## Table of Contents

Preface

**Chapter 1**  
Max Bredig Award

Tentative Determination of the Acidity Level in Room Temperature Ionic Liquids by Electrochemical Methods  
*C. Malherbe, T. Robert, L. Magna, H. Olivier-Bourbigou and B. Gilbert*  

**Chapter 2**  
Synthesis, Structure, and Properties of Molten Salts and Ionic Liquids

From Molecules to Ions - Where do Modern Ionic Liquids Belong?  
*G. Driver and K. Johnson*  

How Polar are Ionic Liquids?  
*J. P. Hallett and T. Welton*  

Influence of Anion Structure on Transport Properties of Perfluorosulfonylamide Ionic Liquids  
*T. Umecky, Y. Saito, S. Tsuzuki and H. Matsumoto*  

An XAFS Study of Niobium Chloride in the Ionic Liquid 1-Ethyl-3-Methyl Imidazolium Chloride/Aluminum Chloride  
*D. Roeper, K. Pandya, G. T. Cheek and W. O'Grady*  

Surface Structure of 1-Hexyl-3-methyl-imidazolium Bis(trifluoromethanesulfonyl)- imide Observed by High-resolution Rutherford Backscattering Spectroscopy  
*A. Ohno, K. Nakajima, M. Suzuki and K. Kimura*  

Liquid Ordering Structure in Binary Room Temperature Ionic Liquids Based on Aliphatic Quaternary Ammonium Ions  
*M. Mizuhata, T. Minowa, M. Maekawa and S. Deki*
Chapter 3
Applications of Molten Salts and Ionic Liquids

In Search of an "Ionic Liquid Effect"
J. P. Hallett, C. L. Liotta, G. Ranieri and T. Welton

Wind to Ammonia: Electrochemical Processes in Room Temperature Ionic Liquids
T. M. Pappenfus, K. Lee, L. M. Thoma and C. R. Dukart

Waste Water Remediation Using Electrochemically Cycled Extractants in Room Temperature Ionic Liquids
M. Carter, R. Bley, J. Clark and C. Marotta

Esterification in Ionic Liquids: The Influence of Solvent Basicity
T. P. Wells, J. P. Hallett, C. Williams and T. Welton

Exploring the Influence of Ionic Liquid Ion Structure on Cellulose Solvation
K. Brown, X. Geng, W. McDanel and W. Henderson

The Structure and Dynamics of Silk and Cellulose Dissolved in Ionic Liquids
P. C. Trulove, W. M. Reichert, H. C. De Long, S. Kline, S. Rahatekar, J. Gilman and M. Muthukumar

Processing of Natural Fibers Nanocomposites Using Ionic Liquids
S. Rahatekar, A. Rasheed, R. Jain, M. Zammaranoa, K. K. Koziol, A. H. Windle, S. Kumar and J. Gilman

Ionic Liquids in the Preparation of Biopolymer Composite Materials

Nonaqueous Solvatochromatic Behavior of Nile Blue A Perchlorate in Imidazolium-Exchanged Clays and its Implication Toward Exfoliation in Polymeric Composites
D. M. Fox, P. C. Trulove, H. C. De Long, J. Gilman and P. H. Maupin

The Mechanism of Absorption of CO2 in Ionic Liquids: a Computational and Raman Spectroscopy Study
W. M. Reichert, W. Eucker, P. C. Trulove, J. J. Urban and H. C. De Long
Variable Emittance Electrochemical Devices for Spacecraft Application based on Ionic Liquids Coupled with Conducting Polymers

P. Chandrasekhar, B. Zay, S. Barbolt, R. Werner, G. Birur and A. Paris

Ionic Liquid Polyoxometalates as Light Emitting Materials

D. Ortiz-Acosta, G. Purdy, B. Scott, B. Bennett, R. Muenchausen, E. McKigney, R. Gilbertson and R. E. Del Sesto

Investigation of the PEO-[C2mim]CF3SO3-LiCF3SO3 Ternary System

C. M. Burba

Low Temperature Operation of the Cell Naβ″-Alumina/S(IV) in AlCl3-NaCl Melt

T. J. Dunstan and J. Caja

Chapter 4

High Temperature Molten Salts

Solid State Electro-Reduction in Liquid Salts

G. Chen

Optimization of the FFC Cambridge Process for NiTi Production

B. K. Jackson, M. Jackson, D. Dye, D. Inman and R. Dashwood

Influence of Bath Composition on Ti Electrolysis in CaF2-CaO-TiO2 Melt

T. Takenaka, M. Sugawara, H. Matsuo, A. Matsuyama and M. Kawakami

Titanium Production from Oxycarbide Anodes

O. S. Kjos, G. Haarberg and A. Martinez

Electrolytic Reduction of Solid SiO2 in Molten CaCl2 for the Production of Solar-grade Silicon

