# TABLE OF CONTENTS

- My Robotic Doppelgänger: A Critical Look at the Uncanny Valley
  
  Christoph Bartneck, Takayuki Kanda, Hiroshi Ishiguro, Norihiro Hagita ................................................................. 1

- Can an Android Persuade You?
  
  Kohei Ogawa, Christoph Bartneck, Daishu Sakamoto, Takayuki Kanda, Tetsuo Ono, Hiroshi Ishiguro ......................... 9

- Real-Time Face Detection for Human Robot Interaction
  
  Yaozhang Pan, Shuzi Sam Ge, Hongsheng He, Lei Chen ................................................................. 15

- Investigating the Contributing Factors to Make Users React Toward an On-Screen Agent As If They
  Are Reacting Toward a Robotic Agent
  
  Takamori Komatsu, Naomi Kuki ................................................................. 21

- Behavior Labeling Algorithms from Accumulated Sensor Data Matched to Usage of Livelihood
  
  Support Application ........................................................................................................................................... 27
  
  Kana Oshima, Ryo Urushibata, Akinori Fujii, Hiroshi Noguchi, Masamichi Shimosaka, Tomomasa Sato, Taketoshi Mori

- Gait Pattern Generation for a Power-Assist Device of Paraplegic Gait
  
  Takahiro Kagawa, Yoji Uno ........................................................................................................................................ 34

- Discrimination of Emotion from Power and Addition of Emotion in Movement to Improve
  Human-Coeexistence Robot's Personal Affinity .................................................................................................................. 40
  
  Takafumi Matsumaru

- Handover Movement Informing Receiver of Weight Load as Informative Motion Study for Human-Friendly Robot
  
  ............................................................................................................................................................................. 48
  
  Takafumi Matsumaru

- Control of a Power Assist Robot for Lifting Objects Based on Human Operator's Perception of
  Object Weight ..................................................................................................................................................... 55
  
  S. M. Mizanoor Rahman, Ryosin Ikura, Masaya Nobe, Hideki Sawai

- Modeling and Identification of 2 DOF Low Cost Driving Simulator: Experimental Results
  
  Hiroshi Ariou, Salim Hima, Lamri Nehaoua .................................................................................................................. 62

- Optimal Arrangement of Ceiling Cameras for Home Service Robots Using Genetic Algorithms
  
  Hichem Ariou, Hatice Kose-Bagci, Joe Saunders, Kerstin Dautenhahn .............................................................................. 68

- An Experimental Investigation of Interference Effects in Human-Humanoid Interaction Games
  
  Qiming Shen, Hatice Kose-Bagci, Joe Saunders, Kerstin Dautenhahn ............................................................................. 76

- Visible Classification of Task-Switching Strategies in Vehicle Operation
  
  Satoshi Suzuki, Fumio Harashima ............................................................................................................................... 84

- Effects of Visual Appearance on the Attribution of Applications in Social Robotics
  
  Frank Hegel, Manja Lohse, Britta Wrede ..................................................................................................................... 90

- Eternal Sharpener - A Rotational Haptic Display That Records and Replays the Sensation of
  Sharpening a Pencil ................................................................................................................................................. 98
  
  Yuichiro Kojima, Yuki Hashimoto, Hiyoyuki Kajimoto

- Teaching a Humanoid Robot: Headset-Free Speech Interaction for Audio-Visual Association
  
  Learning ...................................................................................................................................................................... 102
  
  Martin Heckmann, Holger Brandl, Jens Schmuedderich, Xavier Domin, Bram Bolder, Inna Mikhailova, Herbert Janssen, Michael Gienger, Achim Bendig, Tobias Rodemann, Mark Dunn, Frank Joublin, Christian Goericke

- Development of Power-Assist Robot Arm Using Pneumatic Rubber Muscles with a Balloon Sensor
  
  Kazuo Kadota, Masao Akai, Kenji Kawashima, Toshiharu Kagawa ................................................................................. 108

- Evaluation of Impression for Virtual and Real Robots
  
  Kenichi Ohara, Shunsuke Negi, Tomohito Takabo, Yuasushi Maa, Tatsuo Arai .......................................................... 114

- Resolving Ambiguities in a Grounded Human-Robot Interaction
  
  Haris Dinde, Daniele Zambuto ........................................................................................................................................ 120

- Teaching Sequences to a Social Robot by Voice Interaction
  
  Javi F. Gorostiza, Miguel A. Salichs ............................................................................................................................ 127

- User-Adaptive Interface Based on Symbol Matching for In-Vehicle Information Systems
  
  Sang-Ho Kim, Kosuke Sekiyama, Toshio Fukada ............................................................................................................. 133

- Development of Wearable Master-Slave Training Device Constructed with Pneumatic Rubber
  Muscles ......................................................................................................................................................................... 139
  
  Daisuke Sasaki, Toshiro Noritsugu

- Elevator Available Voice Activated Wheelchair
  
  Akira Murai, Masaharu Mizuguchi, Takeshi Saitoh, Tomoyuki Osaki, Ryosuke Konishi ......................................................... 145
