td>Lijun Mei, W. K. Chan, T. H. Tse, Fei-Ching Kuo</td>
<td></td>
</tr>
<tr>
<td>A Study of Applying Extended PIE Technique to Software Testability Analysis</td>
<td>89</td>
</tr>
<tr>
<td>Tsung-Han Tsai, Chiu-Yu Huang, Jun-Ru Chang</td>
<td></td>
</tr>
</tbody>
</table>

## TESTING II (MODULARIZATION, COMPOSITION AND REUSE)

<table>
<thead>
<tr>
<th>Title</th>
<th>Page</th>
</tr>
</thead>
<tbody>
<tr>
<td>How Well Do Test Case Prioritization Techniques Support Statistical Fault Localization</td>
<td>99</td>
</tr>
<tr>
<td>Bo Jiang, Zhongya Zhang, T. H. Tse, T. Y. Chen</td>
<td></td>
</tr>
<tr>
<td>Automatic Discovery of Web Services Based on Dynamic Black-Box Testing</td>
<td>107</td>
</tr>
<tr>
<td>Youngki Park, Woosang Jung, Byungjeong Lee, Chiau Wu</td>
<td></td>
</tr>
<tr>
<td>Siripol Nokkajana, Taratip Sawanmasart</td>
<td></td>
</tr>
</tbody>
</table>
### TESTING III (TESTING ECONOMICS, MODELS AND ANALYSIS)

**An Economical Approach to Usability Testing** .......................................................... 124  
  *Carl J. Mueller, Dan Tamir, Oleg V. Komagortsev, Liam Feldman*

**A Sentence Generation Algorithm for Testing Grammars** ....................................... 130  
  *Lixiao Zheng, Duanyi Wu*

**Software Input Space Modeling with Constraints among Parameters** ..................... 136  
  *Sergiy A. Vilkomir, W. Thomas Swain, Jesse H. Poore*

**HEAT: An Integrated Static and Dynamic Approach for Thread Escape Analysis** ........ 142  
  *Qichang Chen, Liqiang Wang, Zijiang Yang*

### TESTING IV (TESTING THEORY, METHODOLOGY AND APPLICATION)

**Practical Extensions of a Randomized Testing Tool** ............................................... 148  
  *Hojun Jaygarl, Carl K. Chang, Sunghun Kim*

**Asynchronous Input-Output Conformance Testing** ................................................. 154  
  *Martin Weiglhofer, Franz Wotawa*

**Towards a Theory for Testing Non-terminating Programs** ..................................... 160  
  *Arnaud Gottlieb, Matthieu Petit*

**Towards Call for Testing: An Application to User Acceptance Testing of Web Applications** 166  
  *Lian Yu, Wei Zhao, Xiaofeng Di, Changzhu Kong, Wenbo Zhao, Qianxiang Wang, Jun Zhu*

### SOFTWARE QUALITY I (SOFTWARE QUALITY MEASUREMENT, MODELLING AND ANALYSIS)

**Towards Improving OCL-Based Descriptions of Software Metrics** .......................... 172  
  *Tae Yeon Kim, Yun Kyu Kim, Heung Seok Chae*

**Modeling and Predicting Software Failure Costs** .................................................. 180  
  *Michael Grottke, Christian Graf*

**A Service Discovery System Analyzed with a Queueing Theory Model** ..................... 190  
  *Beihong Jin, Haibin Weng, Yanfeng Wen, Faen Zhang*

### SOFTWARE QUALITY II (SOFTWARE AND SERVICES RELIABILITY MODELS)

**A Hierarchical Reliability Model of Service-Based Software System** ..................... 199  
  *Lijun Wang, Xiaoying Bai, Lizhu Zhou, Yiwong Chen*

**Applicability of Software Reliability Growth Modeling in the Quality Assurance Phase of a Large Business Software Vendor** .................................................. 209  
  *Arne Beckhaus, Lars M. Karg, Gerrit Hänselmann*

**Towards Transaction-Based Reliable Service Compositions** .................................... 216  
  *Chang-Ai Sun*

### SOFTWARE QUALITY III (SOFTWARE QUALITY IMPROVEMENT TECHNIQUE)

**Toward Middleware-Based Online Application Migration** ..................................... 222  
  *Fang Deng, Qianxiang Wang, Jin Shao*

