2009 International Conference on Cyberworlds

(CW 2009)

Bradford, United Kingdom
7 – 11 September 2009
Augmented Reality and Virtual Reality

Challenges in Crowd Simulation ................................. 1
  Daniel Thalmann, Helena Grillon, Jonathan Maim, and Barbara Yersin
Robot Programming Using Augmented Reality .......... 13
  Hongchao Fang, Soh Khim Ong, and Andrew Yeh-Ching Nee
Assembly Design and Evaluation Based on Bare-Hand Interaction in
an Augmented Reality Environment ......................... 21
  Zhenbiao Wang, Yan Shen, Soh Khim Ong, and Andrew Yeh-Ching Nee
Dynamic Hand Gesture Tracking and Recognition for Real-Time Immersive
Virtual Object Manipulation ...................................... 29
  Gan Lu, Lik-Kwan Shark, Geoff Hall, and Ulrike Zeshan
Collaboration in 3D Shared Spaces Using X3D and VRML .... 36
  Lei Wei, Alexei Sourin, and Herbert Stocker
Enhancing Presence in Head-Mounted Display Environments by Visual Body
Feedback Using Head-Mounted Cameras ..................... 43
  Gerd Bruder, Frank Steinicke, Kai Rothaus, and Klaus Hinrichs
Overcoming the Information Overload Problem in a Multiform Feedback
Based Virtual Reality System for Hand Motion Rehabilitation ... 51
  Sha Ma, Martin Roy Varley, James Richards, and Lik-Kwan Shark
The Reflexive Campus: A Study of Dynamic Architecture in a Virtual World ... 57
  Elif Ayiter, Selim Balcişoy, Murat Germem, Bulut Sakçak, and Fethi Ozdol
Beyond Reactive Systems: An Associative Memory for Sensory-Driven
Intelligent Behavior ............................................... 63
  David Panzoli, Hervé Luga, and Yves Duthen
# Modelling and Rendering

Virtual Humans in Serious Games ................................................................................................................. 71  
  *Nadia Magnenat-Thalmann and Zerrin Kasap*

Mathematical Foundation for Designing and Modeling Cyberworlds ................................................................. 80  
  *Kenji Ohmori and Toshiyasu L. Kunii*

A Rule-Based Motion Planning for Crowd Simulation ............................................................................................ 88  
  *Muzhou Xiong, Michael Lees, Wentong Cai, Suiping Zhou, and Malcolm Yoke Hean Low*

Distortion Correction for Immersive Navigation in Spherical Image Environment ............................................................................................................................................................ 96  
  *Xiaoyin Guan, Lik-Kwan Shark, Geoff Hall, and Wei Deng*

Cyclic Animation of Human Body Using PDE Surfaces and Maya ................................................................. 102  
  *Michael Athanasopoulos, Gabriela González Castro, and Hassan Ugail*

General Concept of Repairing CAD-Models ........................................................................................................ 108  
  *Alexander Emelyanov, Yuri Astakhov, and Stanislav Klimenko*

Gender Classification Based on 3D Face Geometry Features Using SVM .................................................. 114  
  *Xia Han, Hassan Ugail, and Ian Palmer*

Interactive Surface Design and Manipulation Using PDE-Method through Autodesk Maya Plug-in ........................ 119  
  *Eyad Elyan and Hassan Ugail*

Optimal 3D Surface Reconstruction from Multiview Photographic Images ................................................ 126  
  *Simant Prakoonwit and Ralph Benjamin*

On Spherical Product Surfaces in $E^3$ .............................................................................................................. 132  
  *Kadri Arslan, Betül Bulca, Bengü Bayram, Güney Öztürk, and Hassan Ugail*

Towards a Definition of Virtual Objects Using Partial Differential Equations ........................................... 138  
  *Hassan Ugail, Gabriela González Castro, Alexei Sourin, and Olga Sourina*

# Animation

Generating Animation from Natural Language Texts and Framework of Motion Database ............................. 146  
  *Masaki Oshita*

# Internet Applications

Virtual Interactive Communities: Capita Selecta in Multi-disciplinary Demand-Driven Research ...................... 154  
  *Peter Quax, Wim Lamotte, and Frank Van Reeth*

