## Replication

Relaxed Atomic Broadcast: State-Machine Replication Using Bounded Memory ................................................................. 3  
*Omid Shahmirzadi, Sergio Mena, and Andre Schiper*

When and How to Change Quorums on Wide Area Networks .............................................................................................. 12  
*M. G. Merideth, F. Oprea, and M. K. Reiter*

Multithreading-Enabled Active Replication for Event Stream Processing .................................................................................... 22  
*Andrey Brito, Christof Fetzer, and Pascal Felber*

Performance Evaluation of a Metaprotocol for Database Replication ............................................................................................. 32  
*María Idoia Ruiz-Fuertes and Francesc Daniel Muñoz-Escoi*

## Distributed Services

Reliable and Highly Available Distributed Publish/Subscribe Service ................................................................................................. 41  
*Reza Sherafat Kazemzadeh and Hans-Arno Jacobsen*

Resource-Aware Migratory Services in Wide-Area Shared Computing ............................................................................................... 51  
*Anand Tripathi, Vinit Padhye, and Devdatta Kulkarni*

Model-Based Validation for Internet Services ........................................................................................................................................ 61  
*Andrew Tjang, Fabio Oliveira, Ricardo Bianchini, Richard P. Martin, and Thu D. Nguyen*
Security

The Effects of Threading, Infection Time, and Multiple-Attacker Collaboration on Malware Propagation ..............................................................73
    Yu Zhang, Bharat Bhargava, and Philipp Hurni

Designing System-Level Defenses against Cellphone Malware ..........................................................83
    Liang Xie, Xinwen Zhang, Ashwin Chaugule, Trent Jaeger, and Sencun Zhu

PolyVaccine: Protecting Web Servers against Zero-Day, Polymorphic and Metamorphic Exploits .................................................................91
    Luis Campo-Giralte, Ricardo Jimenez-Peris, and Marta Patiño-Martinez

Fault Localization for Firewall Policies .........................................................................................100
    JeeHyun Hwang, Tao Xie, Fei Chen, and Alex X. Liu

DToken: A Lightweight and Traceable Delegation Architecture for Distributed Systems ..........................................................107
    Erica Yunwen Yang and Brian Matthews

Fault Tolerance

Constraint Based Automated Synthesis of Nonmasking and Stabilizing Fault-Tolerance ..........................................................119
    Fuad Abujarad and Sandeep Kulkarni

Communication-Based Prevention of Non-P-Pattern ........................................................................129
    Yi-Wei Ci, Zhan Zhang, De-Cheng Zuo, Zhi-Bo Wu, and Xiao-Zong Yang

Spin One’s Wheels? Byzantine Fault Tolerance with a Spinning Primary ........................................135
    Giuliana Santos Veronese, Miguel Correia, Alysson Neves Bessani, and Lau Cheuk Lung

Distributed Algorithms

A Self-Stabilizing O(n)-Round k-Clustering Algorithm ....................................................................147
    Ajoy K Datta, Stéphane Devismes, and Lawrence L. Larmore

A Partition-Tolerant Manycast Algorithm for Disaster Area Networks ............................................156
    Mikael Asplund and Simin Nadji-Tehrani

Genuine versus Non-Genuine Atomic Multicast Protocols for Wide Area Networks: An Empirical Study ..............................................................166
    Nicolas Schiper, Pierre Sutra, and Fernando Pedone

Wireless Sensor Networks

A Holistic Solution to Pursuer-Evader Tracking in Sensor Networks ................................................179
    Xuming Lu, Murat Demirbas, and Chunming Qiao

PEQ: A Privacy-Preserving Scheme for Exact Query Evaluation in Distributed Sensor Data Networks ......................................................................189
    Hai Vu, Thuc Nguyen, Neeraj Mittal, and S. Venkatesan

On Consistent Neighborhood Views in Wireless Sensor Networks ...................................................199
    Arshad Jhumka and Luca Mottola
TASK: Template-Based Key Assignment for Confidential Communication in Wireless Networks  ................................................................. 209
Ramon Novales and Neeraj Mittal

ZoneTrust: Fast Zone-Based Node Compromise Detection and Revocation in Sensor Networks Using Sequential Analysis ............................................................... 217
Jun-Won Ho, Matthew Wright, and Sajal K. Das

Network Protocols

The Blocking Option in Routing Protocols ................................................................................................................ 227
Yan Li and Mohamed G. Gouda

X-BOT: A Protocol for Resilient Optimization of Unstructured Overlays ............................................................................. 236
João Carlos Antunes Leitão, João Pedro da Silva Ferreira Moura Marques, Jose Orlando Roque Nascimento Pereira, and Luís Eduardo Teixeira Rodrigues

A Framework for Distributed Monitoring and Root Cause Analysis for Large IP Networks .............................................................. 246
Dipyaman Banerjee, Venkateswara Madduri, and Mudhakar Srivatsa

Database and Storage

On the Cost of Database Clusters Reconfiguration .................................................................................................... 259
Ricardo Manuel Pereira Vilaça, José Orlando Pereira, Rui Carlos Oliveira, José Enrique Armendáriz-Iñigo, and José Ramón González de Mendivil

Location-Aware Cache-Coherence Protocols for Distributed Transactional Contention Management in Metric-Space Networks ................................................................................. 268
Bo Zhang and Binoy Ravindran

Co-scheduling of Disk Head Time in Cluster-Based Storage ......................................................................................................................... 278
Matthew Wachs and Gregory R. Ganger

Assessment and Improvement of Hang Detection in the Linux Operating System ........................................................................................................ 288
Domenico Cotroneo, Roberto Natella, and Stefano Russo