**Tool Support for Design Pattern Recognition at Model Level** ................................ 228  
  *Hong Zhu, Ian Bayley, Lijun Shan, Richard Amphlett*

**Predicting Change Impact in Object-Oriented Applications with Bayesian Networks** 234  
  *M. K. Abdi, H. Loanis, H. Sahrouri*

**Modeling and Performance Analysis of Software Rejuvenation Policies for Multiple Degradation Systems** ................................................................. 240  
  *Xiaozhi Du, Yong Qi, Di Hou, Ying Chen, Xiao Zhong*
PAIDS: A Proximity-Assisted Intrusion Detection System for Unidentified Worms .................................................. 392
Zhenyun Zhuang, Ying Li, Zesheng Chen

A Multiple Secret Sharing Scheme based on Matrix Projection .................................................................................... 400
Kai Wang, Xukai Zou, Yan Sui

SECURITY II (INTELLIGENT APPLICATIONS)

Exploring Security in PROFINET IO .............................................................................................................................. 406
Johan Åkerberg, Mats Björkman

A Static Java Birthmark Based on Control Flow Edges ................................................................................................. 413
Hyun-II Lim, Heewan Park, Seokwoo Choi, Taisook Han

A Secure and Flexible Electronic-Ticket System ........................................................................................................... 421
M. Fahim Ferdous Khan, Yashiro Takeshi, Ito So, Masahiro Bessho, Ken Sakamura

SOFTWARE ARCHITECTURE I (SOFTWARE ARCHITECTURE DEVELOPMENT AND SCHEDULING)

Towards a Well Structured and Dynamic Application Server ........................................................................................ 427
Chao You, Minghui Zhou, Zan Xiao, Hong Mei

Ali Razavi, Kostas Kontogiannis

Usage History-Based Architectural Scheduling .............................................................................................................. 443
Dongsun Kim, Seokhwan Kim, Sooyong Park

SOFTWARE ARCHITECTURE II (SOFTWARE ARCHITECTURE SPECIFICATION AND ANALYSIS)

Software Methodologies for the Engineering of Service-Oriented Industrial Automation: The Continuum Project ......................................................................................................................... 452
J. Marco Mendes, Axel Bepperling, João Pinto, Paulo Leitão, Francisco Restivo, Armando W. Colombo

Towards a Next-Generation Matrix Library for Java ...................................................................................................... 460
Holger Arndt, Markus Bindschaus, Andreas Naegele

Towards Dynamic Component Updating: A Flexible and Lightweight Approach ....................................................... 468
Zan Xiao, Donggang Cao, Chao You, Minghui Zhou, Hong Mei

SOFTWARE ARCHITECTURE III (ANALYSIS OF SOFTWARE UPDATES)

Design of Service Component Layer in SOA Reference Architecture ............................................................................. 474
Liang-Jie Zhang, Jia Zhang

The Design and Implementation of a Bare PC Email Server .......................................................................................... 480
George H. Ford Jr., Ramesh K. Karne, Alexander L. Wijesinha, Patrick Appiah-Kubi

Service Identification via Ontology Mapping .................................................................................................................. 486
Feng Chen, Zhuopeng Zhang, Jianzhi Li, Jian Kang, Hongji Yang

MOBILE AND PERSUASIVE COMPUTING I (RFID, WIRELESS NETWORK AND SERVICES)

Towards Passive RFID Event ............................................................................................................................................ 492
Wei Ye, Wen Zhao, Yu Huang, Wenhui Hu, Shikun Zhang, Lifu Wang

Estimating Rate of Queue Usage to Differentiate Cause of Packet Loss in Multi-hop Wireless Networks .................................................................................................................................................. 500
Mi-Young Park, Sang-Hwa Chung, Prasanthi Sreekumari

Deployment of Services Applications in Services Execution Environments ........................................................................ 509
Antonin Chazalet, Philippe Lalanda
MOBILE AND PERSVAVE COMPUTING II (SOFTWARE TESTING AND RE-ENGINEERING)

An Overlay-Based Resource Monitoring Scheme for Social Applications in MANET ................................................................. 517
Kyungman Kwak, Gonzalo Huerta-Canepa, Yangwoo Ko, Dongman Lee, Soon J. Hyun

More Tales of Clouds: Software Engineering Research Issues from the Cloud Application Perspective ........................................ 525
Lijun Mei, Zhenyu Zhang, W. K. Chan

