Table of Contents

Conference Information

Invited Papers

Biologically-Inspired Massively-Parallel Architectures - Computing Beyond a Million Processors

Stephen Furber and Andrew Brown

Formal Verification of Lock-Free Algorithms

Gerhard Schellhorn and Simon Bäumler

Examining Important Corner Cases: Verification of Interacting Architectural Components in System Designs

Yosinori Watanabe

Regular Papers

Teak: A Token-Flow Implementation for the Balsa Language

Andrew Bardsley, Luis Tarazona, and Doug Edwards

Desynchronizing Synchronous Programs by Modes

Jens Brandt, Mike Gemünde, and Klaus Schneider

From Concurrent Multi-clock Programs to Deterministic Asynchronous Implementations

Dumitru Potop-Butucaru, Robert de Simone, Yves Sorel, and Jean-Pierre Talpin

Scheduling Synchronous Elastic Designs

Josep Carmona, Jorge Júlvez, Jordi Cortadella, and Michael Kishinevsky

Saving Space in a Time Efficient Simulation Algorithm

Silvia Crafa, Francesco Ranzato, and Francesco Tapparo

Checking pi-Calculus Structural Congruence is Graph Isomorphism Complete

Victor Khomenko and Roland Meyer
Petrifying Operating Guidelines for Services .................................................................80
   Niels Lohmann and Karsten Wolf
Variants of the Language Based Synthesis Problem for Petri Nets ..........................89
   Sebastian Mauser and Robert Lorenz
Flat Arbiters ..................................................................................................................99
   Andrey Mokhov, Victor Khomenko, and Alex Yakovlev
Trading Off Concurrency to Generate Behavioral Adapters .....................................109
   Arjan J. Mooij and Marc Voorhoeve
Why Are Modalities Good for Interface Theories? ....................................................119
   Jean-Baptiste Raclet, Eric Badouel, Albert Benveniste, Benoît Caillaud,
   and Roberto Passerone
Model Checking Verilog Descriptions of Cell Libraries .............................................128
   Matthias Raffelsieper, Jan-Willem Roorda, and MohammadReza Mousavi
Time Arc Petri Nets and Their Analysis .....................................................................138
   Hind Rakkay, Hanifa Boucheneb, and Olivier H. Roux
Specification Enforcing Refinement for Convertibility Verification .......................148
   Partha Roop, Alain Girault, Roopak Sinha, and Gregor Goessler
Parameterised Process Algebraic Verification by Precongruence Reduction .............158
   Antti Siirtola and Juha Kortelainen
Verifying Deadlock- and Livelock Freedom in an SOA Scenario ...............................168
   Karsten Wolf, Christian Stahl, Janine Ott, and Robert Danitz

Tool Papers

Genet: A Tool for the Synthesis and Mining of Petri Nets .........................................181
   Josep Carmona, Jordi Cortadella, and Michael Kishinevsky
DESIJ – Enabling Decomposition-Based Synthesis of Complex Asynchronous
Controllers ....................................................................................................................186
   Mark Schaefer, Dominic Wist, and Ralf Wollowski
