2009 International Conference on Management of e-Commerce and e-Government

(ICMeCG 2009)

Nanchang, China
16 – 19 September 2009
# Message from General Chairs

# Message from Program Chairs

# Organizing Committee

# Program Committee

# Reviewers

# Keynote Speakers

---

## Session 1: Management of e-Commerce

<table>
<thead>
<tr>
<th>Title</th>
<th>Page</th>
</tr>
</thead>
<tbody>
<tr>
<td>Multi-agent Systems Set for B2B E-commerce Systems</td>
<td>3</td>
</tr>
<tr>
<td>Weilin Dan and Mengqiu Song</td>
<td></td>
</tr>
<tr>
<td>Electronic Payment Instruments and Endogenous Money Supply</td>
<td>9</td>
</tr>
<tr>
<td>Lei Wu, Cheng Chen, Naixin Zhang, and Jie Liu</td>
<td></td>
</tr>
<tr>
<td>Evaluating the Enterprise Website Credibility from the Aspect of Online Consumers</td>
<td>14</td>
</tr>
<tr>
<td>Dan Zhao, Chunhui Tan, and Yutao Zhang</td>
<td></td>
</tr>
<tr>
<td>Norm-Oriented Methodology of E-business</td>
<td>18</td>
</tr>
<tr>
<td>Kaiyin Huang, Zhiyuan Fang, and Yu Zhou</td>
<td></td>
</tr>
<tr>
<td>A Collaborative Filtering Algorithm Based on Variance Analysis</td>
<td>24</td>
</tr>
<tr>
<td>Xiaoyun Wang and Jintao Du</td>
<td></td>
</tr>
<tr>
<td>A Review of Technology Acceptance Model in the E-commerce Environment</td>
<td>28</td>
</tr>
<tr>
<td>Lu Han and Yongsheng Jin</td>
<td></td>
</tr>
<tr>
<td>Relationship Between Corporate Citizenship Behavior and Competitive Advantage</td>
<td>32</td>
</tr>
<tr>
<td>Zhou Haiwei and Wang Xiquan</td>
<td></td>
</tr>
</tbody>
</table>
Credit Rating System in C2C E-Commerce: Verification and Improvement of Existent Systems with Game Theory .................................................................36
Youbei Huang and Mingming Wang

Improvement Strategies of the Learning Website Based on Value Chain Model .................................................................40
Bijun Qu and Jiaxian Zhao

Tourism E-commerce between China and United States: A Case Study of Ctrip and Expedia .................................................................44
Zhen Liu, Jie Yang, and Yingkang Gu

China's Producer Service Industry under the E-commerce Platform ..................................................................................49
Zhu Xin and Shen Xinjian

The Credit Violating Behaviour in China's E-commerce Field ..................................................................................53
Yihong Xu

An Integrated Shopping Portal Based Recommendation across Web Storefronts: Architecture and Management .................................................................................................58
Fengzhao Yang, Jie Cao, Yao Han, and Yanni Mao

Construction of Software Enterprise SaaS-Based Business Model .................................................................................................62
Hancheng Liao and Changqi Tao

Dynamic Business Alliance and its Negotiation Model Based on Multi-agent ..................................................................................66
Huamei Sun, Weiwei Wang, and Tiyun Huang

A Multidimensional Framework Model of Credit Management System on E-commerce .................................................................................................70
Dengke Yuan and Tingjie Lu

Applying DeLone and McLean Information System Model to Online Consumer Behavior in China ..................................................................................74
Haiping Wang and Zhengming Hu

Session 2: Management of e-Government

Efficiency Evaluation of Regional E-government Services in China Based on Relative Efficiency .................................................................81
Manfeng Liu and Houxing Tang

A Disaster-Recovery IT Framework Based on Disaster Indexing Measurement Mechanism in E-Government .................................................................................................87
Zhenhua Wu and Yong Ni

Empirical Research on E-Government Based on Content Mining .................................................................................................91
Yang Shen, Zitao Liu, Shaoji Luo, Huijuan Fu, and Ye Li

Supernetwork Model of Knowledge Management in Paroxysmal Public Crisis ..................................................................................95
Zhihong Li and Haiyan Wang

E-Government, Transparency and Anti-corruption .................................................................................................101
Yujian Fan, Zengtian Zhang, and Qingchun Yue
VPLS Technology Research and Application in the Architectures of E-Government Network ................................................................................................................105
  Jiezhao Peng

An Adaptive Framework for E-Government Information Resources Allocation .........................................................108
  Jin Chen

Applying E-Government Information System for Anti-corruption Strategy .................................................................112
  Jian Zhang and Zengtian Zhang