Shift Hashing for Memory-Constrained Applications ........................................................................................................... 531
Sushamna Deodhar, Alan L. Tharp

Transaction Level Control for Application Execution on the SegBus Platform ........................................................................ 537
Tiberiu Seceleanu, Ivica Cnkovic, Cristina Seceleanu

FORMAL METHODS (FORMAL SPECIFICATION AND MODEL CHECKING)

A Formal Descriptive Language and an Automated Detection Method for Complex Events in RFID ....................................... 543
Jiaqi Zhu, Yu Huang, Hanpin Wang

Translation-Based Model Checking for PLC Programs .......................................................................................................... 553
Min Zhou, Fei He, Ming Gu, Xiaoyu Song

Modular Certification of Low-Level Intermediate Representation Programs ...................................................................... 563
Yuan Dong, Shengyuan Wang, Liwei Zhang, Ping Yang

BEST PRACTICE

Integrating System Modeling with Project Management - A Case Study ........................................................................... 571
Jonas Helming, Jörn David, Maximilian Koegel, Helmut Naughton

Efficient Temporal Blocking for Stencil Computations by Multicore-Aware Wavefront Parallelization ............................. 579
Gerhard Wellein, Georg Hager, Thomas Zeiser, Markus Wittmann, Holger Fehske

Extensions for Integrated Queries on Heterogeneous Semantic Web Resources .................................................................. 587
Cheng-Zen Yang, Ing-Xiang Chen, Jia-Da Ye

EDUCATION AND LEARNING (DOMAIN SPECIFIC SOFTWARE ARCHITECTURE DESIGN)

Temporally Robust Software Features for Authorship Attribution ......................................................................................... 593
Steven Burrows, Alexandra L. Uitdenbogerd, Andrew Turpin

An Augmented Social Interactive Learning Approach through Web2.0 ............................................................................... 601
Li Jin, Zhigang Wen

RHE: A Lightweight JVM Instructional Tool ......................................................................................................................... 606
Shaoshan Liu, Chengrui Deng, Xiao-Feng Li, Jean-Luc Gaudiot

FAST ABSTRACTS I (FORMAL METHODS, SOFTWARE TOOLS, ROBOTICS)

The Java Data Mining Package - A Data Processing Library for Java .................................................................................... 614
Holger Arndt

Toward the Design of Robotic Software with Verifiable Safety ............................................................................................. 616
Chih-Hong Cheng, Markus Rickert, Christian Buckl, Edward A. Lee, Alois Knoll

A Systematic Robot Fault-Tolerance Approach ..................................................................................................................... 618
Bingu Shim, Beomho Baek, Soo Yong Park

Generation of Pairwise Test Sets Using a Genetic Algorithm .................................................................................................. 620
James D. McCaffrey

An Ontology-Based Approach for GUI Testing ......................................................................................................................... 626
Han Li, Feng Chen, Hongji Yang, He Guo, William Cheng-Chung Chu, Yuansheng Yang

A Fine-Grained Privacy Structure for Service-Oriented Architecture ...................................................................................... 628
David S. Allison, Hany F. El Yamany, Miriam A. M. Capretz

FAST ABSTRACTS II (SOFTWARE ENGINEERING, MDA)

A Multi-model Process Improvement Methodology Driven by Capability Profiles .............................................................. 630
Clenio F. Salviano
On Model Transformation Reuse  .................................................. 632
   Xiao He, Zhiyi Ma, Yan Zhang, Weizhong Shao

Requirement Risk Assessment Focused-On Stakeholder Risk Analysis .................. 634
   Xiaohong Li, Qiang Liu

Industrial Opinion on the Effectiveness of Risk Management Methods ................... 636
   Mira Kajko-Mattsson, Jan Lundholm, Jonas Norrby

A Study of the Impact on Students Understanding Cross Cultural Differences in Software Engineering Work .................................................................................................................. 638
   Nancy R. Mead, Antonio Drommi, Dan Shoemaker, Jeff Ingalsbe

Industrial Report: Data Reengineering of COBOL Sequential Legacy Systems .......... 640
   Richard Millham, Hongji Yang

DOCTORAL SYMPOSIUM

Dihomotopic Reduction Used in Deadlock Detection ............................................... 642
   David A. Cape, Bruce M. McMillin

Towards a Resource-Aware Component Model for Embedded Systems .................. 646
   Aneta Vulgarakis

