Conference Officers
Programme Committee
Reviewers

Business Interoperability I

Contribution to Interoperability of Decision Support Systems Focusing on the Data Recovery Process .......................................................... 3
  Guillaume Vicien, Yves Ducq, and Bruno Vallespir
The Method of Multi-objective Integrated Progress Control on Aviation Project .......................................................... 10
  Zhen-guo Yan, Jie Zhang, Jian-feng Yu, and Yuan Li
Interoperability Issues in the Field of Innovation Management .......................................................... 15
  Thomas Knothe and Roland Jochem

Service Oriented Architectures for Interoperability I

A SQFD Approach for Service System Design Evaluation and Optimization .................................................. 23
  Shu Liu, Xiaofei Xu, and Zhongjie Wang
Towards Service-Oriented Semantic Interoperability Based on Connecting Ontologies .................................................. 28
  Jian Wang, Keqing He, Yangfan He, and Chong Wang
Component Library-Based ERP Software Development Methodology .................................................. 34
  Song He, Huiyou Chang, and Qing Wang

</table>
Enterprise Modeling for Enterprise Interoperability II

A Petri-net-Based Simulation and Optimization approach for IEM and EI ................................. 129
  Xiaofeng Liu, Xiaofei Xu, and Shengchun Deng

An Ontology Based Method for Business Process Integration .................................................. 135
  Shuchuan Fan, Li Zhang, and Zian Sun

An Aspect-Oriented Modeling Approach to Predict Performance of JCA-Based Systems ................. 140
  Wenbo Zhang, Xiang Huang, Bo Zhang, and Jun Wei

Design and Execution of Interoperable Services

Architectural Design of BIRIS-Based Marine Logistics Service Platform and Related Interoperability Issues ................................................................. 149
  Zhongjie Wang, Xiaofei Xu, Dianhui Chu, and Tong Mo

A Web-Based Problem Solving Environment for Weave Pattern Design ..................................... 157
  Peng Gao, Shijun Liu, Yong Zhang, and Xiangxu Meng

A Cooperative Method between Assembly Process Planning and Simulation for Complex Product ......................................................... 163
  Liang Dong, Yuan Li, Jian-feng Yu, and Jie Zhang

Semantics for Enterprise Interoperability

Rules Driven Object-Relational Databases Ontology Learning .................................................. 169
  Jia Chen, Yue Wu, Ming Li, Shuquan Li, and Jing You

Complex Synonymous Matchings Based on Correlation Mining .............................................. 175
  Liu Jie, Wang Nianbin, Liu Fujiang, and Zhao Yangyao

Towards an User-Friendly Ontology Design Methodology ...................................................... 180
  Nikolai Dahlem, Jianfeng Guo, Axel Hahn, and Matthias Reinel

Business Interoperability II

Reusable Components Retrieval Based on Faceted Classification with Sem-library in Domain Component Library ................................................................. 189
  Cuiyun Fu and Huiyou Chang

Research and Impl of ALM-Tree Maintenance Policy Based on Peercast .................................. 195
  Panxiang Zhang, Zhihui Pan, and Huiyou Chang

Service Oriented Architectures for Interoperability II

A Service-Oriented Business Process Modeling Methodology and Implementation ...................... 201
  Lin Bai and Jun Wei

A SOA Based Framework of Service Ability Description and Selection Methods for Application Integration in Manufacturing Domain ................................................. 206
  Weihua Huang and Xiaoping Li
An Architectural Approach for Service Interoperability ......................................................... 212
Stephan Kassel

Cross-Organizational Collaboration and Cross-Sectoral Processes II

Representing and Discovering Capabilities and Their Complementarity ........................................ 221
Dong Cheng and Nacer Boudjlida

Integrating Process and Ontology for Supply Chain Modelling .................................................. 228
Tonci Grubic and Ip-Shing Fan

Interoperability Scenarios and Case Study & Enterprise Modeling for Enterprise Interoperability III

E-government Data Interoperability Framework in Hong Kong .................................................... 239
Thomas Y. Lee, Patrick K. Yee, and David W. Cheung

An Email-Based Interoperability Approach for SMEs ................................................................. 245
Thomas Burkhart, Dirk Werth, Silke Balzert, and Peter Loos

Semantic Enrichment of Enterprise Modelling – Use of Ontology ............................................. 252
Nabila Zouggar, David Chen, and Bruno Vallespir

Education on Enterprise Interoperability & Approaches and Solutions for Model Driven Architectures and Interoperability II

Solving the Human Problem: Investigation of a Collaboration Culture ....................................... 261
Gilles Gautier, May Bassanino, Terrence Fernando, and Sylvia Kubaski

Organizational Interoperability Supported through Goal Alignment with BMM and Service Collaboration with SoaML ................................................................. 268
Fenglin Han, Espen Moller, and Arne J. Berre

Systems Engineering in the Context of Interoperability

Research on Ontology-Based Multi-source Engineering Information Retrieval in Integrated Environment of Enterprise ................................................................. 277
Yuangang Yao, Lanfen Lin, and Jinxiang Dong

Taxonomy of Mobility-Related Requirements ............................................................................. 283
Sundar Gopalakrishnan and Guttorm Sindre

On Measuring Semantic Similarity of Business Process Models ................................................. 289
Juntao Gao and Li Zhang

Business Interoperability III

Challenges for the Development of Interoperable Information Systems in Healthcare Organizations ................................................................. 297
António Grilo, Luis Velez Lapao, Ricardo Jardim-Goncalves, and Virgilio Cruz-Machado

A Web Service Based B2B Integration Approach for Managed Public and Private Process ................................................................. 302
Cixing L.V. and Yunlong Zhu
Platforms for Enterprise Interoperability

Taxonomy Ontology Searching Method Based on Fuzzy Clustering .............................................................311
   Zhao Yangyao, Deng Shengchun, and Wang Nianbin
A Study on Knowledge Sharing System for Aviation Product Collaborative Design ...............................................................316
   Shuang Zhang and Zhou Ming Li
Pro-active Project Management ........................................................................................................................................320
   Gilles Gautier, Georgios Kapogiannis, Colin Piddington, Terrence Fernando,
   and Yiannis Polychronakis

Specification and Implementation of Interoperability & Enterprise Modeling for Enterprise Interoperability IV

Short-Lived Ontology Approach for Agent/HLA Federated Enterprise Interoperability ........................................................329
   G. Zacharewicz, D. Chen, and B. Vallespir
Using MPMR to Support Developing Web Service Applications for Enterprises ........................................................................336
   Chong Wang, Keqing He, Jian Wang, and Yangfan He
An Architecture Design of a JBI-Based Enterprise Service Bus .......................................................................................343
   Sui Xin, Zhu Yunlong, and Nan Lin