T. Nohira, N. Kani, T. Tsuda and R. Hagiwara

Production of Tantalum Fine Powder by Reduction of Tantalum Chloride with Zinc

Y. Hoshino, O. Takeda, M. Hoshi and Y. Sato

Direct Reduction of Liquid V2O5 in Molten CaCl2

Y. Oka and R. O. Suzuki

Calciothermic Reduction of TiCl4 Gas during the Electrolysis of CaCl2 Melt

R. O. Suzuki and T. Naito
The Role of Chromium in the Hot Corrosion of Metals
   R. A. Rapp and N. Otsuka
   271
A Comparison of the Behavior in Molten Sulfate of Oxidized and Carburized Type 304 Austenitic Steel over 2000 Hours and the Quantitative Analysis of Corrosion Products in the Melt by a Novel Treatment of Their Absorption Spectra
   T. R. Griffiths and N. Phillips
   283
Solubility of Calcium in CaCl2-CaO
   S. Shaw and R. Watson
   301
Diffusion Kinetics for the Electrochemical Reduction of Fe (III) Species in Molten NaCl-FeCl3
   G. Haarberg and M. Keppert
   309
Electrical conductivity of the (KF-AlF3)-NaF-LiF Molten System with Al2O3 additions at Low Cryolite Ratio
   A. Dedyukhin, A. Apisarov, O. Tkacheva, A. A. Redkin, Y. Zaikov, A. Frolov and A. Gusev
   317
A Study of Uranium(V) Species in Alkali Chloride Melts
   V. A. Volkovich, D. Aleksandrov, B. Vasin, T. Khabibullin, I. Polovov and T. R. Griffiths
   325
Electrochemical and Spectroscopic Properties of Tellurium in Fused Alkali Chlorides
   V. A. Volkovich, G. Kabaev, I. Polovov, B. Vasin and T. R. Griffiths
   335
Levitation / CO2 Laser Melting and Glass Formation in MgO Rich Mixtures with SiO2: Raman Spectra and Structure
   A. Kalampounias, N. Nasikas and G. N. Papatheodorou
   343
Corrosion of Constructive Materials in Niobium-containing Melts
   A. Abramov, I. Polovov, V. A. Volkovich, O. Rebrin and T. R. Griffiths
   357
Inert Anodes for Oxygen Evolution in Molten Salts
   E. Kvalheim, G. Haarberg, A. Martinez and H. M. Jahren
   367
Standard Rate Constants of Charge Transfer for the Nb(V)/Nb(IV) Redox Couple in CsCl-K2NbF7 Melt
   A. Popova and S. A. Kuznetsov
   375
Chapter 5
Electrodeposition in Molten Salts and Ionic Liquids

Aluminum UPD and Alloy Formation on (111)-Textured Au in AlCl3-EMIC
G. R. Stafford and G. Haarberg
385

Potentiodynamic Polarization of Platinum and Aluminum in AlCl3-[P14,6,6,6]Cl Melts
J. Vaughan and D. Dreisinger
397

Application of the Electrochemical Quartz Crystal Microbalance for the Investigation of Metal Depositions from Ionic Liquids
A. Ispas, A. Bund and F. Endres
411

EQCM Measurement of Ag(I) / Ag Reaction in an Imide-type Room-temperature Ionic Liquid
N. Serizawa, Y. Katayama and T. Miura
421

Electrochemical Production of Sm-Co Thin Film in Molten LiCl-KCl System
O. Takeda, T. Ideno, E. Nakamura and Y. Sato
431

Influence of Some Factors upon Electrodeposition of Liquid Li and Mg
T. Takenaka, K. Shigeta, H. Masuhama and K. Kubota
441

Electrodeposition of Aluminum from Ionic Liquids
K. Yosimura, K. Miyahara and M. Matsunaga
449

Study of Processes of Pt, Pd, Rh Electrodeposition as Powders or Coatings from Low-Temperature Carbamide, Acetamide, Imidazol-Based Melts
A. V. Savchuk, N. Tumanova and S. Kochetova
453

Cu-Sn Alloy Metallization of Polymer through Reduction-Diffusion Method Using Ionic Liquid Bath at Medium-Low Temperature
A. Ito, K. Murase, T. Ichii and H. Sugimura
461

Effect of Electrolyte Composition and Anode Material on Current Efficiency for NF3 Formation in Electrolytic Synthesis using Diamond Anode
469
Distribution of Impurities during Vanadium Electrorefining and Determination of Optimal Conditions of the Process

Underpotential Deposition Modification of a Nanoporous Au Electrode Fabricated by Alloying/Dealloying in a Room Temperature Ionic Liquid

J. Huang

Chapter 6

Electrochemistry in Ionic Liquids

Electrochemical Studies of Titanium Chlorides in Ionic Liquids

G. T. Cheek, D. Canby and W. O'Grady

Molecular Electrochemistry and Redox Catalysis in Ionic Liquids

Effect of CsF-concentration on Electrolytic Conductivity, Viscosity, and Anode Reaction of Nickel Electrode in (CH3)3N-CsF-HF System at Room Temperature

A. Tasaka, K. Nakanishi, N. Masuda, T. Nakai, K. Momota and M. Inaba

Electrochemical Behavior of Copper(I) Oxide in Urea-Choline Chloride Room-Temperature Melts

T. Tsuda, L. Boyd, S. Kuwabata and C. L. Hussey

Electrochemical Studies of the Fries Rearrangement in Ionic Liquids

G. T. Cheek

Electrochemical Double-Layer Structure of Pt Electrode/Ionic Liquids Interface Studied by in situ IR-visible Sum Frequency Generation Spectroscopy

Electrical Double Layer Structure at Bi(111)/1-ethyl-3-methyl-imidazolium Tetrafluoroborate Interface

L. Siinor, K. Lust and E. Lust

Electrochemical Behavior of Vanadium Oxides in Chloride-Fluoride Melts

S. Devyatkin
Electrochemical Behavior of Ferroceny1thiol / Alkanethiol Binary SAM in Ionic Liquids

Q. Sun, K. Murase, T. Ichii and H. Sugimura

Electrochemical Behaviour of Depolarized Reducing Gas Anodes in Molten Salts

Electrode Kinetics of Ferrocenium/ferrocene in Room-temperature Ionic Liquids

N. Tachikawa, Y. Katayama and T. Miura