Efficient Management of Consistent Backups in a Distributed File System .............. 650
   Jan Stender

Model-Checking BNDC Properties in Cyber-Physical Systems .................................. 654
   Ravi Akella, Bruce M. McMillin

On Expressing Different Concurrency Paradigms on Virtual Execution Systems ........ 658
   Cristian Dittamo

   Jing Lin, Sahra Sedigh, Ann Miller

Reliability Modeling for the Advanced Electric Power Grid: A Proposal for Doctoral Research .............................................................. 666
   Ayman Z. Faza, Sahra Sedigh, Bruce M. McMillin

An Integrated Framework for Checking Concurrency-Related Programming Errors .... 670
   Qichang Chen, Liqiang Wang

REFS 2009 SESSION 1: SERVICES REQUIREMENTS MODELLING SPECIFICATION

Requirements Engineering Needs in a Solution and Infrastructure Improvement Project .............................................................. 674
   Xiping Song, William Sherman, Beatrice Hwong, Brian Berenbach, Gilberto Matos

Rediscovering Zachman Framework Using Ontology from a Requirement Engineering Perspective .............................................................. 676
   Zhuozhi Chen, Rob Pooley

A Scenario-Based Architecture Evaluation Framework for Network Enabled Capability .............................................................. 682
   Colin C. Venters, Duncan J. Russell, Lu Liu, Zongyang Luo, David E. Webster, Jie Xu

Decomposition and Traceability in Software Design .................................................. 686
   Hung-Fu Chang, Stephen C-Y. Lu

Panel on Requirements Engineering for Services ..................................................... 692
   Colette Rolland

ESAS 2009 SESSION 1: SEMANTIC MINING

Variable Support Based Association Rule Mining ..................................................... 698
   Rajul Anand, Ravi Agrawal, Joydip Dhar

Social Graph Generation & Forecasting Using Social Network Mining ..................... 704
   Marjaneh Safiati, Merve Sahan, Mustafa Ilkan

ESAS 2009 SESSION 2: MOBILE AGENTS

Mobile-Agent Approach for Mobile Code Localization in Ad hoc Networks .............. 709
   Yousuf Zafoune, Aicha Mokhtari, Rushed Kanawati

Implementing an Mobile Agent Platform for M-Commerce ...................................... 713
   Xining Li, Guillaume Autran
Semantic Web Enabled Composition of Semantic Web Services ................................................................. 719
Duygu Çelik, Atilla Elçi

**ESAS 2009 SESSION 3: SEMANTIC AGENT SYSTEMS**

An Architecture for Verification of Access Control Policies with Multi Agent System Ontologies .................. 725
Fatih Tekbacak, Tugkan Tuğular, Opuz Dikenelli

OWL Manipulation toward Building Semantic Applications and Agents .................................................. 729
Pooyan Balouchian, Amin Almassian, Atilla Elçi

Agent-Oriented Middleware for Mobile eLearning Services ..................................................................... 735
S. Stoyanov, V. Valkanova, I. Ganchev, M. O’Droma, H. Zedan

**RTSOAA 2009 SESSION 1: RTSOAA MODELS**

Real-Time Guarantees in Flexible Advance Reservations ............................................................................ 740
Kleopatra Konstanteli, Dimosthenis Kyriazis, Theodora Varvarigou, Tommaso Cucinotta, Gaetano Anastasi

Respecting Temporal Constraints in Virtualised Services ............................................................................ 746
Tommaso Cucinotta, Gaetano Anastasi, Luca Abeni

Building an Enterprise Service Bus for Real-Time SOA: A Messaging Middleware Stack ........................ 752
Luis García-Erice

A Service Broker Providing Real-Time Telecommunications Services for 3rd Party Services .................. 758
N. Blum, I. Boldea, T. Magedanz, U. Staiger, H. Stein

A Complex Event Routing Infrastructure for Distributed Systems ............................................................ 765
Gabe Wishnie, Hossein Satedian

Universal and Extensible Service-Oriented Platform Feasibility and Experience: The Service Abstract Machine ................................................................................................................................. 769
Jacky Estublier, Eric Simon

**RTSOAA 2009 SESSION 2: RTSOAA FOR CLOUD**

A Survey of Physiological Monitoring Data Models to Support the Service of Critical Care .......................... 777
Carolyn McGregor, Kathleen P. Smith