Model of Integrated Assessment of E-Government Website Based on Analytic Hierarchy Process ................................................116
  Kangmin Yuan and Jiemin Yuan

Government Website's Dynamic Performance Evaluation Based on Managerial Efficiency .........................................120
  Honglai Li and Zhongjian Le

Emergency Preplan Knowledge Representation and Semantic Retrieval System Based on Ontology ........................................124
  Ruzhi Xu, Xiaoliang Dai, Feng Yang, and Peiguang Lin

New Perspective for E-Governance Performance ........................................................................................................128
  Luo Xiao-hua

Thinking on Electronic Government Affairs Collaboration in Our Country under Super Ministry Regime ......................133
  Shuzhen Cheng

Session 3: Data Management and Intelligence in e-Commerce and e-Government

On-Line Rescheduling to Minimize Makespan under a Limit on the Maximum Disruptions ................................................141
  Yundong Mu and Xiao Guo

Towards Set Theory-Based Knowledge Reduction ........................................................................................................145
  Guoping Yu, Lijuan Huang, Pan Liu, and Yin Liang

Knowledge Management in E-commerce: A Data Mining Perspective ........................................................................152
  Hong Yu, Xiaolei Huang, Xiaorong Hu, and Changxuan Wan

Knowledge Management System in Project-Based Organizations ................................................................................156
  Yuanhong Liao and Lili Qi

Value Measurement Model to the Technology-Based Knowledge Products ................................................................160
  Changling Li, Haiyun Xu, and Xuemei Ji

Embedded XML Data Exchange for Asynchronous Communication Between E-commerce Systems ................................164
  Xiaolin Lu, Lu Ye, Chunting Yang, and Jian Yu

A Mashup Model for Distributed Data Integration .......................................................................................................168
  Jian Meng and Jinlong Chen
Schema Discovery of Semi-structured Hierarchical Data Based on OEM Model and Hierarchical Transactional Database .......................................................... 172

Cheng Lv, Chu-yuan Wei, and Ying Hao

Computational Grid Based Neural Network Ensemble Learning Platform and Its Application .......................................................... 176

Yue Liu, Zaixia Teng, and Bofeng Zhang

A Feasible Enterprise Business Intelligence Design Model .................................................. 182

Liyi Zhang and Xiaofan Tu

Network Teaching Resource Evaluation Method Based on Rough Set Theory .................. 188

Fang Gang

An Improved Model of Rough Sets on Incomplete Information Systems .......................... 193

Xiaoping Yang

Clustering of Triangle Fuzzy Number with Multiple Attributes ........................................ 197

Wang Xin-chang and Xiao Xin-ying

Mean Deviation Method for Fuzzy Multi-sensor Object Recognition ............................. 201

Jiuying Dong

Improved Chain-Block Algorithm to RVM on Large Scale Problems ........................... 205

Gang Li, Shu-Bao Xing, and Hui-feng Xue

The Exploration of Web Sites with Link Structure Graphs ............................................. 209

Jun Yang and Zhigang Tang

A Classification with Random SPI: Better Models in Uncertain Environment ................. 213

Yong Qi, Weihua Li, and Zhonghua Li

**Session 4: Enterprise Management and Information System**

Research of Electronic Patient Record Based on XML .................................................. 219

Xu Yabin, Chen Jian, and Peng Hongyu

Determinants of Information System Innovation Behavior in Enterprises: An Empirical Investigation .......................................................... 223

Min Qin

Study on the Effect of Intellectual Capital on Firm Performance ................................... 228

Chao Liu

Game Analysis on Upstream and Downstream Enterprises in the Global Value Chain .......................................................... 232

Fucui Lu, Wei He, and Sihua Chen

A Corporate Integrated Model Combing E-commerce with Internal Management Based on Knowledge Flow .................................................. 237

Hongtao Zhu and Shaohua He

The Cost Model and Estimation Methods of Product Configuration Case in MC ............. 241

Xiaoming Wei and Wei Wang
Business Process Reengineering of e-HRM Based on ERP .......................................................... 246
  Huanchun Yang

Under- and Overconfidence, Asset Pricing and Corporate Policy .............................................. 250
  Xianyon Tang and Yonghai Wang

He-Xie Mechanism of Organization Evolvement Based on Synergetics .......................................... 254
  Wang Fan, Sun Hong, and Chen Junping

Prediction of Chinese Listed Companies' Credit Risk Based on Mixed Logit Model and Factor Analysis .......................................................... 258
  Xiaolin Sun, Xuezhi Qin, and Bo Chen

Components Composition Compatibility Checking Based on Behavior Description and Roles Division .......................................................... 262
  Zhang Chi

