SPE Eastern Regional Meeting 2009

Charleston, West Virginia, USA 23-25 September 2009

# TABLE OF CONTENTS

SPE 120591 Horizontal Well Production Logging Deployment and Measurement Techniques for US Land Shale Hydrocarbon Plays ................................................................. 1

Duncan Heddleston

SPE 124310 A Practical Methodology for Evaluating Appalachian Basin Waterfloods ................................................................. 10

David C. Freeman

SPE 124495 100% Gelled LPG Fracturing Process: An Alternative to Conventional Water-Based Fracturing Techniques ................................................................. 29

Eric H. Tudor, Grant W. Nevison, Sean Allen, Blaine Pike

SPE 124767 Multi-Stage Fracturing of Horizontal Wells Using Ninety-Five Quality Foam Provides Improved Shale Gas Production ................................................................. 44

Harold D. Brannon, Daniel E. Kendrick, Eric Luckey, Abby Stipetich

SPE 125286 Siting and Permitting of Class II Brine Disposal Wells Associated with Development of the Marcellus Shale ................................................................. 54

J. Daniel Arthur, Stephen L. Dunell, David B. Cornue

SPE 125365 Continuous Multistage Fracture-Stimulation Completion Process in a Cemented Wellbore ................................................................. 64

Nell Segent, Matt Howell

SPE 125419 Successful Strategies for Dewatering Wells Using ESP’s ................................................................. 76

Lonnie Bassett

SPE 125420 Patented Foamed Chemical Technology Frees Stuck Tubing in Coalbed Methane (CBM) Wells ................................................................. 81

Greg Darby, J. Mike Brown

SPE 125447 Novel Activation Fluid System ................................................................. 90

Richard Rickman, Dave Allison, Mike McCabe, Jon Janson

SPE 125458 Case History: Recompletions in a Virginia Coalbed-Methane Field Yield Additional Gas ................................................................. 100

G.D. Rodvelt, W.L. Moyer, P.R. Malamisura, C.W. Hagy, S. Greer

Larry K. Britt, Jerry Schoeffler

SPE 125526 Horizontal Well Completion, Stimulation Optimization, and Risk Mitigation ................................................................. 127

Larry K. Britt, Michael B. Smith

SPE 125530 Reservoir Modeling in Shale-Gas Reservoirs ................................................................. 144

C.L. Cipolla, E.P. Lolon, J.C. Erdle, B. Rubin

SPE 125642 Optimizing Openhole Completion Techniques for Horizontal Foam-Drilled Wells ................................................................. 163

Dave Allison, Don Folds, David Harless, Matt Howell, Greg Vargus, Abby Stipetich

SPE 125665 UV Light Reduces the Amount of Biocide Required to Disinfect Water for Fracturing Fluids ................................................................. 180

Lindsey Gloe, Greg Neal

SPE 125732 What Can Injection Falloff Tell About Job Placement and Production in Tight-Gas Sand ................................................................. 188

Bill Grieser, Bob Shelley

SPE 125734 Plugging and Abandoning Multilateral Horizontal CBM Wells For Safe Mine Through Operations ................................................................. 197

Thomas E. Suly

SPE 125735 Spurring the Devonian: Methods of Fracturing the Lower Huron in Southern West Virginia and Eastern Kentucky ................................................................. 206

T.M. Rowan

SPE 125737 Optimal Use of Vogel’s Dimensionless IPR Curve to Predict Current and Future Inflow Performance of Oil Wells ................................................................. 212

Robert W. Chase, Carter A. Shaver

SPE 125740 Marcellus Shale Post-Frac Flowback Waters – Where is All the Salt Coming From and What are the Implications? ................................................................. 221

M.E. Blauch, R.R. Myers, T.R. Moore; B.A. Lipinski, N.A. Houston

SPE 125745 A Novel Foaming Agent for Hydraulic Fracturing: Laboratory Investigation and Field Usage ................................................................. 241