Microcontroller-Based AWGNG for Security Enhancement of Embedded Real-Time Web Services ........ 783
Behnam Rahnama, Atilla Elçi, Ramin Bakhshi, Alirad Malek, Arjang Ahmadi

Clustering Versus Shared Nothing: A Case Study ....................................................................................... 789
Jonathan Lifflancer, Adam McDonald, Orest Pilskalns

**RTSOAA 2009 SESSION 3: RTSOAA INFRASTRUCTURE**

Toward a Smart Cyber-Physical Space: A Context-Sensitive Resource-Explicit Service Model ................. 795
Jian Huang, Farokh Bastani, I-Ling Yen, Jun-Jang Jeng

Towards Self-Manageable Cloud Services .................................................................................................. 801
Ivona Brandic

Dynamic Service and Data Migration in the Clouds .................................................................................... 807
Wei Hao, I-Ling Yen, Bhavani Thuraisingham

**ME 2009 SESSION 1**

An OSGi Based In-vehicle Gateway Platform Architecture for Improved Sensor Extensibility and Interoperability ................................................................................................................................. 813
Pyungsun Park, Hongbin Yim, Heesok Moon, Jaeil Jung

Performance Impact Analysis of Two Generic Group Communication APIs ............................................... 821
Leandro Sales, Henrique Teixido, Jonathan D’Orleans, Nabor C. Mendonça, Rafael Barbosa, Fernando Trinta

Middleware for RFID Systems: An Overview .............................................................................................. 827
Jameela AlJaroodi, Junaid Aziz, Nader Mohamed
ME 2009 SESSION 2

Ubá: A Software Product Line Architecture for Grid-Oriented Middleware
Davi Oliveira, Nelson Rosa ............................................................. 833

Design of MIDA, a Web-Based Diagnostic Application for Hydroelectric Generators
Luc Vouligny, Claude Hudon, Duc Ngoc Nguyen ......................... 839

An Algorithm for Mining Frequent Items on Data Stream Using Fading Factor
Ling Chen, Shian Zhang, Li Tu ......................................................... 845

Impacts Separation Framework for Performance Prediction of Middleware-Based Systems
Xiang Huang, Wenbo Zhang, Bo Zhang, Jun Wei ......................... 851

SECASA 2009 SESSION 1

Context-Aware Trust Management for Peer-to-Peer Mobile Ad-Hoc Networks
R. Shankaran, V. Varadarajan, M. A. Orgun, M. Hitchens ............... 861

A Contextual Guidance Approach to Software Security
Philipp Schugerl, David Walsh, Juergen Rilling, Philippe Charland 867

AlertMe: A Semantics-Based Context-Aware Notification System
Asterios Leonidis, George Baryannis, Xenofon Fafoutis, Maria Korozi, Niki Gazoni, Michail Dimitriou, Maria Koutsogiannaki, Alkaterini Boutsika, Myron Papadakis, Haridimos Papagiannakis, George Tesseris, Emmanuel Voskakis, Antonis Bikakis, Grigoris Antoniou ......................................................... 873

SECASA 2009 SESSION 2

A Quality-Aware Context Middleware Specification for Context-Aware Computing
Yuanping Li, Ling Feng ................................................................. 879

Context Analysis of Intensional Languages
Weichang Du, Khaled Ben Hamed .................................................. 885

Distributed Eductive Execution of Hybrid Intensional Programs
Joey Paquet ..................................................................................... 891

SECASA 2009 SESSION 3

Relaxed Objects - Object Model for Context-Aware Applications
Michal Kopecký, Michal Zemlicka .................................................. 898

Cartesian Programming: The TransLucid Programming Language
John Plaice, Blanca Mancilla ......................................................... 904

Declarative Multithreaded Programming
Blanca Mancilla, John Plaice ....................................................... 910

QUORS 2009 SESSION 1: SERVICE BASED SYSTEMS

Formal Analysis of Services Compatibility
Xueqiang Gong, Jing Liu, Miaomiao Zhang, Juehliang Hu .......... 916

A Perspective on Middleware-Oriented Context-Aware Pervasive Systems
Zakwan Jaroucheh, Xiaodong Liu, Sally Smith ......................... 922

QUORS 2009 SESSION 2: DESIGN PATTERN AND ADVANCED SOFTWARE DESIGN

Towards a Problem Oriented Engineering Theory of Pattern-Oriented Analysis and Design
Jerry Overton, Jon G. Hall, Lucia Rapanotti, Yijun Yu ............... 928