Overview of Factors for Internet Banking Adoption ............................................................................................ 163  
  *Rita E. Ochuko, Andrea J. Cullen, and Daniel Neagu*

Automatic Composition for Contemporary Dance Using 3D Motion Clips: Experiment on Dance Training and System Evaluation ................................................................. 171  
  *Asako Soga, Bin Umino, and Motoko Hirayama*

Viruses and Security

STAKCERT Framework in Eradicating Worms Attack ............................................................... 257
  Madihah Mohd Saudi, Andrea J. Cullen, and Mike E. Woodward
Modelling Intelligent Phishing Detection System for e-Banking Using Fuzzy
  Data Mining ............................................................................................................................. 265
  Maher Ragheb Aburrous, Alamgir Hossain, Keshav Dahal, and Fadi Thabatah
Social Engineering Detection Using Neural Networks ............................................................. 273
  Hanan Sandouka, Andrea J. Cullen, and Ian Mann

HCI

Multi-platform Human Computer Interaction in Converged Media Spaces .......................... 279
User Interface for Assisting Babies with Feeding Disorders ................................................. 287
  Alena Petrasova, Julie V. Farrer, Silvester Czanner, Alan Chalmers, and Dieter Wolke
Comparison of Adaptive, Adaptable and Mixed-Initiative Menus ........................................ 292
  Khalid Al-Omar and Dimitrios Rigas
Visual Query Interface for Molecular Dynamics Application ................................................. 298
  Olga Sourina and Nikolay Korolev

Virtual Learning

Interactive and Augmented Information Spaces to Support Learning and Dynamic Decision-Making ................................................................................................................................. 305
  D. Robison, R.A. Earnshaw, and P. McClory
Designing Augmented Reality Games for Mobile Learning Using an Instructional-Motivational Paradigm ................................................................................................................................. 312
  F. Fotouhi-Ghazvini, R.A. Earnshaw, D. Robison, and P.S. Excell
Learning in Virtual Worlds: The Challenges and Opportunities ........................................... 320
  Martha Burkle and Kinshuk
The Use of Multimodal Metaphors on E-learning Note-Taking .............................................. 328
  Mohamed Sallam and Dimitrios Rigas
Education in Virtual Worlds: Virtual Storytelling .................................................................... 333
  Polina Danilicheva, Stanislav Klimenko, Yury Baturin, and Alexander Serebrov
Green Channel Watermarking to Overcome the Problem of Multiple Claims of Ownership for Digital Coloured Images ................................................................................................................................. 339
  Abdallah Saleem Nawaf Al-Tahan Al-Nu’aimi and Rami Qahwaji
Social and Ethical Aspects

Determination of the Factors that Influence Consumers’ Trust in Business-to-Consumers Electronic Commerce: An Empirical Approach ................................................................. 345
Radwan M. Al-Dwairi and Mumtaz A. Kamala

An Integrated Trust Model for Business-to-Consumer (B2C) E-commerce: Integrating Trust with the Technology Acceptance Model ................................................................. 351
Radwan M. Al-Dwairi and Mumtaz A. Kamala

The Conditions of Permeability: How Shared Cyberworlds Turn into Laboratories of Possible Worlds .................................................................................................................. 357
Caterina Desiato

Modeling the Personal Space of Virtual Agents for Behavior Simulation ................................................................. 364
Toshitaka Amaoka, Hamid Laga, and Masayuki Nakajima

Place and Locality in Augmented Public Space: A Case Study on the Site Specific Nature of Urban Screens .................................................................................................................. 371
Patrick Allen

Cyberworld Cybernetic Art Model for Shared Communications ................................................................. 377
Gianluca Mura

A Face Tracking Algorithm for User Interaction in Mobile Devices ................................................................................. 385
Abdullah Bulbul, Zeynep Cipiloglu, and Tolga Capin

Mobile Assisted Language Learning in a Developing Country Context ................................................................................. 391
F. Fotouhi-Ghazvini, R.A. Earnshaw, and L. Haji-Esmaeili