Market Selection Mechanism about Technological Innovation of IT Enterprises Based on the Technological Convergence ............................................. 266
  Changqi Tao and Lei Liao

An Incentive Model of Governance of IT Firm ............................................................................ 272
  Yuan Xiong

Analysis on Vertical Integration of Telecom Operators .................................................................. 277
  Rui Dai and Shou-lian Tang

Research on Relationship of Knowledge Management and Organizational Performance ......................................................... 281
  Yu Chen Hu

Architecture of E-Commerce Systems Based on J2EE and MVC Pattern ........................................ 284
  Yanfang Wang, Chunyan Guo, and Lei Song

Session 5: Logistics and Supply Chain Management

Application of Particle Swarm Optimization Based on Clustering Analysis in Logistics Distribution .......................................................... 291
  Haobin Shi, Zhonghua Li, Wenbin Li, and Zhujun Yu

Inventory Model for Items with Weibull Deterioration, Ramp Type Demand and Shortages .......................................................... 296
  Li-Qun Ji

Emergent Management for Consumable Industry Chains after Natural Disasters .............................. 301
  Lai Wei and Hong Chen

Success Factors for Third-Party Private Logistics Enterprise in the Past and Future .......................................................... 306
  Lei Cheng, Ming Hua, and Leina Zheng

Innovation of Tourism Supply Chain Management .......................................................................... 310
  Danhong Chen
Modeling Inventory System of Perishable Products under Supply Chain Environment .............................................................................................................................................................314
  Jian Liu
Tourism Supply Chain Cooperative Trust Dominated by Travel Agency in China .....................................................................................................................................................................................................................................318
  Li Yang, Bangyi Li, and Weiguo Lan
An E-commerce Based Supply Chain Model of Chain Catering Enterprises .................................................................................................................................322
  Weijie Guo, Huan Qi, and Qiujun Guo
Modeling to Plan and Evaluate the E-Supply Chain Management Platform .................................................................................................................................326
  Lijuan Huang
Strategic Interactions between Manufacturer’s Direct Selling and Retailer’s Store Brand Introduction Decisions in Dual-Channel Supply Chain ..............................................................................................331
  Jian Huang, Jian Liu, and Shihua Luo
Business Intelligence and RFID in SCM ........................................................................................................................................................................................................................................335
  Ji Hongen and Chen Yu
Analysis on the Impact of Reverse Logistics on the Dynamic Behaviors in a Two-Stage Supply Chain ..............................................................................................................................................................................................................................................................339
  Cuixia Wang and Xiong Ding
System Dynamics Model to Analysis Oscillation and Amplification in the Closed-Loop Supply Chain ........................................................................................................................................................................................................................................343
  Xiong Ding and Xiaoqing Gan
Value Creation of Supply Chain Cooperation: Theory with Evidence from Chinese Coal and Power Enterprises ..................................................................................................................................................................................................................347
  Sufang Zhang and Xiaoli Zhao
Dynamic Pricing for the Perishable Inventory Management Using RFID Technology ........................................................................................................................................................................................................................................351
  Weiming Yi and Anping Zuo
Rational Expectations Equilibrium Analysis on Newsvendor Model with Information Transfer ........................................................................................................................................................................................................................................355
  Bin Du
Robust Operation Strategy Design for an Electronic Market Enabled Supply Chain with Uncertain Variable Costs ........................................................................................................................................................................................................................................359
  Jiawang Xu, Yunlong Zhu, Bo Jiang, and Zuopeng Wang

**Session 6: Mobile Commerce and Network Technology in e-Commerce**

ZX: A Novel Service Selection Solution Based on Selector-Side QoS Measuring ........................................................................................................................................................................................................................................365
  Zhang Li, Xie Anming, and Chen Zhong
Verification of Data-Intensive Web Applications ........................................................................................................................................................................................................................................370
  Ju Gao, Hongwei Zeng, and Zhenhua Feng
On Evolving Network Model and Topological Properties of Instant Messaging Systems
Yuanping Zhao, Qiang Yan, and Huaying Shu

Towards a Type Theory of WS-CDL Based on Process Algebra
Huaikou Miao and Shenghong Li

Personalized Tourism Information System in Mobile Commerce
Zheng Wan

A Forecast Method of Mobile Business Prospect Based on Bass Model
Huan-huai Zhou and Qi Ruan

Modeling of Input-Output Analysis on Mobile Service
Xiaohong Zhao and Bingyong Tang

A Payment Model of Mobile Phone Based on Third-Party Security
Yong Xu, Xueyan Liu, and Ruifying Yao