A Model-Driven Multicore Software Development Environment for Embedded System
Chihhsiong Shih, Chien-Ting Wu, Cheng-Yao Lin, Pao-Ann Hsiung, Nien-Lin Hsueh, Chih-Hung Chang, Chorng-Shih Koo, William C. Chu ...................................................... 934

Photon: A Domain-Specific Language for Testing Converged Applications
Anne Miller, Balaji Kumar, Anukul Singhal ............................ 942
QUORS 2009 SESSION 3: SOFTWARE REUSE

Using Artifact Flow Diagrams to Model Artifact Usage Anomalies ................................................................. 948
Hwai-Jung Hsu, Feng-Jian Wang

Dual-Container: Extending the EJB2.x Container to Support EJB3.0 ............................................................. 954
Ziyou Wang, Minghui Zhou, Donggang Cao, Haiyan Zhao

Best Principles in the Design of Shared Software ............................................................................................. 960
Dino Konstantopoulos, John Marien, Mike Pinkerton, Eric Braude

QUORS 2009 SESSION 4: SOFTWARE EVOLUTION

Domain Analysis in the Reengineering Process of a COBOL System ............................................................... 966
Richard Millham, Hongji Yang

A Business-Logic Based Framework for Evolving Software Systems .............................................................. 973
Mohammed Alawairdhi, Hongji Yang

A Constraint Based Bug Checking Approach for Python ..................................................................................... 979
Lin Chen, Baowen Xu, Tianlin Zhou, Xiaoyu Zhou

STPSA 2009 SESSION 1

Agent Protection Based on the Use of Cryptographic Hardware ....................................................................... 985
Antonio Muñoz, Antonio Maña, Rajesh Harjani, Marioli Montenegro

Towards Usable Solutions to Graphical Password Hotspot Problem ............................................................... 991
Kemal Bicakci, Nart Bedin Atalay, Mustafa Yuceel, Hakan Gurbaskan, Burak Erdeniz

On Information Flow Forensics in Business Application Scenarios .................................................................... 997
Claus Wonnemann, Rafael Accorsi, Günter Müller

STPSA 2009 SESSION 2

An Enforcement Architecture for Security and Trust Policies in Federated Web-Service-Based Systems .............. 1002
Zhengping Wu, Lifeng Wang

A Model for Privacy Policy Visualization ........................................................................................................... 1008
Kambiz Ghazinour, Maryam Majedi, Ken Barker

STPSA 2009 SESSION 3

The Security Implication of Multiple Observers in a Distributed System ............................................................ 1014
Derek P. Ditch, Bruce M. McMillin

Defending Battery Exhaustion Attacks on Mobile Systems ................................................................................. 1020
Sungyong Shin, Taek Lee, Hoh Peter In

On Selecting Appropriate Development Processes and Requirements Engineering Methods for Secure Software ................................................................................. 1026
Muhammad Umair Ahmed Khan, Mohammed Zulkernine

BINDIS 2009 SESSION 1: SERVICE CREATION AND MANAGEMENT

A Cooperative Framework of Service Chain for Digital Library ............................................................................. 1032
Meng-Xiong Huang, Chun-Xiao Xing, Ji-Jiang Yang

A Specialized Meta-scheduler for Business and Applications Constraints Management .................................. 1038
Jerémie Chevalier, Stéphane Mouton

Towards Industry-Strength SLA Optimization Capabilities for Service Chains ................................................. 1044
Yang Li
Matchmaking Using Natural Language Descriptions: Linking Customers with Enterprise Service Descriptions
Joe Geldart, William Song, Yang Li
An Investigation of the Role of Service Level Agreements in Classified Advertisement Websites
Aijaz Soomro, William Song, Yang Li

Analysis of Redundant Traces for Consistency: With Examples from Electronic Messaging and Graphical Images
Fred Cohen
A Method for Historical Ext3 Inode to Filename Translation on Honeypots
Kevin D. Fairbanks, Ying H. Xia, Henry L. Owen III
Log Data as Digital Evidence: What Secure Logging Protocols Have to Offer?
Rafael Accorsi

Acer Aspire One Netbooks: A Forensic Challenge
Amrit Pal Singh, Michael Lavine, Benjamin Turnbull, Trupti Shiralkar
Penetration Testing for Spam Filters
Yugesh Madhavan, João W. Cangussu, Ram Dantu

