Rasit Eskicioglu

# Table of Contents

**Preface**

**Symposium Organizers**

**Program Committee**

**Part I: Algorithms**

*Queuing Algorithm for Speculative Network Processors*
*J. Foag and T. Wild* ................................................................. 3

*Solving the Quadratic Assignment and Dynamic Plant Layout Problems Using a New Hybrid Meta-Heuristic Approach*
*J. M. Rodriguez, F. C. MacPhee, D. J. Bonham, and V. C. Bhavsar* ................................................................. 9

*A Second Order $L_0$ Stable Algorithm for Evaluating European Options*
*R. K. Thulasiram, C. Zhen, and A. B. Gumel* ................................................................. 17

**Part II: Applications**

*A Parallel Quasi-Monte Carlo Approach to Pricing American Options*
*J. W. L. Wan, K. Lai, A. W. Kolkiewicz, and K. S. Tan* ................................................................. 27

*A New Fast Parallel Statistical Measurement Technique for Computational Cosmology*
*R. J. Thacker and H. M. P. Couchman* ................................................................. 37

*On the Performance of Parallel Implementations of an ADI Scheme for Parabolic Equations with Mixed Derivatives Using Multithreads and MPI*
*G. Baolai* ................................................................. 45

*MPI Scalability of a Large Memory LES Code*
*M. Uddin and A. Pollard* ................................................................. 55

*Numerical Mixing and and Entropy Transport for Compressible CFD Applications*
*J. Wadsley, G. Veerevaldi, and H. Couchman* ................................................................. 63

*Efficient Parallel Mining of Constrained Frequent Patterns*
*C. K. Leung* ................................................................. 73

**Part III: Experiences**

*The ATHA Environment: Experience with a User Friendly Environment for Opportunistic Computing*
*M. A. R. Dantas and A. Hosken* ................................................................. 85
An Enhanced C/C++ and FORTRAN API to Posix Threads
G. Baolai .......................................................... 89

Part IV: The Grid

Communication Issues within HPC Grids
R. D. Mcleod, S. Huang, M. Laskowski, and S. Hussain ........................................... 101

The Trellis Security Infrastructure: A Layered Approach to Overlay Metacomputers
M. Kan, D. Ngo, M. Lee, P. Lu, N. Bard, M. Closson, M. Ding, M. Goldberg,
N. Lamb, Y. Wang, R. Senda, and E. Sumbar .................................................. 109

Part V: Modeling, Simulation, and Performance

Interfacing Gradient-Based Optimization Methods with Simulation Programs:
A Novel Tool for the Design of High Performance Systems
S. Filizadeh and A. M. Gole .......................................................... 121

Performance Evaluation for Neutron Transport Application Using Message Passing
M. Dahmani, B. Morin, and R. Ray .......................................................... 129

Optical Bus Communication Modeling and Simulation
B. J. d’Auriol and M. Beltran .......................................................... 135

Part VI: Systems

Performance Evaluation of the Sun Fire Link SMP Clusters
Y. Qian, A. Afsahi, N. R. Fredrickson, and R. Zamani ........................................... 145

A Study of Separate Array and Scalar Caches
A. Naz, K. Kavi, P. Sweany, and M. Rezaei .................................................. 157

Adaptive Time/Space Sharing with SCOJO
A. C. Sodan and X. Huang .......................................................... 165

Short Papers

An Experimental Case Study of Replication on Reconciliation in a Wireless Environment
M. A. R. Dantas and D. P. Cunha ........................................... 179

Efficient Top-down Algorithms for Tree Inclusion
Y. Chen and Y. Chen .......................................................... 183

Static Assignment Schemes for the Concurrent Computation of Algebraic Fractals
F. C. MacPhee and V. C. Bhavsar ........................................... 189
Survey of Zero-Copy Optimization in User-Level Communication and Adaptive Knowledge-Based Solution
Y. Zhou and A. C. Sodan ................................................................. 193

GAMine—Generalized Intelligent Middleware for Data Access in Parallel Scientific Datamining
A. C. Sodan and G. Hu ................................................................. 199

An OpenMP Implementation of FTCS Method for Reduced Black-Sholes Equation
A. Chhabra, P. Thulasiraman, M. T. Islam, and R. K. Thulasiram ................................................................. 205

Preliminary Performance Assessment of Four Cluster Interconnects on Identical Hardware
H. Pourreza, M. R. Eskicioğlu, and P. C. J. Graham ................................................................. 209

Design of a User Level Data Staging System for use in High Performance Computing Systems
V. K. Narayanasami and P. C. J. Graham ................................................................. 213