Lijian Lin, Samuel C. Danican, Fred A. Mueller
SPE 125752 A Comparative Assessment of 3\frac{3}{8}-in. Perforators Using ‘Reactive’ and ‘Non-reactive’ Shaped Charges .......................................................... 250
Dennis Haggerty, Doug Manning, David Leidel, James Barker, Andrew Pettitt

SPE 125754 Viscoelastic Surfactant-Based Systems in the Niagaran Formation .......................................................... 260
Kristopher A. Kreh

SPE 125769 Boundary Element Analysis of the Stress Distribution around Multiple Fractures: Implications for the Spacing of Perforation Clusters of Hydraulically Fractured Horizontal Wells .......................................................... 267
Y. Cheng

SPE 125859 Top-Down Intelligent Reservoir Modeling of New Albany Shale .......................................................... 282
A. Kalantari Dahaghi, S.D. Mohaghegh

SPE 125866 Reliable Method of Achieving Annular Isolation for a Multi-Stage Fracture Treatment in an Air Drilled Hole .......................................................... 294
Russell Hamilton, Shannon Williams, James Martin, Chad Stahlhake, Tim Davis

SPE 125867 Field Test of Wettability Alteration to Increase the Flow Rate from Aquifer Gas Storage Wells .......................................................... 301
William W. Weiss, Xinna Xie, Jason W. Weiss

SPE 125893 Economic Impact of Reservoir Properties, Horizontal Well Length and Orientation on Production from Shale Formations: Application to New Albany Shale .......................................................... 312
A. Kalantari Dahaghi, S. D. Mohaghegh

SPE 125903 Horizontal Wells with Multistage Fracs Prove to be Best Economic Completion for Many Low-Permeability Reservoirs .......................................................... 325
B.W. McDaniel, Keith Rispler

SPE 125929 Production Data Analysis of Fractured and Horizontal CBM Wells .......................................................... 340
C.R. Clarkson, C.L. Jordan, D. Ilk, T.A. Blasingame

SPE 125944 Hydrajetting Applications in Horizontal Completions to Improve Hydraulic Fracturing Stimulation and Improve ROI .......................................................... 370
B.W. McDaniel, Jim B. Surjaatmadja

SPE 125953 Production Forecast for Fractured Well in Tight Gas Reservoir, Accounting for 3D Fracture Geometry and Variable Fracture Conductivity .......................................................... 381
X. Jin, Y. Wei

SPE 125959 Reservoir Simulation and Uncertainty Analysis of Enhanced CBM Production Using Artificial Neural Networks .......................................................... 393
J. Jalali, S.D. Mohaghegh

SPE 125970 Montney Unconventional Gas - Next Generation, An Integrated Approach to Optimizing Wellbore Completions Technology .......................................................... 402
Rodney Schnell, Nicole Tapper, Ryan Genyk, Dalis Deliu, Habib Tavakol

SPE 125973 The Impact of Stimulation Treatment on EUR of Upper Devonian Formations in the Appalachian Basin .......................................................... 414
R. Krcek, K. Aminian, S. Ameri

SPE 125975 The Role of Economics on Well and Fracture Design Completions of Marcellus Shale Wells .......................................................... 423
R. Schweitzer, H.I. Bilgesu

SPE 125979 Using Microseismic Monitoring to Better Understand Completion of the Medina - Whirlpool Formations: a NYSERDA - Sponsored Project .......................................................... 429
Kirby Walker, John Sink, Joel Le Calvez, Joe Frantz, John Martin

SPE 125985 Horizontal Marcellus Well Cementing in Appalachia .......................................................... 446
John C. Gottschling

SPE 125987 Fracture-Stimulation in the Marcellus Shale—Lessons Learned in Fluid Selection and Execution .......................................................... 454
Nathan Houston, Matt Blauch, Dalton Weaver, David S. Miller, Dave O’Hara