Policy Composition Based on Petri Nets
Hejiao Huang, Hélène Kirchner
Verification of Access Control Policies for REA Business Processes
Vahid R. Karimi, Donald D. Cowan
Towards the Verification of Services Collaboration
Yue Xie, Dehui Du, Jing Liu, Zuohua Ding

Towards Validating Security Protocol Deployment in the Wild
Luca Compagna, Ulrich Flegel, Volkmar Lotz
On a Classification Approach for SOA Vulnerabilities
Lutz Lowis, Rafael Accorsi
SN2K Attacks and Honest Services
Ashish Kundu
PhishCatch - A Phishing Detection Tool
Weider D. Yu, Shruti Nargundkar, Nagapriya Tiruthani

Adaptive Control Framework for Software Components: Case-Based Reasoning Approach
Mykola Tkachuk, Sergii Połkóvkiv, Sergiy Brónin
Modeling Simulink Diagrams Using Input/Output Extended Finite Automata
Changyan Zhou, Rattanesh Kumar
T3: Secure, Scalable, Distributed Data Movement and Remote System Control for Enterprise Level Cyber Security
Gregory S. Thomas, Bill Nickless, David R. Thiede, Ian Gorton, Bill J. Pitre, Jason E. Christy, Liz Fauldersack, Jeffery A. Mauth
IWSC 2009 SESSION 3

A Control-Based Approach to Balance Services Performance and Security for Adaptive Service Based Systems (ASBS) ................................................................. 1146
Chang Liu, Changhai Jiang, Hai Hu, Kai-Yuan Cai, Dazhi Huang, Stephen S. Yau

Prevention of Sequential Message Loss in CAN Systems ................................................................. 1152
Shengbing Jiang, Ratnesh Kumar

Risk-Based Adaptive Group Testing of Semantic Web Services ................................................................. 1158
Xiaoying Bai, Ron S. Kenett

CORCS 2009 SESSION 1: MODELING AND OPTIMIZATION OF COMPONENT-BASED SYSTEMS

Optimizing Component-Based Embedded Software ................................................................. 1164
Olivier Lobry, Juan Navas, Jean-Philippe Babau

Towards a Unified Behavioral Model for Component-Based and Service-Oriented Systems ...................... 1170
Aida Caušević, Aneta Vulgarakis

CORCS 2009 SESSION 2: ANALYZING COMPLEX REAL-TIME AND EMBEDDED SYSTEMS

Testing with Large Parameter Sets for the Development of Embedded Systems in the Automation Domain ................................................................. 1177
Florian Kantz, Thomas Ruschival, Philipp Nenninger, Detlef Streitferdt

Transformational Specification of Complex Legacy Real-Time Systems via Semantic Anchoring ................ 1183
Yue Lu, Antonio Cicchetti, Stefan Bygde, Johan Kraft, Thomas Nolte, Christer Norström

IEESD 2009 SESSION 1

An Integrative Approach for Embedded Software Design with UML and Simulink ........................................... 1189
Tibor Farkas, Carsten Neumann, Andreas Hinnerichs

State of the Art in Using Agile Methods for Embedded Systems Development ........................................... 1195
Jayakanth Srinivasan, Radu Dobrin, Kristina Lundqvist

Test Case Mutation in Hybrid State Space for Reduction of No-Fault-Found Test Results in the Industrial Automation Domain .................................................. 1201
Thomas Ruschival, Philipp Nenninger, Florian Kantz, Detlef Streitferdt

STA 2009 SESSION 1: TEST AUTOMATION I

Implementing an Effective Test Automation Framework ................................................................. 1207
Eun Ha Kim, Jong Chae Na, Seok Moon Ryoo

GUI-Based Testing of Boundary Overflow Vulnerability ................................................................. 1212
T. Tuglular, C. A. Myftuoglu, O. Kaya, F. Belli, M. Linschulte

STA 2009 SESSION 2: TEST AUTOMATION II

Test Selection Prioritization Strategy ................................................................. 1218
Rajesh Subramanyan, Christof J. Budnik

Automatic Testing of Program Security Vulnerabilities ................................................................. 1223
Hossain Shahriar, Mohammad Zulkernine

A New Mutation Analysis Method for Testing Java Exception Handling ................................................. 1229
Changbing Ji, Zhenyu Chen, Baowen Xu, Ziyuan Wang

Author Index