The Architecture of Mobile Knowledge Service Based on Document Knowledge Base & Its Application
Kaiji Liao and Qihui Liu

A Transaction Management Mechanism for Building Trust in Mobile Commerce
Runbo Hu, Deli Yang, and Ruihua Qi

Design and Implementation of a Novel Mobile Application for SMS on Demand
Bo Yang

Negotiation Mechanism Based on Agent Type and Equal Utility Space
Wuling Ren and Xinran Han

A Novel Double Auction Mechanism Based Resource Allocation in the Grid
Yajuan Wang and Xianjia Wang

Research and Application of an Integration Platform for E-Commerce System Based on SOA
Huadong Wang and Qiang Hu

An Approach to Testing Web Applications On-The-Fly
Liping Li, Zhongsheng Qian, and Tao He

Session 7: Security of e-Commerce and e-Government

Security Analysis of Two Remote User Authentication Schemes Using Bilinear Pairings
Zuowen Tan

Two-Party Authenticated Key Agreement Protocol from Certificateless Public Key Encryption Scheme
Mengbo Hou and Qiuliang Xu

Dynamic Network Forensic Based Plug-In Architecture
Wenqi Wang and Yong Li
A Penetration Testing Method for E-Commerce Authentication System

Wei Pan and Weihua Li

A Novel Intrusion Detection System for E-Commerce System

Li Wenbin, Li Zhonghua, Shi Haobin, and Li Weihua

ROI-Based Fingerprint Quality Estimation

Shan Juan Xie, Ju Cheng Yang, Sook Yoon, and Dong Sun Park

Formal Analysis and Improvement of iKP Protocol

Hong Wang, Liwei Dong, Ying Huang, and Bo Chen

The Method of Classified Danger Sensed for Windows Process Intrusion Detection

Fei Xu, Chengyu Tan, Yi Zheng, and Ming Geng

Unknown Malware Detection Based on the Full Virtualization and SVM

Hengli Zhao, Ning Zheng, Jian Li, Jingjing Yao, and Qiang Hou

An Improved Minimalist Cryptography

Lifen Jiang and Zhanglin Li

Analysis of Trust Negotiation Algorithm of Trust-X and its Improvement

Yuansheng Zhong, Xiaohua Liu, and Pucong Li

Social Networking and Personal Data Security: A Study of Attitudes and Public Awareness in Ireland

Michael Lang, Jonathan Devitt, Seán Kelly, Andrew Kinneen, John O’Malley, and Darren Prunty

Session 8: Multimedia and Diverse Applications in e-Commerce

A Watermarking-Based Host Correlation Detection Scheme

Zheng Pan, Hong Peng, Xianzhong Long, Changle Zhang, and Ying Wu

A Semi-fragile Image Watermarking Resisting to JPEG Compression

Xiangqing Wang, Jun Wang, and Hong Peng

A Mixed Semantics Model for Schedulability Analysis of Time Petri Nets

Li Pan and Weidong Zhao

A New Watermarking Image Optimization Method Based on Cort and DCT

Chen Qiansheng

Influence of Interactive Television on Electronic Commerce

Lin Xiang and Qiang Wang

Authentication Scheme and Simplified CAS in Mobile Multimedia Broadcast

Cheng Yang, Jianbo Liu, Jiayin Tian, and Yichun Zhang

The Reconfiguration of Tourism Value Chain Based on E-Commerce

Liang Zhao, Guanghong Cao, and Mengwei Liu

Pricing Credit Default Swaps Under Fractal Structural Model

Tianyun Ma
Dynamic Analysis Method of Economics for Optimal Land Requisition Path for the Government ................................................................. 530
  Jianhua Li, Dasen Yang, and Xinyu Hao

Idea and Implementation: Interpersonal Influence Relieved University Teaching Evaluation ................................................................. 534
  Zhonghua Zheng and Zhanjun Wang

Changing Teachers’ Role to Facilitate Learner Autonomy of College English Majors in E-education ................................................................. 540
  Zhang Wei

Random Ekeland Variational Principle and the Applications in Random Optimal Problems ................................................................. 547
  Li Zhi-Long

Reverse Technology Spillover from Outward FDI: The Case of China ................................................................. 550
  Shuxian Huang and Qian Wang

Financial Support and Electronic Communications Industry: An Analysis Based on Chinese Provincial Panel Data ................................................................. 554
  Ye Xu and Chengwu Kuang

Hotspot for Study in UML of China: Co-word Analysis ................................................................. 558
  Ran Yin, Tong Yi, Yuqin Mo, Zhiqiang Chen, Yaqiong Liu, Jie Fang, and Kaisen Yang

Author Index
