Fabrication Technologies for Thin Cementitious Products

ACI Special Publications Series SP-260

Fajardo, Puerto Rico
9 October 2007

ISBN: 978-1-61567-524-1
TABLE OF CONTENTS

Importance of Processing in Advanced Cement-based Products ................................................................. 1
  K.G. Kuder, S.P. Shah
Development of Thermal Insulation and Storage Materials Using Extrusion Technique .............................. 17
  X. Li, Z. Li
Nailable Extruded HPFRCC for Use in Residential Building Applications ..................................................... 29
  K.G. Kuder, S.P. Shah
The Use of a Continuous Mixer and a Fast-setting Cement to Produce GFRC Architectural Products .................. 45
  H. Ball Jr.
Glass Fiber-reinforced Concrete (GFRC) manufacturing Processes and Their Development ...................... 55
  J. Jones
Behavior of the MR Sandwich Panel in Flexure ................................................................................................ 73
  F.H. Fouad, J. Farrell, M. Heath, A. Shalaby, A. Vichare
Analysis of a Novel Thin-walled Concrete Pole Centrifugally Cast Into a Fiberglass Tube ......................... 89
  A. Fam, Y. Qasrawi
Production Methods for Textile-reinforced Concrete ...................................................................................... 105
  R. Mott, W. Brameshuber, I. Hartung, K. Dilger
Carbonation Curing of Cement Bonded Fiberboard Made by Slurry-dewatering Process ............................ 125
  Y. Shao, S. Wang
